WESTERN SIERRA MINING CORP.

Annual Disclosure Statement

December 31, 2015

WESTERN SIERRA MINING CORP.

Annual Disclosure Statement

December 31, 2015

ITEM 1 – NAME OF ISSUER AND PREDECESSOR

Western Sierra Mining Corp. as of December 4, 2003
Formerly The Gold Chain Mining Company
Utah
August 19, 1907

ITEM 2 – ADDRESS OF ISSUER'S PRINCIPAL EXECUTIVE OFFICES

6175 Plumtree Lane
Edmond, Oklahoma 73034

ITEM 3 - SECURITY INFORMATION

Common Stock

The Company is authorized to issue 350,000,000 shares of common stock. The Company's common stock is traded through OTC Pinks Quotation Service under the symbol "WSRA" (Cusip 95952L200). As of december 31, 2015 there were 325,493,353 shares of the Company's common stock outstanding.

a. Dividends – Through December 31, 2015 the Company has not declared or paid any dividends.
b. Voting Rights – one vote per share of common stock
c. Preemption Rights – None
d. Material Rights – None

Preferred Stock

The Company is authorized to issue 20,000,000 shares of Series A Preferred stock. As of December 31, 2015 there were 11,988,560 shares of the Company's Series A Preferred stock outstanding.

a. Dividends – Through December 31, 2015, the Company has not declared or paid any dividends.
b. Voting Rights – 100 votes per share
c. Conversion Rights – None
d. Preemption Rights- None
e. Material Rights – None

The number of shares or total amount of the securities outstanding for each class of securities authorized

WESTERN SIERRA MINING CORP.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2015

NOTE 1 - Organization and Basis of Presentation

Western Sierra Mining Corp. ("Western Sierra", "the Company", "we" or "us")(formerly Global Decs Corp.) was formed in 1907 in the State of Utah to engage in gold and other precious mineral mining.

On December 1, 2003 we entered into a Share Exchange Agreement with Western Sierra, Inc., whereby Western Sierra, Inc. became a wholly owned subsidiary of Western Sierra Mining Corp. The agreement provided for the exchange of 20,000,000 shares of the Company's common stock for 4,000,000 shares or 100% of the outstanding common stock of Western Sierra, Inc. The shareholders of Western Sierra, Inc. owned approximately 90% of the stock of Western Sierra Mining Corp. after consummation of the transaction. Western Sierra, Inc. was subsequently dissolved and all operations transferred into Western Sierra Mining Corp.

In the opinion of management, the accompanying balance sheets and related statements of income, cash flows, and stockholders' equity, consisting only of normal recurring items, necessary for their fair presentation in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"). Preparing financial statements requires management to make estimates and assumptions that affect the amounts of assets, liabilities, revenue, and expenses. Actual results and outcomes may differ from management's estimates and assumptions.

NOTE 2 - Summary of Significant Accounting Policies

Cash and Cash Equivalents

The Company considers those short-term, highly liquid investments with original maturities of three months or less as cash and cash equivalents.

Mining, Milling and Other Property and Equipment

Mining, milling and other property and equipment is reported at cost. It is the Company's policy to capitalize costs incurred to improve and develop the mining properties. General exploration costs and costs to maintain rights and leases are expensed as incurred.

Depletion of mining improvements will be computed using the units of production method. The Company has made no provision for depletion for the periods ending December 31, 2014 and 2015 as production had not commenced.

Provision is made for depreciation of office furniture fixtures and equipment, machinery and equipment, and building. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets which are 5 to 10 years.

Impairment of Long-Lived Assets

In accordance with Statement of Financial Accounting Standards (“SFAS”) 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" the Company reviews its long-lived assets for impairments. Impairment losses on long-lived assets are recognized when events or changes in circumstances indicate that the undiscounted cash flows estimated to be generated by such assets are less than their carrying value and, accordingly, all or a portion of such carrying value may not be recoverable. Impairment losses then are measured by comparing the fair value of assets to their carrying amounts. The Company recognized no impairment losses at December 31, 2014. The Company recognized $134,926 in impairment losses at December 31, 2015.

