1. NATURE OF OPERATIONS

Select Sands Corp. (the "Company") was incorporated in Canada on July 31, 2006 pursuant to the Business Corporations Act (British Columbia) (the "Act"). The Company is a public company listed on the TSX Venture Exchange (the "TSX.V"), trading under the "LAR" symbol. The address of the Company's corporate office and principal place of business is Suite 310, 850 West Hastings Street, Vancouver, British Columbia, Canada V6C 1E1.

The Company is in the process of acquiring, exploring and developing its exploration and evaluation assets and has not yet determined whether the properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets and related deferred exploration costs are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves, or upon future cash flows from production or sale of the properties.

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") on a going concern basis, which presume the realization of assets and discharge of liabilities in the normal course of business for the foreseeable future. The ability of the Company to arrange additional financing in the future depends, in part, on the prevailing capital market conditions and mineral property exploration success. The Company incurred a net loss and comprehensive loss of $823,438 for the nine months ended April 30, 2015 (April 30, 2014 – net loss and comprehensive loss of $638,522) and had a deficit of $14,959,832 (July 31, 2014 - $14,136,394). There is material uncertainty that may cast significant doubt upon the ability of the Company to continue as a going concern.

2. BASIS OF PRESENTATION

a) Statement of Compliance

These condensed interim financial statements have been prepared in accordance with IAS 34, *Interim Financial Reporting* ("IAS 34"), as issued by the International Accounting Standards Board ("IASB"), and its interpretations, using accounting policies consistent with International Financial Reporting Standards ("IFRS"). The policies applied in these condensed interim financial statements are presented below and are based on IFRS issued and outstanding as of April 30, 2015. Any subsequent changes to IFRS that are given effect in our annual condensed interim financial statements for the year ending July 31, 2015 could result in restatements of these condensed interim financial statements. None of these standards are expected to have a significant effect on the condensed interim financial statements. These condensed interim financial statements should be read in conjunction with the Company's July 31, 2014 annual financial statements.

b) Basis of Measurement and Presentation

These financial statements have been prepared on a historical cost basis, as modified by the revaluation of available-for-sale financial assets. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information. In the opinion of management, all adjustments (including normal recurring accruals), considered necessary for a fair presentation have been included.

The accounting policies set out below have been applied consistently to all years presented in these financial statements.

2. BASIS OF PRESENTATION (Continued)

c) Foreign Currencies

The financial statements are presented in Canadian dollars, which is also the Company's functional currency.

Transactions in currencies other than the functional currency are recorded at the rates of exchange prevailing on the dates of the transactions. At each financial position reporting date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at the date of the statement of financial position. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

d) Significant Accounting Judgments and Estimates

The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. Actual outcomes could differ from these estimates. The financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the statement of financial position date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- the assessment of indications of impairment of the Company's exploration and evaluation assets and related determination of recoverable values and write-down of those assets where applicable;
- the fair value estimation of share-based payments included in the statements of operations and comprehensive loss; and
- the accounting and recognition of income taxes which is included in the statement of operations and comprehensive loss.

3. INVESTMENT DEPOSIT

On April 29, 2014, the Company entered into an asset purchase agreement with Canfrac Sands Ltd. ("Canfrac"). Under the terms of the agreement, the Company would acquire Canfrac, including all assets and business operations for cash consideration of $4,500,000.

The Company was required to deposit in escrow $1,000,000 (paid) for the purposes of the asset acquisition including a capital expenditure program to improve the purchased assets. In the event the asset purchase agreement was terminated, the escrow amount would be released to the vendor, and the Company would receive 22% of the Canfrac's issued and outstanding voting share capital.

On September 2, 2014, the Company terminated the asset purchase agreement, released the remaining escrow to the vendor and received 22% of Canfrac's issued and outstanding voting shares.

3. INVESTMENT DEPOSIT (Continued)

In connection with the terminated asset purchase agreement, the Company received 22% of Canfrac's issued and outstanding voting share capital in exchange for the Company's $1,000,000 deposit. In December 2014, Cranfrac closed the sale of its frac sands business, including substantially all of its assets, for an aggregate purchase price of $3,500,000. On January 21, 2015, the Company received cash proceeds of $410,018 and has recorded an amount receivable for an estimated $242,648 in additional cash proceeds to be received later in 2015. The Company recorded a loss on disposal of marketable securities of $347,334 as result of the sale.

7. MANAGEMENT OF CAPITAL

The Company manages its cash, common shares, stock options and warrants as capital. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its exploration and evaluation assets and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. The Board of Directors does not establish a quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management team to sustain the future development of the business.

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. In order to maximize ongoing exploration efforts, the Company does not pay out dividends. The Company's investment policy is to keep its cash treasury on deposit in an interest bearing Canadian chartered bank account.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents. There were no changes in the Company's approach to capital management during the period ended April 30, 2015. The Company is not subject to externally imposed capital requirements.

The carrying values of the Company's loans and receivables and financial liabilities were a reasonable approximation of fair value due to the short term nature of their maturities.

The Company is exposed to potential loss from various risks including commodity price risk, interest rate risk, currency risk, credit risk and liquidity risk. Based on the Company's operations the liquidity risk and commodity price risk are considered the most significant. There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous years unless otherwise stated in the note.

There have been no transfers between levels 1 and 2, or transfers in or out of level 3 for the year ended July 31, 2014 and period ended April 30, 2015.

a) Commodity Price Risk

The Company's ability to raise capital to fund exploration or development activities is subject to risk associated with fluctuations in the market prices of base and precious metals including gold, silver, zinc, lead and silica sand and the outlook for these minerals. The Company does not have any hedging or other derivative contracts respecting its operations.

Market prices for these minerals historically have fluctuated widely and are affected by numerous factors outside of the Company's control, including, but not limited to, levels of worldwide production, short-term changes in supply and demand, industrial and retail demand, central bank lending, and forward sales by producers and speculators. The Company has elected not to actively manage its commodity price risk, as the nature of Company's business is in exploration.

8. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (Continued)

b) Liquidity Risk

The liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company manages its liquidity risk through careful management of its financial obligations in relation to its cash position. Using budgeting processes the Company manages its liquidity requirements based on expected cash flow to ensure there are adequate funds to meet the short term obligations during the year.

During the past year the Company has been able to maintain its liquidity position through private placements. However, the variable market conditions make it uncertain whether the Company can continue to raise adequate funds to meet its financial obligations.

c) Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or a counter party to a financial instrument fails to meet its contractual obligations. Financial instruments which are potentially subject to credit risk for the Company consist of cash and cash equivalents. Cash and cash equivalents are maintained with financial institutions of reputable credit and may be redeemed on demand.

The carrying amount of the Company's financial assets represents the maximum credit exposure. The Company has gross credit exposure as at April 30, 2015 and July 31, 2014 of $334,407 and $324,069 respectively with respect to cash and cash equivalents and amounts due from related parties.
