The accompanying notes are an integral part of these unaudited financial statements.

NOTE 1 - ORGANIZATION AND NATURE OF BUSINESS

GainClients, Inc. (the "Company") was incorporated under the laws of the State of Florida on January 3, 2001 as e-Video Network, Inc. e-Video changed its name to Foster Community, Inc. in March of 2003 and subsequently changed its name to GainClients, Inc.

GainClients, Inc. is a software service provider to the real estate industry. Its primary product, the SikkU GCard, is a web and mobile real estate networking service that connects professionals (real estate agents, loan officers, title agents) and consumers where home search behavior is tracked and reported.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

These financial statements have been prepared in conformity with accounting principles generally accepted in the United States ("GAAP").

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and the related disclosures at the date of the financial statements, as well as the reported amounts of revenue and expenses during the periods presented. Estimates are used for the allowance for doubtful accounts, acquired software and website development costs, recoverability of intangible assets with definite lives and other long-lived assets, valuation of deferred tax assets, and for share-based compensation. These assumptions may prove incorrect as facts change in the future. Actual results may differ materially from these estimates under different assumptions or conditions.

Concentrations of Credit Risk

Financial instruments that potentially subject the Company to significant concentration of credit risk consist of its cash and accounts receivable. As of December 31, 2015 and December 31, 2014, the Company held all of its cash in deposit accounts with its financial institutions, which management assesses to be of high credit quality, in order to limit exposure of potential risk.

Credit risk with respect to accounts receivable is dispersed due to the large number of customers. In addition, the Company's credit risk on accounts receivable is largely mitigated by the short payment terms that it offers. Collateral is not required for accounts receivable. The Company maintains an allowance for doubtful accounts such that receivables are stated at net realizable value.

Accounts Receivable

Accounts receivable are uncollateralized customer obligations which generally require payment within the terms determined by management. Accounts receivable are stated at the invoice amount. Payments of accounts receivable are applied to the specific invoices identified on the customer's remittance advice or, if unspecified, to the earliest unpaid invoices.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Allowance for Doubtful Accounts

Accounts receivable are generally due within 30 days and are recorded net of the allowance for doubtful accounts. The Company considers accounts outstanding longer than the contractual terms past due. Management reviews accounts receivable on a regular basis and estimates an amount of losses for uncollectible accounts based on our historical collections experience, age of the receivable, knowledge of the customer.

Based on the management's reviews, the amount of uncollectible accounts receivable at December 31, 2015 and December 31, 2014 is considered negligible; thus, no valuation allowance has been recognized.

Revenue Recognition

The Company recognizes revenue in accordance with the provisions of Accounting Standards Codification ("ASC") 605, "Revenue Recognition", which states that revenue is realized when (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred or services have been rendered to the customer, (iii) the fee is fixed or determinable, and (iv) collectability is reasonably assured. The Company considers a signed agreement, a binding insertion order or other similar documentation reflecting the terms and conditions under which products or services will be provided to be persuasive evidence of an arrangement. Collectability is assessed based on a number of factors, including payment history and the creditworthiness of a customer. The Company generates revenue from the sale of data subscriptions to businesses and professionals mainly associated with the real estate and mortgage industries.

Property and Equipment

The Company records property and equipment at cost and depreciates using the straight-line method over the estimated useful lives of the related assets. The useful lives are as follows:

Computer equipment	3 years
Office equipment, furniture, and fixtures	5 years

Ordinary maintenance and repair costs are charged to expense as incurred. Replacements and betterments, which extend the useful life of the related asset, are capitalized. When assets are retired or otherwise disposed of, the Company records gains or losses based on the differences between the proceeds received and the net book value of the disposed assets.

