INDEPENDENT AUDITOR'S REPORT

Board of Directors
First Farmers Financial Corporation
Converse, Indiana

Report on the Financial Statements

We have audited the accompanying consolidated financial statements of First Farmers Financial Corporation, which comprise the consolidated balance sheets as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for each of the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of First Farmers Financial Corporation as of December 31, 2015 and 2014, and the results of its operations and its cash flows for each of the years then ended, in accordance with accounting principles generally accepted in the United States of America.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation and Nature of Operations: The consolidated financial statements of First Farmers Financial Corporation ("Corporation") include its wholly-owned subsidiaries, First Farmers Bank & Trust ("Bank"), First Farmers Risk Management, Inc. and 46992 Holdings, LLC and the Bank's wholly-owned subsidiaries Security Capital, Inc. ("SCI"), Mark Tully Investments II, Inc. ("MTII"), Mark Tully Holdings II, Inc. ("MTHI"), and Mark Tully II, LLC ("MTL"). Security Capital Inc. originates and services leases on behalf of Midwestern financial institutions. First Farmers Risk Management, Inc. is a captive reinsurance subsidiary. MTII owns 100% of MTHI, and MTII and MTHI own 1% and 99% of MTL, which manages investment securities. All significant intercompany transactions and balances have been eliminated in consolidation.

The Corporation and Bank operate primarily in the banking industry. The Bank makes commercial, installment and mortgage loans to and receives deposits from customers through its offices located in the Indiana counties of Miami, Grant, Hamilton, Howard, Huntington, Johnson, Tipton, Madison, Cass, Carroll, Clay, Marshall, Starke, Sullivan, Vermillion, Vigo and Wabash; and Illinois counties of Coles, Edgar and Vermilion. Although the overall loan portfolio is diversified, a substantial portion of its debtors' ability to honor their contracts is dependent upon the agricultural industry. The majority of the Corporation's loans are secured by specific items of collateral including business assets, consumer assets and real property.

Subsequent Events: The Corporation has evaluated subsequent events for recognition and disclosure through March 17, 2016, which is the date the financial statements were available to be issued.

Use of Estimates: To prepare financial statements in conformity with accounting principles generally accepted in the United States of America with U.S. generally accepted accounting principles, management makes estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and the disclosures provided, and actual results could differ.

Cash Flows: Cash and cash equivalents are defined as cash and deposits with other financial institutions with maturities of less than 90 days, money market funds and federal funds sold. Net cash flows are reported for customer loan and deposit transactions, federal funds purchased and repurchase agreements.

Securities: Securities are classified as held to maturity and carried at amortized cost when management has the positive intent and ability to hold them to maturity. Securities are classified as available for sale when they might be sold before maturity. Equity securities with readily determinable fair values are classified as available for sale. Securities available for sale are carried at fair value, with unrealized holding gains and losses reported in other comprehensive income, net of tax.

Interest income includes amortization of purchase premium or discount. Premiums and discounts on securities are amortized on the level-yield method without anticipating prepayments, except for mortgage backed securities where prepayments are anticipated. Gains and losses on sales are recorded on the trade date and determined using the specific identification method.

(Continued)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Management evaluates securities for other than temporary impairment ("OTTI") on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. In estimating other-than-temporary losses, management considers: (1) the length of time and extent that fair value has been less than cost, (2) the financial condition and near term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the Corporation has the intent to sell the security or more likely than not will be required to sell the security before its anticipated recovery in fair value.

Loans Held for Sale: The Corporation sells certain mortgage and guaranteed loans on the secondary market. Loans held for sale are carried at the lower of cost or estimated fair value, in aggregate. Net unrealized losses, if any, are recorded as a valuation allowance and charged to earnings.

Mortgage loans held for sale are generally sold with servicing rights retained. The carrying value of mortgage loans sold is reduced by the amount allocated to the servicing right. Gains and losses on sales of mortgage loans are based on the difference between the selling price and the carrying value of the related loan sold.

Loans: Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off are reported at the principal balance outstanding, net of deferred loan fees and costs and an allowance for loan losses. Interest income on loans is accrued over the term of the loans based on the principal outstanding. Loan fees, net of certain direct loan origination costs, are deferred and recognized as an element of interest income over the term of the loan using the level yield method.

For all classes of loans, interest income is discontinued when full loan repayment is in doubt, typically when the loan is impaired or payments are past due over 90 days. Past due status is based on the contractual terms of the loan. Loans are placed on non-accrual or charged off at an earlier date if collection of principal and interest is considered doubtful. Nonaccrual loans and loans past due 90 days still on accrual include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans. A loan is moved to non-accrual status in accordance with the Corporation's policy, typically after 90 days of non-payment.

For all classes of loans, all interest accrued but not received for loans placed on nonaccrual is reversed against interest income. Interest received on such loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Certain Purchased Loans: The Corporation has purchased certain loans which have shown evidence of credit deterioration since origination. These purchased loans are recorded at the amount paid, such that there is no carryover of the seller's allowance for loan losses. After acquisition, losses will be recognized by an increase in the allowance for loan losses.

Such purchased loans are accounted for individually or aggregated into pools of loans based on loan type. The Corporation estimates the amount and timing of expected cash flows for each purchased loan or pool, and the expected cash flows in excess of amount paid is recorded as interest income over the remaining life of the loan or pool (accretable yield). The excess of the loan's or pool's contractual principal and interest over expected cash flows is not recorded (nonaccretable difference).

(Continued)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Over the life of the loan or pool, expected cash flows continue to be estimated. If the present value of expected cash flows is less than the carrying amount, a loss is recorded as a provision for loan losses. If the present value of expected cash flows is greater than the carrying amount, it is recognized as part of future interest income.

Allowance For Loan Losses: The allowance for loan losses is a valuation allowance for probable incurred credit losses. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Charge-offs of the commercial, agriculture, and real estate portfolio segments are recognized when the loss is confirmed and the amount of the charge-off is the difference in the recorded investment in the loan and the discounted collateral value or the discounted future cash flows, whichever is deemed to be the most likely source of repayment. Loans in the other portfolio segment are typically charged-off no later than 120 days past due. Subsequent recoveries, if any, are credited to the allowance. Management estimates the allowance balance required using past loan loss experience, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions, and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged-off.

The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired or loans otherwise classified as substandard or doubtful. The general component covers non-classified loans and is based on historical loss experience adjusted for current factors.

A loan is impaired when full payment under the loan terms is not expected. Impairment is evaluated in total for smaller balance loans of similar nature such as residential mortgage, consumer, and credit card loans, and on an individual loan basis for other loans. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral.

Troubled debt restructurings are separately identified for impairment disclosures and are measured at the present value of estimated future cash flows using the loan's effective rate at inception. If a troubled debt restructuring is considered to be a collateral dependent loan, the loan is reported, net, at the fair value of the collateral. For troubled debt restructurings that subsequently default, the Corporation determines the amount of reserve in accordance with the accounting policy for the allowance for loan losses.

The general component covers non-impaired loans and is based on historical loss experience adjusted for current factors. The historical loss experience is determined by portfolio segment and is based on the actual loss history experienced by the Corporation. This actual loss experience is supplemented with other economic factors based on the risks present for each portfolio segment including consideration of the following: trends in delinquencies and adversely classified loans; trends and conditions in the local and national economies; and industry-specific economic trends and conditions where credit concentrations to the industry are material. The following portfolio segments have been identified: Commercial; Agriculture; Residential Mortgage; and Other.