Management periodically reviews the recoverability of the capitalized mineral properties and mining equipment. Management takes into consideration various information including, but not limited to, historical production records taken from previous mine operations, results of exploration activities conducted to date, estimated future prices and reports and opinions of outside consultants. When it is determined that a project or property will be abandoned or its carrying value has been impaired a provision is made for any expected loss on the project or property.

Revenue Recognition

Revenues from the sale of minerals are recognized when earned.

Earnings Per Share

Basic profit or (loss) per share is calculated by dividing the Company’s net profit or loss applicable to common shareholders by the weighted average number of common shares issued and outstanding during the period. Diluted earnings per share is calculated by dividing the Company’s net income/(loss) available to common shareholders by the diluted weighted average number of shares outstanding during the year. The diluted weighted average number of shares outstanding is the basic weighted number of shares adjusted for any potentially dilutive debt or equity.

WESTERN SIERRA MINING CORP.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2015

	For the Year Ended December 31, 2015	For the Year Ended December 31, 2014
Income (Loss)	$ 138,097	$ (15,298)
Basic Average Number of Shares Outstanding	325,493,353	325,493,353
Basic Earnings (Loss) Per Share	$ (0.00)	$ (0.00)
Diluted Average Number of Shares Outstanding	325,493,353	325,493,353
Diluted Earnings (Loss) Per Share	$ (0.00)	$ (0.00)

Income Taxes

The Company records deferred income taxes using the liability method as prescribed under the provisions of SFAS No. 109. Under the liability method, deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial statement and income tax bases of the Company's assets and liabilities. An allowance is recorded, based upon currently available information, when it is more likely than not that any or all of the deferred tax assets will not be realized. The provision for income taxes includes taxes currently payable, if any, plus the net change during the year in deferred tax assets and liabilities recorded by the Company.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Environmental Remediation Costs

Environmental remediation costs are accrued based on estimates of known environmental remediation exposure. Such accruals are recorded even if significant uncertainties exist over the ultimate cost of the remediation. It is reasonably possible that the Company's estimates of reclamation liabilities, if any, could change as a result of changes in regulations, extent of environmental remediation required, means of reclamation or cost estimates. Ongoing environmental compliance costs, including maintenance and monitoring costs, are expensed as incurred. There were no environmental remediation costs accrued at December 31, 2014 and 2015.

NOTE 3 - Stockholders' Equity

At various stages in the Company's development we have issued shares of common stock, valued at fair market value, for services or assets with a corresponding charge to operations or property and equipment. In accordance with SFAS 123, these transactions, except for stock issued to employees, have been recorded on the Company's books at the fair value of the consideration received or the fair value of the common stock issued, whichever is more reliably measured.

NOTE 4 – Water Rights

On May 21, 2014, the Company completed the acquisition of various water rights in Northern Colorado with a combined appraised value of $40,500,000 in exchange for 11,888,560 shares of the Company's Series A Preferred Stock. SFAS 123 specifies that this transaction be recorded on the Company's books at the fair value of the consideration received or the fair value of the common stock issued, whichever is more reliably measured at the date of the transaction. Since the Company's Series A Preferred Stock is not traded and therefore has no market and since the water rights are well documented and have accompanying recent appraisals and valuation reports by certified third party appraisers and engineers, the Company has determined that the acquisition should be valued and recorded on the books based on the appraised value of $40,500,000 in accordance with SFAS 123.

