Seeker Tec International, Inc.

ANNUAL REPORT

December 31, 2013

CUSIP: 81572V 109 | TRADING SYMBOL: SNTL

SEEKER TEC INTERNATIONAL, INC.
YEAR END REPORT

1. The exact name of the issuer and the address of its principle executive offices

Seeker Tec International, Inc. hereinafter "Issuer", "the Company", or "SNTL". Formerly Syncronys International, Inc. name changed March 29, 2013.

2. Address of the issuer's principal executive offices

Address:	123 W. Nye Lane, Suite 129
	Carson City, NV 89706
Telephone:	(800)-382-7271
Email:	info@seekertecinternational.com
Web:	www.seeker-tec.com
No IR Firm	

3. Security Information

Trading Symbol: **SNTL**
Exact title and class of securities outstanding: **Common Shares**
CUSIP: **81572V 109**
Par or Stated Value: **.001**
Total shares authorized: **600,000,000** as of: **December 31, 2013**
Total shares outstanding: **594,803,903** as of: **December 31, 2013**

Transfer Agent:
Pacific Stock Transfer Company
6725 Via Austi Pkwy, Suite 300
Las Vegas, NV 89119
Telephone: 702-361-3033
Toll Free: 800-785-PSTC (7782)
Fax: 702-433-1979
Web: www.pacificstocktransfer.com

The transfer agent is registered under the Exchange Act and operates under the regulatory authority of the SEC and FINRA.

List any restrictions on the transfer of security: **None**

Describe any trading suspension orders issued by the SEC in the past 12 months: **None**

List any stock split, stock dividend, recapitalization, merger, acquisition, spin-off, or reorganization either currently anticipated or that occurred within the past 12 months:

On March 29, 2013, the company acquired 100% of Seeker Technologies Ltd, a UK company, in a share exchange agreement which will remain as a wholly own subsidiary of Seeker Tec Int'l, Inc. The company changed its name to Seeker Tec Int'l to reflect its corporate strategy. The Company declared a stock dividend spin off to current shareholders to form Lectric, Inc. record date of March 29, 2013.

4. Issuance History

A. The nature of each offering (e.g., Securities Act Rule 504, intrastate, etc.): **Non registered shares 4(2)**

B. Any jurisdictions where the offering was registered or qualified: **None**

C. The number of shares offered and sold:

2011 1,210,000 shares - non registered 4(2) subscription - non- affiliate

2012 1,950,000 shares, 3,100,000 shares, 2,000,000 shares, and 500,000 shares.
Non registered 4(2) Subscriptions - Non- affiliates

2013 On March 29, 2013, the company acquired 100% of Seeker Technologies, Ltd, a UK company, in a share exchange agreement which will remain as a wholly own subsidiary of Seeker Tec Int'l, Inc.
475,900,000 shares were issued to Seeker Technologies, Ltd shareholders in exchange for 100% of its shares. 40,000,000 were issued for .001 cent per Subscription to Non- affiliate Freedom Holdings LLC.
5,000,000 shares and 1,006,711 shares were issued in April 2013 as non registered subscriptions to non- affiliates and 86,789 in August 2013 by subscription.

During the 4th quarter ended December 31, 2013 the company issued 1,600,000 shares to Mr G. Deacon for an investment of $16,000 in the company and 3,250,000 to the Carlson family for an investment of $19,500 in the company.

D. The price at which the shares were offered, and the amount actually paid to the issuer:

.001 or as indicated

E. The trading status of the shares: **Restricted**

F. Whether the certificates or other documents that evidence the shares contain a legend (1) stating that the shares have not been registered under the Securities Act and (2) setting forth or referring to the restrictions on transferability and sale of the shares under the Securities Act: **Yes**

