Forward Looking Statements

You should read the following discussion and analysis of our financial condition and results of operations together with our financial statements and related notes appearing elsewhere in this quarterly report. Various statements have been made in this report that may constitute "forward-looking statements." Forward-looking statements may also be made in Yippy's other reports filed with or furnished to the OTC Disclosure and News Service or the United States Securities and Exchange Commission, as well as in other documents. In addition, from time to time, Yippy, through its management, may make oral forward-looking statements. Forward-looking

statements are subject to risks and uncertainties, which could cause actual results to differ materially from such statements. The words "believe," "expect," "anticipate," "optimistic," "intend," "plan," "aim," "will," "may," "should," "could," "would," "likely" and similar expressions are intended to identify forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made. Yippy undertakes no obligation to update or revise any forward-looking statements.

Plan of Operation

The Company has several business and partnership opportunities that are in different stages of development. Each represents a potential role in the future business of Yippy. The business that Yippy represents offers vast opportunities in multiple vertical markets that include enterprise and education markets. Since inception, it has always been management's goal to grow the business through internal development and strategic acquisitions of software and synergistic technology companies that add value to the intellectual property of the Company as well as provide future revenue growth.

Description of Business

General

Yippy is a technology company committed to helping customers securely access data anywhere on earth. Over the past several years, Yippy has entered into a series of strategic partnerships and transactions designed to enhance Yippy's product and service offerings. The Company's foundation is built on its perpetual, worldwide, non-exclusive license of the Velocity search platform and associated technologies which Yippy acquired in 2010 from Vivisimo, Inc. ("Vivisimo"). In 2012, International Business Machines Corporation (NYSE: IBM) ("IBM") purchased Vivisimo and rebranded Velocity as IBM Watson Explorer ® ("Watson"), and Yippy maintains its perpetual license of the technology.

Based upon Watson, which Yippy operates autonomously from IBM, and coupled with other internally developed and acquired technologies, the Company has developed a suite of technology solutions which enhance Watson's output while simplifying the deployment process. These solutions range from cloud, enterprise search, business intelligence, document security and data compression for MSS operations. The Company has developed middleware, connectors and associated programs which enable deployments to be successful with substantially less resources and personnel as typically required in the industry.

EASE 360 Platform

In 2014, the Company released its EASE (Enterprise Application Service Environment) 360 platform. EASE 360 is fully managed in the cloud or on site by Yippy. EASE 360 excels in five key areas:

1) Concept Clustering

Yippy allows users to navigate data sets by topical categories dynamically which surfaces concepts and insights in data not previously known. Additional uses include entity extraction, discovery and language agnostic trending for sentiment analysis visualized to give true insight into an organization's data through proprietary technology.

2) Structured Navigation

Yippy delivers faceted navigation filters allowing user to refine search attributes such as date, price, author, location, content type or other customized filters which allow for more effective search inquires. Index filters can be used to create vertical data repositories on subjects, products or competitive businesses, all delivered in real time.

3) Relevancy Controls

Yippy offers organizations the flexibility to control the information that is included in the index and displayed in search results including word proximity, synonyms, source, link analysis and relevancy. It allows users to tune the output of data in innovative ways which are unique to Yippy and its proprietary software. This function has proven to be useful for discovery in large volumes of unstructured and structured data simultaneously.

4) Security

Flexible access control integration including, SSO, LDAP and ACLs that provides early binding document and field level security. This ensures that only the documents or fields a user or group has permission to access will be available. Field level security is extremely useful for customer service, inside sales, or banking due to the user not having to log in and out of multiple systems to access internal data. Yippy is designed for speed to information and helping organizations lock down abandoned files from their data systems to improve document security.

5) Managed Content Connectors

Yippy maintains an unprecedented library of a fully documented connector source factory that monitors, maintains and updates the connectors on a 24/7 basis and that guarantees highly sustainable and scalable use. The Company's content connectors are available for federation and harvesting of public, private, structured or unstructured data in any format, across any location, including enterprise applications, social media and proprietary content sources. The Company's connectors are also platform agnostic, which is extremely helpful for companies with multiple disparate retrieval and information systems.

