Valterra Resource Corporation

(An Exploration Stage Company)

Management's Discussion and Analysis

For the Year Ended December 31, 2015

A. Introduction

The following Management's Discussion and Analysis ("MD&A") of the operating results and financial condition of Valtterra Resource Corporation (the "Company") is for the year ended December 31, 2015, and is dated April 26, 2016. This MD&A was prepared to conform to National Instrument 52-102F1 and was approved by the Board of Directors prior to its release. This analysis should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2015, and the accompanying notes, which have been prepared in accordance with International Financial Reporting Standards ("IFRS").

The Company's shares are listed on the TSX Venture Exchange under the symbol "VQA.V" and the Frankfurt Stock Exchange under the symbol "3VA.F".

The Company's functional and presentation currency is the Canadian dollar and all amounts included herein are in Canadian dollars, unless otherwise indicated.

Additional information relating to the Company, including detailed drill results previously disclosed in news releases, is available on the Company's website at www.valterraresource.com and on SEDAR at www.sedar.com.

B. Qualified Person

Robert W. J. Macdonald, P. Geo., is the qualified person under National Instrument 43-101 responsible for the technical information included in this MD&A and the supervision of work done in association with the exploration and development programs. Mr. Macdonald graduated with a B.Sc. degree from Memorial University of Newfoundland and a M.Sc. from the University of British Columbia. His work has focused on vein and intrusive-related gold systems and massive sulfide deposits.

Valterra Resource Corporation

(An Exploration Stage Company)

Management's Discussion and Analysis

For the Year Ended December 31, 2015

D. Summary of Mineral Properties

The Company's principal business activities include the acquisition, exploration, and development of natural resource properties for enhancement of value and disposition pursuant to sales agreements or development by way of third party option and/or joint venture agreements and has been aggressively exploring in British Columbia and Ontario, Canada.

Swift Katie

The Swift Katie Cu-Au-porphyry property comprises more than 83 square kilometres and is located near Salmo, British Columbia in an area that, historically, has hosted several important mining districts, and is underlain by rocks considered very favourable for the discovery of porphyry-style mineralization.

Since acquisition, the Company has completed 15 drill holes (4,866m) and returned several encouraging intercepts indicative of bulk-tonnage Cu-Au-Ag from the main Katie Zone. Mineralization occurs in volcano-sedimentary rocks of the Rossland Group which hosts numerous precious-metal and polymetallic past-producers in the region.

The drilling outlines a Cu-Au-Ag inventory measuring approximately 600 metres of strike length by 400 metres width, and up to 300 metres depth; being open in several directions. Inventory review work included surveying of historic drill collars, an assessment of the historic QA/QC protocols, and drill spacing with the ultimate goal being to develop a NI 43-101 compliant bulk-tonnage Cu-Au-Ag resource. A previous soil sampling program identified geochemical anomalies (copper, gold, silver and potassium) within anomalous resistivity and magnetic signatures. These geophysical and geochemical anomalies are coincident with host rocks which are of a prospective age and lithology for hosting mineralization.

The Swift target lies immediately south of the Katie deposit which hosts alkalic porphyry copper-gold mineralization. Alkalic porphyry mineralization commonly occurs in clusters, thus the Swift area presents a compelling target.

A previous reconnaissance drilling program consisted of five diamond drill holes totaling 1,423 metres. These holes tested soil and resistivity anomalies over a 1 square kilometre area. Spacing between drill hole collars ranged from 350 metres to 900 metres. The program encountered numerous zones of precious metal mineralization which include 23.4 g/t gold, 0.621% copper and 435 g/t silver over 1.5 metre, and an adjacent 2 metre, interval grading 5.69 g/t gold, 0.128% copper and 26.6 g/t silver from hole SK14-002.

The high-grade gold-silver vein intercepts warrant further exploration and follow-up, as the primary exploration objective to date has only focused on the large-scale copper-gold porphyry potential of the Swift target.

