
ROUTE1 INC.**MANAGEMENT'S DISCUSSION AND ANALYSIS****FOR THE THREE MONTH AND YEAR ENDED DECEMBER 31, 2014****As at April 1, 2015**

The following discussion and analysis of the financial condition and results of operations (this “**MD&A**”) of Route1 Inc. (also referred to as “**we**”, “**us**”, “**our**”, “**Route1**”, or the “**Company**”), should be read in conjunction with the Company’s audited consolidated financial statements and related notes as at and for the year ended December 31, 2014. The Company’s 2014 audited consolidated financial statements and the accompanying notes form part of the annual audited consolidated financial statements to be prepared in accordance with International Financial Reporting Standards (“**IFRS**”).

This Management Discussion & Analysis (“**MD&A**”) has been reviewed and approved by the Company’s Board of Directors prior to filing.

The information in this MD&A is current to April 1, 2015, unless otherwise noted.

FORWARD-LOOKING STATEMENTS

The following discussion may contain forward-looking statements about matters that involve risk and uncertainties, such as statements of Route1’s plans, objectives, expectations and intentions, as well as financial trends. The discussion also includes cautionary statements about these matters. You should read the cautionary statements made below as being applicable to all forward-looking statements wherever they appear in this document. In drawing a conclusion or making a forecast or projection set out in the forward-looking information, the Company takes into account the following material factors and assumptions in addition to the above factors: the Company’s ability to execute on its business plan; the acceptance of the Company’s devices and services by its customers; the timing of execution of outstanding or potential customer orders by the Company; the sales opportunities available to the Company; the Company’s subjective assessment of the likelihood of success of a sales lead or opportunity; the Company’s historic ability to generate sales leads or opportunities; and that sales will be completed at or above the Company’s estimated margins. This list is not exhaustive of the factors that may affect our forward-looking information. These and other factors should be considered carefully and readers should not place undue reliance on such forward-looking information.

Factors that could cause Route1’s actual results to differ materially from the forward-looking statements are contained herein and include, but are not limited to, overall economic conditions, competitive pressures and unexpected technology changes. Additional information concerning risks and uncertainties affecting Route1’s business and other factors that could cause financial results to fluctuate is set forth later in this document, as well as elsewhere herein, and is contained in Route1’s filing with Canadian securities regulatory authorities, available on the SEDAR website (www.sedar.com) under Route1 Inc. and on the Company’s website (www.route1.com).

This MD&A includes additional disclosures on the critical accounting policies and estimates, additional disclosure on the quarterly selected financial information, additional discussion and analysis on the factors affecting the Company’s financial performance, additional disclosure on future liquidity and capital needs including the addition of a tabular presentation of contractual obligations, additional disclosure on the last

eight quarters, and details of related party transactions. The Company does not believe that any of the additional information provided, and that has not been otherwise disclosed in other filings, is material in nature.

All other trademarks and trade names are the property of their respective owners.

The DEFIMNET and MobiNET platforms, and the MobiKEY, MobiKEY Classic, MobiKEY Classic 2 and MobiKEY Fusion devices are protected by copyright, international treaties, and various patents, including Route1's U.S. Patents 7,814,216 and 7,739,726, Canadian Patent 2,578,053, and other patents pending. The MobiKEY Classic 2 is also protected by U.S. Patents 6,748,541 and 6,763,399, and European Patent 1001329 of Aladdin Knowledge Systems Ltd. and used under license. Other patents are registered or pending in various countries around the world.

OVERVIEW

Route1 delivers industry-leading security and identity management solutions to corporations and government agencies that need universal, secure access to all digital resources and sensitive data. These customers depend on The Power of MobiNET - Route1's communications and service delivery platform. MobiNET provides identity assurance and individualized access to networks and data. Route1's patented solutions simplify the process of meeting increasingly stringent regulatory requirements for privacy and security.

HIGHLIGHTS

- On January 7, 2014, the Company announced that MobiKEY users can now use Precise Biometrics' Tactivo device, an advanced tool for ID-1 smart card users (CAC, PIV and FRAC) who want to use an iPad to securely access data remotely. In doing so, Route1 has expanded the number of mobile devices that ID-1 smart card users can utilize to securely access data via the MobiKEY technology.
- On April 22, 2014, the Company announced that a total of 2,074,000 stock options at an exercise price of \$0.05 per share were granted to the Company's independent directors and Brian Brunetti, its President. The options will expire on April 22, 2019 and will vest thirty percent on the first anniversary, thirty percent on the second anniversary and the remainder on the third anniversary.
- On June 6, 2014, the Company announced a total of 838,300 stock options at an exercise price of \$0.05 per share were granted to certain members of the Company's executive team. The options will expire on June 3, 2019 and will vest thirty percent on the first anniversary, thirty percent on the second anniversary and the remainder on the third anniversary.
- On June 24, 2014, the Company announced the commercial release of MobiKEY 4.4 with support for audio. This enables mobile users to securely listen to audio or video from their workspace without

transferring any files to the mobile asset. MobiKEY 4.4 also features general performance and usability improvements for MobiKEY clients connecting to VMware virtual desktops.