(Continued)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Each of these portfolio segments has different risk characteristics and the allowance for loan loss methodology addresses these risks as follows:

Commercial loans include those secured by pledged assets of the customer's business (such as inventories, property and equipment, or accounts receivable), those secured by mortgages or other liens on real property, and those that are unsecured. Such loans include term loans and revolving arrangements. Repayment may be structured for full, partial, or no amortization of principal. These types of loans are primarily underwritten with expected repayment to be from the cash flow from the business operations of the customer. In underwriting these types of loans, the customer's ability to repay as well as the value of any pledged assets, are considered. Repayment is dependent upon the business operations of the borrowers, which is impacted by various factors including the industry in which the customer operates and the general economy.

Agriculture loans are secured by farm real estate, farm equipment or other farm business assets such as crops or livestock. Such loans include term loans and revolving arrangements. Repayment may be structured for full, partial, or no amortization of principal. These types of loans are primarily underwritten with expected repayment to be from farm operations of the customer. In underwriting these types of loans, the customer's ability to repay as well as the value of any pledged assets, are considered. Repayment is dependent upon the farm operations of the borrowers, which can be impacted by various factors including the price of agricultural commodities, machinery, real estate, and the general economy.

Residential Mortgage loans are those that are secured by senior or junior liens on residential property. This portfolio segment includes fixed-and adjustable-rate mortgage loans that provided for the full amortization of principal and home equity lines of credit. Repayment of real estate loans is primarily dependent upon the personal income of the borrowers, which can be impacted by the economic conditions in their market area. The Corporation seeks to mitigate the risk of the uncertainty of economic conditions with its current underwriting standards, which include a required loan-to-value ratio of at least 80% of each loan originated. The losses experienced within this segment will be impacted by changes in real estate values for the collateral securing these loans.

The Other portfolio segment includes consumer installment loans and leases. Repayment of the consumer loans is primarily dependent on the personal income of the borrowers, which can be impacted by economic conditions such as unemployment levels. Loans to consumers are extended after a credit evaluation, including the creditworthiness of the borrower(s), the purpose of the credit, and the secondary source of repayment. Consumer loans are made at fixed and variable interest rates. The repayment of the loans in this segment is dependent upon the willingness and ability of the customers to repay any outstanding balance. Leases are generally secured by commercial or agriculture-related equipment and repayment is expected to come primarily from the business or farm operations, and secondarily from the residual value of the equipment. Management tracks the risk in this segment based on the level of past due loans and the actual net charge-offs experienced.

Direct Financing Leases: Direct financing leases are recorded at the aggregate future minimum lease payments plus estimated residual value of leased assets less unearned income. Income on direct financing leases is recognized by a method that approximates a level rate of return. Leases are included in Loans on the consolidated balance sheet.

(Continued)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued**)**

Servicing Assets: Servicing assets are recognized separately when they are acquired through sales of loans. For sales of mortgage loans, servicing assets are initially recorded at fair value with the income statement effect recorded in gains on sales of loans. Fair value is based on market prices for comparable mortgage servicing contracts, when available, or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, the custodial earnings rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses. All servicing assets are subsequently measured using the amortization method, which requires servicing rights to be amortized into non-interest income in proportion to, and over the period of, the estimated future net servicing income of the underlying loans. Servicing assets are $3,202 and $2,830 at December 31, 2015 and 2014, respectively, and are included in accrued interest receivable and other assets in the consolidated balance sheets.

Servicing assets are evaluated for impairment based upon the fair value of the assets as compared to carrying amount. Impairment is determined by stratifying assets into groupings based on predominant risk characteristics, such as interest rate, loan type and investor type. Impairment is recognized through a valuation allowance for an individual grouping, to the extent that fair value is less than the carrying amount. If the Corporation later determines that all or a portion of the impairment no longer exists for a particular grouping, a reduction of the allowance may be recorded as an increase to income. Changes in valuation allowances are reported with other income on the income statement. The fair values of servicing assets are subject to significant fluctuations as a result of changes in estimated and actual prepayment speeds and default rates and losses.

Servicing fee income which is reported on the income statement as other income is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal; or a fixed amount per loan and are recorded as income when earned. The amortization of servicing assets is netted against loan servicing fee income. Servicing fees totaled $1,859 and $1,657 for the years ended December 31, 2015 and 2014. Late fees and ancillary fees related to loan servicing are not material.

Foreclosed Assets: Assets acquired through or instead of loan foreclosure are initially recorded at fair value less estimated selling costs when acquired, establishing a new cost basis. If fair value declines, a valuation allowance is recorded through expense. Costs after acquisition are expensed. The balance of foreclosed assets was $381 and $1,635 at December 31, 2015 and 2014, respectively and is included in other assets in the consolidated balance sheets.

Premises and Equipment: Land is carried at cost. Premises and equipment are stated at cost less accumulated depreciation. Premises and equipment are depreciated primarily on the straight-line method over the estimated useful lives of the assets. These assets are reviewed for impairment when events indicate the carrying amount may not be recoverable.

Federal Home Loan Bank (FHLB) Stock: The Bank is a member of the FHLB system. Members are required to own a certain amount of stock based on the level of borrowings and other factors, and may invest in additional amounts. FHLB stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment based on ultimate recovery of par value. Both cash and stock dividends are reported as income.

(Continued)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued**)**

Federal Reserve Bank (FRB) Stock: The Bank is a member of its regional Federal Reserve Bank. FRB stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment based on ultimate recovery of par value. Both cash and stock dividends are reported as income.

Bank-Owned Life Insurance: The Corporation acquired life insurance policies on certain key executives through acquisitions in 2009 and 2012. Bank-owned life insurance is recorded at the amount that can be realized under the insurance contract at the balance sheet date, which is the cash surrender value adjusted for other charges or other amounts due that are probable at settlement.

Goodwill and Other Intangible Assets: Goodwill resulting from business combinations prior to January 1, 2009 represents the excess of the purchase price over the fair value of the net assets of businesses acquired. Goodwill resulting from business combinations after January 1, 2009, is generally determined as the excess of the fair value of the consideration transferred, plus the fair value of any noncontrolling interests in the acquiree, over the fair value of the net assets acquired and liabilities assumed as of the acquisition date. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but tested for impairment at least annually. The Corporation has selected June 30 as the date to perform the annual impairment test. Intangible assets with definite useful lives are amortized over their estimated useful lives to their estimated residual values. Goodwill is the only intangible asset with an indefinite life on the balance sheet.

Core deposit intangible and other intangible assets arise from bank branch and other business acquisitions. They are initially measured at fair value and then are amortized on a straight line or accelerated method over their estimated useful lives, which range from 4 to 10 years for core deposit intangibles.

Loan Commitments and Related Financial Instruments: Financial instruments include off-balance sheet credit instruments, such as commitments to make loans and commercial letters of credit, issued to meet customer financing needs. The face amount for these items represents the exposure to loss, before considering customer collateral or ability to repay. Such financial instruments are recorded when they are funded.

Loss Contingencies: Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. Management does not believe there are now such matters that will have a material effect on the financial statements.

Dividend Restriction: Banking regulations require maintaining certain capital levels and may limit the dividends paid by the bank to the holding company or by the holding company to stockholders. Additionally, the Corporation may not declare dividends if it has deferred interest payments or is in default on its subordinated debentures.

(Continued)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Derivatives: At the inception of a derivative contract, the Corporation designates the derivative as one of three types based on the Corporation's intentions and belief as to likely effectiveness as a hedge. These three types are (1) a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment ("fair value hedge"), (2) a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability ("cash flow hedge"), or (3) an instrument with no hedging designation ("stand-alone derivative"). For a fair value hedge, the gain or loss on the derivative, as well as the offsetting loss or gain on the hedged item, are recognized in current earnings as fair values change. For a cash flow hedge, the gain or loss on the derivative is reported in other comprehensive income and is reclassified into earnings in the same periods during which the hedged transaction affects earnings. For both types of hedges, changes in the fair value of derivatives that are not highly effective in hedging the changes in fair value or expected cash flows of the hedged item are recognized immediately in current earnings. Changes in the fair value of derivatives that do not qualify for hedge accounting are reported currently in earnings, as noninterest income.