The two zones associated with the high-grade precious metals include 20-40 centimetre wide pyrite-pyrrhotite-chalcopyrite veins at the contact between andesite and a diorite intrusive and sit within a much broader zone of elevated copper mineralization (>100ppm Cu) with zones of strongly anomalous gold and silver. The interval in SK14-002 from 179.5 metres to 181 metres has associated polymetallic mineralization including 0.6% lead. This polymetallic mineralization may be an indication of a porphyry transitional environment.

Valterra Resource Corporation

(An Exploration Stage Company)

Management's Discussion and Analysis

For the Year Ended December 31, 2015

D. Summary of Mineral Properties, continued

Swift Katie, continued

Drill holes SK14-001 and SK14-003 did not intersect significant copper or gold values, however hydrothermal alteration in the form of chlorite, epidote, calcite, pyrite and magnetite were intercepted in both holes. In addition, indicators of porphyry-style mineralization have been intersected, including zones of potassic alteration (biotite and magnetite) in SK14-002, SK14-004 and SK14-005.

The results support the belief that there is a hydrothermal system associated with porphyry Cu-Au at Swift and are being evaluated along with property-scale targets to determine the next phase of work.

The Company also believes that the drill results are positive in finding gold mineralization and alkalic porphyry Cu-Au style alteration. Further work may expand these mineralized widths and over a half dozen targets remain to be tested on the property.

Bobcaygeon

On December 30, 2014, the Company received notice of default of the option agreement which claimed failure to deliver shares of sufficient value and failure to incur required expenditures, amongst certain other claims.

On January 29, 2015, the Company responded to the notice disputing the claims therein and requested a standstill period in accordance with the terms of the agreement.

On December 16, 2015, the Company received a final notice of default and the property was returned to the vendor.

Acquisition Costs

Mineral property acquisition costs are capitalized, net of recoveries. Mineral property acquisition costs as at December 31, 2015, were as follows:

	Bobcaygeon	Swift Katie	Total
	\$	\$	\$
Balance as at December 31, 2013	59,325	388,175	447,500

Valterra Resource Corporation

(An Exploration Stage Company)

Management's Discussion and Analysis

For the Year Ended December 31, 2015

E. Results of Operations, continued

The Company has mostly been focused on financing efforts and other strategic initiatives during the current period in order that it may continue with its mandate to acquire, explore, and develop mineral resource properties.

Wherever possible, the Company has been reducing general and administration costs.

Additional legal fees were incurred during the current period with respect to a notice of demand for payment of the Company's bank indebtedness (*J - Financial Condition, Liquidity and Capital Resources*).

On June 30, 2015, a Notice of Claim was filed in Small Claims Court regarding disputed amounts owed to a certain vendor that the Company believed total \$44,497. The Notice of Claim demanded payment of \$25,000 and stated that the vendor would abandon any claims to payment in excess of this amount plus costs. As a result, a gain on settlement of debt of \$19,497 was subsequently recognized.

As the Company continues to assess planned courses of action with respect to the Swift Katie property it has determined this to be an indicator of impairment. Accordingly, an impairment provision was recognized against all capitalized costs incurred to date (2014 - impairment recognized as a result of an unresolved dispute with respect to the Bobcaygeon option agreement).

F. Summary of Quarterly Results

The following financial data was derived from the Company's financial statements for the last eight quarters:

	Dec 31	Sept 30	Jun 30	Mar 31	Dec 31	Sept 30	Jun 30	Mar 31
	2015	2015	2015	2015	2014	2014	2014	2014
	\$	\$	\$	\$	\$	\$	\$	\$
Net loss	374,759	8,020	26,791	19,443	154,991	24,665	47,938	46,944
Basic and diluted loss per share	\$0.01	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00

Due to the nature of its current operation, the Company earned no revenue during the periods presented.

Quarterly fluctuations mainly relate to mineral property exploration expenditures and impairments which occur as projects are identified and results are analyzed or other indicators arise. Significant impairment charges were recognized in the three months ended December 31, 2015 and 2014.

G. Fourth Quarter

Other than already disclosed, no other unusual events affected the Company's financial performance or cash flows during the fourth quarter.