- On September 5, 2014, the Company announced that the TSX Venture Exchange (the Exchange) has accepted a notice filed by Route1 of its intention to make a Normal Course Issuer Bid (the Bid). The notice provides that Route1 may, during the 12 month period commencing September 11, 2014 and ending September 10, 2015, purchase on the Exchange up to 38,200,991 common shares in total, being approximately 10% of the public float.
- On September 24, 2014, the Company announced that a total of 451,700 stock options at an exercise price of \$0.05 per share were granted to certain of the Company's executive team. The stock options will expire on September 24, 2019 and will vest thirty percent on the first anniversary, thirty percent on the second anniversary and the remainder on the third anniversary.
- On October 7, 2014, the Company announced that MobiKEY, Route1's proprietary technology, is the focus of a new thought leadership profile in Government Technology magazine. The article outlines the wide range of cyber-security threats that government entities face today, and how, Route1's MobiKEY technology allows agencies to grant their employees remote access while ensuring government data always remains within the government network.
- On February 2, 2015, the Company provided an update on certain business development initiatives including:

U.S. Department of the Interior (DOI):

Working with a lead component of the DOI, Route1 has agreed to build and provide for use by DOI a DEFIMNET platform. Route1 is in the process of building the DEFIMNET and expects it to be installed and accredited for use in the second quarter of 2015.

U.S. Department of Homeland Security (DHS):

Over the past few months Route1 has been working with a component of DHS to deliver secure remote scanning capabilities as a feature addition to Route1's flagship technology, MobiKEY.

McMaster University:

As part of a growing collaboration between Route1 and McMaster University, Route1's technology will be the basis of mini-hubs in the PEDAL (Public Economics Data Analysis Laboratory) facility. The university is a leader in applying big data to address local and global socio-economic challenges. Their vision is to provide local and visiting researchers and members of academia a place to securely access, analyze and interpret data.

U.S. Department of Defence (DOD):

As previously announced in the Company's third quarter 2014 financial results report, Route1 has continued to leverage U.S. government reciprocity rules and the installed accredited infrastructure to grow the number of proof of concepts and pilots within the DOD. During the third quarter of 2014, Route1 received and fulfilled device orders from a component of the DOD for approximately 720 MobiKEY Fusion devices.

NON-IFRS FINANCIAL MEASURE: Adjusted EBITDA

Within this MD&A we use the term Adjusted EBITDA (earnings before interest, income taxes, depreciation and amortization, stock-based compensation, restructuring and other costs). Adjusted EBITDA does not have any standardized meaning prescribed under IFRS and is therefore unlikely to be comparable to similar measures presented by other companies.

We use Adjusted EBITDA, among other measures, to assess the operating performance of our ongoing businesses without the effect of amortization expense and stock-based compensation because it is largely dependent on the accounting methods and assumptions we use.

Adjusted EBITDA allows us to compare our operating performance over time on a consistent basis. We believe that certain investors and analysts use Adjusted EBITDA to measure a company's ability to service debt and to meet other payment obligations, or as a common valuation measurement in the technology industry.

The table below reconciles Adjusted EBITDA to Operating profit (loss) before stock-based compensation for the quarters presented.

<i>In thousands of Canadian dollars</i>	Dec 31 2014	Sept 30 2014	June 30 2014	Mar 31 2014	Dec 31 2013
Adjusted EBITDA	\$107	\$110	\$120	\$564	\$48
Depreciation and amortization	87	89	94	95	70
Operating profit (loss) before stock-based compensation	\$20	\$21	\$26	\$469	\$(22)

SELECTED FINANCIAL INFORMATION

The following table outlines selected unaudited financial information of the Company on a consolidated basis for the three months and year ended December 31, 2014 and 2013.

<i>(in thousands of Canadian dollars, except per share amounts)</i>	For the Three Months Ended		For The Year Ended

COMPARISON FOR THE THREE MONTHS ENDED DECEMBER 31, 2014 AND 2013

Revenue

Revenue for the three months ended December 31, 2014 was \$1,485,436, representing a decrease of \$39,701, from \$1,525,137, for the same period in 2013. The comparison, discussed by segment, is as follows:

Devices and Appliances

Revenue from our MobiKEY devices (MobiKEY Classic 2 device, MobiKEY Classic device and the MobiKEY Fusion devices) and appliances (the DEFIMNET platform and the MobiNET Aggregation Gateway) for the three months ended December 31, 2014 was \$12,243, representing a decrease of \$200,587, from \$212,830 for the same period in 2013. The decrease during the quarter ended December 31, 2014 is primarily the result of a purchase of 2,000 MobiKEY Fusion devices, by a component of the U.S. Department of Homeland Security during the same quarter in the prior year.

Devices and appliances revenue as a percentage of total revenue represents 0.8% of total revenue for the current period as compared to 14% for the prior year period.

Services

Revenue from our services segment (MobiKEY application software, and the DEFIMNET platform and other appliance licensing or yearly maintenance) for the three months ended December 31, 2014, was \$1,415,513, representing an increase of \$140,979, from \$1,274,534, for the same period in 2013. The increase is largely a result of an increase in the number of paid, active MobiKEY application software users with the U.S. Navy and improved exchange rates.

Services revenue, as a percentage of total revenue, represented 95.3% for the current period as compared to 84% for the prior year period.

Services revenue by quarters <i>(in thousands of Canadian dollars)</i>	Dec 31 2014	Sept 30 2014	June 30 2014	Mar 31 2014	Dec 31 2013
MobiKEY application software revenue	\$1,221	\$1,211	\$1,185	\$1,108	\$1,100
Other services revenue	194	188	189	173	174
Total	\$1,415	\$1,399	\$1,374	\$1,281	\$1,274

The table below provides information on the number of and revenue amount for the MobiKEY application software subscribers during each of the last five quarters.