Software Development Costs and Acquired Software

The costs incurred in the preliminary stages of development are expensed as incurred. Once an application has reached the development stage, internal and external costs, if direct and incremental and deemed by management to be significant, are capitalized amortized on a straight-line basis over their estimated useful lives. Maintenance and enhancement costs, including those costs in the post-implementation stages, are usually expensed as incurred, unless such costs relate to substantial upgrades and enhancements to the website or software that result in added functionality, in which case the costs are capitalized and amortized on a straight-line basis over the estimated useful lives. Amortization expense related to the capitalized website and software development costs is included in operating expenses.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Software Development Costs and Acquired Software (Continued)

Software Development Costs and Acquired Software (continued)

The estimated useful lives of website and software development activities are reviewed frequently and adjusted as appropriate to reflect upcoming development activities that may include significant upgrades and enhancements to the existing functionality.

Impairment of Long-Lived Assets

The Company periodically evaluates its long-lived assets for impairment whenever events or circumstances indicate that they may not be recoverable. Under the provision of ASC 360, "Long-Lived Assets", recoverability is measured by comparing the carrying amount of an asset group to future undiscounted net cash flows expected to be generated. Management groups assets for purposes of such review at the lowest level for which identifiable cash flows of the asset group are largely independent of the cash flows of the other groups of assets and liabilities. If the anticipated undiscounted cash flows of the long-lived assets are less than the carrying amount, their carrying amounts are reduced to fair value, and an impairment loss is recognized.

Cost of Revenue

Cost of revenue consists of expenses related to operating the Company's mobile applications and websites, including Multiple Listing Service data and other home and neighborhood related data.

Share-Based Compensation

The Company accounts for stock-based compensation in accordance with ASC 718, "Compensation – Stock Compensation" ("ASC 718"), which establishes an accounting for stock-based awards in exchange for employee services. Under the provisions of ASC 718, share-based compensation cost is measured at the grant date, based on the fair value of the award, and is recognized as expense over the employee's requisite service period (generally the vesting period of the equity grant). The fair value of the Company's common stock options are estimated using a Black Sholes valuation model with the following assumptions: stock price, exercise price, expected volatility, dividend rate, risk free interest rate and the expected life. The Company expenses stock-based compensation by using the straight-line method. In accordance with ASC 718, excess tax benefits realized from the exercise of stock-based awards are classified in cash flows from financing activities. The future realization of the reserved deferred tax assets related to these tax benefits associated with the exercise of stock options will result in a credit to additional paid in capital if the related tax deduction reduces tax payable. The Company has selected a "with-and-without" approach regarding the accounting for the tax effects of share-based compensation awards.

Warrants

The Company values its warrants using the Black-Scholes option-pricing model. The warrants are not subject to any form of vesting schedule and, therefore, are exercisable by the holders anytime at their discretion during the life of the warrants. No discounts are applied to the valuation determined by the option-pricing model provide that in determining volatility the Company utilizes the lesser of the 90-day volatility as reported by nationally recognized provider of financial market data.

Income (Loss) per Share

Basic income (loss) per share is computed using the weighted-average number of common shares outstanding during the period. Diluted net income (loss) per share is computed using weighted-average number of common shares and excludes employee options and warrants as their effect is anti-dilutive.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES/Fair Value of Financial Instruments (Continued)

Fair Value of Financial Instruments

Financial instruments include cash, accounts receivable, prepayments and other receivables, accounts payable and accrued expenses and other payables. The carrying amounts of cash, accounts receivable, prepayments and other receivables, short-term loans, accounts payable and accrued expenses approximate their fair value due to the short term maturities of these instruments.

The Company adopted ASC 820, Fair Value Measurements and Disclosures as of January 1, 2009 for all financial assets and liabilities and nonfinancial assets and liabilities that are recognized or disclosed at fair value in the financial statements on a recurring basis.

ASC 820 defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact and it considers assumptions that market participants would use when pricing the asset or liability. ASC 820 establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. ASC 820 establishes three levels of inputs that may be used to measure fair value:

- Level 1 – Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company holds. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2 **–** Valuation based on quoted prices in markets that are not active for which all significant inputs are observable, either directly or indirectly.
- Level 3 – Valuation based on inputs that are unobservable and significant to the overall fair value measurement.