Net cash settlements on derivatives that qualify for hedge accounting are recorded in interest income or interest expense, based on the item being hedged. Net cash settlements on derivatives that do not qualify for hedge accounting are reported in noninterest income. Cash flows on hedges are classified in the cash flow statement the same as the cash flows of the items being hedged.

The Corporation formally documents the relationship between derivatives and hedged items, as well as the risk-management objective and the strategy for undertaking hedge transactions at the inception of the hedging relationship. This documentation includes linking fair value or cash flow hedges to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. The Corporation also formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivative instruments that are used are highly effective in offsetting changes in fair values or cash flows of the hedged items. The Corporation discontinues hedge accounting when it determines that the derivative is no longer effective in offsetting changes in the fair value or cash flows of the hedged item, the derivative is settled or terminates, a hedged forecasted transaction is no longer probable, a hedged firm commitment is no longer firm, or treatment of the derivative as a hedge is no longer appropriate or intended.

Stock Based Compensation: Compensation cost is recognized for restricted stock awards issued to employees, based on the market price of the Corporation's common stock at the date of grant. Compensation cost is recognized over the required service period, generally defined as the vesting period. For awards with graded vesting, compensation cost is recognized on a straight-line basis over the requisite service period for the entire award.

Income Taxes: Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

A tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded.

(Continued)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The Corporation recognizes interest and/or penalties related to income tax matters in income tax expense.

Earnings Per Common Share: Basic earnings per common share is based on net income divided by the weighted-average number of common shares outstanding during the year. All outstanding unvested share-based payment awards contain rights to nonforfeitable dividends and are considered participating securities for this calculation so there is no difference between dilutive and basic earnings per share. All share and per share data are restated for all stock splits and stock dividends through the date of issuance of the financial statements.

Comprehensive Income: Comprehensive income consists of net income and other comprehensive income (loss). Other comprehensive income (loss) includes unrealized gains and losses on securities available for sale and unrealized gains and losses on cash flow hedges, which are also recognized as separate components of equity.

Fair Values of Financial Instruments: Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed in a separate note. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments, and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates.

Transfers of Financial Assets: Transfers of financial assets are accounted for as sales, when control over the assets has been relinquished. Control over transferred assets is deemed to be surrendered when the assets have been isolated from the Corporation, the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and the Corporation does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

NOTE 2 - SECURITIES

The fair value of securities available for sale and the related unrealized gains and losses recognized in accumulated other comprehensive income (loss) were as follows:

	2015			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. treasury and government agency securities	$ 118,530	$ 107	$ (610)	$ 118,027
Obligations of states and political subdivisions	89,279	1,338	(70)	90,547
Corporate obligations	750	2	-	752
Mortgage-backed securities, residential	58,549	290	(470)	58,369
Marketable equity securities	9	18	-	27
	$ 267,117	$ 1,755	$ (1,150)	$ 267,722

(Continued)

NOTE 2 - SECURITIES (Continued)

	2014			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. treasury and government agency securities	$ 80,357	$ 99	$ (696)	$ 79,760
Obligations of states and political subdivisions	65,358	1,141	(107)	66,392
Corporate obligations	2,254	23	-	2,277
Mortgage-backed securities, residential	67,675	525	(266)	67,934
Marketable equity securities	9	14	-	23
	$ 215,653	$ 1,802	$ (1,069)	$ 216,386

The carrying amount, unrecognized gains and losses, and fair value of securities held to maturity were as follows:

	2015			
	Carrying Amount	Gross Unrecognized Gains	Gross Unrecognized Losses	Fair Value
Obligations of states and political subdivisions	$ 10,100	$ 339	$ -	$ 10,439

	2014			
	Carrying Amount	Gross Unrecognized Gains	Gross Unrecognized Losses	Fair Value
Obligations of states and political subdivisions	$ 14,259	$ 525	$ -	$ 14,784

Securities with a carrying value of $108,305 and $93,793 were pledged to secure other borrowings at December 31, 2015 and 2014, respectively.

At December 31, 2015 and 2014, there were no holdings of securities of any one issuer, other than the U.S. Government and its agencies, in any amount greater than 10% of stockholders' equity.

Proceeds from sales of securities available for sale during 2015 and 2014 were $0 and $2,594, respectively. There were no held to maturity securities sold in 2015 and 2014. Gross gains of $0 and $31 and no gross losses were recognized on the sales of securities available for sale during 2015 and 2014, respectively. During 2015 and 2014, an additional $16 and $(44), respectively, in gains (losses) resulted from net redemption premiums on called securities.

(Continued)

NOTE 2 - SECURITIES (Continued)

The amortized cost and fair value of investment securities by contractual maturity are shown below. Securities not due at a single maturity date or with no maturity date, primarily mortgage-backed and marketable equity securities are shown separately.

	2015			
	Held to Maturity		Available for Sale	
	Carrying Value	Fair Value	Amortized Cost	Fair Value
Due in one year or less	$ 2,886	$ 2,910	$ 21,573	$ 21,605
Due after one year through five years	6,166	6,443	141,072	141,014
Due after five years through ten years	958	996	45,914	46,707
Due after ten years	90	90	-	-
Mortgage-backed securities and marketable equity securities	-	-	58,558	58,396
	$ 10,100	$ 10,439	$ 267,117	$ 267,722

Securities with unrealized losses at December 31, 2015 and 2014 are as follows, presented by length of the time the securities have been in an unrealized loss position.

	Less than 12 Months		12 Months or More		Total	
Description of Securities	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
2015						
U.S. treasury and government agency	$ 71,220	$ (463)	$ 11,852	$ (147)	$ 83,072	$ (610)
Obligations of states and political subdivisions	15,525	(62)	2,073	(8)	17,598	(70)
Mortgage-backed securities, residential	26,048	(292)	8,189	(178)	34,237	(470)
Total temporarily impaired	$112,793	$ (817)	$ 22,114	$ (333)	$134,907	$ (1,150)

	Less than 12 Months		12 Months or More		Total	
Description of Securities	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
2014						
U.S. treasury and government agency	$ 15,563	$ (45)	$ 40,778	$ (651)	$ 56,341	$ (696)
Obligations of states and political subdivisions	10,011	(61)	3,663	(46)	13,674	(107)
Mortgage-backed securities, residential	15,248	(74)	11,407	(192)	26,655	(266)
Total temporarily impaired	$ 40,822	$ (180)	$ 55,848	$ (889)	$ 96,670	$ (1,069)

(Continued)

NOTE 2 - SECURITIES (Continued)

Unrealized losses on investments have not been recognized into income because the issuers are insured or of high credit quality, management does not intend to sell and it is not more likely than not that management would be required to sell the securities prior to their anticipated recovery, and the decline in fair value is largely due to market interest rates and other economic factors. The fair value is expected to recover as the investments approach their maturity date and/or market rates change.

