NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. Nature of Operations and Basis of Presentation

United Resource Holdings Group, Inc. (an Exploration Stage Company); its wholly-owned subsidiary, Dun Glen Mining Corp. ("Dun Glen"); and its majority-owned subsidiary, United Milling and Refining Corp. ("United Milling"; formerly Noble Technologies Corp.); (collectively, the "Company") are incorporated in the State of Nevada.

The Company's principal business activity is the acquisition, exploration, and development of precious metal-bearing properties in North America.

The Company is considered to be an exploration stage company, and substantially all of its efforts are devoted to pursuing these types of opportunities in the mining sector.

Basis of Presentation

These unaudited consolidated financial statements have been prepared in accordance with Generally Accepted Accounting Principles ("GAAP") in the United States of America with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business, rather than through a process of forced liquidation. The financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations.

The accompanying balance sheet, statement of operations, and cash flows are for the years ended December 31, 2014 and 2015 and are consistent with the format of the audited financial statements of the years ending 2011 and 2012 as filed with the OTC Markets on February 26, 2013. These financial statements, taken as whole, have been prepared without audit; correspondingly no such report of our independent auditor is included.

2. Summary of Significant Accounting Policies

Principles of Consolidation

The consolidated financial statements consist of the parent, United Resource Holdings Group, Inc.; its wholly-owned subsidiaries Dun Glen and Pershing; and provisional amounts reflecting the acquisition of 87% United Milling and Refining Corp. (formerly Noble Technologies Corp.). All inter-company balances and transactions have been eliminated upon consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent

assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Fair Value of Financial Instruments

The fair values of the Company's financial instruments are presented in accordance with three-tiered hierarchy as established by GAAP. The fair value of financial instruments is the amount at which the instruments could be exchanged in a current transaction between willing parties. The Company considers the carrying costs of current assets and liabilities approximate their fair values due to the short period of time between the origination of such instruments and their expected realization.

Cash and Cash Equivalents

Cash and cash equivalents include cash in banks and financial instruments which mature within three months of the date of purchase. For the periods presented, the Company did not hold any cash equivalents.

Stock Based Compensation

The Company has on occasion issued equity and equity linked instruments to employees and non-employees in lieu of cash for the receipt of goods and services and, in certain circumstances the settlement of short-term loan arrangements. The applicable GAAP establishes that share-based payment transactions with non-employees shall be measured at the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable.

In these transactions, the Company issues unregistered and restricted equity instruments and determines the fair value of the unregistered and restricted shares issued with non-employees based on its principal and most active trading market, private placements and independent investors. Further, the company's quoted market price does not reflect the economic substance of the transactions, correspondingly, the quoted market price is not the most reliably measurable fair value. This determination was based upon the liquidity restrictions placed upon our unregistered restricted equity instruments.

When unregistered common shares are issued for the settlement of short-term financing arrangements, the reacquisition price of the extinguished financing arrangement is determined by the value of the debt which is more clearly evident, and no additional inducement expense is recognized.

In situations in which we issue unregistered restricted common shares in exchange for goods and services, and the value of the goods and services are not the most reliably measurable, we recognize the fair value of the unregistered restricted equity instruments based on the value of similar instruments issued in private placements in exchange for cash in the most recent transactions (a Level 2 input within the GAAP hierarchy). The Company has determined this methodology reflects the risk adjusted fair value of our unregistered restricted equity instruments using a commercially reasonable valuation technique.

Exploratory Property Costs

The acquisition costs of exploratory properties are initially capitalized. Subsequent exploration costs are expensed as incurred. When it has been determined that a mineral property can be economically developed as a result of establishing proven and probable reserves, the costs then incurred to develop such property, are capitalized. Such costs will be amortized using the units-of-production method over the estimated life of the probable reserve.

The Company assesses the carrying costs for impairment periodically, at least annually or when circumstances arise that may indicate the properties may be impaired. In the event the properties are subsequently abandoned or impaired, any capitalized costs will be charged to operations.

Property, Plant and Equipment

Property and equipment are recorded at historical cost. Minor additions and renewals are expensed in the year incurred. Major additions and renewals are capitalized and depreciated over their estimated useful lives. When property and equipment are retired or otherwise disposed of, the cost and accumulated depreciation are removed from the accounts and any resulting gain or loss is included in the results of operations for the respective period.

