

BREAKING DATA CORP.
(FORMERLY SPRYLOGICS INTERNATIONAL CORP.)

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF THE RESULTS
OF OPERATIONS AND FINANCIAL CONDITION**

For the 9 month periods ended October 31, 2015 AND 2014 as at December 30, 2015

Introduction

The following Management's Discussion and Analysis ("MD&A") covers the operations, financial position and operating results of Breaking Data Corp. (formerly Sprylogics International Corp.) (the "Company") for the 9 month periods ended October 31, 2015 and 2014, updates information from the Company's fiscal 2015 MD&A, and is intended to help readers better understand operations and key financial results, as they are, in our opinion, at the date of this report. The MD&A has been prepared in accordance with National Instrument 51-102F1, Continuous Disclosure Obligations – Management's Discussion & Analysis, and should be read in conjunction with the audited annual consolidated financial statements of the Company for the years ended January 31, 2015 and January 31, 2014 and the accompanying notes which have been prepared under IFRS. These interim unaudited condensed consolidated financial statements have been reviewed by the Audit Committee of the Company and have been approved by its Board of Directors. Additional information relating to the Company is available on SEDAR at www.sedar.com, as well as the Company's Web site at www.BreakingDataCorp.com.

These statements are essentially forward-looking and are subject to risks and uncertainties, as described in the "Risks and Uncertainties" section, below. Actual results, levels of activity, performance or achievements could differ materially from those projected, discussed or contemplated herein and are dependent upon on a number of factors, including the successful and timely completion of research and development initiatives, the uncertainties related to the market acceptance, and the commercialization of our products thereafter.

Consolidation and Presentation

The interim unaudited condensed consolidated financial statements of the Company comprise the accounts of Breaking Data Inc. (Formerly Sprylogics International Inc.), Devesys Technologies Inc. ("DTI") and Poynt Inc., the Company's wholly-owned subsidiaries. DTI was incorporated on January 19, 2007 in the United States of America pursuant to the laws of the state of Delaware. Poynt Inc. was incorporated on December 13, 2012 in Canada and pursuant to the laws of the province of Ontario. Poynt was acquired on July 31, 2013 and therefore its results are included in the Unaudited Interim Condensed Consolidated Statement of Loss and Comprehensive Loss for the periods ended October 31, 2015 and 2014. In addition, the assets and liabilities have been consolidated in the Interim Unaudited Condensed Statement of Financial Position at October 31, 2015 and January 31, 2015. The Company presents its interim unaudited condensed consolidated financial statements in Canadian dollars, which is the Company's functional currency, which includes the accounts of DTI translated into Canadian dollars as well as certain account balances from Poynt Inc., translated into Canadian dollars. All significant intercompany accounts and transactions are eliminated. Unless otherwise noted, all financial information in this MD&A is presented in Canadian dollars.

Effective September 4, 2013 the Company consolidated its common shares issuing 1 new common share for every 10 old common shares. The current issued and outstanding common shares at December 30, 2015 are

42,109,919. All issuances of common shares, stock options, share purchase warrants, and earnings per share in current and previous accounting periods presented herein, have been adjusted retroactively to reflect this share consolidation.

Effective September 10, 2015, at an Annual and Special Meeting of Shareholders, the Company approved a change of its name to Breaking Data Corp., effective immediately.

SELECTED FINANCIAL INFORMATION FOR THE PERIOD

The following table provides selected consolidated financial information for the Company as at and for the 9 month periods ended October 31, 2015 and 2014

	As at and for the 9 month period ended October 31, 2015 \$	As at and for the 9 month period ended October 31, 2014 \$
Total assets	3,463,067	3,640,633
Total liabilities	1,128,675	1,976,777
Revenue	968,838	1,549,242
Total expenses	4,817,260	3,944,526
Amortization of intangible assets	243,750	243,750
Accretion on debentures	91,295	34,088
Interest on debentures	17,272	54,902
Gain on sale of assets	127,211	-
Interest earned	-	1,669
Net and comprehensive loss	(3,721,211)	(2,393,615)
Basic and diluted loss per share	(0.09)	(0.09)

MANAGEMENT'S DISCUSSION AND ANALYSIS OF THE RESULTS OF OPERATIONS AND FINANCIAL CONDITION

The following MD&A of the results of operations and financial condition of the Company are based on and derived from and should be read in conjunction with the interim unaudited condensed consolidated financial statements and notes to the financial statements for the 9 month periods ended October 31, 2015 and October 31, 2014.

