DEPRECIATION & AMORTIZATION

Code Development and certain legal costs previously capitalized are being amortized using the straight line method over the estimated useful lives of the assets. Depreciation and Amortization has commenced since certain of the Company's products are currently available for general release to customers.

2. BASIS OF PRESENTATION

These Financial Statements have been compiled using historical data from reports prepared by the previous management of the Company along with the recent activity of the Company and the Shareholder Group who initiated the change in the Company's management. These financial statements are preliminary and are based on the best information available at this time. As the discovery and review of certain historical documents continues (the current management was voted into office on October 17, 2011) any revisions will be updated in the next fiscal quarter (See Note 5). These statements have not been audited or reviewed and accordingly, no opinion or any other form of assurance is expressed on them.

3. COMPOSITION OF CERTAIN ASSET ACCOUNTS

Since it is currently being demonstrated to prospective customers the Company believes it meets the feasibility test required for capitalization. Also, the Company has adequate technical, financial and any other required resources to complete the development and sell or lease the resulting product or process. 5. LITIGATION

On March 21, 2013, the Company and its subsidiary, Digital Focus, Inc. (DFI), filed a lawsuit in the Clark County, Nevada District Court to protect and resolve their respective rights as to certain intellectual property and technology, which lawsuit and corresponding counterclaims could have a material effect on these financial statements and the financial position of the Company. In recent months, the Company has completed development of new digital compression and scaling technologies that are unrelated to the Company's original technology that is the subject of the lawsuit. The Company's new technologies include new proprietary algorithms that are described at least in part in provisional patent applications filed by the Company in 2015. As a result of such new product developments, the Company no longer sees the need to continue to spend valuable resources litigating over technology that is not in development by the Company. Accordingly, upon motion made by the Company and granted by the Court, the Company's claims against Defendants were voluntarily dismissed on February 19, 2016. Motions to dismiss and for summary judgment as to Defendants' counterclaims against the Company, DFI and certain individual Counter defendants are pending with the Court. On the basis of