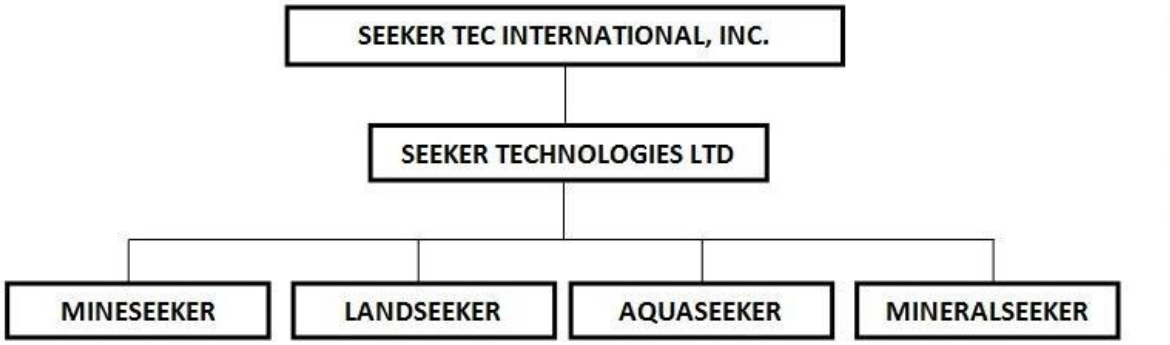

5. Financial Statements

The financial statements for year ended December 31, 2013 are hereby incorporated by reference and attached as Exhibit 1. These financial statements include balance sheets, statements of income, statements of cash flows, a statement of changes in stockholders' equity, and financial statement notes.

6. Describe the Issuer's Business, Products and Services

A. Management's Discussion and Analysis or Plan of Operation

The Seeker Tec International's core business is in aerial survey and mapping using a range of innovative imaging and sensor technology.

The Seeker Tec offering is underpinned by a unique multi-spectral imaging technology that can detect surface and sub-surface objects while mapping the area providing visual overlay of the graphic images.
This has applications in oil & gas exploration, agriculture, water exploration, and environmental survey. To date the main focus, through Seeker Tec's Mineseeker division, has been primarily in the detection of landmines and unexploded ordnance (UXO), targeting a humanitarian market in excess of $50 billion.

Currently the United Nations (along with many other authorities) state that there are over 100 million landmines buried in 70 countries; that it will take hundreds of years to clear, at a cost in excess of $50 billion. These figures exclude Iraq, Afghanistan and Libya.

The cost of clearing the land is on average more than $1 million per square kilometre, and it is estimated that over 800 thousand square kilometres are affected across the planet. An average landmine operative can only clear 35 square metres per day!

The Seeker Tec product is unique and offers huge benefits of cost and time over existing methods. The technology is a fusion of multi-spectral images, which have been developed and extensively trialled. Each system has been designed to survey up to 5 square kilometres per day, at a considerable cost saving for the client over traditional clearance methods.

In fact, over 80% of the land designated as minefields is actually free of landmines. Seeker Tec will concentrate on wide area reduction, identifying minefields, and releasing land surveyed as 'mine field free' back to practical usages, quickly and without the need for additional costs of clearance.

This dramatically increases the land available for the economic benefit of the local population and enables businesses to develop the land for agriculture, tourism, mineral exploration, and construction as applicable.

Seeker Tec is already in discussions with potential customers including governments, international funding agencies, and businesses with a commercial interest in land reclamation, such as oil and gas corporations and has established partnerships to market its technology and services in Southern Africa, the Middle East and South America.

Furthermore these markets also have requirements for specialist aerial surveying and mapping outside the field of minefield detection.

Seeker Tec is uniquely placed to deliver a cost effective, efficient solution to one of the most economically devastating, man-made problems affecting the world today.

Plan of Operation

It is estimated and generally agreed that of all the designated minefields less than 10% actually contain mines. The issue is that no one is certain as to which 10%. Therefore, up to 90% of the funding for mine clearance is often wasted in searching for landmines where there are none.

Seeker Tec's rapid and safe mapping systems can be used highly effectively to survey such areas and identify those areas that are actually mined and those which are not.

It will be possible to release large areas of land back into use as it is identified as minefield free. Expensive and time consuming demining processes should only be necessary on the remaining 10% at a future date and time when the necessary resources are available.

For many governments this will represent significant steps towards economic development as well an important PR gain for them, showing tangible movement towards meeting their international demining obligations and enabling them to claim 90% land clearance in a very short time and at a readily affordable cost.

Not all terrains will be immediately suitable for analysis using GPSAR, but we expect that initially up to 50% will be, representing potentially hundreds of thousands of square kilometres. However, the land most suited to our technology will also be the most valuable and desirable land – agricultural land or areas suitable for mineral and hydro-carbon exploration.

Development plans of Seeker Tec will incrementally allow us to map the remaining terrains. The company has already demonstrated the ability to enhance and cross reference other data from high definition camera systems and other complimentary technology. The Seeker Tec team has significant experience in the operation of aerial imaging systems.