Caution regarding forward-looking statements

This MD&A contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to herein as "forward-looking statements"). These statements relate to future events or the Company's future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "continues", "forecasts",

“projects”, “predicts”, “intends”, “anticipates” or “believes”, or variations of, or the negatives of, such words and phrases, or state that certain actions, events or results “may”, “could”, “would”, “should”, “might” or “will” be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those anticipated in such forward-looking statements. The forward-looking statements in this MD&A speak only as of the date of this MD&A or as of the date specified in such statement. Specifically, this MD&A includes, but is not limited to, forward-looking statements regarding: the Company’s goal of creating shareholder value; its ability to meet its operating costs for the fiscal year ending January 31, 2016; the plans, costs, and timing for future research and development of the Company’s current and future technologies, including the costs and potential impact of complying with existing and proposed laws and regulations; management’s outlook regarding future trends; sensitivity analysis on financial instruments that may vary from amounts disclosed; prices and price volatility the Company’s products; and general business and economic conditions.

By their nature forward-looking statements are subject to known and unknown risks, uncertainties, and other factors which may cause actual results, events or developments to be materially different from any future results, events or developments expressed or implied by such forward-looking statements. Such factors include, among other things, the Company’s stage of development, long-term capital requirements and future ability to fund operations, future developments in the Company’s markets and the markets in which it expects to compete, risks associated with its strategic alliances and the impact of entering new markets on the Company’s operations. Each factor should be considered carefully and readers are cautioned not to place undue reliance on such forward-looking statements. See “Risk Factors.”

The Company disclaims any intention or obligation to update or revise these forward-looking statements, resulting from new information, future events or otherwise.

Outlook and Growth Strategy

Breaking Data Corp. (formerly Sprylogics International Corp.) is a technology provider of semantic search, machine learned language and Natural Language Processing (“NLP”). The Company’s technology platform, “Cluuz” uses Semantic and Machine Learning techniques to process, analyze and interpret massive volumes of aggregated data in order to extract key sentiments, facts, opinions, user interests and intents.

Originally, in 2008, the desktop version of the “Cluuz” platform was launched as a prototype of a “next generation” search engine platform that returns better results than traditional search engines by going beyond simply listing links. Subsequent to launching “Cluuz”, the Company undertook a strategic review process with the objective of identifying commercial opportunities related to the core technologies demonstrated in the desktop prototype. The process, which included detailed discussions with the Company’s current and prospective customers, as well as industry experts and analysts, led to a comprehensive analysis and evaluation of the current market opportunity, the Company’s core technology strengths, the competitive environment, as well as the emerging trends in search, discovery, advertising and commerce.

Breaking Data Corp. Consumer Applications

Breaking Data Corp. Consumer Applications are focused on delivering the customer facing mobile applications, specifically in its area of expertise; search and semantics. To that end the Company’s has built a new real-time social media search app in the sports vertical called BreakingSports. In addition to BreakingSports the Company

continues to grow Poynt application previously acquired in July 2013, which is an established recognizable worldwide search app.

BreakingSports aims to offer the fastest news delivery to sports fans around the world. Officially launched on February 23, 2015, BreakingSports tracks social media in real-time for significant sports information and events and distributes summarized information through real-time push notifications to consumers. By utilizing advanced artificial intelligence techniques, BreakingSports can detect events as they happen and as they are announced in social media, determine nature of the events, attribute events to participants, summarize source articles, index the underlying information, provide search of events and articles and send alerts to fantasy players, sport fans and enthusiasts. Since the introduction of the Company's BreakingSports App in early 2015, the growth and usage has continued to rise with over 800,000 downloads to date. In addition, last month the app delivered over 50 million notifications and over 300,000 unique pieces of news.

