WOWI, INC.
Notes to Consolidated Financial Statements
For Nine Months Ended June 30, 2016

Note 1 - Nature of Business and Summary of Significant Accounting Policies:

Nature of Business

We are an early-stage company that is in the business of licensing technology and intellectual property to operators and businesses in the legal cannabis industry nationally. We also provide packaging and labeling, lease equipment and lease of real property to such companies. Lastly WOWI, Inc. provides a plethora of consulting services including proper business structure and management in the ever changing legal cannabis space. We provide these services to cultivations, growers, extractors and dispensaries that operate legally in states that have legal medicinal and/or recreational legislation. We pride ourselves on being at the cutting edge and touting quality, safety, proper structure and adherence to the legislation in each and every state.

Use of Estimates

Preparing the Company's financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition

N/A since we do not currently have any revenues.

Marketing Costs

Advertising and sales promotion costs are expensed as incurred.

Cash and Cash Equivalents

Cash and cash equivalents consist primarily of cash on deposit, certificates of deposit, money market accounts, and investment grade commercial paper that are readily convertible into cash and purchased with original maturities of three months or less.

Goodwill

For Asset purposes, our Goodwill represents the benefits of acquiring Legacy Brands Holding Inc. in September 2010 with its public company features, i.e., public trading status, shareholder base, market makers, DTC electronic trading status, FINRA status, etc. Goodwill includes the Organizational Costs (14,314), Accrued Expenses (41,742), and Promissory Notes as of October 31, 2010 (260,348). Organizational Costs (14,314) include cost to incorporate Revelation MIS Inc. and to perform the merger with Legacy Brands Holding Inc. The total is $316,604. In light of the fact that we are a non-reporting OTC shell, we are adjusting (Impairment) the goodwill to $260,677 (an impairment of $55,927) effective 31 December 2010. This is the amount that we could possibly expect if we sold the shell for cash in the market at that time.

For tax purposes, we will follow IRC, Section 197, Amortization of Goodwill and Certain Other Intangibles, which permits us to claim a deduction determined by amortizing our Goodwill over a 15-year period beginning with the month in which it was acquired. Taking into account that the impairment that was applied on 31 December 2010, the amortization begins with the month of January 2011. Accordingly, our deduction is $1,448.21 per month ($4,344.63 per quarter or $17,379 per year) on goodwill of $260,677 as of 31 December 2010.

Effective May 3, 2016, the Company acquired World of Weed, Inc. as a wholly owned subsidiary (the "Subsidiary"). The terms of the agreement called for the issuance of 25,750,000 shares of common stock to the stockholders of the Subsidiary, rescinding of 5,750,000 shares of common stock by an officer of the Company, and issuance of 150,000 shares of common stock and a note payable for $84,000 satisfying $290,108 of existing related party payables of the Company (as discussed in Note 3). This acquisition included assets of $325,325 in the form of cash and liabilities of $392,000 in the form of convertible notes payable, resulting in goodwill of $66,675 recognized to the period ended June 30, 2016.

Fair Value of Financial Instruments

The fair value of financial instruments is estimated using relevant market information and other assumptions. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, prepayments, and other factors. Changes in assumptions or market conditions could significantly affect these estimates. The amounts reported in the balance sheet for cash and equivalents, receivables, and payables approximate fair value.

Contingencies

Certain conditions may exist as of the date the financial statements are issued, which may result in a loss to the Company, but which will only be resolved when one or more future events occur or fail to occur. The Company's management and its legal counsel assess such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against the Company, or unasserted claims that may result in such proceedings, the Company's legal counsel evaluates the perceived merits of any legal proceedings or unasserted claims as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, the estimated liability would be accrued in the Company's financial statements. If the assessment indicates that a potentially material loss contingency is not probable but is reasonably possible, or is probable but cannot be estimated, the nature of the contingent liability, together with an estimate of the range of possible loss if determinable and material, would be disclosed.

Loss contingencies considered remote are generally not disclosed unless they arise from guarantees, in which case the guarantees would be disclosed.

In August 2002, a judgement was entered against the Company for $18,013 plus interest and expenses. The Company contested the judgement based upon the fact that the judgement creditor did not provide the promised investor relations services. The judgment expires in 2022. The judgement creditor has not contacted the Company subsequent to the entry of the judgment and has not pursued collection. The judgement creditor was dissolved in 2012, subsequent to an administrative order by the Securities and Exchange Commission sanctioning the judgment creditor's principal and barring him from the securities

business. Based on these facts, the Company has removed the liability on the judgment from its balance sheet and is treating it as a contingent liability.