NOTE 3 - LOANS AND ALLOWANCE FOR LOAN LOSSES

Loans are comprised of the following:

	2015	2014
Commercial		
Commercial real estate	$ 168,128	$ 167,347
Commercial & industrial	196,831	176,847
Construction & development	16,040	13,676
Agriculture		
Farm real estate	283,821	248,835
Other	268,682	232,612
Residential Mortgage		
Residential real estate	99,453	78,996
Other		
Leases	40,169	40,085
Consumer & other	15,460	12,978
Subtotal	1,088,584	971,376
Less: Allowance for loan losses	(13,289)	(12,327)
Loans, net	$1,075,295	$ 959,049

Lease financing consists of the following:

	2015	2014
Total minimum lease payments receivable	$ 37,815	$ 37,719
Total residual	7,681	7,693
Unearned income	(5,327)	(5,327)
Total lease financing	$ 40,169	$ 40,085

Minimum lease payments receivable are as follows:

Year Ending December 31,	
2016	$ 11,973
2017	8,725
2018	6,974
2019	4,518
2020 and thereafter	5,625
	$ 37,815

(Continued)

NOTE 3 - LOANS AND ALLOWANCE FOR LOAN LOSSES (Continued)

The Corporation has purchased loans, for which there was, at acquisition, evidence of deterioration of credit quality since origination and it was probable, at acquisition, that all contractually required payments would not be collected. The carrying amount of those loans is as follows:

	2015	2014
Commercial	$ 3,344	$ 9,793
Residential Mortgage	743	2,620
Outstanding balance	$ 4,087	$ 12,413
Carrying amount, net of allowance of $8 and $55	$ 1,814	$ 6,157

Accretable yield, or income expected to be collected, is as follows:

	2015	2014
Balance at January 1	$ 477	$ 951
Accretion of income	(818)	(478)
Reclassifications from non-accretable difference	695	171
Disposals	(14)	(167)
Balance at December 31	$ 340	$ 477

For those purchased credit impaired loans disclosed above, the Corporation increased the allowance for loan losses during 2015 and 2014 by $8 and $55, respectively.

There were no loans with evidence of deterioration of credit quality acquired during the years ended December 31, 2015 and 2014.

Income is not recognized on certain purchased loans if the Corporation cannot reasonably estimate cash flows expected to be collected. During the years ended December 31, 2015 and 2014 the Corporation had no such loans.

Certain directors, executive officers and principal stockholders of the Corporation, including their immediate families and companies in which they are principal owners, were loan customers of the Bank. At December 31, 2015 and 2014, loans to these individuals totaled approximately $20,277 and $14,021.

(Continued)

NOTE 3 - LOANS AND ALLOWANCE FOR LOAN LOSSES (Continued)

The following tables present the activity in the allowance for loan losses by portfolio segment for the years ending December 31, 2015 and 2014:

	Commercial	Agriculture	Residential Mortgage	Other	Unallocated	Total
December 31, 2015						
Allowance for loan losses						
Beginning balance	$ 3,174	$ 7,212	$ 535	$ 146	$ 1,260	$ 12,327

Troubled Debt Restructurings:

As of December 31, 2015 and 2014, the Corporation has a recorded investment in troubled debt restructurings of $31,472 and $21,261, respectively. The Corporation has allocated $392 and $401 of specific reserves for those loans at December 31, 2015 and 2014, and has no commitments to lend to these borrowers at either period.

During the years ending December 31, 2015 and 2014, the terms of certain loans were modified as troubled debt restructurings. The modification of the terms of such loans included one or a combination of the following: a reduction of the stated interest rate of the loan or an extension of the maturity date at a stated rate of interest lower than the current market rate for new debt with similar risk.

(Continued)

NOTE 3 - LOANS AND ALLOWANCE FOR LOAN LOSSES (Continued)

Modifications involving a reduction of the stated interest rate of the loan were for periods ranging from 1 month to 15 years. Modifications involving an extension of the maturity date were for periods ranging from 3 months to 15 years.

The following table presents loans by class modified as troubled debt restructurings that occurred during the years ending December 31, 2015 and 2014:

	Number of of Loans	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
December 31, 2015			
Troubled Debt Restructurings:			
Commercial			
Commercial & industrial	2	$ 561	$ 561
Agriculture			
Farm real estate	8	9,187	9,316
Other	6	10,856	10,856
Other			
Leases	6	444	445
Consumer & other	1	92	92
Total	23	$ 21,140	$ 21,270

The troubled debt restructurings described above increased the allowance for loan losses by $46 and resulted in charge offs of $0 during the year ending December 31, 2015.

	Number of of Loans	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
December 31, 2014			
Troubled Debt Restructurings:			
Commercial			
Commercial real estate	2	$ 68	$ 38
Commercial & industrial	4	545	545
Agriculture			
Farm real estate	3	5,362	5,253
Other	4	1,183	1,315
Residential Mortgage	5	215	98
Total	18	$ 7,373	$ 7,249

The troubled debt restructurings described above increased the allowance for loan losses by $30 and resulted in charge offs of $234 during the year ending December 31, 2014.

(Continued)

NOTE 3 - LOANS AND ALLOWANCE FOR LOAN LOSSES (Continued)

The following table presents loans by class modified as troubled debt restructurings for which there was a payment default within twelve months following the modification during the years ending December 31, 2015 and 2014:

	Number of Loans	Recorded Investment
December 31, 2015		
Commercial & industrial	2	$ 562
Agriculture – Other	1	4,026
Leases	1	111
Total	4	$ 4,699

The troubled debt restructurings that subsequently defaulted described above increased the allowance for loan losses by $27 and resulted in charge offs of $0 during the year ending December 31, 2015.

	Number of Loans	Recorded Investment
December 31, 2014		
Commercial & industrial	1	$ 223
Residential Mortgage	2	151
Total	3	$ 374

The troubled debt restructurings that subsequently defaulted described above increased the allowance for loan losses by $6 and resulted in charge offs of $234 during the year ending December 31, 2014.

A loan is considered to be in payment default once it is 90 days contractually past due under the modified terms.

In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification. This evaluation is performed under the Corporation's internal underwriting policy.

Credit Quality Indicators:

The Corporation categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Corporation analyzes loans individually by classifying the loans as to credit risk. All loans are graded at origination. On a quarterly basis, all loans with exposure greater than $500 or graded special mention, substandard or doubtful are reviewed for potential grade changes. Other loans outside of this scope are re-graded only as additional financial information is received or delinquency status changes. The Corporation uses the following definitions for risk ratings:

> **Special Mention:** Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

(Continued)

NOTE 3 - LOANS AND ALLOWANCE FOR LOAN LOSSES (Continued)

Substandard: Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful: Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be pass-rated loans.

Based on the most recent analysis performed, the risk category of loans by class of loans as of December 31, 2015 and 2014 is as follows:

	Pass	Special Mention	Substandard	Doubtful
December 31, 2015				
Commercial				
Commercial real estate	$ 159,415	$ 4,295	$ 4,418	$ -

(Continued)

NOTE 4 - PREMISES AND EQUIPMENT

A summary of premises and equipment is detailed below as of December 31:

	2015	2014
Land	$ 3,619	$ 3,342
Buildings and improvements	17,000	15,061
Furniture and equipment	10,255	8,838
Total cost	30,874	27,241
Accumulated depreciation	(12,458)	(11,217)
	18,416	16,024
Buildings and equipment in process	59	656
	$ 18,475	$ 16,680

During 2015, the Corporation did not recognize an impairment charge on branch facilities. During 2014, the Corporation recognized impairment charges on branch facilities of $300.

NOTE 5 - GOODWILL AND INTANGIBLE ASSETS

Goodwill

The change in balance for goodwill during the year is as follows:

	2015	2014
Beginning of year	$ 8,729	$ 8,482
Measurement period adjustments to previously recorded goodwill	-	247
End of year	$ 8,729	$ 8,729

Acquired Intangible Assets

	2015		2014	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Amortized intangible assets:				
Core deposit intangible	$ 12,392	$ 8,392	$ 10,384	$ 7,263

Aggregate amortization expense for 2015 and 2014 was $1,129 and $646.

Estimated amortization expense for each of the next five years:

2016	$ 1,069
2017	886
2018	726
2019	583
2020	338

(Continued)

NOTE 6 - SERVICING ASSETS

Loans and leases serviced for others are not reported as assets of the Corporation and total $649,768 and $612,340 at December 31, 2015 and 2014.

Activity for capitalized loan servicing assets (included in accrued interest receivable and other assets on the consolidated balance sheets) and the related valuation allowance follow.