NOTE 5 - Mining Properties

Gold River Mines:
On May 5, 2008, the Company acquired eight mining properties from Gold River Exploration Inc. in exchange for 56,555,166 shares of the Company's common stock and $50,000 in cash. The mines have a total of 102,000 oz. gold resources, 593,000 oz. silver resources, 423,000 oz. probable gold resources and 362,000 oz. probable silver resources. At $1200/oz. gold and $20/oz. silver, the gold reserves total $122,000,000, the silver reserves total $11,000,000, the probable gold resources total $507,000,000 and the probable silver resources total $7,000,000. SFAS 123 specifies that this transaction be recorded on the Company's books at the fair value of the consideration received or the fair value of the common stock issued, whichever is more reliably measured at the date of the transaction. Since the Company's stock had little or no activity in the six months preceding the date of the acquisition of the mining properties and since the reserves on the mining properties are well documented and certified by a licensed geologist, the Company has determined that the acquisition should be valued and recorded on the books based on the discounted value of the reserves in accordance with SFAS 123. The Company therefore calculated the net value of the reserves, net of estimated production costs and discounted over the recovery period and to reflect uncertainties, to be $18,530,408. On June 8, 2010, the Company sold the Sun Gold and Treasure Gulch Mines to VHGI Holdings, Inc. in exchange for $550,000 cash, 5,000,000 shares of VHGI common stock and a royalty of 2% of gross sales.

The remaining properties have a total of 88,000 oz. gold resources and 755,000 oz. silver resources. At $1,200/oz. gold and $20/oz. silver, the gold resources total $106,000,000 and the silver resources total $15,000,000.

Gold Star:
On October 15, 2011, a shareholder of the company contributed several mining properties including the Gold Star and Gold Crown. The Gold Star consists of 350 acres in central Arizona and has 168,750 oz. of gold resources valued at $203,000,000. The acquisition was recorded on the Company's books at $3,500,000, the posted selling price of the property.

NOTE 6 – Joint Venture

On July 29, 2015 Western Sierra Mining Corporation (the "Company") announced that it had signed a Letter of Intent with Global Hemp Group Inc. ("GHG") of Surrey, British Columbia (CSE: GHG / FRANKFURT: GHG / OTCQB: GBHPF) to partner on the acquisition of agricultural lands for the purpose of hemp cultivation and the development of a Value-Added Hemp Processing Zone, strategically located adjacent to the hemp farming areas.

This joint venture allows the Company to put its current water rights assets into "beneficial use" to irrigate and grow hemp as a sustainable cash crop. Upon harvest, his hemp will be processed -- for sale and further refinement in myriad industrial, commercial and nutritional applications,

The partnership will create a "Hemp Processing Zone" (industrial processing campus) in which the hemp seed will be transformed into oil and protein powder for the food industry; Cannabidiol (CBD) will be extracted from the leaves and flowers to meet rapidily increasing product demand; and the straw will be processed into fiber, hurd (woody core) and dust. The fiber will then be further processed for the textile industry to supplement cotton and synthetic fiber currently in use. The hurd would be processed into chips to be utilized in sustainable building materials for the construction industry, and the dust recovered would be pelletized for a variety of target markets. Initial building materials produced will be utilized in the construction of the processing facilities and affordable work force housing for the Company's employees. These various processing functions represent markedly increased revenue for the Company.

NOTE 7 - Related Parties

There were no related party transactions in 2014 or 2015.

NOTE 8 - Notes Payable	December 31, 2014	December 31, 2015
Notes payable to shareholders, unsecured, due October 23 - November 14, 2004, bearing no interest	$107,450	$107,450

Notes payable to two shareholders, unsecured, due January 2, 2017, bearing no interest	25,000	20,000
Note payable, unsecured, due April 1, 2015, bearing interest at 2.5%	222,245	347,188
Note payable, secured by water rights, due May 21, 2015, bearing no interest	1,045,000	1,090,000
Note payable, secured by water rights, due April 1, 2015, bearing interest at 10%	385,504	330,349
Note payable, secured by water rights, due March 23, 2015, bearing interest at 12%	455,000	455,000
	3,825,732	3,915,519
Less: Current portion	(2,132,750)	(2,242,537)
Long-Term Debt	$1,692,982	$1,672,982

Maturities of long-term debt are as follows:

2016	2,242,537
Total	$2,242,537

NOTE 9 - Income Taxes

The Company has adopted FASB 109 to account for income taxes. No provision for income taxes has been recorded in these financial statements based on the net operating loss carry-forward of $18,475,769 as of December 31, 2015 that will be offset against future taxable income. Due to the uncertainty as to the utilization of net operating loss carry- forwards, an evaluation allowance has been made to the extent of any tax benefit that net operating losses may generate.