Valterra Resource Corporation

(An Exploration Stage Company)

Management's Discussion and Analysis

For the Year Ended December 31, 2015

H. Summary of Annual Information

The following represents certain financial data for the previous three fiscal years:

	2015	2014	2013
	\$	\$	\$
Net loss	(429,013)	(274,538)	(1,133,634)
Basic and diluted loss per share	(0.01)	(0.01)	(0.04)
Current assets	10,174	9,375	66,546
Other non-current assets	-	10,000	45,000
Mineral properties	-	388,175	447,500
Total assets	10,174	407,550	559,046
Total non-current financial liabilities	-	-	-
Cash dividends per common share	-	-	-

The Company earned no revenue during the periods presented other than minimal interest income due to the nature of the industry and its current operations. The Company's operating costs fluctuate as financing or other ad-hoc projects are undertaken. Costs previously incurred under a services agreement decreased due to the cessation of the agreement that came into effect on October 1, 2013. The Company continues to invest in its mineral properties as finance and assessments have permitted. Impairment charges are recognized as relevant indicators arise.

To date, the Company has not paid dividends and does not have any long-term financial liabilities.

I. Related Party Transactions

The Company entered into the following related party transactions during the year ended December 31, 2015:

(a) Under a service agreement between the Company and a private company controlled by a director and officer of the Company, the Company was charged as follows:

- \$nil (2014 - \$30,368) for geological consulting services; and
- \$nil (2014 - \$448) in respect of the mark-up on out-of-pocket expenses.

Effective October 1, 2013, the Company received notice that it was in default of the service agreement. Amounts payable as at December 31, 2015 were \$11,025 (2014 - \$11,025).

(b) Fees relating to legal and consulting services of \$nil (2014 - \$nil) were charged by a private company controlled by a director and officer of the Company. Amounts payable as at December 31, 2015 were \$4,373 (2014 - \$4,373).

(c) Fees relating to consulting services of \$12,000 (2014 - \$12,000) were charged by an officer of the Company. Amounts payable as at December 31, 2015 were \$30,500 (2014 - \$18,500).

Valterra Resource Corporation

(An Exploration Stage Company)

Management's Discussion and Analysis

For the Year Ended December 31, 2015

I. Related Party Transactions, continued

(d) Fees relating to geological consulting services of \$nil (2014 - \$2,813) were charged by a private company controlled by a director of the Company.

(e) Loans totalling \$5,460 (2014 - \$nil) are payable to directors of the Company with respect to funds advanced.

These transactions were in the normal course of operations and were measured at the fair value of the services rendered. Amounts due to related parties are unsecured, non-interest-bearing, and have no formal terms of repayment.

The key management personnel of the Company are the directors and officers of the Company. The Company has no long-term employee or post-employment benefits.

A summary of compensation awarded to key management, included in (c) and (d) above, is as follows:

	2015		2014	
Short-term benefits	\$	12,000	\$	14,813
Total	\$	12,000	\$	14,813

J. Financial Condition, Liquidity and Capital Resources

As at December 31, 2015, the Company had a working capital deficit of \$501,265 (2014 - \$470,427).

Where possible, the Company has been negotiating extended payment terms of its trade payables and reviewing its capital expenditure plan and future commitments to identify opportunities to reduce or delay spending and payments. However, the Company does not generate any revenue from operations and, without further financing, the Company does not have sufficient capital to meet the requirements for its administrative overhead, maintaining its mineral interests and continuing with its exploration program in the following twelve months.

For the foreseeable future, the Company will need to rely on raising capital in the equity markets and/or enter into joint venture agreements with third parties to provide working capital and to finance its mineral property acquisition and exploration activities.

Although the Company has been successful in obtaining financing through the issuance of its securities, there can be no assurance that the Company will be able to obtain adequate financing in the future in light of factors such as the market demand for its securities, the general state of financial markets and other relevant factors.

Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of its projects with a possible loss of some properties and reduction or termination of operations.

Valterra Resource Corporation

(An Exploration Stage Company)

Management's Discussion and Analysis

For the Year Ended December 31, 2015

J. Financial Condition, Liquidity and Capital Resources, continued

Bank indebtedness

Bank indebtedness was previously due on demand and secured by a letter of credit from Schroders (C.I.) supported by a guarantee by a company owned by a shareholder of the Company. Pursuant to an agreement, as amended on February 3, 2015, the guarantee was extended until September 30, 2015.