	2015	2014
Servicing assets		
Beginning of year	$ 4,152	$ 4,299
Additions	1,273	540
Direct write-downs	(155)	(44)
Amortized to expense	(815)	(643)
End of year	$ 4,455	$ 4,152

	2015	2014
Valuation allowance		
Beginning of the year	$ 1,322	$ 1,199
Direct write-downs	(155)	(44)
Net additions expensed	86	167
End of year	$ 1,253	$ 1,322
Net servicing assets	$ 3,202	$ 2,830

The fair value of servicing assets for 2015 and 2014 was approximately $3,230 and $2,880. Fair value at year-end 2015 and 2014 was primarily determined based on a valuation model that calculates the present value of estimated net servicing income. Fair value at year-end 2015 was determined using a weighted average discount rate of 7.01% and an immediate and long-term weighted average prepayment speed of 10.2% and 9.3% respectively. Fair value at year-end 2014 was determined using a weighted average discount rate of 7.00% and an immediate and long-term weighted average prepayment speed of 11.6% and 10.4% respectively.

The weighted average amortization period is 6 years. Estimated amortization expense for each of the next five years is:

2016	$ 697
2017	591
2018	498
2019	416
2020	333

(Continued)

NOTE 7 - INTEREST-BEARING DEPOSITS

Interest-bearing deposits consisted of the following at December 31:

	2015	2014
Interest-bearing demand deposits	$ 418,884	$ 337,878
Savings	261,183	240,159
Time deposits over $250,000	66,218	83,494
Other time deposits	188,323	181,206
	$ 934,608	$ 842,737

At December 31, 2015, stated maturities of time deposits were:

2016	$ 131,908
2017	54,811
2018	36,766
2019	19,509
2020	6,830
Thereafter	4,717
	$ 254,541

NOTE 8 - FEDERAL HOME LOAN BANK ADVANCES

At year-end, advances from the Federal Home Loan Bank were as follows:

	2015	2014
Maturities from March 2016 through July 2021, with fixed rates from 0.60% to 2.70%, with a weighted average rate of 1.52% at December 31, 2015. Maturities from February 2015 through July 2021, with fixed rates from .60% to 2.80%, with a weighted average rate of 1.50% as of December 31, 2014.	$ 72,300	$ 72,250
Maturity of December 2019, with a floating rate tied to 3 month LIBOR plus a spread of 0.17% with quarterly reset dates, with a rate of 0.68% as of December 31, 2015. This advance is tied to an interest rate swap see Note 14 Derivatives and Hedging Activities for additional information on this transaction.	5,000	-
Maturity of June 2018, with a floating rate tied to 1 month LIBOR plus a spread of 0.21% with monthly reset dates, with a rate of 0.54% as of December 31, 2015 and a rate of 0.37% as of December 31, 2014. This advance is tied to an interest rate swap see Note 14 Derivatives and Hedging Activities for additional information on the transaction.	5,000	5,000
Maturity of September 2017 with a floating rate tied to 3 month LIBOR plus a spread of 0.25% capped at 2.25% with quarterly reset dates, with a current rate of 0.66% and a rate of 0.49% as of December 31, 2014.	3,000	3,000

(Continued)

NOTE 8 - FEDERAL HOME LOAN BANK ADVANCES (Continued)

	2015	2014
Maturity of August 2015, with floating rate based upon 3-month LIBOR that may vary between 0.00% and the initial rate. The initial rate of 2.08% is unchanged from the rate of 2.08% as of December 31, 2014.	-	5,000
Total	$ 85,300	$ 85,250

Maturities and scheduled principal reductions are as follows:

2016	$ 12,000
2017	12,300
2018	19,000
2019	21,000
2020	15,000
Thereafter	6,000
	$ 85,300

The Bank has entered into a series of forward starting swaps designated as cash flow hedges to convert the floating interest payments to a fixed rate on a series of future floating rate FHLB advances summarized below. See Note 14 Derivatives and Hedging Activities for additional information on these transactions.

As of December 31, 2015

Amount of Future Advance	Index	Swap Trade Date	Forward Start Date of Swap	Date of FHLB Advance	Maturity Date
$ 5,000,000	1 mo. LIBOR	08/15/2014	02/16/2016	Future	02/16/2021
5,000,000	1 mo. LIBOR	10/09/2014	04/15/2016	Future	04/15/2021
5,000,000	1 mo. LIBOR	06/12/2015	06/15/2016	Future	06/15/2020
4,000,000	1 mo. LIBOR	01/21/2015	07/15/2016	Future	07/15/2020
5,000,000	1 mo. LIBOR	12/14/2015	12/15/2016	Future	12/15/2021
4,000,000	1 mo. LIBOR	01/21/2015	01/17/2017	Future	01/18/2022
$ 28,000,000

$ 15,000,000					

(Continued)

NOTE 8 - FEDERAL HOME LOAN BANK ADVANCES (Continued)

Each advance is payable at its maturity date, with a prepayment penalty for fixed rate advances and the floating advances tied to 3 month LIBOR except for those payments made on various contractual prepayment dates. The advances were collateralized by $175,091 and $151,370 under a blanket lien arrangement at year-end 2015 and 2014. At December 31, 2015 outstanding advances are secured by specific securities totaling $49,587 and a blanket pledge of all qualifying one-to-four family real estate loans totaling $48,267, qualifying multifamily loans totaling $905 qualifying commercial real estate loans totaling $28,999, qualifying small business loans totaling $5,211, and qualifying small farm loans totaling $32,001. Based on this collateral and the Corporation's holdings of FHLB stock, the Corporation is eligible to borrow up to a total of $31,122 at year-end 2015.

NOTE 9 - OTHER BORROWINGS

On April 14, 2015 the Corporation entered into a term loan agreement for $7,500 with a fixed rate of 3.90%. The payments for the $7,500 loan are based on a 7 year amortization schedule with quarterly payments of $307 including principal and interest with a balloon payment of $2,639 to be paid in full by April 14, 2020. The proceeds from this loan of $7,494 were invested directly into the Bank. Fees of $6 including legal fees and commitment fees were capitalized and are being amortized over five years.

On September, 30, 2014 the Corporation entered into a term loan agreement for $2,500 with a fixed rate of 3.95%. The payments for the $2,500 loan are based on a 7 year amortization schedule with quarterly payments of $103 including principal and interest with a balloon payment of $894 to be paid in full by September 30, 2019. The proceeds from this loan of $2,499 were invested directly into the Bank. Legal fees of $1 were expensed.

On September 5, 2013 the Corporation entered into a term loan agreement for up to $10,000. At that time the Corporation advanced $8,000 with a fixed rate of 3.85%. The payments for the $8,000 loan are based on a seven year amortization schedule with quarterly payments of $327 including principal and interest with a balloon payment of $2,852 to be paid in full by September 5, 2018. On December 27, 2013 the Corporation exercised its option to draw the additional $2,000 term loan with a fixed rate of 3.89%. This loan is also based on a seven year amortization schedule with quarterly payments of $85 including principal and interest with a balloon payment of $731 to be paid in full by September 5, 2018. The combination of the $8,000 and $2,000 loans were used to pay off an existing loan with a balance of $3,765 including principal and interest while the remaining $6,223 was invested directly into the Bank. Fees of $12, including legal fees and commitment fees, were capitalized and are being amortized over five years.

As of December 31, 2015 and 2014 the balance on the term loans totaled $16,012 and $10,883 respectively.

On November 10, 2015 the Corporation reduced the $5,000 revolving credit line to $1,500 amending the maturity date to September 5, 2016. Legal fees of $2 were expensed. Going forward the $1,500 revolving credit line will have a 25 basis point non-usage fee charged against the line quarterly on a pro-rata basis. On September 30, 2014 the Corporation executed renewal of the $5,000 revolving credit line amending the maturity date to September 5, 2015. As of December 31, 2015 and 2014 the revolving line had not been drawn on.