Income Taxes

The Company accounts for income taxes according to ASC 740 "Income Taxes" which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial statement and tax bases of assets and liabilities at the applicable enacted tax rates. A valuation allowance is established when necessary to reduce deferred tax assets to the amount expected to be realized. Income tax expense is the tax payable or refundable for the period, plus or minus the change during the period in deferred tax assets and liabilities.

The Company follows the provision of ASC 740-1 "Accounting for Uncertainty in Income Taxes" ("ASC 740-10") effective of 2007. ASC 740-10 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Benefits from tax positions should be recognized in the financial statements only when it is more likely than not that the tax position will be sustained upon examination by appropriate taxing authority that would have full knowledge of all relevant information. A tax position that meets the more likely than not recognition threshold is measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. Tax positions that previously failed to meet the more likely than not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more likely than not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. ASC 740-10 also provides guidance on the

Income Taxes (continued)

accounting for and disclosure of unrecognized tax benefits, interest and penalties. The Company has not been subject to U.S. federal income tax examination by neither tax authorities nor state authorities since its inception in 2001.

Reclassifications

Certain amounts in the prior period have been reclassified to conform to the 2015 presentation with no effect on previously reported net income.

Cash and Cash Equivalents

For purposes of the Statement of Cash Flows, the Company considers all cash accounts, which are not subject to withdrawal restrictions or penalties to be cash equivalents.

Advertising

The Company follows the policy of charging the costs of advertising to expense as incurred. Advertising and promotion costs were $930 and $292 for the years ended December 31, 2015 and 2014, respectively.

Recently Issued Accounting Standards

In May 2011, the Financial Accounting Standards Board ("FASB") amended existing rules covering fair value measurement and disclosure to clarify guidance and minimize differences between GAAP and International Financial Reporting Standards ("IFRS"). The guidance requires entities to provide information about valuation techniques and unobservable inputs used in Level 3 fair value measurements and provide a narrative description of the sensitivity of Level 3 measurements to changes in unobservable inputs. The guidance is effective during interim and annual periods beginning after December 15, 2011. The Company adopted this guidance on January 1, 2012. The adoption of this guidance did not have any impact on the Company's financial position, results of operations or cash flows.

In September 2011, the FASB issued guidance on the presentation of comprehensive income to increase the prominence of other comprehensive income in the financial statements. An entity has the option to present the components of net income and comprehensive income in either one or two consecutive financial statements. This guidance is effective for interim and annual reporting periods beginning after December 15, 2011, with earlier adoption permitted, and must be applied retrospectively. The Company adopted this guidance on January 1, 2012. The adoption of this guidance did not have any impact on the Company's financial position, results of operations or cash flows as the Company does not have any items of other comprehensive income in any period presented, and therefore, the Company is not required to disclose other comprehensive income or comprehensive income.

In September 2011, the FASB issued guidance on testing goodwill for impairment to permit an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill application permitted. The Company adopted this guidance on January 1, 2012. The adoption of this guidance did not have any impact on the Company's financial position, results of operations or cash flows.

Presentation of Sales Taxes

The State of Arizona and counties within the State impose sales taxes on certain items the Company sells to nonexempt customers. The Company's accounting policy is to exclude the sales tax billed to and collected from

customers from revenues and cost of sales and record the sales tax charged to customers as accrued liabilities until remitted to the appropriate state taxing authority.

Operating lease

For the years ended December 31, 2015 and 2014, the Company was continuing the lease agreement for its main office space on a month-to-month basis in the approximate amount of $468. The Company is not responsible for utilities, other common areas and maintenance expenses.