Seeker Tec management is already in discussions with a number of potential customers, including governments and commercial organisations in South Africa, Mozambique and Angola, government representatives and agents in the Middle East as well as oil and gas companies, and landowners with interests in mineral exploration and agricultural development. There has also been significant interest from the traditional demining community.

Following on from the initial service of minefield mapping, there are a number of other service offerings that will take advantage of Seeker Tec's multispectral imaging radar (MIR™).

The list is large, but includes:

- Buried utilities
- Pipelines/transmission etc.
- Geological survey
- Water exploration
- Environmental impact monitoring
- Animal census
- Plant and crop growth
- Corridor mapping - power lines, communications planning
- Change detection – erosion
- Pipeline monitoring, break detection
- Border patrols/monitoring

Seeker Tec is committed to assembling cutting edge technology and becoming a recognized leader in the field of specialist aerial survey and mapping.

Investment Considerations

The company is seeking additional funding in order to grow more quickly, capitalizing on its position as first mover in deploying ground penetrating radar on an aerial platform.

Growing organically utilizing funds generated from sales, while a viable option, would result in a slower initial growth phase due to limitations on its international marketing and business development and allow for the possibility of deploying multiple systems both in terms of equipment cost and in recruiting and training operational teams with the relevant levels of expertise.

Goals

Seeker Tec International, Inc. is a company that wants to achieve three primary objectives.

- **Deliver a Superior Value Proposition**: Delivering to our customers a faster more cost effective solution allowing for the economic regeneration of land which is currently unusable.
- **Establish a global recognition of the company's services:** Establish the company's reputation amongst its potential customer base within the field of mine clearance and further in market sectors where aerial mapping and survey has the potential to deliver more efficient solutions than currently available.
- **Build strong business partnerships:** Further develop relationships with complementary businesses to extend and capitalize on market opportunities in the aerial survey and mapping industry.

Keys to Success

Innovative Technology: Seeker Tec has assembled a portfolio of leading technologies and developed innovative solutions to major problems inhibiting economic development in large parts of the world.

Management Team: The Company has an experienced management team with unique experience of deploying ground breaking aerial technology across the globe and building sustained growth for shareholders.

Finances

The Company acquired Seeker Technologies Ltd together with its assets and liabilities during the year. It is now looking to fund its further growth from a limited number of private placements.

Current and Future Cash Requirements and Use

The first immediate cash requirement for the Company is working capital to undertake marketing and business development activities in Africa and North America and establish operations for its first contract in Angola. We are in discussions with potential funders and investment partners to secure the necessary investment. Further funding will be sought if required to accelerate the company development through product enhancement and the deployment of multiple systems, together with associated equipment purchase, recruitment and training.

Total Initial Cash Required

First phase financing activities is $485,000 as follows.

Angola Contract	Professional services and travel	$65,000
Other Working Capital	Business development	$100,000
Debt Financing & Loan Repayments	Servicing existing loan finance	$200,000
General Administrative	Corporate expenses, legal and reporting	$120,000
Total	**Total Estimated Cash Requirements**	**$485,000**

B. Date and State of Incorporation:

The Issuer was incorporated on April 8, 2004 in the State of Nevada

C. The issuer's primary and secondary SIC Codes:

The primary SIC Code is 3612 and there is no secondary SIC Code

D. The issuer's fiscal year end date: Fiscal year is December 31

E. Principal products or services, and their markets: See a)

7. Describe the Issuer's leased facilities

Public Company
123 W. Nye Lane, Suite 129
Carson City, NV 89706
Telephone: (800)-382-7271

Operations
Registered office: Unit 1, Wolverhampton Business Airport
Bobbington, Stourbridge, DY7 5DY, United Kingdom

8. Officers, Directors, and Control Persons

A.