MobiKEY Subscribers <i>(in thousands of Canadian dollars for Revenue)</i>	Dec 31 2014	Sept 30 2014	June 30 2014	Mar 31 2014	Dec 31 2013
Closing Number	14,792	14,645	14,461	14,240	14,602
Average Number ⁽¹⁾	14,631	14,588	14,401	14,198	14,600
Revenue per Subscriber ⁽²⁾	\$334	\$332	\$329	\$312	\$301
Revenue	\$1,221	\$1,211	\$1,185	\$1,108	\$1,100

- (1) Calculated by taking the average of the closing MobiKEY subscriber number at the end of the month for each of the three months during the quarter.
- (2) Calculated by dividing the MobiKEY revenue during the quarter by the average number of users and multiplying by four.

Gross Profit

Gross profit is equivalent to revenue minus the cost of revenue. The cost of revenue primarily includes the cost of our devices and appliances sold to clients, as well as the cost of their shipping and packaging, plus the cost to operate and maintain the Route1 MobiNET platform.

The cost of revenue for the three months ended December 31, 2014 was \$242,317, representing a decrease of \$100,785 from \$343,102 for the same period in 2013. A portion of the decrease in cost of revenue for the three months ended December 31, 2014 is the result of decreased device and appliance sales compared to the same period in the prior year.

Gross profit for the three months ended December 31, 2014 was \$1,243,119 or 83.7% of gross revenue, representing an increase of \$61,084 from a gross profit of \$1,182,035 or 78% of gross revenue for the same period in 2013.

Expenses

Operating expenses consist of general administration, research and development, and selling and marketing. Operating expenses for the three months ended December 31, 2014 were \$1,223,291, representing an increase of \$19,714, from \$1,203,577 for the same period in 2013.

General administration

General administration expenses consist primarily of salaries and benefits for administrative staff, professional fees, rent, telephone, computer related expenses, directors' fees, insurance, bad debts, public company regulatory costs, depreciation and amortization and other indirect costs.

General administration expenses for the three months ended December 31, 2014 were \$776,253, representing an increase of \$74,404, from \$701,849 for the same period in 2013. The majority of the change can be summarized as follows:

- Professional fees increased by approximately \$40,000 for the three months ended December 31, 2014 as compared to the same period in 2013. The increase was the result of an increase in the scope of work performed by contractors and legal fees.
- Depreciation expense increased by approximately \$20,000 for the three months ended December 31, 2014 as compared to the same period in 2013. The increase was the result of depreciation associated with fiscal year 2014 computer equipment purchases and the depreciation of computer equipment purchased in the prior fiscal year which was only recently put into use.
- Salary expense increased by approximately \$10,000 for the three months ended December 31, 2014 as compared to the same period in 2013, as a result of salary increases.

Research and development

Research and development expenses consist of salaries and benefits for the research and development department, and other professional fees associated with development work.

Research and development expenses for the three months ended December 31, 2014 were \$285,122, representing a decrease of \$30,985 from \$316,107, for the same period in 2013 and the majority of the change can be summarized as follows:

- Salaries and benefits expenses decreased for the three months ended December 31, 2014 as compared to the same period in 2013 as a result of a reduction in head count.

Selling and marketing

Selling and marketing expenses consist primarily of salaries and commissions, agent fees, marketing and trade shows, and travel and entertainment.

Selling and marketing expenses for the three months ended December 31, 2014 were \$161,916, representing a decrease of \$23,705, from \$185,621 for the same period in 2013. The majority of the change can be summarized as follows:

- Marketing costs, including travel expenses, brand building and tradeshow fees, decreased by approximately \$21,000 as compared to the same period in 2013, as the Company refocused its marketing efforts.

Other Items

Stock-based compensation

Stock-based compensation was \$31,899 for the three months ended December 31, 2014, a decrease of \$20,590 from \$52,489 for the same period in 2013. The contributing factor to the decrease was the reduction of options vesting during the three months ended December 31, 2014 as compared to the same period in 2013.

Foreign exchange translation

The gain attributable to foreign exchange translation on balance sheet items such as Accounts Receivable, Accounts Payable and foreign bank accounts was \$33,426 for the three months ended December 31, 2014, an increase of \$20,302 from a gain of \$13,124 for the same period in 2013. There was volatility and fluctuation of the Canadian dollar against the U.S. dollar during the fourth quarter of the current year.

Income tax recovery - Income tax expense and deferred tax recovery

For the three months ended December 31, 2014 the Company recognized an income tax expense of \$31,531, an increase of \$31,531 from \$nil for the same period in 2013.

For the three months ended December 31, 2014, the Company also recognized a deferred tax asset of \$31,531 (December 31, 2013 - \$nil). The recognized deferred tax asset relates to unused tax losses that are considered to be offset against the Company's taxable profits expected to arise in future fiscal years. Management has based their assessment on the operating budget previously approved, the Company's ability to meet this budget and its operating forecast moving forward.

Comprehensive Gain (Loss) After Taxes

Comprehensive gain for the three months ended December 31, 2014 was \$21,355 or \$0.00 per share, representing an increase of \$85,262 from a comprehensive loss of \$63,907 or \$(0.00) per share for the same period in 2013.

COMPARISON FOR THE YEAR ENDED DECEMBER 31, 2014 AND 2013

Revenue

Revenue for the year ended December 31, 2014 was \$6,077,590, representing an increase of \$644,856 from \$5,432,734 for the same period in 2013. The comparison, discussed by segment, is as follows:

Devices and appliances

Revenue from our MobiKEY devices (MobiKEY Classic 2 device, MobiKEY Classic device and the MobiKEY Fusion device) and appliances (the DEFIMNET platform and the MobiNET Aggregation Gateway) segment for the year ended December 31, 2014 was \$536,160 representing an increase of \$88,855, from \$447,305 for the same period in 2013. Devices and appliances revenue as a percentage of total revenue represents 9% of total revenue for the current period as compared to 8% for the same period in the prior year. The largest contributing factor to the increase in devices and appliances revenue for the year ended December 31, 2014, was the result of a MobiKEY Fusion device sale of 4,000 devices to a component of the U.S. Department of Homeland Security during the first quarter of this year.

