CERTIVE SOLUTIONS INC.

Notes to consolidated condensed interim financial statements for the period ended August 31, 2016

(Unaudited - Expressed in U.S. Dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

Certive Solutions Inc. ("the Company") was incorporated under the Laws of British Columbia and is traded on the Canadian Security Exchange ("CSE"). The Company provides revenue cycle management solutions to U.S. hospitals, delivered collaboratively, utilizing proprietary workflow document management and analytics management tailored to health care business processes. The Company is currently focused on the denied claim segment of revenue cycle management and provides solutions to enhance the efficiency and effectiveness of denied claims recovery in a revenue sharing relationship that improves hospitals' net operating results.

The consolidated financial statements of the Company are presented in U.S. dollars, which is the functional currency of the Company, unless otherwise indicated.

The consolidated financial statements were prepared on a going concern basis, under the historical cost convention. The Company's ability to continue as a going concern is dependent upon the ability of the Company to obtain financing and generate positive cash flows from its operations. The Company has minimal capital resources presently available to meet obligations which normally can be expected to be incurred by similar companies and has a working capital deficit of \$4,899,362 (May 31, 2016 - \$4,467,088), a loss for the period of \$430,034 (2015 - \$470,712) and a deficit of \$21,808,152 (May 31, 2016 - \$21,378,118).

Management of the Company does not expect that cash flows for the Company's operations will be sufficient to cover all of its operating requirements, financial commitments and business development priorities during the next twelve months. Accordingly, the Company expects that it will need to obtain further financing in the form of debt, equity or a combination thereof for the next twelve months. There can be no assurance that additional funding will be available to the Company, or, if available, that this funding will be on acceptable terms. If adequate funds are not available, the Company may be required to delay or reduce the scope of any or all of its operations.

2. BASIS OF PRESENTATION AND CHANGES TO THE ACCOUNTING POLICIES

Statement of compliance

The interim condensed consolidated financial statements for the three months ended August 31, 2016 have been prepared in accordance with IAS 34 Interim Financial Reporting.

The interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Company's annual financial statements as at May 31, 2016.

These consolidated condensed interim financial statements were authorized by the audit committee and board of directors of the Company on October 28, 2016

2. BASIS OF PRESENTATION AND CHANGES TO THE ACCOUNTING POLICIES (cont'd...)

Use of estimates and judgments

The preparation of the consolidated condensed interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements. Actual results could differ from these estimates.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting year, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

i) Depreciation

The Company's management exercises its judgment in estimating the useful lives of the depreciable assets. The estimated useful lives reflect the management's estimate of the years the Company intends to derive future economic benefits from the use of these assets. The Company depreciates its capital assets in accordance with the accounting policies stated in Note 3.

ii) Recovery of deferred tax assets

Judgment is required in determining whether deferred tax assets are recognized on the statement of financial position. Deferred tax assets, including those arising from un-utilized tax losses require management to assess the likelihood that the Company will generate taxable earnings in future years, in order to utilize recognized deferred tax assets. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded at the reporting date could be impacted.

Additionally, future changes in tax laws in the jurisdictions in which the Company operates could limit the ability of the Company to obtain tax deductions in future years.

iii) Contingencies

By their nature, contingencies will only be resolved when one or more future events occur or fail to occur. The assessment of contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events.

2.BASIS OF PRESENTATION AND CHANGES TO THE ACCOUNTING POLICIES (cont'd...)**Determination of functional currency**

The functional currency is the currency of the primary economic environment in which the entity operates. Management has determined that the functional currency for the Company is the U.S. dollars. The functional currency determination was conducted through an analysis of the consideration factors identified in IAS 21, *The Effects of Changes in Foreign Exchange Rates*.

Basis of consolidation

These consolidated financial statements include the accounts of the Company and its subsidiaries. Intra-company balances and transactions, and any unrealized income and expenses arising from intra-company transactions, are eliminated in preparing the consolidated financial statements.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial assets

The Company classifies its financial assets into one of the following categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

Fair value through profit or loss - This category comprises derivatives, or assets acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statement of financial position at fair value with changes in fair value recognized through profit or loss.

Loans and receivables - These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are carried at cost less any provision for impairment. Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default.

Held-to-maturity investments - These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at amortized cost using the effective interest method. If there is objective evidence that the investment is impaired, determined by reference to external credit ratings and other relevant indicators, the financial asset is measured at the present value of estimated future cash flows. Any changes to the carrying amount of the investment, including impairment losses, are recognized through profit or loss.

Available-for-sale - Non-derivative financial assets not included in the above categories are classified as available-for-sale. They are carried at fair value with changes in fair value recognized directly in equity. Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment, the amount of the loss is removed from equity and recognized through profit or loss.

The Company has not classified any financial assets as held-to-maturity or available for sale.

All financial assets except for those at fair value through profit or loss are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is any objective evidence that a financial asset or a Company of financial assets is impaired. Different criteria to determine impairment are applied for each category of financial assets, which are described above.

