1. Summary of significant accounting policies

Nature of operations, basis of financial statement presentation

The Company was incorporated in the State of Nevada on March 22, 1995 as Royce Biomedical Inc.

In August 2005, the Company changed its name from Royce Biomedical Inc. to Smart-tek Solutions Inc. to better reflect new business activities.

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and include the following significant accounting policies:

Liquidity

At June 30, 2016, the Company had cash and cash equivalents of $191,134, a working capital deficit of approximately $28.3 million and an accumulated deficit of approximately $21.6 million. As of June 30, 2016, the Company had an obligation for $31.0 million in delinquent payroll taxes including accrued penalties. These amounts are due to the US Treasury and represent collection of employment taxes from its PEO employees. The U.S. Treasury and Internal Revenue Services (IRS) will have a priority interest in all assets of the Company.

The Company earned a net profit of approximately $1,617,311 for the six months ended June 30, 2016.

Principles of consolidation

The consolidated financial statements include the accounts of Trucept Inc. Significant inter-company transactions have been eliminated in consolidation.

Use of estimates

The preparation of these consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts and related disclosures. Specific areas, among others, requiring the application of management's estimates and judgment includes assumptions pertaining to credit worthiness of customers, interest rates, useful lives of assets, future cost trends, tax strategies, and other external market and economic conditions. Actual results could differ from estimates and assumptions made.

Cash and equivalents

Cash and cash equivalents consist of cash on hand and bank deposits. For financial reporting purposes, the Company considers all highly liquid debt instruments with original maturities of three months or less to be cash equivalents. The Company maintains its cash in bank deposit accounts, which at times, may exceed federally insured limits. The Company has not experienced any losses related to this concentration of risk. At June 30, 2016 and 2015, the Company did not have any deposits in excess of federally insured limits.

1. Summary of significant accounting policies - continued

Accounts Receivable

Accounts receivables are recorded at net realizable value consisting of the carrying amount less an allowance for uncollectible accounts, as needed. The Company uses the allowance method to account for uncollectible accounts receivable balances. Under the allowance method, if needed, an estimate of uncollectible customer balances is made based upon specific account balances that are considered uncollectible. Factors used to establish an allowance include the credit quality and payment history of the customer. The allowance for doubtful accounts was $0 as of June 30, 2016 and 2015, respectively.

Workers compensation insurance

The Company maintains reserves in the form of prepaid cash deposits for known workers' compensation claims which are made up of estimated collateral required to pay claims and estimated expenses to settle the claims. The collateral amounts are determined by the insurance carrier and are not recoverable by the Company until all claims related to a policy period are settled. The cash deposits will not be recoverable in the near term and accordingly, they are classified as a long term asset with a balance of $14,074,034 and $11,761,947 as of June 30, 2016 and December 31, 2015, respectively.

Concentration of credit risk

Credit risk arises from the potential that a counterpart will fail to perform its obligations. The Company minimized credit risk by requiring clients to wire in advance of services being provided. The Company's receivables are comprised of a number of debtors which minimizes the concentration of credit risk. It is management's opinion that the Company is not exposed to significant credit risk associated with its accounts receivable.

Equipment

Equipment is recorded at cost and depreciated on a straight-line basis using accelerated methods over the estimated useful lives of the related assets ranging from 3 to 5 years. The Company reviews the carrying value of long-term assets to be held and used when events and circumstances warrant such a review. If the carrying value of a long-lived asset is considered impaired, a loss is recognized based on the amount by which the carrying value exceeds the fair market value. Fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved. The cost of normal maintenance and repairs is charged to operations as incurred. Major overhaul that extends the useful life of existing assets is capitalized. When equipment is retired or disposed, the costs and related accumulated depreciation are eliminated and the resulting profit or loss is recognized in income.

Income taxes

The Company recognizes consolidated deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are determined based on the difference between the tax basis of assets and liabilities and their financial reporting amounts based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income.

1. Summary of significant accounting policies - continued

Deferred tax assets are recognized for deductible temporary differences and for carry forwards. Deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

The Company regularly assesses uncertain tax positions in each of the tax jurisdictions in which it has operations and accounts for the related financial statement implications. Unrecognized tax benefits are reported using the two-step approach under which tax effects of a position are recognized only if it is "more-likely-than-not" to be sustained and the amount of the tax benefit recognized is equal to the largest tax benefit that is greater than fifty percent likely of being realized upon ultimate settlement of the tax position. Determining the appropriate level of unrecognized tax benefits requires the Company to exercise judgment regarding the uncertain application of tax law. The amount of unrecognized tax benefits is adjusted when information becomes available or when an event occurs indicating a change is appropriate. Future changes in unrecognized tax benefits requirements could have a material impact on the results of operations. The Company files U.S. federal and U.S. state tax returns.

Revenue recognition

The Company recognizes professional employment organizations (PEO) revenues when each periodic payroll is delivered. The Company's net PEO revenues and cost of PEO revenues do not include the payroll cost of its worksite employees. Instead, PEO revenues and cost of PEO revenues are comprised of all other costs related to its worksite employees, such as payroll taxes, employee benefit plan premiums and workers' compensation insurance.

PEO revenues also include professional service fees, which are primarily computed as a percentage of client payroll or on a per check basis.