On April 20, 2015, the Company received notice of demand for payment of the bank indebtedness. As the Company was unable to comply with this notice, on June 1, 2015, security was enforced against the letter of credit from Schroders (C.I.) and supporting guarantee in the amount of \$199,810. The amount now owing under the guarantee is currently unsecured, has no formal terms of repayment and is presented within accounts payable and accrued liabilities in the financial statements.

Claims

On June 30, 2015, a Notice of Claim was filed in Small Claims Court regarding disputed amounts owed to a certain vendor that the Company believes total approximately \$45,000. The Notice of Claim demanded payment of \$25,000 and stated that the vendor abandoned any claims to payment in excess of this amount plus costs.

The Company was unable to pay and could not offer a reasonable settlement. On August 21, 2015, a Notice of Seizure was filed against the remaining balances in the Company's bank accounts that totaled approximately \$2,500.

K. Outstanding Equity and Convertible Securities

i) Issued and outstanding

As at December 31, 2015 and April 26, 2016, the Company had 32,735,925 common shares issued and outstanding.

ii) Stock Options

As at December 31, 2015 and April 26, 2016, stock options outstanding and exercisable were as follows:

Exercise Price	Expiry Date	Balance December 31, 2015	Balance April 26, 2016
\$1.00	November 17, 2016	20,000	20,000
\$0.10	July 19, 2017	480,000	480,000
\$0.12	December 17, 2017	1,375,000	1,375,000
\$0.17	March 1, 2018	100,000	100,000
		1,975,000	1,975,000
Weighted average exercise price		\$0.13	\$0.13
Weighted average contractual life remaining (years)		1.86	1.54

Valterra Resource Corporation
(An Exploration Stage Company)
Management's Discussion and Analysis
For the Year Ended December 31, 2015

K. Outstanding Equity and Convertible Securities, continued

iii) Share Purchase Warrants

As at December 31, 2015 and April 26, 2016, share purchase warrants outstanding were as follows:

Exercise Price	Expiry Date	Balance December 31, 2015	Expired	Balance April 26, 2016
\$1.00	January 31, 2016	5,000	5,000	-
\$0.05	February 20, 2017	3,105,000	-	3,105,000
\$0.05	February 21, 2017	785,650	-	785,650
\$0.05	June 10, 2017	1,000,000	-	1,000,000
\$0.05	August 12, 2017	100,000	-	100,000
		4,995,650	5,000	4,990,650
Weighted average exercise price		\$0.05	\$1.00	\$0.05
Weighted average contractual life remaining (years)		1.21		0.89

L. Financial Instruments

The Company's financial instruments include cash, reclamation bond, bank indebtedness, accounts payable and accrued liabilities and due to related parties. The Company has classified its financial instruments into the following categories:

Financial Instrument	Category	Carrying Value
Cash	FVTPL	Fair Value
Reclamation Bond	Loans and Receivables	Amortized Cost
Bank Indebtedness	Other Financial Liabilities	Amortized Cost
Accounts Payable and Accrued Liabilities	Other Financial Liabilities	Amortized Cost
Due to Related Parties	Other Financial Liabilities	Amortized Cost

The carrying values of accounts payable and accrued liabilities and due to related parties approximate their fair values due to the short period to maturity. During the year ended December 31, 2015, the reclamation bond was refunded and bank indebtedness was repaid.

These financial instruments have no material risk exposure.

M. Events After the Reporting Period and Outlook

There are no other material events subsequent to the date of this document. The Company is confident that its property has potential warranting continued exploration. Activities over the ensuing year will focus on this. The Company expects to continue its strategy of collaborating with experienced mining companies to develop properties and to advance them to production.

Valterra Resource Corporation

(An Exploration Stage Company)

Management's Discussion and Analysis

For the Year Ended December 31, 2015

N. Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements and does not contemplate entering into any such arrangements in the foreseeable future.