The Company has classified its cash as fair value through profit or loss. The Company's receivables and due from related parties are classified as loans and receivables.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

Financial liabilities (cont'd...)

The Company classifies its financial liabilities into one of two categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

Fair value through profit or loss - This category comprises derivatives, or liabilities acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statement of financial position at fair value with changes in fair value recognized through profit or loss.

Other financial liabilities: This category includes short term loans, promissory notes, convertible debts, amounts due to related parties, and accounts payables and accrued liabilities, all of which are recognized at amortized cost.

Financial risk management

The board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's financial instruments consist of receivables, due from related parties, accounts payable and accrued liabilities, convertible debt, due to related parties and short term loan.

The fair value of cash is measured on the statement of financial position using level 1 of the fair value hierarchy. The fair value of convertible debt is measured on the statement of financial position using level 2 of the fair value hierarchy.

The fair values of receivables, due from related parties, accounts payable and accrued liabilities, due to related parties, subscriptions payable and short term loan approximate their book values because of the short-term nature of these instruments.

Financial instrument risk exposure

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management processes.

Credit risk

Credit risk is the risk of financial loss to the Company if counterparty to a financial instrument fails to meet its payment obligations. The Company has no material counterparties to its financial instruments with the exception of the financial institutions which hold its cash. The Company manages this credit risk by ensuring that these financial assets are placed with a major financial institution with strong investment grade ratings by a primary ratings agency. The Company's receivables consist primarily of harmonized sales tax due from the Canada Revenue Agency. The Company does not believe it has a material exposure to credit risk.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure as described in Note 4. There is a risk that the Company may not be able to meet its financial obligation when they are due. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms. As at May 31, 2016 the Company has no financial assets that are past due or impaired due to credit risk defaults.

CERTIVE SOLUTIONS INC.

Notes to consolidated condensed interim financial statements for the period ended August 31, 2016

(Unaudited - Expressed in U.S. Dollars)

Foreign exchange risk

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in the foreign currency exchange rates. The Company's functional currency is the United States dollar as the Company's main center of operations is the United States. All of the Company's financial instruments are denominated in United States dollars. In management's opinion there is no significant foreign exchange risk to the Company.

Transaction Costs

Transaction costs attributable to the acquisition or issue of financial assets or financial liabilities, other than those classified as held-for-trading, are added to the initial fair value amount to match the costs with the related transactions. Purchases and sales of securities are accounted for on the settlement date basis.

- The average credit period on rendering of services is between 30 to 45 days. No interest is charged on outstanding trade receivables.
- All the Company's receivables are current and expected to be collected by the due date, except for the amount that was provided for doubtful provision
- In determining the recoverability of a trade receivable, management considers the history of collection from the client and any changes in credit quality of the receivable from the date the credit was initially granted.
- In the previous year, the Company provided a provision for doubtful accounts for the total amount receivable from one of its customers, who is experiencing cash flow issues, and therefore the collectability of this receivable is considered doubtful. No further changes have been made to the allowance for doubtful debts in the current year.

7. CUSTOMER LIST, RELATIONSHIPS AND BUSINESS COMBINATIONS

Customer relationships, Trade name and Goodwill

As part of several business combination transactions during the previous year, the Company acquired the trade name, customer portfolio and relationships of the acquiree, this resulted in recognizing intangible assets with indefinite lives of \$1,145,000 in 2016 and \$3,046,402 in 2015 at the acquisition dates, representing the value of the customer lists acquired.

Customer relationships are supported by service agreements that provide the basis only for economic benefit to accrue to the Company. These service agreements auto renew as a standard part of the relationship with each separately identifiable customer. In accordance with *IAS 38 para 16*, the service agreement establishes the means to place an economic benefit upon these long term customer relationships. The Company has many service agreements with multiple customers and therefore controls the economic benefit associated with this intangible asset.

Goodwill and trade names are inherently intangible assets with undeterminable lives; therefore they are classified as intangibles with indefinite live for the purpose of the annual impairment test.

Accordingly, no amortization of the value associated with these assets has been calculated in the current year. At each year end, the Company tests impairment of its intangible assets with indefinite lives using standard measures for such impairment.

The intangible assets with indefinite lives of the Company consist mainly of the customer relationships, access to customer's information, supporting service agreements, trade names and Good will acquired during the following business combinations:

	Customer Relationships		Trade Name		Goodwill

Acquisition of Omega Technology Solutions LLC.

