Cautionary Factors That May Affect Future Results (Cautionary Statements Under the Private Securities Litigation Reform Act of 1995)

The disclosure and analysis set forth herein contains certain forward looking statements, particularly statements relating to future actions, performance or results of current and anticipated

products and services, sales efforts, expenditures, and financial results. From time to time, the Company also provides forward-looking statements in other publicly released materials, both written and oral. Consequently, no forward-looking statement can be guaranteed. Actual future results may vary materially.
The Company undertakes no obligation to update any forward-looking statements, but investors are advised to consult any further disclosures by the Company on this subject in its subsequent filings. Furthermore, as permitted by the Private Securities Litigation Reform Act of 1995, the Company provides these cautionary statements identifying risk factors, listed below, which could cause the Company's actual results to differ materially from expected and historical results. It is not possible to foresee or identify all such factors. Consequently, this list should not be considered an exhaustive statement of all potential risks, uncertainties and inaccurate assumptions.

RISK FACTORS

No Active Market. Although the Company's shares are listed on the OTC Markets Group Inc. listing service, the Company believes that the public trading price may be an inaccurate representation of the value of the Company because there is little or no trading volume in the Company's shares and no analysts or NASD market makers actively follow the Company.

We have never issued a Dividend and don't anticipate any Dividends in the future. Verde Media Group Inc. has never issued a dividend and we do not anticipate paying dividends on our common stock in the foreseeable future. Furthermore, we may also be restricted from paying dividends in the future pursuant to subsequent financing arrangements or pursuant to Delaware law.

You could be diluted from the Issuance of additional Common and Preferred Stock. Verde Media Group is authorized to issue up to 500,000,000 shares of common stock and 10,000,000 shares of preferred stock. To the extent of such authorization, our board of directors will have the ability, without seeking shareholder approval, to issue additional shares of common and preferred stock in the future for such consideration as the board may consider sufficient. The issuance of additional common stock in the future may reduce your proportionate ownership and voting power.

Volatility of Stock Prices. In the event that there is an established public market for the Company's Common Stock, market prices will be influenced by many factors and will be more subject to significant fluctuations in response to variations in operating results of the Company and other factors such as investor perceptions of the Company, supply and demand, interest rates, general economic conditions and those specific to the industry, developments with regard to the Company's activities, future financial condition and management.

Applicability of Low Priced Stock Risk Disclosure Requirements. The Common Stock of the Company may be considered a low priced security under rules promulgated under the Securities Exchange Act of 1934. Under these rules, broker-dealers participating in transactions in low priced securities must first deliver a risk disclosure document which describes the risks associated with such stocks, the broker-dealer's duties, the customer's rights and remedies, certain market and other information, and make a suitability determination approving the customer for low priced stock transactions based on the customer's financial situation, investment experience and objectives. Broker-dealers must also disclose these restrictions in writing to the customer, obtain specific written consent of the customer, and provide monthly account statements to the customer. With all these restrictions, the likely effect of designation as a low priced stock will be to decrease the willingness of broker-dealers to make a market for the stock, to decrease the liquidity of the stock and to increase the transaction cost of sales and purchases of such stock compared to other securities.

VERDE MEDIA GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Period Ended December 31st 2015

Note 1 – ORGANIZATION

Verde Media Group Inc. operates a managed media financing company with production, distribution, and development functions for film and television. The company also incorporates an Agency division managing multi-media, public relations and marketing functions for corporate clientele and a Biotech Division.

Note 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America.

Going Concern

These financial statements have been prepared in accordance with generally accepted accounting principles applicable to a going concern, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. As of December 31, 2015, the Company has negative working capital, and an accumulated deficit of $4,293,869. The company's ability to continue as a going concern is contingent upon the successful completion of additional financing arrangements and its ability to achieve and maintain profitable operations. While the Company is expanding its best efforts to achieve the above plans, there is no assurance that any such activity will generate funds that will be available for operations. These conditions raise substantial doubt about the Company's ability to continue as a going concern. These financial statements do not include any adjustments that might arise from this uncertainty.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Risks and Uncertainties

The Company is subject to substantial risks from, among other things, intense competition associated with the industry in general, other risks associated with financing, liquidity requirements, rapidly changing customer requirements, limited operating history and the volatility of public markets.

Note 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair Value Measurements

Accounting Standards Codification ("ASC") 820-10, Fair Value Measurements, defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles and enhances disclosures about fair value measurements. Fair value is defined under ASC 820-10 as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the note Principal or the most advantageous market for an asset or liability in an orderly transaction between participants on the measurement date. Valuation techniques used to measure fair value

under ASC 820-10 must maximize the use of observable inputs and minimize the use of unobservable inputs. The standard describes a fair value hierarchy based on the levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value which are the following:

• Level 1 - Quoted prices in active markets for identical assets or liabilities.