Services

Revenue from our services segment (MobiKEY application software, and the DEFIMNET platform and other appliance licensing or yearly maintenance) for the year ended December 31, 2014, was \$5,470,141, representing an increase of \$522,485, from \$4,947,656 for the same period in 2013. Services revenue, as a percentage of total revenue, represents 90% for the current period as compared to 91% for the same period in the prior year. A portion of the increase in service revenue is the result of additional MobiKEY application software users with the U.S. Navy and improved exchange rates.

Deferred revenue as at December 31, 2014 increased by \$225,244 to \$1,635,265 from \$1,410,021 as at December 31, 2013. The increase in the carrying amount of deferred revenue is primarily driven by MobiKEY application software renewals done by components of the U.S. Department of Defense and U.S. Department of Homeland Security covering the service period April 1, 2014 to March 31, 2015 and May 1, 2014 to April 30, 2015 respectively.

Other Revenue

Other revenue for the year ended December 31, 2014 was \$71,289, representing an increase of \$33,516 from \$37,773 for the same period in 2013. Other revenue, as a percentage of totaled revenue, represents approximately 1% for the current period as compared to 1% for the same period in the prior year. Other revenue for the year ended December 31, 2014 was received from a government grant for work related to a development project (in the amount of \$13,609) and the development and sale of secure remote scanning capabilities to the U.S. Department of Homeland Security as a feature addition to the Company's MobiKEY technology (in the amount of \$57,680).

Gross Profit

Gross profit is equivalent to revenue minus the cost of revenue. The cost of revenue primarily includes the cost of our devices and appliances sold to clients, as well as the cost of their shipping and packaging, plus the cost to operate and maintain the Route1 MobiNET platform.

The cost of revenue for the year ended December 31, 2014 was \$1,145,113, representing an increase of \$8,592 from \$1,136,521 for the same period in 2013.

Gross profit for the year ended December 31, 2014 was \$4,932,477 or 81.2% of gross revenue, representing an increase of \$636,264 from a gross margin of \$4,296,213 or 79% of gross revenue for the same period in 2013.

For the year ended December 31, 2014, the Company incurred a devices and appliances write-down of \$56,983 which was included in the cost of revenue. For the year ended December 31, 2013, the Company incurred a devices and appliances write-down of \$81,640 which was included in the cost of revenue. Additional information regarding the write-down see, **“DEVICES AND APPLIANCES HELD FOR SALE”** of this MD&A for additional information.

Expenses

Operating expenses consist of general administration, research and development, and selling and marketing. Operating expenses for the year ended December 31, 2014 were \$4,397,602, representing a decrease of \$87,255, from \$4,484,857 for the same period in 2013.

General administration

General administration expenses consist primarily of salaries and benefits for administration staff, professional fees, rent, telephone, computer related expenses, directors' fees, insurance, bad debts, public company regulatory costs, depreciation and amortization and other indirect costs.

General administration expenses for the year ended December 31, 2014 were \$2,755,942, representing an increase of \$38,345, from \$2,717,597 for the same period in 2013 and the majority of the change can be summarized as follows:

- Depreciation expense increased by approximately \$106,000 for the year ended December 31, 2014 as compared to the same period in 2013. The increase was the result of depreciation associated with fiscal year 2014 computer equipment purchases and the depreciation of computer equipment purchased in the prior fiscal year which was only recently put into use in 2014.
- Salary expense increased by approximately \$58,000 for the year ended December 31, 2014 as compared to the same period in 2013, as a result of salary increases.
- Professional fees decreased by approximately \$76,000 for the year ended December 31, 2014 as compared to the same period in 2013, as a result of the elimination or reduction in the scope of work performed by third party investor relations activities, contractors and legal fees.
- Rent expense decreased by approximately \$46,000 for the year ended December 31, 2014 as compared to the same period in 2013, as a result of one-time accounting revision to the additional rent obligation associated with the 8 King Street East office lease.

Research and development

Research and development expenses consist of salaries and benefits for the research and development department, and other professional fees associated with development work.

Research and development expenses for the year ended December 31, 2014 were \$914,434, representing a decrease of \$160,666, from \$1,075,100 for the same period in 2013 and the change can be summarized as follows:

- Salaries and benefits expenses decreased by approximately \$177,000 for the year ended December 31, 2014 as compared to the same period in 2013, as a result of a decrease in headcount.
- The Scientific Research and Experimental Development credit decreased by approximately \$16,000 in 2014 as compared to 2013, as fewer projects were eligible for the credit.

Selling and marketing

Selling and marketing expenses consist primarily of salaries and commissions, agent fees, marketing and trade shows, and travel and entertainment.

Selling and marketing expenses for the year ended December 31, 2014 were \$727,226, representing an increase of \$35,066, from \$692,160 for the same period in 2013 and the majority of the change can be summarized as follows:

- Marketing costs, including travel expenses, brand building and tradeshow fees, increased by approximately \$35,000 for the year ended December 31, 2014 as compared to the same period in 2013, as the Company refocused its marketing efforts.

Other items

Stock-based compensation

Stock-based compensation was \$124,538 for the year ended December 31, 2014, a decrease of \$134,373 from \$258,911 for the same period in 2013. The decrease in stock based compensation is the result of options vesting and no longer being expensed.