Name	Position	Number of Shares
Donald Rex Gay BA MBA *	President & Director	93,472,858
Mike Kendrick	Director	254,295,737
Mark Dorey BSc (Econ)	Director	95,180,000
David Oliver FCCA, ACA	Director	4,759,000

*Donald Rex Gay resigned as a director on the 24 April 2014

B. Legal/Disciplinary History

Please identify whether any of the foregoing persons have, in the last five years, been the subject of:

1. A conviction in a criminal proceeding or named as a defendant in a pending criminal proceeding (excluding traffic violations and other minor offenses):

   None

2. The entry of an order, judgment, or decree, not subsequently reversed, suspended or vacated, by a court of competent jurisdiction that permanently or temporarily enjoined, barred, suspended or otherwise limited such person's involvement in any type of business, securities, commodities, or banking activities:

   None

3. A finding or judgment by a court of competent jurisdiction (in a civil action), the Securities and Exchange Commission, the Commodity Futures Trading Commission, or a state securities regulator of a violation of federal or state securities or commodities law, which finding or judgment has not been reversed, suspended, or vacated; or

   None

4. The entry of an order by a self-regulatory organization that permanently or temporarily barred suspended or otherwise limited such person's involvement in any type of business or securities activities.

   None

C. Beneficial Shareholders

The following persons own more than ten percent (10%) of issuer's equity securities:

Mike Kendrick **Director** **254,295,737 shares**
Unit 1, Wolverhampton Business Airport
Bobbington, Stourbridge, DY7 5DY UK

Mark Dorey BSc (Econ) **Director** **95,180,000 shares**
Unit 1, Wolverhampton Business Airport
Bobbington, Stourbridge, DY7 5DY UK

Donald Rex Gay **Director** **93,472,858 shares**
(Resigned 24 April 2014)
3433 Highway 190 #365 Mandeville, LA 70471

9. Third Party Providers

SEC Attorney

Aaron D. McGeary Esq.
The McGeary Law Firm, P.C.
3904 Vernon Way, Fort Worth, Texas

SEEKER TEC INTERNATIONAL, INC.
NOTES TO FINANCIAL STATEMENTS (Unaudited)

NOTE 1 – Business description and significant accounting policies

Organization

Syncronys International, Inc. (the "Company") was incorporated in the State of Nevada on April 8, 2004, under the name of AVL Global, Inc. On January 18, 2006, the Company changed its name to China Northwest Biotech Corp. On June 18, 2007, the Company changed its name to LGM Biopharma, Inc. The Company changed its name to Syncronys International, Inc. on November 23, 2007, and considers January 1, 2007 to be the date of commencement of new developments of its principle business plan (date of inception). On March 31, 2013 the Company changed its name to Seeker Tec International, Inc.

The Company has been devoting most of its efforts to raising capital and developing a business plan and, consequently, meets the definition of a Development Stage Enterprise, as defined in Statement of Financial Accounting Standards FASB Topic 915 "Accounting and Reporting for Development Stage Enterprises." Under FASB Topic 915, certain additional financial information is required to be included in the financial statements for the period from inception of the Company to the current balance sheet date.

Principles of Consolidation

Investments in unconsolidated subsidiaries representing ownership of at least 20% but less than 50% is accounted for under the equity method. Non-marketable investments in which the Company has less than 20% ownership and in which it does not have the ability to exercise significant influence over the investee is initially recorded at cost and periodically reviewed for impairment. As of December 31, 2013, the Company did not have non-marketable investments.

Cash and cash equivalents

Cash and cash equivalents include all cash balances in non-interest bearing accounts and money-market accounts. The Company place its temporary cash investments with quality financial institutions. At times, such investments may be in excess of Federal Deposit Insurance Corporation (FDIC) insurance limit. The Company does not believe it is exposed to any significant credit risk on cash and cash equivalents. For the purpose of the statements of cash flows, all highly liquid investments with an original maturity of three months or less is considered to be cash equivalents. Cash equivalents were $1,613 as of December 31, 2013.

Credit Risks

Financial instruments that potentially subject us to concentrations of credit risk consist principally of cash deposits. Accounts at each institution are insured by the Federal Deposit Insurance Corporation (FDIC) up to $250,000. At December 31, 2013, the Company did not have balances in excess of FDIC insured limits.

Revenue recognition

The Company recognizes revenue in accordance with ASC subtopic 605-10 (formerly SEC Staff Accounting Bulletin No. 104 and 13A, "Revenue Recognition") net of expected cancellations and allowances.

The company has recognised the revenue and cost of sales relating to its contract in Angola. However, a provision has been made against profits from the last five months of operations due to an ongoing dispute with the main contractor. Our partner in Angola expects this to be resolved in the company's favour by the end of 2015.