<u>Blue Flame Appliance</u>

Over the last couple of years, Yippy developed an appliance-based deployment for the EASE 360 platform known as the Blue Flame appliance. We have delivered several appliances over the past year with very high marks from customers. The timing of its development was born through recommendations by CIOs of major international companies we visited with during that period. The message was clear. Few, if any, major companies were going to put their all of their proprietary data on third party managed or shared systems (aka: Cloud) in the foreseeable future.

Yippy's second generation Blue Flame appliance was developed to speed up the development and deployment processes. Some of the biggest logistical challenges in IT are the coordination of multiple departments, analyzing hardware and software solutions, and security checks which increase cost and personnel requirements. Successful deployments require several IT knowledge disciplines for coding, network and hardware architecture, which creates work flows that are not easily managed and inherently flawed in the process.

Yippy took a logical look at the processes of deploying a big data system and we endeavored to create a software stack from both acquired assets and internally developed technologies to greatly assist big data deployments reducing time on site by as much as 80%. The Company's Blue Flame appliances have been running in businesses for nearly two (2) years and have maintained a 100% uptime record for both software and hardware availability.

Yippy Search Appliance

For over a decade, the leading on-premises enterprise search solution has been the Google Search Appliance (GSA). In February 2016, Google, Inc. ("Google") announced that it was sun-setting the Google Search Appliance, its retirement to be effective early 2018. That means that Chief Information Officers and small business owners alike are suddenly faced with the need to replace their GSA with another search solution. Google has generated significant revenue from the GSA, and based on third party sources and Yippy's internal calculations, the Company estimates the current GSA market to be at least $500 million per year and along with other third party market researchers, forecasts the search enterprise market to continue to grow exponentially.

Upon the news of Google's departure from on premise appliance business, Yippy retooled its Blue Flame Appliance to create a separate search based model called the Yippy Search Appliance (YSA). The YSA serves as a replacement for the GSA while delivering additional technology features for the benefit of the consumer. The YSA allows users to search and derive insights from all structured and unstructured data anywhere, and allows enhanced data sampling. As an example, the YSA can search all of an organization's content at once, while the GSA is only able to search 1000 files per search.

Google sells the GSA through a network of value added resellers (termed Google for Work partners). These resellers (typically data consulting firms) rely upon GSA sales for their revenue. Yippy's strategy for capturing a portion of the GSA market is to form a series of strategic partnerships with GSA resellers who are now seeking an enterprise search partner as a result of Google's planned departure from the market. The Company's YSA product is a cost-effective alternative to the GSA and, with the YSA's additional features, Yippy believes it to be an upgrade for consumers currently using the GSA.

Private Cloud

Yippy's EASE 360, Blue Flame and YSA technology stack provide organizations with a choice of public or private cloud options for internal and external content. This option and functionality is a key solution for the industry, as companies continue to show hesitancy to entrust a cloud-based system as the sole source for storing and maintaining their sensitive and critical

information.

Yippy appliance stacks create a premium Cloud with data federation abilities that unite an entire organization's knowledge base globally, without firewall breaches or other complications. Yippy's solution is platform and data agnostic, which means that the appliance stack can unify SAP, Oracle, Microsoft, Google, Jira, Confluence, Stack, Box or any other enterprise class business product without ever having to change the structure or location in which the data resides.

The Private Cloud-based enterprise unification market is growing quickly, at the expense of third party cloud, and the Company believes there is a market opportunity for a hybrid approach, where highly sensitive information is stored securely on-premises, while less sensitive information is stored off-site on the third party cloud. With the majority of information created in knowledge base systems being private in nature, the third party cloud has limited use cases for major enterprises. For large organizations, the ability to migrate to the cloud incrementally without hard deadlines is a strong selling point for the Company's hybrid solution.

Results of Operations

Revenues

Revenues for the three months ended August 31, 2016, were $270,400, compared to $113,000 for the same period ended August 31, 2015. The increase in revenue from the previous period is attributed to Globalstar pre-launch billing and installation of YSA boxes.