Foreign exchange translation

The gain attributable to foreign exchange translation on balance sheet items such as Accounts Receivable, Accounts Payable and foreign bank accounts was \$60,070 for the year ended December 31, 2014, a decrease of \$44,391 from a gain of \$104,461 for the same period in 2013. There was volatility and fluctuation of the Canadian dollar against the U.S. dollar during the year.

Income tax recovery - Income tax expense and deferred tax recovery

For the year ended December 31, 2014 the Company recognized an income tax expense of \$285,140, an increase of \$285,140 from \$nil for the same period in 2013.

For the year ended December 31, 2014, the Company also recognized a deferred tax asset of \$451,738 (December 31, 2013 - \$nil). The recognized deferred tax asset relates to unused tax losses that are considered to be offset against the Company's taxable profits expected to arise in future fiscal years. Management has based their assessment on the operating budget previously approved, the Company's ability to meet this budget and its operating forecast moving forward.

Comprehensive Gain (Loss) After Taxes

Comprehensive gain for the year ended December 31, 2014 was \$637,005 or \$0.00 per share, an increase of \$980,099 from a comprehensive loss of \$343,094 or \$(0.00) per share for the same period in 2013.

SUMMARY OF QUARTERLY RESULTS

The following table sets out selected unaudited financial information of the Company on a consolidated basis for the last eight quarters. The information has been derived from the Company's quarterly unaudited condensed interim consolidated financial statements that, in management's opinion, have been prepared on a basis consistent with the consolidated annual financial statements and are reviewed and approved by the Company's Board of Directors. The Company's quarterly operating results have varied substantially in the past and may vary substantially in the future. Accordingly, the information below is not necessarily indicative of results for any future quarter.

The Company's revenue and financial results are difficult to forecast and have historically fluctuated on a quarterly basis, and it is expected that quarterly revenue and financial results will continue to fluctuate in the future as the Company continues growing. Fluctuations in results are related to the growth of the Company's revenue, the timing of revenue being recognized and sales to customers, who may place large single orders in any one quarter, and the timing of staffing and infrastructure additions to support growth.

LIQUIDITY AND CAPITAL RESOURCES

Management continually assesses liquidity in terms of the ability to generate sufficient cash flow to fund the business. Net cash flow is affected by the following items: i) operating activities, including the level of accounts receivable, inventory, prepaid expenses, accounts payable and deferred revenue; ii) investing activities, including the purchase of capital assets; and iii) financing activities, including the issuance of capital stock.

Cash flow used in operating activities

Cash generated by operating activities for the year ended December 31, 2014 were \$1,313,313, compared to cash generated of \$430,166 in the same period in 2013, representing an increase of \$883,147. Non-cash working capital activities generated \$295,026 for the year ended December 31, 2014 compared to \$172,264 used in the same period a year earlier. Therefore net cash generated in the day-to-day operations for the year ended December 31, 2014 was \$1,018,287 compared to \$257,903 generated in the same period in 2013, representing an increase of \$760,384.

The increase in cash generated from operating activities for the year ended December 31, 2014 compared to the prior year was mainly due to the profit realized during the year, increasing amortization expense, the reduction of stock-based compensation and the timing of accounts receivable and payable.

Cash flow used in investing activities

Cash used in investing activities for the year ended December 31, 2014 was \$130,877 compared to cash used of \$484,731 in the same period in 2013, representing a decrease in the outflow of cash of \$353,854. The decrease of cash outflow is the result of less fixed assets being purchased during the year ended December 31, 2014 compared to the same period in the prior year.

Cash flow provided by financing activities

Cash used in financing activities for the year ended December 31, 2014 was \$349,478 compared to cash generated or used of \$nil for the same period in 2013. The increase in cash outflow is the result of the Company repurchasing its common shares for cancellation. For additional information see **"SHARE REPURCHASE PROGRAM"** of this MD&A

The Company's current business plan and sales forecast projects revenue growth in 2015 and beyond. The Company believes that its success in securing sales contract vehicles and/or growing sales with the U.S.

government will lead to growth within the U.S. government and future opportunities abroad with other governments.

The Company's need for capital expenditures is limited to such items as computer hardware and software, expenditures to support sales, marketing and general administration activities and working capital. Since inception, the Company has financed its cash and/or capital requirements through operating cash flow, the issuance of equity from private placements, and through the issuance of obligations under capital leases.

On October 4, 2011, the Company entered into a \$550,000 credit facility with a banking and financial services organization consisting of a \$500,000 revolving demand operating facility and a \$50,000 VISA facility. The revolving demand credit facility carries an interest rate equal to the lender's prime rate of interest plus 1.80%. The credit facility is secured by the assets of the Company. There is no minimum collateral asset value to access the first \$100,000; accessing an amount in excess of \$100,000 shall be based on the balance and term of the Company's trade accounts receivables outstanding plus the amount of SR&ED tax credits filed and refundable. The Company had not drawn on the facility as of April 1, 2015.

The following table discloses future payments as at December 31, 2014 committed by the Company over the next five (5) years and thereafter. It includes both principal and interest obligations required under capital lease agreements.

Contractual Obligations				
	Total	No later than 1 year	Later than one year and not later than five years	Later than five years
Operating leases	\$880,710	\$110,799	\$599,451	\$170,460

DEVICES AND APPLIANCES HELD FOR SALE

On a quarterly basis or when necessary management reviews the carrying value of inventory. Under IFRS, inventory must be recognized at, the lower of cost and their net realizable value, which is the estimated selling price in the ordinary course of business less the estimated costs of completion and estimated costs necessary to make the sale. During the year ended December 31, 2014, management reviewed the sales mix of its MobiKEY Classic 2 device, MobiKEY Classic device and the MobiKEY Fusion device. As a result, the Company incurred a write-down of MobiKEY Classic devices in the amount of \$56,983. For the year ended December 31, 2013, the Company incurred a write-down of MobiKEY Classic devices to the lower of cost and their net realizable value in the amount of \$81,640.