Advertising costs

The Company expenses all costs of advertising as incurred. There were $2,044 in advertising and promotion costs as of December 31, 2013.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Fair value of financial instruments

Fair value estimates discussed herein is based upon certain market assumptions and pertinent information available to management as of December 31, 2013. The respective carrying value of certain on-balance-sheet financial instruments approximated their fair values. These financial instruments include cash, accounts receivable, accounts payable, accrued liabilities and notes payable. Fair values were assumed to approximate carrying values because they is short term in nature and their carrying amounts approximate fair values or they is payable on demand.

Impairment of long-lived assets

The Company reviews its long-lived assets and intangibles periodically to determine potential impairment by comparing the carrying value of the long-lived assets with the estimated future cash flows expected to result from the use of the assets, including cash flows from disposition. Should the sum of the expected future cash flows be less than the carrying value, the Company would recognize an impairment loss. An impairment loss would be measured by comparing the amount by which the carrying value exceeds the fair value of the long-lived assets and intangibles. The Company recognized no impairment losses during the year ended December 31, 2013.

Loss per share

Loss per share is provided in accordance with ASC Topic 260 "Earnings per Share" (as amended). The Company presents basic earnings per share ("EPS") and diluted EPS on the face of consolidated statements of operations. Basic EPS is computed by dividing reported earnings by the weighted average shares outstanding. Diluted EPS is computed by adding to the weighted average shares the dilutive effect if stock options and warrants were exercised into common stock. Basic loss per share is computed by dividing losses available to common stockholders by the weighted average number of common shares outstanding during the period. Basic earnings per common share is based on the weighted average number of common shares outstanding during the year. Diluted earnings per share is based on the weighted average number of common shares, plus all stock options and warrants convertible into common stock. There are no stock options or warrants issued and outstanding as of December 31, 2013.

Share-based compensation

The Company has adopted FASB Accounting Standards Codification Topic 718-10, "Compensation- Stock Compensation" ("ASC 718-10") which requires the measurement and recognition of compensation expense for all stock-based payment awards made to employees and directors. Under the fair value recognition provisions of ASC 718-10, stock-based compensation cost is measured at the grant date based on the value of the award and is recognized as expense over the vesting period.

Determining the fair value of stock-based awards at the grant date requires considerable judgment, including estimating the expected future volatility of our stock price, estimating the expected length of term of granted options and selecting the appropriate risk-free rate.

Dividends

The Company has not yet adopted any policy regarding payment of dividends.

Recent Accounting Pronouncements

The Company reviews all of the Financial Accounting Standard Board's updates periodically to ensure the Company's compliance of its accounting policies and disclosure requirements to the Codification Topics.

In February 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2013-02, Comprehensive Income (Topic 220)—Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income (ASU 2013-02), to require entities to provide information about significant amounts reclassified out of accumulated other comprehensive income by component and their corresponding effect on net income. ASU 2013-02 is effective for us in the first quarter of our fiscal year ending February 28, 2014. We not believe that this updated standard will have a significant impact on our consolidated financial statements.

In July 2012, the FASB issued Accounting Standards Update No. 2012-02, Intangibles—Goodwill and Other (Topic 350)—Testing Indefinite-Lived Intangible Assets for Impairment (ASU 2012-02), to simplify how entities test intangibles with indefinite lives for impairment. ASU 2012-02 gives entities the option to first assess qualitative factors to determine whether it is more likely than not that the fair value of an intangible asset is less than its carrying amount. If greater than 50 percent likelihood exists that the fair value is less than the carrying amount then a quantitative impairment test as described in Subtopic 350-30 must be performed. ASU 2012-02 is

effective for us in the first quarter of our fiscal year ending February 28, 2014. We currently do not believe that this updated standard will have a significant impact on our consolidated financial statements.

The Company will continue to monitor these emerging issues to assess any potential future impact on its financial statements.

NOTE 2 – Going concern

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. Its ability to continue as a going concern is dependent upon attaining profitable operations based on the development of distributions platforms through which its products that can be sold. The Company intends to use borrowings and security sales to mitigate the effects of its cash position, however, no assurance can be given that debt or equity financing, if required, will be available. The financial statements do not include any adjustments relating to the recoverability and classification of recorded assets and classification of liabilities that might be necessary should the Company be unable to continue in existence.

NOTE 3 – Fair value

Its financial instruments consist principally of notes payable and lines of credit. Notes payable and lines of credit is financial liabilities with carrying values that approximate fair value. Management determines the fair value of notes payable and lines of credit based on the effective yields of similar obligations and believe all of the financial instruments' recorded values approximate fair market value because of their nature and respective durations.