In determining the pricing of the markup component of its billings, the Company takes into consideration its estimates of the costs directly associated with its worksite employees, including payroll taxes, benefits and workers' compensation costs, plus an acceptable gross profit margin. As a result, the Company's operating results are significantly impacted by the Company's ability to accurately estimate, control and manage its direct costs relative to the revenues derived from the markup component of the Company's gross billings.

Share-based compensation

The Company measures the cost of employee services received in exchange for equity awards based on the grant date fair-value of the awards. Fair value is typically the market price of the shares on the date of issuance. Costs are measured at the grand date and recognized as compensation expense over the employer's requisite service period (generally the vesting period of the equity award).

Net earing per share

The basic income per common share is computed by dividing the net income by the weighted average shares of common stock outstanding during the periods. Net income per share on a diluted basis is computed by dividing the net income for the periods by the weighted average number of common and dilutive common stock equivalent shares outstanding during the periods.

1. Summary of significant accounting policies - continued

Fair Value of Financial Instruments

Fair value is determined to be the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. The Company follows a fair value hierarchy that prioritizes the inputs used in measuring fair value into three broad levels as follows:

Level 1—Quoted prices in active markets for identical assets or liabilities.

Level 2—Inputs, other than the quoted prices in active markets, are observable either directly or indirectly.

Level 3—Unobservable inputs based on the Company's assumptions.

The Company is required to use observable market data if such data is available without undue cost and effort.

At March 31, 2016 and December 31, 2015, the carrying amounts of financial instruments, including cash, accounts and other receivables, accounts payable and accrued liabilities, and accounts payable to related parties approximate fair value because of their short maturity.

Recent Accounting Pronouncements

The Company has reviewed accounting pronouncements and interpretations thereof that have effective dates during the periods reported and in future periods. The Company believes that the following impending standards may have an impact on its future filings. The applicability of any standard will be evaluated by the Company and is still subject to review by the Company.

The Company has adopted FASB ASC 220 “Comprehensive Income”, which establishes standards for reporting and display of comprehensive income (loss), its components and accumulated balances. The Company had no components of comprehensive income (loss) for the periods presented.

In July 2012, the FASB issued ASU No. 2012-02, *Intangibles—Goodwill and Other (Topic 350) Testing Indefinite-Lived Intangible Assets for Impairment* (“ASU 2012-02”). ASU 2012-02 is intended to reduce the cost and complexity of the annual indefinite-lived intangible assets impairment testing by providing entities an option to perform a “qualitative” assessment to determine whether further impairment testing is necessary. As such, there is the possibility that quantitative assessments would not need to be performed if it is more likely than not that no impairment exists. This new update is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. The Company has adopted ASU 2012-02 as of December 31, 2012 for its annual impairment testing. The adoption has no impact on the Company’s consolidated financial position, results of operations, or cash flows.

Management does not believe any other recent accounting pronouncements issued by the FASB, the AICPA, or the SEC have a material impact on the Company's present or future consolidated financial statements.

2. Equity

At June 30, 2016, the Company is authorized to issue:

1. 5,000,000 shares of preferred stock, par value $0.001 per share.
2. 500,000,000 shares of common stock, par value $0.001 per share.

Common Stock

At June 30, 2016, there are 50,262,123 shares of common stock outstanding.

There are no stock options outstanding at June 30, 2016 and December 31, 2015.

Preferred Shares

There are no preferred shares issued or outstanding.

5. Net earnings per share

	June 30, 2016	June 30, 2015
Net Income	$ 1,617,311	$ 232,565
Weighted number of shares outstanding	50,262,123	50,262,123
Net income per share	$ 0.03	$ 0.01

6. Bad Debt Adjustment.

Management, due to the use of multiple systems, prudently established reserves. Management has and will continue to work on auditing their accounts payable including Taxes accrued which was found to have significant duplications. Management will continue to request and receive documentation from outside agencies and once received will manually verify and tie in multiple reports from these various sources. The Company will continue this work and during 2016 will continue to reduce the bad debt reserve until Management has concluded its work and the bad debt reserve is reduced to be in line with actual. For year-end 2016, it was determined that bad debt write-offs may amount to $900,000. For the six months ended June 30, 2016, $303,000 of accounts receivable have been written off.

RESULTS OF OPERATIONS

The six months ending June 30, 2016 and 2015

Revenue

For the six months ending June 30, 2016 and 2015, revenues were $2,882,348 and $4,526,636 respectively, for a decrease of $1,644,288 (36.3%) over the same period in 2015. The decrease was attributable to loss of clients.

Future Financings

The Company's short-term plan is to utilize its common stock where possible to pay for services and to seek further shareholder loans. In the longer term, the Company is actively seeking additional merger, acquisition or venture relationships with operating enterprises in order to generate long-term growth opportunities for the Company, permit the Company to meet its financial obligations and to provide increased value to the Company's shareholders. In the past we have obtained our required cash resources principally through loans from shareholders and our sole executive officer.

Management's plans to improve our financial condition are as follows:

- Continued growth in PEO and staffing business line;
- We intend to increase profitability by offering various insurance and other products and services to our co-employer and staffed clients.
- We will continue to look for opportunities to grow organically where feasible as well as evaluate potential acquisition opportunities that may present themselves in the next 12 months.

There can be no assurance that our planned activities will be successful.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to stockholders.