RELATED PARTY TRANSACTIONS

The Company has directors and officers who are considered related parties. The Company had the following transactions and/or outstanding amounts with related parties for the year ended December 31, 2014 and 2013 respectively. All transactions are recorded at their exchange amounts.

- The Company made payments (including HST) to 1220764 Ontario Inc. for management services provided by Mr. Tony P. Busseri, a director and the CEO of the Company in the amount of \$406,800 for the year ended December 31, 2014 (December 31, 2013 - \$423,750).
- The Company incurred expenses (including CPP) payable to and on behalf of the independent members of the Board of Directors of \$333,849 for the year ended December 31, 2014 (December 31, 2013 - \$334,712). These transactions are in the normal course of operations and are paid or payable for directorship services and/or investor relations activities. As at December 31, 2014, accounts payable included \$78,861 owing to directors (December 31, 2013 - \$80,445).

- The Company made payments to or incurred expenses for key management (President, Chief Technology Officer, and the Chief Financial Officer) in the year ended December 31, 2014 as follows, with 2013 comparatives.

	Year Ended December 31, 2014	Year Ended December 31, 2013
Short-term employee benefits	\$680,000	\$645,000
Stock option expense	56,004	181,719
	<u>\$736,004</u>	<u>\$826,719</u>

PROPOSED TRANSACTIONS

The Company has not entered into any asset or business acquisition or disposition transactions.

CRITICAL ACCOUNTING ESTIMATES

The consolidated financial statements have been prepared in accordance with International Accounting Standard (“IAS”). Management makes certain estimates and relies on certain assumptions relating to reporting the Company’s assets and liabilities as well as operating results in order to prepare the audited financial statements in conformity with IFRS. On an on-going basis, the Company evaluates its estimates and assumptions including those related to revenue, the valuation of accounts receivable, the estimation of useful lives of the various classes of capital assets, stock-based compensation expense, and the measurement of income tax valuation allowances. Actual results could differ from those estimates, which are as follows:

- The Company’s revenue is derived from hardware (i.e. MC2 device, the MobiKEY Classic device and the MobiKEY Fusion device) sales and subscription services (i.e. MobiKEY application software). The Company recognizes revenue in accordance with IAS 18, “Revenue”.
- In the determination of the valuation of accounts receivable, including the allowance for doubtful accounts, the Company relies on current customer information, payment history and trends as well as future business and economic conditions.
- The determination of inventory obsolescence allowance.
- The determination of fair value of investments (if any) is based on a discounted cash flow model.
- The estimation of useful lives of the various classes of capital assets is based upon history and experience of similar assets within each class.
- The fair value of stock options is based on certain estimates applied to the Black-Scholes option-pricing model as disclosed in the Company’s financial statements.
- The measurement of the income tax valuation allowance is based upon estimates of future taxable income and the expected timing of reversals of temporary differences.

FUTURE ACCOUNTING POLICY CHANGES

Fair Value Measurement

IFRS 9, “Financial Instruments” (IFRS 9), was issued by the IASB in July 2014 and will replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 uses a single approach to determine whether a financial asset is measure at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the

requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. Requirements relating to Hedge Accounting, representing a new hedge accounting model, have been added to IFRS 9 in November 2013. The new model represents a substantial overhaul of hedge accounting which will allow entities to better reflect their risk management activities in the financial statements. The most significant improvements apply to those that hedge non-financial risk, and so these improvements are expected to be of particular interest to non-financial institutions. The standard is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. Management is studying the impact of adopting IFRS 9 on the consolidated financial statements.

Revenue from Contracts with Customers

IFRS 15, “Revenue from Contracts with Customers” (IFRS 15), was issued by the IASB in May 2014 and will supersede current revenue recognition guidance, which is currently found across several standards and interpretations including IAS 11, Construction Contracts and IAS 18, Revenue. IFRS 15 provides a framework for determining the nature, amount, timing and uncertainty of revenue and cash flows arising from a contract with a customer. The standard is effective for annual periods beginning on or after January 1, 2017, with early adoption permitted. The Company is in the process of assessing the impact of this standard on its consolidated financial statements.

FINANCIAL INSTRUMENTS

Establishing fair value

The carrying amount of financial instruments including cash and cash equivalents, accounts receivable and accounts payable and other liabilities approximates fair value because of the short-term nature of these instruments.

The following table sets out the classification, carrying amount, and fair value of the Company’s financial assets and liabilities as at December 31, 2014 and December 31, 2013:

	December 31, 2014		December 31, 2013	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
FINANCIAL ASSETS				
Loans and receivables				
Cash and cash equivalents (i)	\$1,532,902	\$1,532,902	\$699,944	\$699,944
Accounts receivable (i)	\$181,183	\$181,183	\$188,017	\$188,017
FINANCIAL LIABILITIES				
Other liabilities				
Accounts payable and other liabilities (i)	\$329,017	\$329,017	\$314,801	\$314,801

(i) The fair value of these financial instruments is their carrying amount due to their short-term nature.

FINANCIAL INSTRUMENTS - RISK MANAGEMENT

The Company has exposure to credit risk, liquidity risk and market risk associated with its financial assets and liabilities. The Board has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board has established the Audit Committee which is responsible for monitoring the Company's compliance with risk management policies. The Audit Committee regularly reports to the Board on its activities.