Depreciation is provided over the estimated useful lives of the related assets using the straight-line method for financial statement purposes.

Impairment of Long-Lived Assets

The Company reviews the recoverability of its long-lived assets whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. The estimated future cash flows are based upon, among other things, assumptions about future operating performance, and may differ from actual cash flows. Long-lived assets evaluated for impairment are grouped with other assets to the lowest level for which identifiable cash flows are largely independent of the cash flows of other groups of assets and liabilities. If the sum of the projected undiscounted cash flows (excluding interest) is less than the carrying value of the assets, the assets will be written down to the estimated fair value in the period in which the determination is made. No impairment was recognized for the periods presented.

Goodwill

The Company tests goodwill for impairment at least annually. The Company assesses goodwill impairment risk by first performing a qualitative review of entity-specific, industry, market and general economic factors. If significant potential goodwill impairment risk exists, the Company applies a two-step quantitative test. The first step compares the estimated fair value with its carrying value. If the carrying value exceeds its fair value, the second step is applied to measure the difference between the carrying value and implied fair value of goodwill. If the carrying value of goodwill exceeds its implied fair value, the goodwill is considered impaired and reduced to its implied fair value. During 2015 the goodwill was considered impaired and the fair value has been adjusted accordingly.

Income Taxes

The Company recognizes deferred tax assets and liabilities for the expected future tax consequences of events that have been included in financial statements or tax returns. Deferred tax items are reflected at the enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to reverse. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized. Due to the uncertainty regarding the success of future operations, management has valued the deferred tax asset allowance at 100% of the related deferred tax assets.

As of December 31, 2015, the Company did not have any amounts recorded pertaining to uncertain tax positions. The Company files federal income tax returns in the United States. The Company may be subject to reassessment of federal taxes for a period of three years from the date of the original notice of assessment in respect of any particular taxation year. For U.S. income tax returns, the open taxation years range from 2012 to 2014. In certain circumstances, the U.S. federal statute of limitations can reach beyond the standard three year period.

Recent Accounting Pronouncements

There are no recently issued accounting pronouncements that the Company expects to have a material impact on the financial position, results of operations, or cash flows.

Reclassifications

Certain reclassifications have been made to the prior period financial statement presentation in order to conform to the current period presentation. These reclassifications have no effect on the previously reported financial position, results of operations, or cash flows.

3. Going Concern

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern, which contemplates the realization of assets and the liquidation of liabilities in the normal course of business. Since inception, the Company has had no operating revenues to offset its operating losses. The Company's ability to continue as a going concern is uncertain and is dependent upon obtaining additional financing or maintaining continued support from its shareholders and creditors.

In the event that additional financial support is not received or operating profits are not generated, the carrying values of the Company's assets may be adversely affected. Current market conditions have made it increasingly difficult to raise additional capital at favorable terms.

If financing is acquired, the Company's ability to achieve and maintain profitability and positive cash flow is dependent upon its ability to establish a profitable mineral property and generate revenues from commercial production. There is no assurance that the Company will be able to establish an economical mineral property or that the Company will commence commercial production.

These financials do not include any adjustments relating to the recoverability and classification of recorded asset amounts or amounts and classification of liabilities that might result from this uncertainty.

4. Business Acquisitions

In regards to the subsidiary, United Milling and Refining Corporation, in 2015 the mill facility at 1280 Alexandria Court, McCarran, NV was initially subleased and then turned over to a private Nevada company. There is currently a purchase agreement in place between UMRC and the private company to purchase some of the equipment owned by UMRC. The remaining equipment is being stored in the Tahoe-Reno Industrial Park. Due to this change in operation and structure of UMRC, we are reviewing the carrying costs and appraised value of the remaining assets.

Item 6 Business, Products and Services

A) A description of the issuer's business operations are as follows: The issuer is a U.S. company focused on precious metals exploration and development with a special emphasis on mining properties with a history of production along with milling and refining operations. In addition, the business plan anticipates the potential acquisition or development of a wide variety of other vertical mining interests including base metal assets, strategic metal assets, mining equipment, and processing facilities.

B) The original date and State of Incorporation for the issuer was September 27, 1951 in the state of Idaho, however the name was changed to United Resource Holdings Company, Inc. on January 12, 2007 with jurisdiction in the state of Nevada.