NOTE 3 - PROPERTY AND EQUIPMENT, NET

The following table presents the detail of property and equipment as of December 31, 2015 and December 31, 2014:

	December 31, 2015	December 31, 2014
Computer equipment	17,918	$17,918
Office equipment & furniture	8,631	6,071
Property and equipment	26,549	23,989
Less: accumulated depreciation	(23,848)	(23,373)
Property and equipment, net	$2,701	$616

The Company recorded depreciation expense of $308 and $216 during the years ended December 31, 2015 and 2014, respectively.

NOTE 4 - INTANGIBLE ASSETS, NET

The following table presents the detail of intangible assets subject to amortization as of the following quarters presented.

	December 31, 2015		
	Cost	Accumulated Amortization	Net
Acquired software – Short Message Service	$858,269	$(686,613)	$171,656
Software development costs	1,521,938	(1,198,422)	323,516
Intangible assets	$2,380,207	$(1,885,035)	$495,172

	December 31, 2014		
	Cost	Accumulated Amortization	Net
Acquired software – Short Message Service	$858,269	$(514,961)	$343,308
Software development costs	1,310,298	(1,033,187)	277,111
Intangible assets	$2,168,567	$(1,548,148)	$620,419

Amortization expense recorded for intangible assets was $337,054 and $313,381 for the years ended December 31, 2015 and 2014, respectively. On an annual basis the Company evaluates the carrying value of long-lived assets and determines if impairment has occurred and if so, records a charge for impairment. Management has not performed the evaluation for the years ending December 31, 2015 and 2014, and has concluded no impairment exists as of the years then ended December 31, 2015 and 2014.

NOTE 5 - INCOME TAXES

The company is subject to federal and state income taxes in the United States. The Company has provided a full valuation allowance against its net deferred tax assets as of December 31, 2015 because, based on the weight of available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. Therefore, no tax liability or expense has been recorded in the financial statements. The company filed its 2014

income tax returns and the accumulated tax losses were $5,372,657 for the year ended December 31, 2014. The Company has not filed its 2015 income tax returns as of the date of this report.

NOTE 7 - GOING CONCERN

The financial statements have been prepared assuming that the Company will continue as a going concern. The Company commenced operations in 2001. Since inception, it has incurred losses and negative cash flows from operations. The Company has been dependent upon external financing, including private sales of securities and borrowings from its CEO to fund operations. For the years ended December 31, 2015 and 2014 the Company had

revenue of $61,562 and $99,928 with an inception to date accumulated deficit of $9,909,711 and $8,953,550, respectively. This raises doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments that might result from this uncertainty. Management continues to seek additional funding. There is no assurance that its efforts will be successful, or that the Company will be able to obtain additional debt or equity financing on terms acceptable to the Company. Failure to raise needed funds on satisfactory terms could have a material adverse impact on the Company's business, operating results or financial condition.

D. Principal products or services, and their markets:

The Company is in the sales cycle of its recently released and upgraded service, The SikkU (seek-u) GCard, a multi-platform (web, text, mobile web and iPhone/Android App) electronic business card that builds and promotes relationships among real estate professionals including real estate agents/brokerages, loan officers/mortgage brokerages and title and escrow officers/companies, insurance agents/companies and consumers.

A progressive marketing and relationship-building system, the GCard gives lenders, retailers, title reps, and/or insurance agents the information consumers want and need to search for homes, involving these professionals the home buy/sell process from the start. When participating professionals share their clients with each other, relationships become fluid, are virally grown and developed within each team's network.

Similar to other popular online networks, professional users can invite clients and their industry partners to join their GCard network and be featured as a trusted team member. Teams can then provide real estate, lending and title services and information as they do in real life with the use of technology, a preferred method of consumers.

The SikkU GCard is a new way to create, build, and continue relationships between real estate professionals and consumers in a preferred environment with accurate real estate data that is accessible via smart phones and the web.

The GCard service is currently available in select cities in AZ, San Diego CA, Denver and Colorado Springs, CO, Las Vegas NV, Chicago IL, Dallas/Fort Worth, TX and Seattle WA.