The Company's risk management program seeks to minimize potential adverse effects on the Company's financial performance and ultimately shareholder value. The Company manages its risks and risk exposures through a system of internal controls and sound business practices.

The Company's financial instruments and the nature of the risks to which they may be subject are set out in the following table:

	Credit	Liquidity	Foreign Exchange	Interest Rate
Cash and cash equivalents	Yes		Yes	Yes
Accounts receivable	Yes		Yes	
Accounts payable and other liabilities		Yes	Yes	

Credit risk

Credit risk arises from cash held with banks and credit exposure to customers, including outstanding accounts receivable. The maximum exposure to credit risk is equal to the carrying value (net of allowances) of the financial assets. The objective of managing credit risk is to prevent losses on financial assets. The Company assesses the credit quality of counterparties, taking into account their financial position, past experience and other factors. During the year ended December 31, 2014, the largest single customer represented approximately \$2,873,345 of recorded revenue (December 31, 2013 - \$1,580,000).

Cash and cash equivalents

Cash and cash equivalents consist of bank balances. Credit risk associated with cash is minimized substantially by ensuring that these financial assets are held in highly rated financial institutions. At December 31, 2014, the Company had cash consisting of cash on hand and deposits with banks of \$1,532,902 (December 31, 2013 - \$699,944).

Accounts receivable

Accounts receivable consist primarily of accounts receivable from invoicing of devices and services. The Company's credit risk arises from the possibility that a customer which owes the Company money is unable or unwilling to meet its obligations in accordance with the terms and conditions in the contracts with the Company, which would result in a financial loss for the Company. This risk is mitigated through established credit management techniques, including monitoring customer's creditworthiness, setting exposure limits and monitoring exposure against these customer credit limits.

The carrying amount of accounts receivable is reduced through the use of an allowance for doubtful accounts and the amount of the loss is recognized in the statement of comprehensive income (loss). When a receivable balance is considered uncollectible, it is written off against the allowance for accounts

receivable. Subsequent recoveries of amounts previously written off reduce other expenses in the statement of comprehensive income (loss). As at December 31, 2014, the largest single customer's accounts receivable represented \$78,771 (December 31, 2013 – \$94,982) of the total accounts receivable. This receivable was subsequently collected after the quarter.

The following table outlines the details of the aging of the Company's receivables as at December 31, 2014 and December 31, 2013:

	December 31, 2014	December 31, 2013
Current	\$181,183	\$159,420
Past due		
1 – 60 days	-	28,597
Greater than 60 days	-	-
Less: Allowance for doubtful accounts	-	-
Total accounts receivable, net	\$181,183	\$188,017

For the year ended December 31, 2014 and year ended December 31, 2013, there was a \$nil balance for the allowance for doubtful accounts.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time. In order to meet its financial liabilities, the Company has relied on collecting its accounts receivable, which by nature, are due predominately from government agencies with a high level of certainty of collection.

The Company's ability to manage its liquidity risk going forward will require some or all of the following: the ability to secure capital and/or credit facilities on reasonable terms in the current market place and its ability to generate positive cash flows from operations. Accounts payable of \$329,017 (December 2013 - \$314,801) were outstanding as of December 31, 2014.

The following table details the Company's contractual maturities for its financial liabilities, including interest payments and operating lease commitments, as at December 31, 2014:

	2015	2016	2017 and Beyond	Total
Accounts payable and other liabilities	\$329,017	\$-	\$-	\$329,017
Operating lease commitments	110,799	114,587	655,324	880,710
	\$439,816	\$114,587	\$655,324	\$1,209,727

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates will affect the fair value of recognized assets and liabilities or future cash flows or the Company's results of operation.

Foreign exchange

The functional currency of the parent company is Canadian dollars and the reporting currency is Canadian dollars. As at December 31, 2014, the Company had non-Canadian dollar net monetary assets of

approximately US\$513,749 and €nil (December 31, 2013 - approximately US\$180,952 and €5,108). An increase or decrease in the U.S. to Canadian dollar exchange rate by 5% as at December 31, 2014 would have resulted in a gain in the amount of \$30,785 or a loss of \$30,785 (December 31, 2013 – gain or loss of \$9,623). Similarly, an increase or decrease in the Euro to Canadian dollar exchange rate by 5% as at December 31, 2014 would have resulted in a gain in the amount of \$nil or a loss of \$nil (December 31, 2013 – gain or loss of \$374). Any gain or loss would have been included in the determination of net (loss) income.

Interest rate

The Company has cash balances which maybe exposed to interest rate fluctuations. At December 31, 2014, cash totalled \$1,532,902 (December 31, 2013 - \$699,944).

SHARE REPURCHASE PROGRAM

On September 5, 2014, the Company announced with approval from the TSX Venture Exchange its intention to make a Normal Course Issuer Bid (“NCIB”). The NCIB permits the Company to purchase for cancellation up to 10% of the common shares in the public float. The maximum number of shares allowed for repurchase is 38,200,991. Purchases under the NCIB will be taking place during the 12 month period commencing September 11, 2014 and ending September 10, 2015, or the date upon which the maximum number of common shares have been purchased by the Company.

From September 5, 2014 to December 31, 2014, the Company repurchased for cancellation 9,236,000 of its common shares for a total consideration of \$344,694 at an average price of \$0.04 per share under the NCIB. The Company also incurred costs of \$4,784 to complete the repurchases during the year ended December 31, 2014. The Company made no share repurchase for the year ended December 31, 2013.