On July 15, 2015, the Company closed the acquisition of the assets of Omega Technology Solutions LLC., ("Omega") of Fort Lauderdale, Florida. The initial purchase price recorded for the purchased assets was one million four hundred thousand dollars (\$1,440,000) paid by Certive Technologies Arizona ("Certive USA") as follows:

- Initial payment in the amount of two hundred thousand dollars (\$200,000), paid on August 31, 2015.
- Four hundred thousand dollars (\$400,000) subscription receipt for Omega in the private placement which shall entitle Omega to 1,333,334 Units comprised of 1,333,334 common shares of Certive and 1,333,334 warrants exercisable into 1,333,334 warrant shares.
- Convertible promissory note on the date of initial closing for six hundred thousand dollars (\$600,000). The convertible promissory note will be non-interest bearing and have a two-year term from the date of initial closing. In the event that Omega elects, in whole or in part, to take cash as the form of payment on the promissory note, Certive shall have 60 days from the date of notification of such election to make the requested payment. The note is convertible at \$0.50 per share. Subsequent to May 31, 2016, Omega agreed to convert the \$600,000 obligation into shares of Certive at a price of \$.30 per share (*see Note 20 below*).
- In addition to this, and contingent on the results from operations, Certive USA will pay in the form of 1,300,000 preferred shares of Certive Solutions Inc. allotted but not issued until earned. Commencing on the date of initial closing and for a period of three years (the "Earn Out Period"), if at any time during the Earn Out Period Certive receives cumulatively \$1,000,000 in gross revenue from the acquired assets or from any of Omega's current software offerings, the preferred shares shall be redeemable by Certive at a price of one dollar (\$1.00) per share for each dollar (\$1.00) earned from the Scheduled Contracts by Certive USA in excess of \$1,000,000. Any shares not otherwise redeemed after the Earn Out Period will be cancelled at that time. At year end, the Earn Out Shares have been deemed to be earned out, and the fair value of preferred shares was assessed to be \$240,000.

Intangibles with indefinite useful life acquired through business combinations are allocated to Advantive Information Management (AIM), Titan Health Management (Titan), Knowledge Capital Alliance (KCA) and Omega Technology Solutions (“Omega”) Cash Generating Units (“CGUs”), which are also operating and reportable segments, for impairment testing.

Carrying amount of intangibles allocated to each of the CGUs:

Trade name	-	-	-	-	-	-	200,000	200,000	200,000	200,000

The Company is required to test, on an annual basis, whether goodwill and intangible assets with indefinite life has suffered any impairment. The recoverable amount is determined based on value in use calculations. The use of this method requires the estimation of future cash flows and the determination of a discount rate in order to calculate the present value of the cash flows.

The Company performed its annual impairment test in May 2016 and 2015. The Company considers the relationship between its market capitalization and its book value, among other factors, when reviewing for indicators of impairment. As at May 31, 2016 and 2015, the market capitalization of the Company was below the book value of its equity, indicating a potential impairment of goodwill and impairment of the assets of the operating segment.

17. IMPAIRMENT TESTING OF GOODWILL AND INTANGIBLE ASSETS WITH INDEFINITE LIVES (cont'd...)

Advantive Information Management (AIM) CGU

As a result of the loss of the software license with Auresoft, recurring losses and the growing deficit in the AIM CGU, management has determined the recoverable amount of this CGU to be nil as at May 31, 2015 and 2014. Impairment loss of \$4,222,190 was recorded during the year ended May 31, 2013.

The recoverable amount has been determined based on a value in use calculation using cash flow projections from financial budgets covering a three-year year. The projected cash flows have been updated to reflect the impact of the loss of the software license with Auresoft. The pre-tax discount rate applied to cash flow projections is 15 % (2014: 15%) and cash flows beyond the three-year year are extrapolated using a 3.0% to 5% growth rate that is the same as the long-term average growth rate for the same industry. It was concluded that the fair value less costs of disposal did not exceed the value in use. As a result of this analysis, management has recognized an impairment charge of \$4,222,190 in the year ended May 31, 2014 against goodwill with a carrying amount \$4,222,190 as at May 31, 2013.

The Company recorded the AIM acquisition as goodwill insofar as the Auresoft software license, when originally issued to the Company was deemed to have an indefinite life with no quantified expiration. The only condition of the license was that the Company was required to pay a portion the revenues generated from the use of the license to Auresoft. When the license was terminated, its value was determined to be impaired and according it was written off.

Titan Health Management (Titan), Knowledge Capital Alliance (KCA) and Omega Technology Solution (Omega) CGUs

Intangibles with indefinite lives allocated to Titan, KCA and Omega CGUs was recognized as a result of business acquisitions during current and previous year and as a result of these acquisitions, during the financial year ended May 31, 2016, the Company recorded total revenue from Titan's operations of \$3,369,045 (2015:\$3,129,710), \$546,757 (2015:\$733,127) from KCA's operations, and \$1,189,798 from Omega's operations.

Management performs the impairment test for these CGU units by comparing carrying amount of the assets with its recoverable amount, in determining the recoverable of the assets, Management relies on the valuation metrics published by the Scott – Macon Healthcare Quarterly Reviews.

The report showed that the average sale price for similar businesses is 2.4 * revenue. By applying this rate to Titan, KCA & Omega, the fair value for each division would be \$8 million for Titan, \$1.3 million for KCA, and \$2.9 million for Omega less estimated cost of sales between \$100,000 and \$500,000, the results would be higher recoverable amount than the current carrying value, therefore management has concluded that the assets of these CGUs are not impaired at year end.

Please refer to Note 7 for details on the business combinations transactions.