The term loans and the revolving credit line have covenants related to earnings, asset quality and capitalization for which the Corporation was in compliance as of December 31, 2015 and 2014.

(Continued)

NOTE 10 - SUBORDINATED DEBENTURES

In December 2004, a trust formed by the Corporation issued $5,000 of fixed to floating rate trust preferred securities as part of a pooled offering of such securities. The Corporation issued subordinated debentures to the trust in exchange for the proceeds of the offering, which debentures represent the sole asset of the trust. The Corporation may redeem the subordinated debentures, in whole but not in part, any time after 2009 at face value. The subordinated debentures must be redeemed no later than 2034. On December 15, 2009 the fixed rate period expired and the floating rate commenced based on 3-month LIBOR plus 2.10%. As of December 31, 2015 and 2014, the variable rate of the debentures was 2.61% and 2.34%, respectively. Interest payments are payable quarterly in arrears and the Corporation has the option to defer interest payments from time to time for a period not to exceed 20 consecutive quarters.

On February 13, 2014 the Corporation executed an interest rate cap designated as a cash flow hedge on the $5,000 subordinate debenture. The interest rate cap is effective from December 15, 2014 through December 15, 2019. This interest rate cap replaced the interest rate swap that matured on December 14, 2014. See Note 14 - Derivatives and Hedging Activities for additional information on these transactions.

In May 2007, a second trust formed by the Corporation issued $13,000 of fixed to floating rate trust preferred securities as part of a pooled offering of such securities. The Corporation issued subordinated debentures to the trust in exchange for the proceeds of the offering, which debentures represent the sole asset of the trust. The Corporation may redeem the subordinated debentures, in whole but not in part, any time after 2012 at face value. The subordinated debentures must be redeemed no later than 2037. On June 15, 2012, the fixed rate period expired and the floating rate period commenced based on 3-month LIBOR plus 1.48%. As of December 31, 2015 and 2014 the variable rate of the debentures was 1.99% and 1.72%. Interest payments are payable quarterly in arrears and the Corporation has the option to defer interest payments from time to time for a period not to exceed 20 consecutive quarters.

On February 4, 2013, the Corporation executed an interest rate cap designated as a fair value hedge on the first $5,000 of the $13,000 subordinated debentures. The interest rate cap is effective from March 15, 2013 through December 15, 2019. Subsequently on February 14, 2013, the Corporation entered into an interest rate swap designated as a cash flow hedge to convert the floating interest payments to a fixed rate on the remaining $8,000 of the $13,000 subordinated debentures beginning December 15, 2014 until December 15, 2019. See note 14 Derivatives and Hedging Activities for additional information on these transactions.

NOTE 11 - EMPLOYEE BENEFIT PLANS

The Corporation maintains a 401(k) profit sharing plan, covering employees who have completed six months of service. Employer contributions to the plan are at the discretion of the board of directors. In addition, the plan provides for the Corporation to match employee 401(k) contributions at a percentage determined annually by the board of directors. Employer contributions charged to operations were $957 and $934 for 2015 and 2014.

Under employment agreements with certain executives, certain events leading to separation from the Corporation could result in cash payments equal to 2 times the average of the employee's base pay plus any cash bonuses for the last 3 complete calendar years preceding the employee's termination of employment. The President will receive 2.99 times the average base pay plus any cash bonuses.

As a result of the May 1, 2012 acquisition of First Citizens of Paris, Inc., the Corporation has assumed obligations under a Supplemental Executive Retirement Plan (SERP) for certain senior officers of Citizens National Bank of Paris. Under the provisions of the SERP, each participant will receive at retirement an annual benefit for a fifteen-year period as stated in the agreement.

(Continued)

NOTE 11 – EMPLOYEE BENEFIT PLANS (Continued)

Participants who were not yet fully vested as of May 1, 2012 fully vested based on the terms of their SERP agreement. Total expense of $5 and $32 was recorded during 2015 and 2014, respectively. As of December 31, 2015 and 2014, accrued benefits payable totaled $467 and $510, respectively.

As a result of the December 4, 2009 acquisition of C.B. Bankshares, Inc., the Corporation has assumed obligations under a Supplemental Executive Retirement Plan (SERP) for certain senior officers of Central Bank. Under the provisions of the SERP, each participant will receive at retirement an annual benefit for a ten-year period as stated in the agreement. Participants fully vested upon the acquisition date. Total expense of $32 and $36 was recorded during 2015 and 2014, respectively. As of December 31, 2015 and 2014, accrued benefits payable totaled $1,230 and $1,238, respectively.

As a result of the December 4, 2009 acquisition of C.B. Bankshares, Inc., the Corporation entered five-year employment agreements with two former executives of Central Bank. The employment agreements concluded during December 2014. In addition a seven year non-competition agreement was entered with one of the individuals.

NOTE 12 - STOCK-BASED COMPENSATION

The Corporation has adopted a Restricted Stock Plan ("RSP") which provides for the issuance of shares to officers and employees. Compensation expense is recognized over the vesting period of the shares based on the market value of the shares at issue date. The market value of the stock was determined using an independent appraisal, which is performed at least annually. Annually, the Corporation may issue up to 6,000 shares, although shares not issued during the year are not available to be granted in future periods. RSP grants cliff vest over a four year period. 3,475 and 4,250 shares were granted during 2015 and 2014 with a fair value per share of $46.50 and $41.50, respectively. Compensation expense of $173 and $163 was recorded during 2015 and 2014 for shares granted.

A summary of changes in the Corporation's nonvested shares for the year follows:

Nonvested Shares	Shares	Weighted-Average Grant-Date Fair Value
Nonvested at January 1, 2015	21,950	$ 30.37
Granted	3,475	
Vested	(4,750)	
Forfeited	(150)	
Nonvested at December 31, 2015	20,525	$ 34.62

As of December 31, 2015 and 2014, there was $314 and $326, respectively of total unrecognized compensation cost related to non-vested shares granted under the Plan. The cost is expected to be recognized over a weighted-average period of 1.7 years.

NOTE 13 - INCOME TAXES

The provision for income taxes consists of the following:

	2015	2014
Current payable	$ 6,593	$ 5,274
Deferred income tax (benefit)	(284)	1,054
	$ 6,309	$ 6,328

	2015	2014
Income tax provision computed at statutory federal rate of 35%	$ 8,091	$ 7,894
Tax effect of:		
Income from tax exempt securities and loans	(776)	(739)
State income tax (net of federal tax effect)	778	757
Tax credits	(1,445)	(1,427)
Other	(339)	(157)
	$ 6,309	$ 6,328

	2015	2014
Deferred tax asset	$ 7,800	$ 7,308
Deferred tax liability	(9,288)	(9,457)
Net deferred tax liability	$ (1,488)	$ (2,149)

The deferred tax asset is primarily due to accumulated differences in the allowance for loan losses, SERP liabilities, deferred loan fees, bonus depreciation, non-accrual loan interest income, net other comprehensive loss and purchase accounting adjustments. The Corporation has an Illinois NOL of $245 that begins to expire in 2024. The deferred tax liability is primarily due to accumulated differences in lease activity, amortization of intangibles, mortgage servicing rights, depreciation, fair value appreciation on securities available for sale, prepaid expenses and accumulated differences on partnership investments.

The Corporation recognized $27 in interest and penalties during the year ended December 31, 2015. There was no interest and penalties recognized or accrued during the year ended December 31, 2014.

The Corporation and its subsidiaries are subject to U.S. federal income tax as well as income tax of the states of Indiana, Illinois and Florida. The Corporation is no longer subject to examination by federal or state taxing authorities for years before 2012.