The Poynt App is built for targeted local search and has a rich and popular history with mobile smart phone users, having been downloaded more than 25 million times worldwide, across 5 mobile platforms. The addition of Poynt has enabled the Company to integrate its advanced search and semantic technology and overlap and complement its SDK research and development for local search with a Poynt Enabled version of the SDK. The Consumer Applications Team seeks to further commercialize some of Breaking Data Corps' established technology (specifically, the Cluuz Platform) to address market opportunities that help solve real world problems for consumers through its search and semantic solutions.

Breaking Data Corp. continues to market its existing products and services of its subsidiary, DTI, and is actively pursuing opportunities to monetize, via licensing and/or advertising of its Platform and Consumer Applications initiatives.

Breaking Data Corp. Platform Solutions

Breaking Data Corp. Platform Solutions involve the licensing of core search, semantic, and data acquisition technology to enterprise and consumer solution providers in multiple business verticals.

Breaking Data Corp has developed a powerful mobile platform with proprietary IP in advanced search and analysis, intelligent infrastructure services, contextual content services, semantic and machine learning techniques. The platform allows us to process, analyze and interpret unstructured data in real-time, in order to extract sentiment, facts, user interests and intent.

Currently, the primary focus of the Platform Solutions team is Breaking Data Corps' proprietary semantic and natural language processing technology, which can be customized to analyze big data sets and integrate Natural Language Processing ("NLP") and semantic search capabilities in different business verticals.

In addition to the semantic and NLP processing technology, the Breaking Data Corp. Platform Solutions business includes: (1) Search Software Development Kit (SDK) to mobile messaging providers. This product is called "Poynt-Enabled SDK" ; and (2) DTI, its subsidiary company that develops case management, tracking and reporting systems for Fortune 500 and other companies. DTI's expertise in case tracking issues and related industries has won strong praise from the ethics and compliance marketplace. DTI's product line comprises TrakBasic^(R), TrakEnterprise^(R), and TrakWeb^(TM).

The Company continues to explore new and beneficial ways to exploit and deploy its existing technologies and IP with strategic partnerships and projects.

BreakingSports App

Since 2007, Breaking Data Corp. has been developing natural language, machine learning and semantic search technologies first used in its Cluuz search engine, voted as one of the top 50 real-time search engines and one of the top 10 semantic search engines. The latest advancements in the Company's real-time NLP, enabled by recent breakthroughs in deep-learning, are showcased in its latest product, the BreakingSports App (or "BreakingSports"). This app is taking aim at a massive high growth sports information industry with interest across the globe.

Utilizing the Company's proprietary semantic technology, the BreakingSports App aims to offer the fastest news delivery to sports fans around the world. Launched on February 23, 2015, BreakingSports tracks social media, in real-time, for significant sports information and events and distributes summarized information through real-time push notifications to consumers. By utilizing advanced artificial intelligence techniques, BreakingSports can detect events as they happen and as they are announced in social media, determine nature of the events, attribute events to participants, summarize source articles, index the underlying information, provide search of events and articles and send alerts to fantasy players, sport fans and enthusiasts.

Compared to other similar products, BreakingSports has the differentiated advantage of not requiring human intervention when detecting and generating alerts, thereby enabling faster delivery of relevant information. Through a simple-to-use interface, BreakingSports users specify what teams and players they are interested in as well as what type of events they care about, such as injuries, roster moves, line-up changes, statistics, rumours and more.

In addition to tracking social media, BreakingSports analyzes statistical and play-by-play information to auto-generate news, updating users on important facts that might not be covered through traditional sports or social media. Users are able to review news in a familiar feed/stream interface and as search results, both of which are ideally suited for monetization through native advertising. Other monetization options include freemium models, with upgrades to subscribe to more teams and topics and/or ad-free streams. While the current real-time semantic processing pipeline understands North American football, basketball, baseball, hockey and race car driving, it can, and will be easily configured to include other sports moving forward, as well as potentially other categories of information, ushering the era of real-time news subscription for any topics of choice.