The Company comply with the provisions of ASC 820, *"Fair Value Measurements and Disclosures"* ("ASC 820"). ASC 820 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements required under other accounting pronouncements. ASC 820-10-35, *"Fair Value Measurements and Disclosures - Subsequent Measurement"* ("ASC 820-10-35"), clarifies that fair value is an exit price, representing the amount that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants. ASC 820-10-35 also requires that a fair value measurement reflect the assumptions market participants would use in pricing an asset or liability based on the best information available. Assumptions include the risks inherent in a particular valuation technique (such as a pricing model) and/or the risks inherent in the inputs to the model. The Company also follows ASC 825 *"Interim Disclosures about Fair Value of Financial Instruments"*, to expand required disclosures.

ASC 820-10-35 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under ASC 820-10-35 is described below:

Level 1. Valuations based on quoted prices in active markets for identical assets or liabilities that an entity has the ability to access.

Level 2. Valuations based on quoted prices for similar assets or liabilities, quoted prices for identical assets or liabilities in markets that is not active, or other inputs that is observable or can be corroborated by observable data for substantially the full term of the assets or liabilities.

Level 3. Valuations based on inputs that is supported by little or no market activity and that is significant to the fair value of the assets or liabilities.

The Company utilizes the best available information in measuring fair value. The following table summarizes, by level within the fair value hierarchy, the financial assets and liabilities recorded at fair value on a recurring basis as of December 31, 2013:

	Fair Value Measurements			
	Level 1	Level 2	Level 3	Total Fair Value
Liabilities				
Loans from officer	$ -	$ 59,572	$ -	$ 59,572
Total	$ -	$ 59,572	$ -	$ 59,572

NOTE 4 – Income taxes

At December 31, 2013, the Company had approximately $2,035,223 of federal and state net operating losses. For the year ended

December 31, 2013, the Company reported net losses of $646,835. No provision for income tax expense has been recorded. In addition no benefit for income taxes has been recorded due to the uncertainty of the realization of any tax assets. The net operating loss carry forwards, if not utilized will begin to expire in 2026.

For financial reporting purposes, the Company has incurred historical losses. Based on the available objective evidence, including the Company's history of its loss, management believes it is more likely than not that, the net deferred tax assets will not be fully realizable. Accordingly, the Company provided for a full valuation allowance against its net deferred tax assets at December 31, 2013.

NOTE 5 – Stockholder's equity

The Company is authorized to issue up to 600,000,000 shares of $0.001par value common stock.

During the 1st quarter ended March 31, 2013, the Company issued 515,900,000 shares of its $0.001 par value common stock. 475,900,000 shares were issued to Seeker Technologies, Ltd in a stock exchange. The fair value of Seeker Technologies, Ltd was $475,900 and was recorded as an investment. 40,000,000 were issued for .001 cent per Subscription to Non-Affiliate Freedom Holdings LLC.

During the 2nd quarter ended June 30, 2013 the Company issued 6,006,711 shares of its $0.001 par value common stock. 1,006,711 shares were issued to Carlton Ltd in exchange for the pay down of a $30,000 loan. The remaining 5,000,000 were issued upon an investment in the Company of $5,000.

During the 4th quarter ended December 31, 2013 the Company issued 1,600,000 shares to Mr. G. Deacon for an investment of $16,000 in the Company and 3,250,000 to the Carlson family for an investment of $19,500 in the company.

NOTE 6 – Commitments and contingencies

Leases

The Company currently maintains an executive office in Mandeville, Louisiana. The space is approximately 500 square feet in size. The monthly rental for the space is approximately $275 per month on a month-to-month basis.

NOTE 7 – Related party transactions – Loans from Officer

Mr. Donald R Gay, an officer and director of the Company, has loaned the Company money in order to pursue its planned business model. The non- interest bearing loans are due on demand. The balance due is $59,572 as of December 31, 2013. No interest has been recorded for the period ended December 31, 2013, as the Company considers these imputed amounts to be nominal to the overall financial statements.

NOTE 8 – Subsequent events

In accordance with ASC 855, management evaluated all activity of the Company through the issue date of the financial statements and concluded that no other subsequent events have occurred that would require recognition or disclosure in the financial statements.