General and Administrative Expenses

General and administrative expenses for the three months ended August 31, 2016 were $110,451, compared to $448,422 for the three months ended August 31, 2015. The decrease in general and administrative expenses is mainly attributed to the reduction software development costs and legal expenses.

Share Based Compensation

Share based compensation was $0 for the three months ended August 31, 2016, compared to $367,120 for the three months ended August 31, 2015. The decrease in share based compensation expense was due to the issuance of a warrant to a legal advisor being fully expensed as of May 31, 2016.

Depreciation and Amortization Expense

Amortization expense relates primarily to the amortization of intangible assets. Amortization expense was $126,761 for the three months ended August 31, 2016, compared to $126,761 for the three months ending August 31, 2015.

Net Loss

The Company experienced a net loss of $35,460 for the three months ended August 31, 2016, compared to $463,100 for the three months ended August 31, 2015. The decrease in net loss was primarily due to increased revenue and substantial reduction in share based compensation charges.

Liquidity and Capital Resources

As of August 31, 2016, the Company had cash on hand of $222,983 and $680,731 in accounts receivables. The Company finances its operations from the proceeds from debt offerings and revenue. The Company is currently in discussions with potential financial and strategic sources of financing but no definitive agreements are in place at the time of this reporting.

We believe that we have sufficient cash on hand to meet our operating expense requirements for the next fiscal year.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements, financings, or other relationships with unconsolidated entities or other persons, also known as "special purpose entities" (SPEs).

ITEM VII: Property

The Company does not currently own any facility. The Company currently maintains a leased administrative office in Atlanta, Ga and Fort Myers, Florida. The facilities are located at 17595 S. Tamiami Trail, Suite 221, Fort Myers, Florida 33908, and 1995 North Park Place, Suite 270, Atlanta, GA 30339.

ITEM X: Legal Proceedings.

From time to time we may become involved in legal proceedings which could adversely affect us. We are currently not involved in any litigation, other than litigation in the ordinary course of business, which we believe could have a materially adverse effect on our financial condition or results of operations. There is no action, suit, proceeding, inquiry or investigation before or by any court, public board, government agency, self-regulatory organization or body pending or, to the knowledge of the executive officers of our company or any of our subsidiaries, threatened against or affecting our company, our common stock, any of our subsidiaries or of our company's or our company's subsidiaries' officers or directors in their capacities as such, in which an adverse decision could have a material adverse effect.

ITEM XI: Defaults Upon Senior Securities.

The Magna Group (dba Hanover Holdings) ("Magna") and the Company are in the pre-trial stage of litigation regarding a dispute concerning the exact amount of debt outstanding which is owed by the Company to Magna pursuant to multiple note transactions entered into by the parties in 2012. The litigation also relates to the application against the outstanding debt of third party collateral which was sold in connection with such transactions. Requests by the Company and its counsel for audited accounting of the transactions in question were repeatedly ignored and to date the Company still has not received such records. The Company does not believe Magna's claims have merit and will continue to defend itself rigorously. The Company does not believe this litigation will have a materially adverse effect on its financial condition or results of operations.

ITEM XII: Other Information.

Not applicable.

ITEM XIII: Exhibits.

Exhibit A – Interim Financial Statements for August 31, 2016.

ITEM XIV: Issuer's Certifications.

I, Richard Granville, certify that:

1. I have reviewed this disclosure statement of Yippy, Inc.;

2. Based on my knowledge, this disclosure statement does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this disclosure statement; and

3. Based on my knowledge, the financial statements, and other financial information included or incorporated by reference in this disclosure statement, fairly present in all material respects the financial condition, results of operations and cash flows of the issuer as of, and for, the periods presented in this disclosure statement.