Deferred income taxes reflect the net tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Deferred tax assets and the related valuation account as of December 31, 2014 and 2015 are as follows:

	2015	2014
Deferred tax asset:		
Net operating loss carry-forward	$ 7,390,000	$ 7,335,000
Valuation allowance	(7,390,000)	(7,335,000)
	$ -	$ -

At December 31, 2015, the Company had net operating loss carry-forwards totaling $18,475,769 that, if conditions of the Internal Revenue Codes are met, can be carried forward to offset future earnings. These carry-forwards expire in various amounts through 2035.

ITEM 6 - ISSUER'S BUSINESS, PRODUCTS AND SERVICES

Business Development

The Company was incorporated under the laws of the State of Utah on August 19, 1907 as The Gold Chain Mining Company. On September 28, 2001 the Company changed its name to Global DECS Corp. On December 1, 2003 we entered into a Share Exchange Agreement with Western Sierra, Inc., whereby Western Sierra, Inc. became a wholly owned subsidiary of Western Sierra Mining Corp. The agreement provided for the exchange of 20,000,000 shares of the Company's common stock for 4,000,000 shares or 100% of the outstanding common stock of Western Sierra, Inc. The shareholders of Western Sierra, Inc. owned approximately 90% of the stock of Western Sierra Mining Corp. after consummation of the transaction. Western Sierra, Inc. was subsequently dissolved and all operations transferred into Western Sierra Mining Corp.

We are currently listed with the National Quotation Bureau under the trading symbol WSRA.

The Company is on a calendar year-end basis.

The Company is not party to any material legal proceedings or administrative actions.

Business of Issuer

Historically, Western Sierra Mining Corporation has focused on the strategic acquisition, sale, joint venture, management and extraction of precious metals on its mineral properties and reserves in the western United States and primarily in Central Arizona. On May 21, 2014 the Company completed the acquisition of various water rights in Northern Colorado with a combined appraised value of $40,500,000 and intends to utilize these assets for real estate development, agricultural production and other beneficial uses as the Company expands and enhances its asset base. The Company intends to aggressively pursue development of the gold and silver assets it currently owns and to simultaneously pursue a diversification into other natural resource related projects. The Company will begin systematically implementing its new business model resulting in the creation of new commodity based endeavors to the direct benefit the Company's shareholders.

On July 29, 2015 Western Sierra Mining Corporation (the "Company") announced that it had signed a Letter of Intent with Global Hemp Group Inc. ("GHG") of Surrey, British Columbia (CSE: GHG / FRANKFURT: GHG / OTCQB: GBHPF) to partner on the acquisition of agricultural lands for the purpose of hemp cultivation and the development of a Value-Added Hemp Processing Zone, strategically located adjacent to the hemp farming areas.

This partnership (which shall be formalized in August, 2015), allows the Company to put its current water rights assets into "beneficial use" to irrigate and grow hemp as a sustainable cash crop. Upon harvest, his hemp will be processed -- for sale and further refinement in myriad industrial, commercial and nutritional applications,

The partnership will create a "Hemp Processing Zone" (industrial processing campus) in which the hemp seed will be transformed into oil and protein powder for the food industry; Cannabidiol (CBD) will be extracted from the leaves and flowers to meet rapidly increasing product demand; and the straw will be processed into fiber, hurd (woody core) and dust. The fiber will then be further processed for the textile industry to supplement cotton and synthetic fiber currently in use. The hurd would be processed into chips to be utilized in sustainable building materials for the construction industry, and the dust recovered would be pelletized for a variety of target markets. Initial building materials produced will be utilized in the construction of the processing facilities and affordable work force housing for the Company's employees. These various processing functions represent markedly increased revenue for the Company.

The Company's SIC Code is 6794.

The Company has never been a "shell company."

The Company has no environmental cleanup issues or liabilities.