O. Disclosure Controls and Procedures

The Board of Directors, through its Audit Committee, is responsible for ensuring that management fulfils its responsibilities for financial reporting and internal control. The Audit Committee is composed of three independent directors who meet at least quarterly with management and at least annually with the external auditors to review accounting, internal control, financial reporting, and audit matters.

There have been no significant changes to the Company's internal control over financial reporting that occurred during the period that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

The Audit Committee has established procedures for complaints received regarding accounting, internal controls or auditing matters, and for a confidential, anonymous submission procedure for employees who have concerns regarding questionable accounting or auditing matters.

The Whistleblower policy is in accordance with National Instrument 52-110 Audit Committees, National Policy 58-201 Corporate Governance Guidelines and National Instrument 58-101 Disclosure of Corporate Governance Practices.

Being a venture issuer, the Company is exempted from the certification on Disclosure Controls and Procedures and Internal Control Over Financial Reporting. The Company is required to file Form 52-109FV1 for annual reporting and Form 52-109FV2 for interim reporting.

P. Risks and Uncertainties

The principal business of the Company is the acquisition, exploration and development of mineral properties. Given the nature of the mining business, the limited extent of the Company's assets and the present stage of development, the following risk factors, among others, should be considered:

Exploration Stage Company

The Company does not hold any known mineral reserves of any kind and does not generate any revenues from production. The Company's success will depend largely upon its ability to locate commercially productive mineral reserves. Mineral exploration is highly speculative in nature, involves many risks and frequently is non productive. There is no assurance that exploration efforts will be successful. Success in establishing reserves is a result of a number of factors, including the quality of management, the level of geological and technical expertise, and the quality of property available for exploration.

Once mineralization is discovered, it may take several years in the initial phases of drilling until production is possible, during which time the economic feasibility of production may change.

Valterra Resource Corporation

(An Exploration Stage Company)

Management's Discussion and Analysis

For the Year Ended December 31, 2015

P. Risks and Uncertainties, continued

Exploration Stage Company, continued

Substantial expenditures are required to establish proven and probable reserves through drilling and bulk sampling, to determine the optimal metallurgical process to extract the metals from the ore and, in the case of new properties, to construct mining and processing facilities.

Because of these uncertainties, no assurance can be given that exploration programs will result in the establishment or expansion of resources or reserves.

Operating History and Availability of Financial Resources

The Company has no operating revenues and is unlikely to generate any significant amount in the foreseeable future. Hence, it may not have sufficient financial resources to undertake by itself all of its planned mineral property acquisition and exploration activities.

Operations will continue to be financed primarily through the issuance of securities and such reliance on the issuance of securities for future financing may result in dilution to existing shareholders.

Furthermore, the amount of additional funds required may not be available under favourable terms, if at all. Failure to obtain additional funding on a timely basis could result in delay or indefinite postponement of further exploration and development and could cause the Company to forfeit its interests in some or all of its properties or to reduce or discontinue its operations.

Price Volatility and Lack of Active Market

For some time, the securities markets in Canada and elsewhere have experienced a high level of price and volume volatility, and the market prices of securities of many public companies have experienced significant fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies.

It may be anticipated that any quoted market for the Company's securities will be subject to such market trends and that the value of such securities may be affected accordingly. If an active market does not develop, the liquidity of the investment may be limited and the market price of such securities may decline below the subscription price.

Competition

The resource industry is intensively competitive in all of its phases, and the Company competes with many other companies possessing much greater financial and technical resources. Competition is particularly intense with respect to the acquisition of desirable undeveloped properties. The principal competitive factors in the acquisition of prospective properties include the staff and data necessary to identify and investigate such properties, and the financial resources necessary to acquire and develop the projects. Competition could adversely affect the Company's ability to acquire suitable prospects for exploration.

Valterra Resource Corporation

(An Exploration Stage Company)

Management's Discussion and Analysis

For the Year Ended December 31, 2015

P. Risks and Uncertainties, continued

Title to Property

Although the Company has exercised the usual due diligence with respect to title to properties in which it has a material interest, there is no guarantee that title to the properties will not be challenged or impugned.

