Item XVI Management's Discussion and Analysis or Plan of Operation

A. Plan of Operation

Not Applicable as Company has had fluctuating revenues from Operations in the last fiscal years.

B. Management's Discussion and Analysis of Financial Condition and Results of Operations.

a. Full fiscal years discussion

There was an increase in revenues from 2012 to 2013 which was experienced due to a number of reasons. In the latter part of the latter year, there was a physical move to a new, less costly office space that interrupted operations for a period of time. The Company then re-tooled and upgraded its software program and experienced a learning curve in training employees on how to use the new software. The Company took some time to upgrade the level of employees on staff and the Company feels that, going forward with lower overhead, newer technology, and more experienced employees, these strategic moves will pay off by increased profits and shareholder value. Lastly, there has been a changing trend in the Home Health Market and competition has sharply increased.

During 2012, the Company diversified its business into the technology industry, which caused fluctuations in revenues, gross, and net profits. Margins were experienced. This trend has management focusing their efforts on possible entry into other markets.

i. As noted, there are noted documented trends, events, and uncertainties that had a material impact on the Company's short-term or long-term liquidity;
ii. The Company's cash flow is a result of revenues from Operations
iii. There are no material commitments for capital expenditures
iv. The Company acquired ACG International Equity Services, Inc.
v. There are no significant elements of income or losses that do not arise from the issuer's continuing operations.
vi. There have been material changes from period to period in the line items of the Company's financial statements.
vii. There are no seasonal aspects that had a material effect on the financial condition or results of operation of the Company.

b. Interim Periods

Not applicable as the Company had two full years of operations

C. Off-Balance Sheet Arrangements

The Company has no Off-Balance Sheet Arrangements as defined in the guidelines to prepare this Annual Update