The Company has two full-time employees and four part-time employees.

Principal Products

The Company's principal products are water, gold, silver and other materials extracted from ore bodies. All these products are considered commodities and have ready, well established, worldwide markets for as much as the Company can produce.

Distribution and Marketing
The Company's products have well established worldwide markets and require no distribution or marketing efforts.

New Products
Not Applicable

Competitive Business Conditions
The Company's competes with other companies and individuals to acquire mining projects and to recruit and train qualified employees. Many of these companies are substantially larger and have greater financial resources than we do.

Sources and Availability of Raw Materials
The acquisition of gold properties and their exploration and development are subject to intense competition. Companies with greater financial resources, larger staffs, more experience and more equipment for exploration and development may be in a better position than WSMC is to compete for new mineral properties. The Company has a total of eight mineral properties and has several other properties under lease or option. These properties should provide the Company with an ample supply of mining projects for the foreseeable future.

Major Customers
Gold and other precious metals are sold on historically well established, worldwide markets with numerous purchasers for the entirety of the Company's production.

Patents and Trademarks
The Company has no patents or trademarks.

Government Regulations
Many of the Company's mining claims are located on property owned and managed by either the United States Forest Service or the Bureau of Land Management. The Company is therefore subject to various regulations and permitting requirements with respect to these claims. The Company anticipates no significant governmental regulatory delays with respect to the development of these claims. The Company can also be subject to various federal and state environmental regulations. Furthermore, there can be no assurance that future changes to environmental legislation and related regulations, if any, will not adversely affect the Company's operations. The Company could be held liable for environmental hazards that exist on the properties in which Western holds interests, whether caused by previous or existing owners or operators of the properties. The Company has not incurred any environmental remediation costs to date.

Risk Factors

Some information contained in or incorporated by reference into this report may contain "forward-looking statements." These statements include comments regarding exploration and mine development and construction plans, costs, grade, production and recovery rates, permitting, financing needs, the availability of financing on acceptable terms or other sources of funding, and the timing of additional tests, feasibility studies and environmental permitting. We believe the expectations reflected in those forward-looking statements are reasonable. However, we cannot assure that these expectations will prove to be correct. Actual results could differ materially from those anticipated as a result of the risk factors, including but not limited to: worldwide economic and political events, volatility in market, financial market conditions and the availability of debt or equity financing on acceptable terms; uncertainties regarding future changes in tax and foreign-investment legislation or implementation of existing tax legislation and the availability of experienced employees.

Issues and Uncertainties

The following issues and uncertainties, among others, should be considered in evaluating our financial outlook. Our ultimate success will depend on our ability to generate profits from our properties. Our viability is largely dependent on the successful commercial development of our currently owned properties. We lack operating cash flow and rely on external funding sources. We cannot assure that additional funding will be available to allow us to fulfill such obligations.

Results of Operations

For the year ended December 31, 2015 our operating costs and expenses totaled $3,171. We had impairment losses of $134,926. We had negative working capital of $2,674,668 as of December 31, 2015. To the extent that cash flow is unavailable, management intends to raise all necessary capital through private financing, the sale of our securities and/or joint venture partnerships.

Plan of Operations and Need for Additional Financing

The Company has acquired significant assets and intends to apply these assets directly to agricultural production and other beneficial uses as we expand and enhance our asset base and initiate capital formation strategies to address aggressive development of current commodity endeavors, including mining projects; oil and gas service industry projects; coal production; and various other natural resource-related projects. The Company is also making changes in its business model and conforming management changes and enhancements.

Environmental Issues

There are no significant environmental concerns or existing reclamation requirements.

Off-Balance Sheet Transactions

The Company does not have any transactions, agreements or other contractual arrangements that constitute off-balance sheet arrangements.

ITEM 7 – NATURE AND EXTENT OF ISSUER'S FACILITES

The Company maintains an administrative office at 6175 Plumtree Lane, Edmond, Oklahoma 73034 on a "month to month" rental basis. The Company's operations occur at the mine locations referenced above.