One of the biggest problems faced by today's mobile world is search and discovery. As a platform/network grows, so does the amount of content, which makes it increasingly difficult for consumers to find the information they want. BreakingSports allows users to subscribe to their favorite teams and players so that they never miss a beat. Whether it is a headline, injury, trade, or scoring alert, BreakingSports users are the first to know.

BreakingSports delivers the fastest breaking sports news and alerts to users by integrating social media sourced updates. Through specialized algorithms, BreakingSports taps social media for the latest sports news and delivers it to users in a fully automated real time manner.

Additional BreakingSports App features include:

- News Feed – View news feed for personalized subscriptions;
- Filter Alerts – Select which type of news is most important to you, from injuries to rumors;
- League News – View and search news by league for the latest updates;
- Scores – Follow current and upcoming games via the game calendar for in-game alerts;
- Player Stats – View game and season stats in player profiles;

- Individual News – Access team or player specific news by selecting them from your customizable subscription list; and
- Share – Send friends links to important updates via email or text.

The Poynt App Strategy

The Poynt App is a convenient and timesaving GPS-enabled application that connects consumers to local businesses, restaurants, events and movie theatres at the moment they want to buy or acquire products or services. The Poynt App gives consumers the ability to move beyond discovery of their local area to view movie trailers and show times, book dining reservations, view directions on a map, click-to-call the business or view their website. The system is designed to make searching for local products/services/merchants quick and easy.

The differentiators that position Poynt as the leading mobile local search application include being deeply integrated into the native applications and capabilities of each device platform. This includes integration into contacts by adding addresses directly from within the Poynt App, adding calendar entries for dinner reservations and movie tickets, providing directions on a map and delivering results to friends or colleagues via email. The Poynt App also integrates with voice activation, virtual reality and gesture calling.

The Poynt App is built as a native client based upon SDKs from Google and Apple. The Poynt App integrates with the various libraries on each device to access the address book, calendar, GPS, maps, etc. This enables users to carry out the features available within the Poynt App such as adding calendar events for dining, events and movies, adding listing results to the address book or forwarding listing information to a friend via email. The client communicates with the Company's backend operating environment to retrieve data based upon the user's request.

Since acquiring Poynt, the Company has initiated a number of strategic partnerships that provide enhanced capabilities within the Poynt application and/or enables better commercialization of the existing users.

Poynt App and iBeacons

As a local search app, Poynt application users represent ideal targets for local advertising. In 2014/2015 we saw additional emphasis on the use of Apples iBeacon technology as a basis for detecting user location and sending them relevant advertising. iBeacon technology allows advertisers to do indoor advertising while targeting different users based on proximity to the closest beacon so that users can receive varying ads in different sections of the store.

In 2014, the Company developed and integrated an iPhone beacon technology providing users with the ability to receive promotions based on their proximity to an iBeacon. The Poynt application has been launched with the integrated beacon technology in partnership with Juice Mobile. These iBeacon campaigns are expected to be active during the 2016 fiscal year resulting in new revenue streams for the Poynt application. Feedback from our partner has been very positive in terms of the number of potential impressions that can be generated from the Poynt user base through iBeacon proximity.

Semantic Analysis of Social Media Content

Breaking Data Corp. has accumulated considerable intellectual property and expertise in the areas of natural language processing and artificial intelligence. Currently these capabilities are utilized within our BreakingSports application; however, there is nothing inherently different about processing written language on the topic of sports vs other domains such as weather, food, music, entertainment, politics, business etc.

News and events during the 9 month period ended October 31, 2015

The business and related public news highlights are outlined below:

1. **On February 12, 2015** – the Company issued 4,285,714 units at \$0.35 for gross proceeds of \$1.5 million. Each unit consists of one common share and one share purchase warrant at an exercise price of \$0.45 for 24 months.
2. **On February 12, 2015** - the Company repaid a debenture with a principle amount of \$500,000 and the Company issued a new \$500,000 convertible debenture which will be convertible into common shares of the Company at conversion price of \$0.38 per share until maturity. The convertible debenture will mature in 24 months. In connection with the debenture the Company issued 1,315,789 warrants at an exercise price of \$0.50 for 24 months.
3. **On February 12, 2015** - the Company issued 428,571 shares at \$0.35 to satisfy debt of \$150,000.
4. **On February 23, 2015** - the Company announced that it launched its BreakingSports App for Android, available now on Google Play Store.
5. **On March 12, 2015** - the Company issued 8,125,000 units at \$0.40 for gross proceeds of \$3.25 million. Each unit consists of one common share and one half of one share purchase warrant. Each whole warrant exercise price is \$0.50 for 18 months.
6. **On March 13, 2015** - the Company announced that it has now integrated NCAA Men's Basketball ("NCAAMB") into its BreakingSports app, giving users real time news and updates, scores and statistics. The new NCAAMB feed will allow users to follow NCAAMB teams and players of their choice and filter the news and information to their liking. BreakingSports is ready to deliver fast and compelling news, in a fully automated, real time manner, with push notifications, to users throughout the upcoming NCAA March Madness tournament.
7. **On March 23, 2015** - the Company announced that it has entered into a strategic agreement with Pointstreak 5050 an electronic raffle software system that drives consumer participation in raffle events while providing accountability to the raffle process. Pointstreak 5050 system electronically captures every transaction while providing updated real-time raffle information to display devices located throughout the venue. Pointstreak 5050 is the market leader and is currently used by over 250 different venues throughout North America, including over 70 major professional sports teams (e.g. NFL, MLB, NBA, NHL, etc.), 16 NCAA institutions and reaches over 100 million sports fans annually.
8. **On March 30, 2015** - the Company announced that its BreakingSports App Gains Traction with over 100k Downloads in less than 30 days amidst NCAA March Madness. In addition, BreakingSports was *selected as 1 of 5 apps to follow the NCAA tournament, by USA Today*. BreakingSports has been well received by sports fans and fantasy players and most recently by those who are following teams or their brackets in the NCAA March Madness tournament. In addition, the app has garnered other valuable metrics including the delivery of over 10 million notifications to its users, via more than 1.1 million pieces of relevant, filtered and categorized content. Users average over 8 custom subscriptions (of their chosen teams and/or players) and are viewing more than 8 pages per session, leading to significant engagement and session time, throughout the day. This meaningful level of engagement will continue to grow as users beef up their subscriptions and hone their preferred choice of filters.
9. **In March 2015** - the Company issued 550,000 options to consultants with exercise prices ranging from \$0.45 to \$0.62.
10. **On April 1, 2015** - the Company issued 25,000 shares upon the exercise of 25,000 share purchase options and an exercise price of \$0.63 for proceeds of \$15,750.
11. **On April 20, 2015** - the Company announced that BreakingSports launched "Live-Feeds." This

revolutionary new functionality dramatically improves search and discovery of live-streaming platforms like Periscope and Meerkat by delivering real-time videos to BreakingSports app users based on their subscriptions and filters.