Earnings per Share

Basic net earnings (loss) per common share is computed by dividing net earnings (loss) by the total number of shares issued and outstanding on the date of the computation.

Earnings per Share

The following table sets forth the computation of net loss per share for our first nine months ended June 30, 2016:

Net Gain (Loss)	($80,985)
Common Shares Outstanding – Weighted Average	12,596,340
Net Loss per Weighted Average Common Share	$(0.01)

The shares related to convertible promissory notes were excluded from the computation.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets, including tax loss and credit carryforwards, and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred income tax expense represents the change during the period in the deferred tax assets and deferred tax liabilities. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on their characteristics. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

The Company recognizes the amount of taxes payable or refundable for the current year and recognizes deferred tax liabilities and assets for the expected future tax consequences of events and transactions that have been recognized in the Company's financial statements or tax returns.

Prior to the merger, Legacy Brands Holding Inc. was current in filing it tax return to all agencies. It has filed a final return that closes its account with the IRS and State of Florida. It has no tax liability.

WOWI, Inc. will establish the necessary reporting functions with the appropriate tax authorities. As of the date of this disclosure statement, we have no tax liability.

Measurement of Fair Value

We adopted SFAS No. 157, which provides a framework for measuring fair value under GAAP. As defined in SFAS No. 157, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). In determining fair value in accordance with SFAS No. 157, we utilize market data or assumptions that we believe market participants would use in pricing the asset or liability that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible, including assumptions about

risk and the risks inherent in the inputs to the valuation technique. Classification of the financial asset or liability within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The three levels of the fair value hierarchy defined by SFAS No. 157 are as follows:

Level 1 Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 Financial instruments lacking unadjusted, quoted prices from active market exchanges, including over-the-counter traded financial instruments. The prices for the financial instruments are determined using prices for recently traded financial instruments with similar underlying terms as well as directly or indirectly observable inputs, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 Financial instruments that are not actively traded on a market exchange. This category includes situations where there is little, if any, market activity for the financial instrument. The prices are determined using significant unobservable inputs or valuation techniques.

As of June 30, 2016, we did not have any financial assets utilizing Level 1, Level 2 or Level 3 inputs.

Note 2 - Debt Arrangements:

In conjunction with the acquisition, on May 3, 2016, the Company and Mike Heilman agreed to satisfy the $290,108 of related party notes payable through the issuance of 150,000 shares of common stock and issuance of a note payable in the amount of $84,000, payable in 12 consecutive monthly payments of $7,000 each beginning in May 2016. As of June 30, 2016, $70,000 remained payable under this obligation. This note is convertible into 5,000,000 shares of common stock if and upon default on the repayment terms.

The acquisition included $392,000 of convertible notes payable issued prior to the acquisition. After the acquisition, an additional $140,000 of convertible notes payable was issued.

Note 3 - Income Taxes

The Company adopted FIN 48. FIN 48 provides a comprehensive model for the recognition, measurement and disclosure in financial statements of uncertain income tax positions that a company has taken or expects to take on a tax return. Under FIN 48, a company can recognize the benefit of an income tax position only if it is more likely than not that the tax position will be sustained upon tax examination, based solely on the technical merits of the tax position. Otherwise, no benefit can be recognized. The tax benefits recognized are measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement. Additionally, companies are required to accrue interest and related penalties, if applicable, on all tax exposures for which reserves have been established consistent with jurisdictional tax laws. The cumulative effect of adopting FIN 48 is recorded as an adjustment to the opening balance of accumulated deficit on the adoption date. As a result of the implementation of FIN 48, the Company did not record any changes to the liability for unrecognized tax

benefits related to tax positions taken in prior periods, and no corresponding change in accumulated deficit was recorded.

Note 4 - Shareholders' Equity:

The following are the details of the Company's common and preferred stock as of June 30, 2016:

	Authorized Shares	Issued Shares	Outstanding Shares	Dollar Amount
Common Stock at par of $0.001	500,000,000	30,001,340 Based upon par of $0.001	30,001,340	$30,001 Based upon par of $0.001
Preferred Stock	0	0	0	0

When Jolen was incorporated in Florida, it established its par value at $0.001. Jolen is the surviving company of a merger of Revelation MIS, Inc. into Jolen, Inc. Revelation's par was $0.01. This par value difference has been reflected in our Balance Sheet.

Note 5 - Concentration of Credit Risk:

The Company's financial instruments that are exposed to concentrations of credit risk consist primarily of cash and cash equivalents. Since the Company's cash is of a small amount it is kept in a single bank account.

Note 6 – Proposed Agreement:

Licensing, management and possible lease agreement being negotiated with AMA.
