Item 4. Management's Discussion and Analysis or Plan of Operation.

Plan of Operation

During the Quarter ending March 31, 2013 the Company abandoned their concessions in Ghana West Africa, as production costs exceeded the amount of gold recovered and are seeking new business opportunities.

The Company plans to overcome the circumstances that impact our ability to remain a going concern through a combination of achieving profitability through finding a new business, raising additional debt and equity financing, and renegotiating existing obligations. There can be no assurance, however, that we will be able to complete any additional debt or equity financing on favorable terms or at all, or that any such financings, if completed, will be adequate to meet our capital requirements. Any additional equity or debt financings could result in substantial dilution to our stockholders. If adequate funds are not available, we will be required to delay, reduce or eliminate some or all of our planned activities. Our inability to fund our capital requirements would have a material adverse effect on the Company. The Company has no plans of sales or purchases of significant equipment this quarter and will not be hiring additional employees until we begin realizing revenue from our efforts. Management believes that the actions presently being taken to revise the Company's operating and financial requirements may provide the opportunity for the Company to continue as a going concern.

Item 5. Legal proceedings.

There are no current, past, pending or threatened legal proceedings or administrative actions by or against the Company that could have a material effect on the issuer's business, financial condition or operations and any current, past or pending trading suspensions by a securities Regulator.

Notes to the Financial Statements
June 30, 2013

Note 1. Interim Reporting:

While the information presented in the accompanying twelve months financial statements is unaudited, it includes all adjustments, which are, in the opinion of management, necessary to present fairly the financial position results of operations and cash flows for the interim period presented in accordance with accounting principles generally accepted in the United States of America.

Operating results for the three months ended June 30, 2013 are not necessarily indicative of results that can be expected for the forthcoming year ending December 31, 2013.

Note 2. Nature and Continuance of Operations:

The Company was incorporated in the State of Delaware on April 10 1977 and is in the Business of Marketing Companies.

The Company has adopted December 31 as its fiscal year end.

These financial statements have been prepared in accordance with generally accepted accounting principles applicable to a going concern, which assumes that the Company will be able to meet its obligations and continue its operations for its next fiscal year. At June 30, 2013 the Company had not yet achieved profitable operations, has accumulated losses of $ 1,855,600 since its inception. The Company expects to incur further losses in the development of its business, all of which casts substantial doubt about the Company's ability to continue as a going concern. The Company's ability to continue as a going concern is dependent upon its ability to generate future profitable operations and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due. Management anticipates that additional funding will be in the form of equity financing from the sale of common stock. Management may also seek to obtain short-term loans from the directors of the Company. There are no current arrangements in place for equity funding or short -term loans.

Note 3. Convertible Debt Notes

All convertible debt notes are required to be vested for one full year before eligible for conversion into common shares. Note 4. Summary of Significant Accounting Policies.

Financial Instruments

The carrying values of cash and cash equivalents, accounts payable and accrued liabilities and due to/from related parties approximate fair value because of the short-term nature of these instruments. Management is of the opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments.

Basic and Diluted Net Income (Loss) Per Share

The Company computes net loss per share in accordance with SFAS No. 128 "Earnings Per Share" SFAS 128 requires presentation of both basic and diluted earnings per share ("EPS") on the face of the income statement. Basic loss per share is computed by dividing net loss available to common shareholders by the weighted average number of common shares outstanding during the year. Diluted EPS gives effect to all dilutive potential common shares outstanding during the year including stock options, using the treasury stock method, and convertible preferred stock, using the if-converted method. In computing diluted EPS, the average stock price for the year is used in determining the number of shares assumed to be purchased from the exercise of stock options or warrants. Diluted EPS excludes all dilutive potential common shares if their effect is anti-dilutive.

Cash and Currency Risks

The Company incurs expenditures in Canadian and U.S. Dollars. Consequently some assets and liabilities are exposed to Canadian dollar foreign currency fluctuations. As at June 30, 2013 there were no amounts denominated in Canadian dollars included in the financial statements. Balances in U.S. Dollars at Canadian institutions are not protected by insurance and are therefore subject to deposit risk. As at June 30, 2013 all cash and equivalents represented cash at US financial institutions.