12. **On May 19, 2015** - the Company announced that it has entered into an agreement with Anthem Sports & Entertainment Corp. ("Anthem") a global specialty content platform focused on passionate sports and lifestyle communities across multiple media. Under the terms of the agreement, the Breaking Data Corp. BreakingSports app will provide Anthem's offerings including its award winning RotoExperts.com fantasy content, articles and FNTSY Sports Network videos and entertainment to its growing user base. In exchange Anthem will market Breaking Data Corps' BreakingSports app on Anthem's platforms.
13. **On June 3, 2015** – the Company announced that it launched NASCAR, F1 and Indy car racing feeds for its BreakingSports app, now available on Apple iOS and Google Play for Android.
14. **On July 7, 2015** – the Company announced an exclusive partnership that will see Fantasy Feud become the exclusive integrated daily fantasy sports platform of the BreakingSports app. Through this partnership, Fantasy Feud and the BreakingSports app have completed the development of an integrated technology solution that will allow the more than 500,000 users of BreakingSports' mobile application the ability to automatically integrate a custom Fantasy Feud feed within the BreakingSports app. Daily fantasy sports participants have traditionally been required to search for relevant statistical information on their contest players. The partnership between Fantasy Feud and the BreakingSports app will enable Fantasy Feud's participants to receive instant and relevant data on players selected in each of their daily contests without the need to search in the traditional manner.
15. **On July 15, 2015** – the Company announced that its BreakingSports App has now integrated the English Premier League. With the start of the EPL season right around the corner, the app's latest coverage addition gives soccer fans the fastest news, from line-ups to injury reports, so they can stay up-to-date on their favorite teams and players.
16. **On July 16, 2015** – the Company announced that it has entered into an exclusive agreement with **Tabcorp Holdings Limited (ASX:TAH)** ("Tabcorp") a world leading wagering company to offer a new version of its BreakingSports app to the Australian market. The agreement is mutually exclusive and provides Breaking Data Corp per click advertising revenue, with an annual minimum guaranteed level. The agreement will see wagering information and markets from TAB.com.au seamlessly integrated into the BreakingSports app news feed. In addition to the current sports available on the BreakingSports app, the new version will provide breaking news information from social media feeds about Australian Football (AFL) and Rugby League, EPL and A-League Soccer as well as International Cricket.
17. **On July 2 and July 17, 2015** - the Company issued 100,000 and 50,000 shares respectively upon the exercise of 150,000 broker warrants at an exercise price of \$0.45 for total proceeds of \$67,500.
18. **On July 31, 2015** - the Company announced that its BreakingSports app is now available on Apple Watch to give sports fans faster access to its up-to-the-second mobile alerts. This app update comes on the heels of the app surpassing 250,000 downloads in less than two months.
19. **On September 3, 2015** - the Company announced that its BreakingSports app is now including coverage for college football just in time for the season. To get fans excited, BreakingSports is announcing its College Football Campus Challenge that will reward the team school that has the most subscribers with a range of great prizes.
20. **On September 10, 2015** - at an Annual and Special Meeting of Shareholders the Company obtained approval of a new 2015 option plan. In particular, the total amount of share purchase options available for issuance was increased from 5,469,541 to a maximum of 8,420,000.

RESULTS OF OPERATIONS

	9 months ended October 31, 2015	9 months ended October 31, 2014	Dollar Increase/ (Decrease)	Percentage Increase/ (Decrease)

Gain on sale of asset	127,211	-	127,211	100%
Interest earned	-	1,669	(1,669)	-100%
Net and comprehensive loss for the period	(3,721,211)	(2,393,615)	(1,327,596)	55%

Analysis of revenues and expenses

Revenues for the 9 month period ended October 31, 2015 were \$968,838 compared to \$1,549,242 for the 9 month period ended October 31, 2014, a decrease of \$580,404 or 37%. This decrease is the result of the absence of 2 consulting agreements that the Company completed in the first 2 quarters of last year for \$675,000; offset by increases in revenues from Poynt and DTI, the Company's wholly owned subsidiaries.

In addition, as the Company has now transitioned into marketing and growing its BreakingSports app and providing its technology platform to various business verticals, development resources have been focused on these initiatives. To that end, the BreakingSports app has contributed some early stage revenues as the Company invests in marketing and promotion to grow the app's user base.

In recent months, the Company is pleased to report that new pilot projects have begun and while they do produce some moderate revenue in the near term, more importantly they continue to validate the Company's growth strategy and value propositions to various new and potential partners.

To that end, most recently the Company has been engaged to build and license a proprietary enterprise solution for a world leading large multinational technology company which includes 2 phases consisting of web based customized search tool in phase 1 and a visualization of entities in phase 2.

In addition, the Company is in advanced discussions to integrate its NLP and semantic search capabilities with other companies in different verticals. There is no assurance at this time that opportunities in the pipeline will materialize into revenue generating agreements for the Company; nevertheless, these unsolicited strategic projects that are in discussion and/or negotiation stages, continue to validate the wide range of interest and potential value of the Company's technology platform.

