D. Presentation of Unaudited Financial Statements – Financial Statement Notes

The accompanying unaudited financial statements of the Company should be read in conjunction with the Company's Annual Disclosure Statement for the year ended June 30, 2016, as filed with the OTC Marketplace on September 12, 2016. In the opinion of the Company, the unaudited financial statements contain all adjustments (all of which were considered normal and recurring) necessary for a fair statement of the Company's financial position at September 30, 2016 and the results of operations and cash flows for the three months ended September 30, 2016 and 2015. The preparation of the Company's financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosure of certain assets and liabilities at the balance sheet date. Such estimates include revenue recognition, the collectability of receivables, and the carrying value of inventory and property and equipment. Actual results may differ from such estimates. These interim results are not necessarily indicative of results to be expected for a full year or subsequent interim periods.

(1) Inventories

Inventories consist of the following:	(Unaudited) September 30, 2016	(Unaudited) June 30, 2016

Treasury Stock – Shares of common stock repurchased are classified as treasury shares. During the quarter ended September 30, 2016, twenty-two shares of common stock were repurchased for $296. During fiscal 2016, twenty-five shares of common stock were repurchased for $306. In addition, the Company determined that 1,923 shares of common stock previously reported as treasury shares were actually retired prior to July 1, 2014. Prior periods in the financial statements reflect this change.

(5) Recent Accounting Pronouncements

Revenue Recognition

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers* (ASU 2014-09), which supersedes nearly all existing revenue recognition guidance under U.S. GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled for those goods or services. ASU 2014-09 defines a five step process to achieve this core principle and, in doing so, more judgment and estimates may be required within the revenue recognition process than are required under existing U.S. GAAP.

The standard is effective for annual periods beginning after December 15, 2018, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients, or (ii) a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). The new standard allows for early adoption for annual periods beginning after December 15, 2016. The Company is currently evaluating the impact of its pending adoption of ASU 2014-09 on its financial statements and has not yet determined the method by which it will adopt the standard.

Leases

In February 2016, the FASB issued Accounting Standards Update No. 2016-02, *Leases*. The new standard establishes a right-of-use (ROU) model that requires a lessee to record a ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement.

The new standard is effective for fiscal years beginning after December 15, 2019. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available. The Company is currently evaluating the impact of its pending adoption of the new standard on its financial statements.

Deferred Taxes

In November 2015, the FASB issued ASU 2015-17, *Balance Sheet Classification of Deferred Taxes*, which will eliminate the guidance in Topic 740, *Income Taxes*, that required an entity to separate deferred tax liabilities and assets between current and noncurrent amounts in a classified balance sheet. Rather, deferred taxes will be presented as noncurrent under the new standard.

The amendment is effective for fiscal years beginning after December 15, 2017. The Company does not expect that the adoption of this new standard will have a significant impact on the consolidated financial statements.