(Continued)

NOTE 14 - DERIVATIVES AND HEDGING ACTIVITIES

The Corporation uses various derivative instruments, including designated and non-designated hedge instruments. These derivative instruments may include interest rate caps, floors and swaps. The corporation does not use derivatives for speculative purposes.

While authorized to use a variety of derivative products the Corporation primarily utilizes interest rate swaps as a means to offer borrowers credit-based products that meet their needs and may from time to time utilize interest rate swaps to manage the macro interest rate risk profile of the Corporation. The interest rate swaps are used to mitigate overall risk to changes in interest rates during the life of the swaps and are a component of the Corporation's asset liability management strategy to reduce the risk that changes in interest rates will change net interest margin.

The interest rate swap agreement establishes the basis on which interest rate payments are exchanged with counterparties, referred to as the notional amount. The notional amount of the interest rate swaps do not represent amounts exchanged by the parties. The amount exchanged is determined by reference to the notional amount and the other terms of the interest rate swap.

The Corporation's exposure to credit loss, in the event of nonperformance by a borrower or counterparty, is limited to the market value of the derivative instrument associated with that borrower or counterparty as provided in regulatory guidance as calculated by the Remaining Maturity Method. The Corporation monitors its derivative credit exposure to borrowers by monitoring the creditworthiness of the related loan customers through the normal credit review process the Corporation performs on all borrowers. The Corporation manages the market value credit risk of the counterparty through the Regulation F compliance review and the quarterly derivative review.

All swaps are determined to be fully effective at inception and are expected to remain effective at December 31, 2015 and 2014.

In connection with its use of derivative instruments, the Corporation is required from time to time to post collateral with its counterparties to offset its market position. The Corporation had pledged short-term certificates of deposit, cash and securities with a carrying value of $3,789 and $3,478, at December 31, 2015 and 2014, respectively, in satisfaction of credit support agreements with derivative counterparties.

(Continued)

NOTE 14 - DERIVATIVES AND HEDGING ACTIVITIES (Continued)

The following tables summarize the notional values of the derivative financial instruments utilized by the Corporation at December 31, 2015 and 2014 respectively. The instruments are broken out by their designation.

					December 31, 2015

Non-Designated Hedge Instruments

The Corporation's one interest rate cap agreement (Table Reference C-1) was considered a non-designated hedging instrument maturing August 2015. The Corporation paid $281 to enter into this transaction in 2010.

Certain interest rate swaps (Table Reference S-1) entered into during 2012 and prior were also classified as non-designated hedge instruments due to their offsetting matched terms with prepayment penalties on the associated loans. The offsetting changes in the fair value of these instruments are reflected in earnings. The Corporation did not enter into any new non-designated interest rate swaps during 2015 or 2014.

Cash Flow Hedge Instruments

The Corporation has two interest rate cap agreements designated as cash flow hedge instruments for portions of the Corporation's subordinated debentures.

The Corporation entered into a forward starting interest rate cap agreement (Table Reference C-2) designated as a cash flow hedge instrument against the Corporations subordinated debenture issued in December 2004. The effective date of the cap was December 15, 2014 the Corporation paid $253 to enter into this transaction in 2014.

(Continued)

NOTE 14 - DERIVATIVES AND HEDGING ACTIVITIES (Continued)

The Corporation has another interest rate cap agreement (Table reference C-3) also designated as a cash flow hedge instrument against a portion of the Corporations subordinated debenture issued in May 2007. The effective date of the cap was March 15, 2013 the Corporation paid $222 to enter into this transaction in 2013.

The Corporation has entered into two interest rate swaps designated as cash flow hedges against a portion of the Corporation's subordinated debentures (Table Reference S-2 and S-3). Interest expense on the swap transactions are reported as a component of interest expense on subordinated debentures.

See Note 10 Subordinated Debentures for additional information on these transactions.

Interest Rate Swaps Designated as Cash Flow Hedges of certain Federal Home Loan Bank Advances

The Corporation entered into a series of interest rate swaps starting in February 2013 through December 2015 (Table Reference S-4 through S-11) to hedge against exposure to variability in cash flows related to changes in projected interest payments caused by changes in the underlying index associated with future Federal Home Loan Bank advances. These interest rate swaps are designated as cash flow hedges against a future floating rate Federal Home Loan Bank advance. The interest expense associated with the swap transaction is reported as a component of interest expense on FHLB debt.

NOTE 15 - COMMITMENTS

	2015	2014
Unused lines of credit	$ 195,255	$ 199,626
Commercial letters of credit	4,524	2,174
Commitment to sell loans	2,655	3,889

At December 31, 2015 and 2014, the Bank was required to maintain $3,232 and $2,196, respectively, on deposit with the Federal Reserve or as cash on hand. These reserves earned interest at a rate of 0.50% and 0.25% at December 31, 2015 and 2014, respectively.

During 2012 and 2010, the Corporation committed to invest $2,500 and $3,517, respectively, in funds that will invest the proceeds in various qualifying low-income housing projects. Subsequent to the initial investment the Corporation committed to an additional $13 in various low-income housing projects. In accordance with current accounting guidance, the entire investment was recorded at the time the commitment was made and is reflected on the Corporation's Consolidated Balance Sheets. During 2015 and 2014, $479 and $970 of the commitments were funded. The remaining commitments of $557 and $1,036 were recorded with other liabilities on the Consolidated Balance Sheets at December 31, 2015 and 2014, respectively.

(Continued)

NOTE 16 - REGULATORY MATTERS

Banks and bank holding companies are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet various capital requirements can initiate regulatory action. The final rules implementing Basel Committee on Banking Supervision's capital guidelines for U.S. banks (Basel III rules) became effective for the Corporation on January 1, 2015 with full compliance with all of the requirements being phased in over a multi-year schedule, and fully phased in by January 1, 2019. The net unrealized loss on available for sale securities is included in computing regulatory capital. Capital amounts and ratios for December 31, 2014 are calculated using Basel I rules. Management believes as of December 31, 2015, the Corporation and Bank meet all capital adequacy requirements to which they are subject.

Prompt corrective action regulations provide five classifications: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and plans for capital restoration are required.

At year-end 2015 and 2014, the most recent regulatory notifications categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since the notifications that management believes changed the institution's category. Actual consolidated and Bank capital levels and minimum required levels were as follows.

	Actual		Required For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Regulations	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
2015						
Total capital to risk weighted assets						
Consolidated	$ 147,713	12.7%	$ 93,050	8.0%	N/A

NOTE 17 - FAIR VALUES

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair values:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Corporation used the following methods and significant assumptions to estimate the fair value of each type of asset or liability carried at fair value:

The fair values of securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1 inputs) or matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs).

Derivative instruments consist of interest rate swaps and interest rate caps. The Corporation obtains fair values from financial institutions that use internal models with observable market inputs to estimate the values of these instruments (Level 2 inputs).

(Continued)

NOTE 17 - FAIR VALUES (Continued)

The fair value of mortgage servicing rights is based on a valuation model that calculates the present value of estimated net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income. The Corporation is able to compare the valuation model inputs and results to widely available published industry data for reasonableness (Level 2 inputs).

The fair value of impaired loans with specific allocations of the allowance for loan losses is generally based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are typically significant and result in a Level 3 classification of the inputs for determining fair value.