The Company's mineral property interest may be subject to prior unregistered agreements or transfers, aboriginal land claims, government expropriation and title may be affected by undetected defects. In addition, certain of the mining claims in which the Company has an interest are not recorded in the name of the Company and cannot be recorded until certain steps are taken by other parties.

Licenses and Permits

The operations of the Company require licenses and permits from various government authorities. The Company believes that it holds all necessary licenses and permits under applicable laws and regulations for work in progress and believes it is presently complying in all material respects with the terms of such licenses and permits.

However, such licenses and permits are subject to change in various circumstances. There can be no guarantee that the Company will be able to obtain or maintain all necessary licenses and permits that may be required to explore and develop its properties, commence construction or operation of mining facilities or to maintain continued operations that economically justify the cost.

Dependence on Key Personnel

The Company is dependent on a relatively small number of key directors, officers and senior personnel. Loss of any one of those persons could have an adverse effect on the Company. The Company does not currently maintain "key-man" insurance in respect of any of its management.

Government Regulations and Environmental Risks and Hazards

The Company conducts exploration activities in Canada, and is subject to various federal and provincial laws, rules and regulations, including environmental legislation. Environmental legislation is becoming increasingly stringent and costs and expenses of regulatory compliance are increasing. The impact of new and future environmental legislation on the Company's operations may cause additional expenses and restrictions. If the restrictions adversely affect the scope of exploration and development on the resource property interests, the potential for production on the property may be diminished or negated.

The Company has adopted environmental practices designed to ensure that it continues to comply with environmental regulations currently applicable to it. All of the Company's activities are in compliance in all material respects with applicable environmental legislation. Environmental hazards may exist on the Company's properties, hazards that are unknown to the Company at present, which have been caused by previous or existing owners or operators of the properties. The Company is not aware of any existing environmental hazards related to any of its current or former property interests that may result in material liability to the Company.

Q. Changes in Accounting Policies Including Initial Adoption

Future Accounting Standards Changes

IFRS 9: *Financial Instruments* will eventually form a complete replacement for IAS 39: *Financial Instruments: Recognition and Measurement*. All financial assets are classified as measured at amortized cost or at fair value based on the Company's business model for managing financial assets and the contractual cash flow characteristics of the financial assets. Financial liabilities are classified as subsequently measured at amortized cost except for financial liabilities classified at fair value through profit and loss, financial guarantees and certain other exceptions.

In response to delays to the completion of the remaining phases of the project, on December 16, 2011, the IASB issued amendments to IFRS 9 which deferred the mandatory effective date from January 1, 2013 to annual periods beginning on or after January 1, 2018. The amendments also provided relief from the requirement to restate comparative consolidated financial statements for the effects of applying IFRS 9. The Company is currently assessing these effects.

R. Proposed Transactions

Other than normal course review of monthly submittals and on-going plans to raise finance, there are no other proposed transactions contemplated as at the date of this report.

S. Forward-Looking Statements

Some of the statements contained in this MD&A may be deemed "forward-looking statements."

These include estimates and statements that describe the Company's future plans, objectives or goals, and expectations of a stated condition or occurrence. Forward-looking statements may be identified by the use of words such as "believes", "anticipates", "expects", "estimates", "may", "could", "would", "will", or "plan". Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties.

Actual results relating to, among other things, results of exploration, reclamation, capital costs, and the Company's financial condition and prospects, could differ materially from those currently anticipated in such statements for many reasons such as but not limited to; changes in general economic conditions and conditions in the financial markets; changes in demand and prices for the minerals the Company expects to produce; litigation, legislative, environmental and other judicial, regulatory, political and competitive developments; technological and operational difficulties encountered in connection with the Company's activities; and changing foreign exchange rates and other matters discussed in this MD&A.

Readers should not place undue reliance on the Company's forward-looking statements. Further information regarding these and other factors, which may cause results to differ materially from those projected in forward-looking statements, are included in the filings by the Company with securities regulatory authorities. The Company does not assume any obligation to update or revise any forward-looking statement that may be made from time to time by the Company or on its behalf, except in accordance with applicable securities laws, whether as a result of new information, future events or otherwise.