• Level 2 - Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or corroborated by observable market data or substantially the full term of the assets or liabilities.

• Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the value of the assets or liabilities.

The fair value of the accounts receivable, accounts payable, notes payable are considered short term in nature and therefore their value is considered fair value.

Cash

The Company considers all highly liquid instruments purchased with a maturity of three months or less to be cash equivalents. The Company minimizes its credit risk associated with cash by periodically evaluating the credit quality of its primary financial institution. The balance at times may exceed federally insured limits. At December 31, 2015 no cash balances exceeded the federally insured limit.

Accounts receivable and allowance for doubtful accounts

Accounts receivable are stated at the amount management expects to collect. The Company generally does not require collateral to support customer receivables. The Company provides an allowance for doubtful accounts based upon a review of the outstanding accounts receivable, historical collection information and existing economic conditions. As of December 31, 2015 the allowance for doubtful accounts was $0 and bad debt expense for the year ended December 31, 2015 was $0.

Note 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue Recognition

The Company follows the provisions of Securities and Exchange Commission Staff Accounting Bulletin ("SAB") No. 104, *Revenue Recognition* The Company recognizes revenue when all of the following conditions are met:

- there is persuasive evidence of an arrangement;
- the service has been provided to the customer;
- the collection of the fees is reasonably assured; and
- the amount of fees to be paid by the customer is fixed or determinable.

The Company records revenue as services are performed. Invoicing is done at the beginning of each month for the services to be rendered that month.

Advertising

Advertising expenses consist primarily of costs of promotion for corporate image and product. The Company expenses all advertising costs as incurred.

Intangible Assets

The Company accounts for its intangible assets pursuant to ASC 350-20-55-24, " *Intangibles - Goodwill and Other"*. Under ASC 350, intangibles with definite lives continue to be amortized on a straight-line basis over the lesser of their estimated useful lives or contractual terms. Intangibles with indefinite lives are evaluated at least annually for impairment by comparing the asset's estimated fair value with its carrying value, based on cash flow methodology. Intangibles with definite lives are subject to impairment testing in the event of certain indicators. Impairment in the carrying value of an asset is recognized whenever anticipated future cash flows (undiscounted) from an asset are estimated to be less than its carrying value. The amount of the impairment recognized is the difference between the carrying value of the asset and its fair value.

Income Taxes

Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due plus deferred taxes related primarily to differences between the bases of assets and liabilities for financial and income tax reporting. The deferred tax assets and liabilities represent the future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled. Deferred taxes are also recognized for operating losses that are available to offset future federal and state income taxes. Any interest charges on underpayment or other assessments are recorded as interest expense. Any penalties are recorded in Operating Expenses.

Note 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Net income (loss) per Common Share
Basic net income (loss) per share is computed by dividing the net loss attributable to the common stockholders by the weighted average number of shares of common stock outstanding during the period. Fully diluted loss per share is computed similar to basic loss per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive.

Since the Company reflected a net loss for the year ended December 31, 2015, the effect of considering any common stock equivalents would have been anti-dilutive and therefore a separate computation of diluted loss per share is not presented.

Recent Accounting Pronouncements

No new accounting pronouncements issued or effective during the fiscal year has had or is expected to have a material impact on the financial statements.

Note 3 – OFFICER NOTES PAYABLE

During the year ended December 31, 2015, officers of the Company loaned $12,400 for operating purposes. The amount is due on demand and bears no interest.

Note 4 – STOCKHOLDERS' EQUITY

No new shares of the company’s common or preferred stock was issued for the year ended December 31 2015.

Note 5 – WARRANTS

On February 14, 2013, the Company entered into a warrant purchase agreement for 163,805 series C warrants. Under the terms of the agreement, the warrant holder was entitled to purchase an aggregate number of common shares of the Company’s common stock equal to the total outstanding

warrants held by the warrant holder times $9.14 divided by an exercise price equal to 50% of the lowest closing bid price of the Company's common stock during the 5 trading days preceding the conversion. The warrants are convertible for up to two years. On February 15th 2015 the series C warrants expired.

Note 6 – COMMITMENTS AND CONTINGENCIES

Litigations, Claims and Assessments

The Company may become involved in various lawsuits and legal proceedings, which arise in the ordinary course of business. However, litigation is subject to inherent uncertainties, and an adverse result in these or other matters may arise that may harm its business. The Company is currently not aware of any such legal proceedings or claims that they believe will have, individually or in the aggregate, a material adverse affect on its business, financial condition or operating results.