Promotion and marketing expense was \$1,533,756 for the 9 month period ended October 31, 2015, compared to \$95,015 for the 9 month period ended October 31, 2014, an increase of \$1,438,741 or 1514%. This increase is primarily related to the Company's launch and continuing marketing of its BreakingSports app. To effectuate its strategy, the Company contracted outsourced marketing resources and invested significant resources in on-line and traditional marketing campaigns to ramp up the downloads of BreakingSports and convert these downloads into active users. While the Company has grown to over 800,000 downloads of its new app (which in October 2015 alone amounted to over 50 million notifications to active users and the delivery of over 300,000 unique pieces of news), it fully expects this allocation of marketing dollars to be discretionary moving forward. Consequently, the Company will continue to evaluate marketing opportunities and ROI in order to maximize the conversion of downloads to active users of its app. Nevertheless, the Company raised funds at the beginning of the fiscal year and allocated a specific amount of these funds to a strong, strategic and successful marketing effort around the BreakingSports app, which, on the whole, has garnered significant user activity and engagement by many thousands of daily users.

Stock-based compensation was \$638,119 for the 9 month period ended October 31, 2015 compared to \$1,371,543 for the 9 month period ended October 31, 2014, a decrease of \$733,424 or 53%. This expense is a non-cash item, with a corresponding credit to contributed surplus. The decrease is the result of past years share purchase options issued to board members and consultants previously expensed.

Employee salary and benefits expense was \$623,905 for the 9 month period ended October 31, 2015, compared to \$436,752 for the 9 month period ended October 31, 2014, an increase of \$187,153 or 43%. Employee salary and benefits expense relates to expenses paid for the employees of the Company and its wholly-owned subsidiaries and includes salary and wages, payroll taxes and benefits. The increase is a direct result of added headcount, specifically in product development and programming and is also in part, offset by the decrease in Research and development consultants (see below) as the Company grew its full time employees and decreased some of its outsourced resources.

Research and development consultants' compensation for the 9 month period ended October 31, 2015 were \$480,805 compared to \$632,982 for the 9 month period ended October 31, 2014, a decrease of \$152,177 or 24%. As noted above, the Company has transitioned contractors to payroll and reduced outsourcing contracts while it modifies and strengthens its internal R&D team of developers.

The Company will continue to modify and augment its combined outsourced consulting and in-house teams, to enhance core technology solutions including semantics, NLP development, application interface (AI) friendliness and platform initiatives on both iOS and Android handsets. The Company has taken steps to strengthen its Canadian team to improve efficiencies. In addition, the Company continues to invest in R&D investments to stay ahead of the market and produce best of breed solutions that address the current marketplace. Outsourced teams are in place in both Canada and Serbia to further identify projects of value.

Business development consultants' compensation for the 9 month period ended October 31, 2015 were \$445,834 compared to \$229,960 for the 9 month period ended October 31, 2014, an increase of \$215,874 or 94%. The Company has invested in business development to facilitate its growth and create new strategic opportunities. The Company's success is measured by the increased exposure in the marketplace resulting in a growing opportunity funnel, in addition to marketing and branding awareness of its consumer facing products and services, as evidenced by the strategic agreements announced in the last fiscal year. The Company recently retained new business development consultants at the end of last fiscal year and into this fiscal year to further its goals, which will increase this expense moving forward. This increased expenditure is expected to result in a ramp up of users of BreakingSports and to close strategic partnerships and other revenue generating deals.

In recent months, the Company is pleased to report that new pilot projects have begun and while they do produce some moderate revenue in the near term, more importantly they continue to validate the Company's growth strategy and value propositions to various new and potential partners. To that end, most recently the Company has been engaged to build and license a proprietary enterprise solution for a world leading large multinational technology company which includes 2 phases consisting of web based customized search tool in phase 1 and a visualization of entities in phase 2.

In addition, the Company is in advanced discussions to integrate its NLP and semantic search capabilities with other companies in different verticals. There is no assurance at this time that opportunities in the pipeline will materialize into revenue generating agreements for the Company; nevertheless, these unsolicited strategic projects that are in discussion and/or negotiation stages, continue to validate the wide range of interest and potential value of the Company's technology platform.