Note 1. The Company and Summary of Significant Accounting Policies

The Company

Yippy, Inc. (formerly known as Cinnabar Ventures, Inc.) (the "Company") was incorporated in the State of Nevada on May 24, 2006. Yippy Soft, Inc., a Delaware corporation (formerly known as Yippy, Inc.), was incorporated in the State of Delaware on October 6, 2009, and was renamed Yippy Soft, Inc. on April 23, 2010. On January 26, 2010, the Company acquired Yippy Soft, Inc. for 4,680,000 common shares. The acquisition was accounted for as a combination of entities under common control. All historical financial information is presented as combined for all periods presented. On April 15, 2010, the Company changed its name from Cinnabar Ventures, Inc. to Yippy, Inc.

On December 5, 2011, the Company declared a 2-for-1 forward stock split. All per share and share amounts have been restated to reflect the forward stock split in the amounts presented.

On July 30, 2012, the Company formed a wholly owned subsidiary, Yippy Labs, Inc., ("Yippy Labs") a corporation incorporated in British Columbia, Canada. On August 1, 2012, Yippy Labs acquired 100% of the issued and outstanding common stock of Macte! Labs, Inc. ("Macte"), a corporation incorporated in British Columbia, Canada. On March 31, 2013, Yippy Labs sold its interest in Macte.

Yippy provides secure family friendly online web destinations and services such as search, browser, email, cloud applications and storage to family PC's, learning institutions and libraries. In addition, Yippy provides custom search and tool platforms.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statements, which management considered in formulating its estimate could change in the near term due to one or more future confirming events. Accordingly, the actual results could differ significantly from estimates.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

Cash and Cash Equivalents

For purposes of the statement of cash flows, the Company considers all short-term investments purchased with original maturities of three months or less at the date of purchase to be cash equivalents.

Intangible Assets

Intangible assets includes software license agreements with independent parties. Intangible assets have a definite life and are amortized on a straight-line basis, with estimated useful lives of two to seven years. Intangible assets with a definite life are tested for impairment whenever events or circumstances indicate that the carrying amount of an asset (asset group) may not be recoverable. An impairment loss is recognized when the carrying amount of an asset exceeds the estimated undiscounted cash flows used in determining the fair value of the asset. The amount of the impairment loss to be recorded is calculated by the excess of the asset's carrying value over its fair value. No impairment was recognized for the three months ended August 31, 2016.

Note 1. The Company and Summary of Significant Accounting Policies – (continued)

Income Taxes

Income taxes are computed using the asset and liability method. Under the asset and liability method, deferred income taxes and liabilities are determined based on the difference between financial reporting and tax bases of assets and liabilities and are measured using the currently enacted tax rates and laws. A valuation allowance is provided for the amount of deferred tax assets that, based on available evidence, are not expected to be realized.

Revenue Recognition

Revenue is recognized when the price is fixed or determinable, persuasive evidence of an arrangement exists, the service is performed, and collectability of the related fee is reasonably assured. Revenue is derived primarily from IT services and hardware.

Accounts Receivable and Allowances

Trade accounts receivable are recorded at the invoiced amount and do not bear interest. The Company maintains allowances for bad debts. The allowance for doubtful accounts is based on the best estimate of the amount of probable credit losses in existing accounts receivable. The Company determines the allowances based on historical write-off experience by industry and regional economic data and historical sales returns. The Company reviews the allowance for doubtful accounts periodically. The Company does not have any significant off-balance-sheet credit exposure related to its customers.

Fair Value of Financial Instruments

Under Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 820, "*Fair Value Measurements and Disclosures"*, we are permitted to elect to measure financial instruments and certain other items at fair value, with the change in fair value recorded in earnings. We elected not to measure any eligible items using the fair value option. Consistent with the Fair Value Measurement Topic of the FASB ASC 820, we implemented guidelines relating to the disclosure of our methodology for periodic measurement of our assets and liabilities recorded at fair market value.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A three-tier fair value hierarchy prioritizes the inputs used in measuring fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). These tiers include:

- Level 1, defined as observable inputs such as quoted prices for identical instruments in active markets;
- Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable such as quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active; and
- Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions, such as valuations derived from valuation techniques in which one more significant inputs or significant value drivers are unobservable.

Note 1. The Company and Summary of Significant Accounting Policies – (continued)

The carrying amounts of trade and other accounts receivable, trade accounts payable, accrued payroll, bonuses and team member benefits, and other accrued expenses approximate fair value because of the short maturity of those instruments.

