NOTES TO FINANCIAL STATEMENTS

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. The reported amounts of revenues and expenses during the reporting period may be affected by the estimates and assumptions we are required to make. Estimates that are critical to the accompanying financial statements include assessing the impact of contingencies as well as the valuation and recoverability of long-lived assets.

Estimates and assumptions are reviewed periodically and the effects of revisions are reflected in the financial statements in the period they are determined to be necessary. It is at least reasonably possible that our estimates could change in the near term with respect to these matters.

Statements of Cash Flows

For purposes of the statements of cash flows, we consider all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

Long-Lived Assets

ASC Topic 360-10-5, "Accounting for the Impairment or Disposal of Long-Lived Assets" requires that long-lived assets, including certain identifiable intangibles, be reviewed for impairment whenever events or changes in circumstances indicate that the carrying value of the assets in question may not be recoverable.

Property and Equipment

Property and Equipment is stated at cost. Depreciation expense is computed using the straight-line method over the useful lives of the assets.

Income Taxes

We compute income taxes in accordance with ASC - Topic 740. Deferred taxes are recognized for the tax consequences of temporary differences by applying enacted statutory rates applicable to future years to differences between the tax bases of assets and liabilities and their financial statement carrying amounts. Also, the effect on deferred taxes of a change in tax rates is recognized in income in the period that included the enactment date. Temporary differences between financial and taxable reporting arise primarily from differences in the tax bases of assets and certain accrued liabilities that are not deductible for tax purposes until they are paid.

Recent Pronouncements

We do not expect that the adoption of any recent accounting pronouncements will have a material impact on our financial statements.

NOTE 3 - GOING CONCERN

The accompanying financial statements are prepared in accordance with accounting principles generally accepted in the United States of America applicable to a going concern, which contemplate the realization of assets and liquidation of liabilities in the normal course of business. The company has incurred losses since its inception, has no revenues to date and continues to rely on financing and the issuance of shares to raise capital to fund its operations.