SHARE CAPITAL, WARRANTS AND CONTRIBUTED SURPLUS

The Company’s authorized share capital consists of the following:

- Unlimited number of common shares with voting rights and no par value.
- Unlimited number of non-cumulative, non-voting first preferred shares with no fixed dividend rate, issuable in series.
- Unlimited number of non-cumulative, non-voting second preferred shares with no fixed dividend rate, issuable in series.
- Unlimited number of non-cumulative, non-voting Series A first preferred shares with no fixed dividend rate, issuable in series and convertible into common shares at the option of the holder on a one-for-one basis at any time after October 31, 2000.

As of December 31, 2014, the following was outstanding:

	Number of Common Shares	\$
Balance, January 1, 2014	382,009,914	\$23,699,469
Shares issued/repurchased for cancellation	(9,236,000)	(349,478)
Balance, December 31, 2014	<u>372,773,914</u>	<u>\$23,349,991</u>

- 38,000,000 common share purchase warrants (“Warrants”) convertible into 38,000,000 common shares at an exercise price of \$0.15/share expiring on February 25, 2015; the warrants expired unexercised on February 25, 2015.
- 29,124,000 common share purchase options (“Options”) exercisable into 29,124,000 common shares.

RISK FACTORS AND UNCERTAINTY

Although management has a positive outlook for the Company and continually improves and adapts the Company’s risk mitigation strategies, operating in the technology industry inherently involves a certain level of risk and uncertainty. In management’s opinion, the following risk factors, among others, should be considered when evaluating the Company’s business and its results of future operations:

- Management’s ability to secure additional financing, if needed, on reasonable terms. Access to such financing at acceptable commercial terms will be dependent on the timing of recognition and receipt of cash from our current receivables and contracts, on our ability to demonstrate execution of our business strategy and the general condition of the credit and/or equity markets. Such additional financing may be dilutive in nature to existing shareholders.
- The Company’s access to credit or capital could be restricted based on a global financial crisis which would restrict credit availability worldwide and could also impact its ability to continue operations.
- The Company’s projected revenue in the short-term is tied to approximately US\$4.5 million in renewals from MobiKEY application software subscriptions and a DEFIMNET platform maintenance agreement, with one or more US Government (“USG”) accounts. If one or more USG accounts were to discontinue their relationship with the Company, such events may have a material adverse impact on the Company’s financial results.
- The Company’s ability to collect payment on a timely basis for services delivered may have a material adverse impact on the Company’s liquidity position.
- There is no assurance that any forward-looking statement will materialize. Unless otherwise indicated, forward-looking statements describe expectations as of the date of this document.
- Route1 disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
- Route1 had working capital at December 31, 2015 of \$319,463 which may not be sufficient to support current operating levels and growth objectives for the current fiscal year;
- Third-party claims for infringement of intellectual property rights by Route1, and the outcome of any litigation with respect thereto, may harm the Company’s competitive advantage in the secure remote access industry;
- Route1’s ability to successfully obtain patent or other proprietary or statutory protection for its technologies and products, may harm the Company’s competitive advantage in the secure remote access industry;
- Route1’s ability to obtain rights to use certain software or components which are supplied by third parties, may not be sufficient to support future sales volumes;
- The ability to run efficient and uninterrupted operation of Route1’s MobiNET platform, which could impact on the credibility of the Company’s product and services;
- Route1’s ability to establish new, and to build on its existing customer base, could also slow the Company’s continued growth;
- The occurrence of a breach or perception of a breach of Route1’s secure product and service offering, may impact on the credibility of the Company’s product and services;
- The inappropriate disclosure of confidential information of the Company may have an impact on the credibility of the Company’s product and services;

- Competition, both with existing providers as well as with any future providers entering the marketplace, within the secure remote access industry may hamper future sales growth;
- Route1's reliance on its suppliers and the risk that suppliers will not be able to deliver required components on a timely basis, which may slow future sales growth;
- Any future government(s) regulation of the secure remote access industry, including but not limited to restrictions on encryption of the MobiKEY device and the MobiNET platform may hamper future growth;
- Any significant economic downturn, in geographic areas where Route1 engages in business activities, that may cause those government agencies to reduce discretionary budget spending in areas such as secure identity solutions.
- Any delays in the budget approval process by the U.S. government may delay the procurement and spending in areas such as digital security solutions.

The Company records transactions in Canadian dollars and conducts business both in Canada and internationally. The volatility of the Canadian dollar against currencies such as the U.S. dollar and the Euro can impact financial results negatively should the Canadian dollar appreciate significantly.

Audit Committee

The three members of the Audit Committee are independent and all meet the qualifications of a financial expert and all are financially literate as such term is defined in National Instrument 52-110 – Audit Committees.

Legal proceedings

In the normal course of operations, the Company may be subject to litigation claims from customers, suppliers, patent holders, resellers and former employees. A provision is recognized when the probability that the event will occur is greater than the probability that it will not. The Company regularly reviews any outstanding claims to see if they meet the criteria. A provision is calculated based on management's best estimate of probable outflow of economic resources.

REVENUE INFORMATION

The Company is organized and managed as a single reportable business entity with two distinct revenue streams, being devices and appliances, and services. The Company considers revenue realized or realizable and earned when the Company has transferred to the buyer the significant risks and rewards of ownership of the goods, the Company does not retain any managerial involvement, it is probable that the economic benefits associated with the transaction will flow to the company, the amount of revenue can be measured reliably. For sale of devices, revenue is recognized at the time of shipment of the device which constitutes transfer of ownership of the device. Revenue for the services component is reported as deferred revenue on the statement of financial position and is recognized as earned revenue in the period which the service is provided. At December 31, 2014, the Company had \$1,635,265 (December 31, 2013 - \$1,410,021) in deferred revenue.