Derivative Instruments

In connection with the issuance of certain debt instruments, the Company may provide features allowing the debt to be convertible into

shares of the Company's common stock. In these circumstances, these options may be classified as derivative liabilities, rather than as equity. Additionally, these instruments may contain embedded derivative instruments, such as embedded derivative features which in certain circumstances may be required to be bifurcated from the associated host instrument and accounting for separately as a derivative instrument liability.

The Company's derivative instrument liabilities are re-valued at the end of each reporting period, with the changes in the fair value of the liability recorded as charges or credits to income in the period in which the changes occur. For warrants and bifurcated embedded derivative features that are accounting for as derivative instrument liabilities, the Company estimates the fair value using either quoted market prices of financial instruments with similar characteristics or other valuation techniques. The valuation techniques require assumptions related to the remaining term of the instrument and risk-free rates of return, expected dividend yield, and the expected volatility of the Company's common stock over the life of the instrument. Because of the limited trading history of the Company's common stock, the Company estimates the future volatility of its common stock price based on not only the history of its stock price but also the experience of other entities considered to be comparable to the Company.

Earnings Per Share

In accordance with accounting guidance now codified as ASC Topic 260, *"Earnings per Share,"* basic earnings (loss) per share is computed by dividing net income (loss) by weighted average number of shares of common stock outstanding during each period. Diluted earnings (loss) per share is computed by dividing net income (loss) by the weighted average number of shares of common stock, common stock equivalents and potentially dilutive securities outstanding during the period.

Since the Company reflected net losses for the three months ended August 31, 2016 and 2015, the effect of considering any common stock equivalents, if outstanding, would have been anti-dilutive. A separate computation of diluted earnings (loss) per share is not presented.

New Accounting Pronouncements

Management does not expect adoption of recently issued but not yet effective pronouncements to have a material impact on the Company's financial statements.

Note 2. Accounts receivable

At August 31, 2016, the Company evaluated the collectability of accounts receivable and determined that an allowance for doubtful accounts of $175,000 was necessary due to the cancellation of a project by a customer. Accounts receivable at August 31, 2016 and May 31, 2016 consists of:

	August 31, 2016	May 31, 2016
Accounts receivable	$ 855,731	$ 584,912
Less: Allowance for doubtful accounts	175,000	175,000
Balance, accounts receivable	$ 680,731	$ 409,912

Note 3. Intangible Assets

On May 17, 2010, the Company entered into a license agreement (the "License Agreement") with Vivisimo, Inc. ("Vivisimo"), granting the Company a non-exclusive, world-wide right to the use of "Velocity," a software information optimization platform that unifies access to secure business repositories, presents relevant information and enables knowledge sharing across an enterprise, for use in connection with computer applications currently being developed by the Company. In connection with the License Agreement, the Company acquired the domain Clusty.com, a metasearch engine, and all sub-domains and scripts related thereto, pursuant to a related purchase agreement (the "Purchase Agreement"). Vivisimo agreed not to compete with the Company in the consumer search area for a

period of two years. Total consideration paid to Vivisimo under the Purchase Agreement and License Agreement was approximately $5,550,000 (the "Acquisition Price"). In May 2012, Vivisimo was acquired by IBM.

On December 10, 2015, the Company entered into a 20 year license agreement with Globalstar, Inc. ("Globalstar") whereby the Company granted a limited exclusive (MSS industry) license to Globalstar for the use of the Company's technology and Globalstar granted to the Company the right to market its services to Globalstar's customers. The Company also received a carrier sales agreement for Globalstar services up to 20% of the network capacity with colocation and hosting in all the Globalstar network operation centers worldwide. The Company issued 14,430,000 shares of its common stock to Globalstar in exchange for the license agreement. The common stock has a market value of $3,028,857 on the date of issuance.