Nonrecurring adjustments to certain commercial and residential real estate properties classified as other real estate owned (OREO) are measured at fair value, less costs to sell. Fair values are based on recent real estate appraisals. These appraisals may use a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

Assets and Liabilities Measured on a Recurring Basis

Assets and liabilities measured at fair value on a recurring basis, including financial assets and liabilities for which the Corporation has elected the fair value option, are summarized below:

	Fair Value Measurements at December 31, 2015 Using		
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Financial Assets:

Residential Mortgage	-	-	1,330
Other real estate owned			
Residential	-	-	126

Appraisals or brokers-price-opinions for both collateral-dependent impaired loans and other real estate owned are performed by certified general appraisers (for commercial properties) or certified residential appraisers (for residential properties) whose qualifications and licenses have been reviewed and verified by the Corporation. Once received, a member of the Loan Department reviews the assumptions and approaches utilized in the appraisal as well as the overall resulting fair value in comparison with independent data sources such as recent market data or industry-wide statistics. After the review of the appraisal, the Corporation typically applies a discount for liquidation and other considerations. For collateral dependent impaired loans this discount ranges from 0-20% for Agriculture and 10%-35% for Commercial and Residential Mortgage. For other real estate owned this discount ranges from 0-25%.

The following represent impairment charges recognized during the period:

Mortgage servicing rights, which are carried at lower of cost or fair value, included a portion carried at their fair value of $2,828 which is made up of the outstanding balance of $4,236 net of a valuation allowance of $1,408 at December 31, 2015, resulting in a $86 impairment charge for the year ending December 31, 2015. At December, 31, 2014 mortgage servicing rights included a portion carried at their fair value of $2,384, which is made up of the outstanding balance of $3,750 net of a valuation allowance of $1,366, resulting in a $167 impairment charge for the year ending December 31, 2014.

Collateral dependent impaired loans include loans which are measured for impairment using the fair value of the collateral and loans that have been charged down to the fair value of the collateral. These loans had a carrying amount of $11,169, with a valuation allowance of $398 at December 31, 2015, resulting in an additional provision for loan losses of $45 for the year ending December 31, 2015. At December 31, 2014, impaired loans had a carrying amount of $20,191, with a valuation allowance of $573, resulting in an additional provision for loan losses of $42 for the year ending December 31, 2014.

Other real estate owned measured at fair value less costs to sell, had a net carrying amount of $184, which is made up of the outstanding balance of $200, net of a valuation allowance of $16 at December 31, 2015, resulting in a write-down of $16 for the year ended December 31, 2015. At December 31, 2014, other real estate owned measured at fair value less costs to sell, had a net carrying amount of $126, made up of the outstanding balance of $200, net of a valuation allowance of $74, resulting in a write-down of $0 for the year ended December 31, 2014.

(Continued)

NOTE 17 - FAIR VALUES (Continued)

The carrying amounts and estimated fair values of financial instruments, at December 31, 2015 and 2014 are as follows:

	2015		2014	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets

Derivatives	(1,395)	(1,395)	(1,571)	(1,571)

The methods and assumptions, not previously presented, used to estimate fair value are described as follows:

Carrying amount is the estimated fair value for cash and cash equivalents, accrued interest receivable and payable, demand deposits, short-term debt, and variable rate loans or deposits that reprice frequently and fully. The methods for determining the fair values for securities held to maturity is consistent with the methods for securities available for sale, which was described previously. For fixed rate loans or deposits and for variable rate loans or deposits with infrequent repricing or repricing limits, fair value is based on discounted cash flows using current market rates applied to the estimated life and credit risk. Fair value of loans held for sale is based on market quotes. Fair value of debt is based on current rates for similar financing. It was not practicable to determine the fair value of restricted stock due to restrictions placed on its transferability. The carrying value (zero) of off-balance-sheet items is considered to be a reasonable estimate of fair value of these instruments.

NOTE 18 - BUSINESS COMBINATION

On April 18, 2015, the Corporation acquired three commercial banks in Illinois, which resulted in the addition of 5 branches. The Corporation acquired First National Bank of Chrisman, United Community Bank, and Community Bank. These branches are located in the communities of Chrisman, Danville, Hoopeston, and Oakwood, Illinois and were acquired through a purchase and assumption agreement. Acquisition-related costs of $429 and $137 are included in other operating expenses in the Corporation's income statement for the year ended December 31, 2015 and 2014, respectively.

(Continued)

NOTE 18 - BUSINESS COMBINATION (Continued)

Under the acquisition method of accounting, the total estimated purchase price is allocated to the net tangible and intangible assets based on their current estimated fair values on the date of the acquisition. Based on management's preliminary valuation of the fair value of tangible and intangible assets acquired and liabilities assumed, which are based on assumptions that are subject to change, the purchase price for the acquisitions is allocated as follows:

Fair value of total cash consideration transferred	$ 15,936
Cash and cash equivalents	$ 25,160
Interest-bearing deposits with banks	25,340
Securities	51,816
Loans	57,791
Restricted stock	21
Premises and equipment	1,139
Core deposit intangible	2,008
Accrued interest receivable and other assets	616
Total assets acquired	163,891
Deposits	147,683
Accrued expenses and other liabilities	159
Total liabilities assumed	147,842
Total identifiable net liabilities assumed	16,049
Bargain purchase gain	113
	$ 15,936

Prior to the end of the one year measurement period for finalizing the purchase price allocation, if information becomes available which would indicate adjustments are required to the purchase price allocation, such adjustments will be included in the purchase price allocation retrospectively.

NOTE 18 – BUSINESS COMBINATION (Continued)

On November 14, 2014 the Corporation acquired 7 branches of BMO Harris Bank, N.A located in the communities of Brazil, Clay City, Farmersburg, Logansport, Marion, Sullivan, and Terre Haute, Indiana through a purchase and assumption agreement. Acquisition-related costs of $30 and $256 are included in other operating expenses in the Corporation's income statement for the year ended December 31, 2015 and 2014, respectively.

Under the acquisition method of accounting, the total purchase price is allocated to the net tangible and intangible assets based on their fair values on the date of the acquisition. The recorded bargain purchase gain arising from the acquisition was adjusted by $20 during the measurement period and is now final as the measurement period has passed. The following table summarizes the assets acquired and liabilities assumed recognized at the acquisition date:

Cash	$ 117,929
Loans	119
Premises and equipment	1,636
Core deposit intangible	1,297
Accrued interest receivable and other assets	317
Total assets acquired	121,298
Deposits	120,871
Accrued expenses and other liabilities	142
Total liabilities assumed	121,013
Total identifiable net assets acquired	285
Bargain purchase gain	285

NOTE 20 – ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS) (Continued)

The tables below present significant amounts reclassified out of each component of accumulated other comprehensive income (loss) for the year ending December 31, 2015 and 2014:

December 31, 2015

Details about Accumulated Other Comprehensive Income Components	Amount Reclassified From Accumulated Other Comprehensive Income	Affected Line Item in the Statement Where Net Income is Presented
Losses on cash flow hedges		
Interest rate contracts	$ (13)	Interest expense
	(13)	Total before tax
	5	Tax (expense) or benefit
	(8)	
Unrealized gains and losses on available-for-sale securities		Net gain on sale and
	$ 16	redemption of securities
	16	Total before tax
	(6)	Tax (expense) or benefit
	$ 10	Net of tax

December 31, 2014

Details about Accumulated Other Comprehensive Income Components	Amount Reclassified From Accumulated Other Comprehensive Income	Affected Line Item in the Statement Where Net Income is Presented
Unrealized gains and losses on available-for-sale securities		Net gain on sale and
	$ (13)	redemption of securities
	(13)	Total before tax
	5	Tax (expense) or benefit
	$ (8)	Net of tax

NOTE 21 – SUBSEQUENT EVENT

On November 9, 2015, the Corporation entered into an Agreement and Plan of Reorganization to acquire Century Bancorp and its wholly owned subsidiary, The Citizens Exchange Bank located in Fairmount, Indiana. The assets of the Bank at the time of the announcement were $61,500 (unaudited). Regulatory approvals were received between January 14, 2016 and February 11, 2016 and the Corporation expects the transaction to close in the second quarter of 2016.