The intangible assets included in the table below:

Description	August 31, 2016	May 31, 2016	Estimated Useful Life
Software license	$ 3,849,180	$ 3,849,180	5 - 7 years

Less: accumulated amortization	(4,693,520)	(4,566,714)	
Intangible assets, net	$ 4,586,667	$ 4,713,473	

On an annual basis the Company will evaluate the carrying value of intangible assets and determine if impairment has occurred and if so, record a charge for impairment. Management has concluded no impairment exists as of August 31, 2016.

The Company recorded amortization expense of $126,806 for the three months ended August 31, 2016 and 2015, respectively, related to the intangible assets.

Note 4. Property and equipment

Property and equipment consists of the following at August 31, 2016 and May 31, 2016:

Description	August 31, 2016	May 31, 2016	Estimated Useful Life

Plus: Amortization of Discounts	22,536	16,155
Total Convertible Notes Payable	$ 122,536	$ 53,845

Accrued interest on the convertible notes payable was $2,214 and $8,692 at August 31, 2016 and May 31, 2016, respectively.

Note 6. Going Concern

As reflected in the accompanying financial statements, the Company has accumulated net losses of $20,217,834 since inception and a net loss of 35,461 for the quarter ended August 31, 2016.

The Company may seek additional funds to finance its immediate and long-term operations through debt and/or equity financing. The successful outcome of future financing activities cannot be determined at this time and there is no assurance that if achieved, the Company will have sufficient funds to execute its intended business plan or generate positive operating results.

These factors, among others, raise substantial doubt about the Company's ability to continue as a going concern. The accompanying financial statements do not include any adjustments related to recoverability and classification of asset carrying amounts or the amount and classification of liabilities that might result should the Company be unable to continue as a going concern.

Note 7. Related Party Transactions

An officer and director of the Company and a shareholder advance funds to and from the Company from time to time. The balance due the sole director and officer and the shareholder, which is included in convertible notes payable – related party, was $37,770 and $72,770 at August 31, 2016 and May 31, 2016, respectively.

Note 8. Stockholders' Equity (Deficit)

In the year ended May 31, 2015 convertible notes in the principal amount of $30,000 were converted for 303,000 shares.

On December 10, 2015, the Company entered into a 20 year license agreement with Globalstar, Inc. ("Globalstar") whereby the Company granted a limited exclusive (MSS industry) license to Globalstar for the use of the Company's technology and Globalstar granted to the Company the right to market its services to Globalstar's customers. The Company also received a carrier sales agreement for Globalstar services up to 20% of the network capacity with colocation and hosting in all the Globalstar network operation centers worldwide. The Company issued 14,430,000 shares of its common stock to Globalstar in exchange for the license agreement. The common stock has a market value of $3,028,857 on the date of issuance.

Note 8. Stockholders' Equity (Deficit) (cont'd)

In June 2016, holders of $70,000 in convertible notes payable elected to convert their notes. Accrued interest on the notes totaling $15,895 was also converted. The Company issued 814,000 shares of its common stock in connection with these conversions.

Warrants

In September 2013, the Company issued 250,000 warrants to legal counsel for legal services performed. Fair value of the warrants at the date of grant was $42,500. The warrants have an exercise price of $0.20 per share, subject to adjustment, and have a term of three years.

In the year ended May 31, 2015, the Company issued 250,000 warrants in exchange for accounting services on March 1, 2015. Fair

value of the warrant at the date of the grant was $7,500. The stock grant has an exercise price of $0.20 per share.

On July 15, 2015, the Company entered into a consulting agreement with a law firm to provide legal representation to the Company in exchange for a warrant to purchase a total of 2,500,000 shares of the Company's common stock at a purchase price of $0.03 per share. The warrant has term of five years. The fair market value of the warrant was $706,000 on the date of issuance. The warrant was valued using the Black-Scholes option pricing model with the following assumptions: volatility of 5.14%, risk adjusted interest rate of 1.66%, and zero dividends. The warrant vests as follows: 1,000,000 shares upon issuance and 100,000 shares per month, starting June 30, 2015. The Company recognized legal expense of $1,351,840 during the year ended May 31, 2016 related to the vesting of the warrant and the common stock. The legal expense related to the warrant was fully amortized as of May 31, 2016.

Note 9. Acquisition