Development personnel continue to facilitate and implement new strategic initiatives around the evolution of the BreakingSports app, the Poynt app and the Software Development Kits (SDK's) and prospective opportunities for our technology platform in various business verticals.

Management consulting compensation for the 9 month period ended October 31, 2015 was \$315,000 compared to \$315,000 for the 9 month period ended October 31, 2014. This cost is related to core management consulting contracts for the Chief Executive Officer and Chief Financial Officer in order to lead the business including but not limited to finance, strategy, M+A, operations, hiring, reporting and short and long term planning.

Administration and operations expenses for the 9 month period ended October 31, 2015 were \$268,049 compared to \$355,613 for the 9 month period ended October 31, 2014, representing a decrease of \$87,564 or 25%. The Company has made a concerted effort to keep general overheads, including office costs, low and allocate funds towards R&D, marketing and business development. In the first quarter of FY 2014 the Company acquired Poynt Inc., which resulted in one-time or short term transition costs that explains the difference in expense. Furthermore, This decrease consists of a combination of items including; foreign exchange gains buoyed by increased US dollar revenues specifically by Poynt app, a decrease in hosting expenses, an

increase in maintenance and small equipment expense to maintains its mobile testing equipment, and decreases in general office, insurance, telephone and internet expenses that have small fluctuations from month to month.

Amortization of intangibles was \$243,750 for the 9 month period ended October 31, 2015 compared to \$243,750 for the 9 month period ended October 31, 2014. This was a result of the amortization of intangibles acquired in the Poynt business acquisition on July 30, 2013. The intangibles acquired are broken down as follows from a cost allocation perspective: Intellectual Property in the amount of \$1,205,000; the Poynt user base for \$745,000; and the Poynt brand and trade name for \$185,000. Amortization was recorded during the period on the Intellectual Property and Poynt user base applying an effective amortization period of 6 years.

Application content expense for the 9 month period ended October 31, 2015 were \$137,808 compared to \$159,422, a decrease of \$21,614 or 14%. Application content expense includes data and provisioning costs for the Poynt app. These direct costs are both fixed and variable and should decrease as a percentage of related revenues, as revenues increase. In addition, management continues, where possible, to reduce direct data and provisioning costs resulting in small savings during this fiscal period.

Accretion on debentures was \$91,295 for the 9 month period ended October 31, 2015 compared to \$34,088 for the 9 month period ended October 31, 2014, an increase of \$57,207 or 168%. This expense is a non cash item. The accretion this period was accelerated with net repayments made in the period of \$590,000.

Interest on debentures was \$17,272 for the 9 month period ended October 31, 2015 compared to \$54,902 for the 9 month period ended October 31, 2014, a decrease of \$37,630 or 69%. This decrease was as a result of the smaller outstanding debentures balance during the period compared to the same period in the last fiscal year. In addition, a new debenture for \$500,000 has no interest attached to it in lieu of bonus shares issued.

Professional fees for the 9 month period ended October 31, 2015 were \$21,667 compared to \$15,499 for the 9 month period ended October 31, 2014, an increase of \$6,168 or 40%. Professional fees in the period are primarily patent maintenance costs and fluctuate from time to time depending on the dates for payment of annual fees related to granted patents. In addition, the Company recently incurred some fees related to its corporate name change and symbol change.

Gain on sale of assets was \$127,211 for the 9 month period ended October 31, 2015 compared to \$nil for the 9 month period ended October 31, 2014. On July 14, 2015, the Company entered into an arm's length Domain name assignment agreement, thereby selling all rights, title and interests in certain URLs owned by the Company for \$100,000US (\$127,211CAD). There was no cost base associated with these domain names and the transaction was recorded as a gain on sale of assets. There is no impact on the Company's operations resulting from the sale of these domain names, beyond the receipt of a cash payment.

Interest earned was \$nil for the 9 month period ended October 31, 2015 compared to \$1,669 for the 9 month period ended October 31, 2014. This decrease was as a result of cash balances invested in term deposits in the previous fiscal period.

Liquidity and Capital Resources

For the 9 month period ended October 31, 2015, there was a net cash outflow from operating activities of \$3,732,340 compared to a net cash outflow of \$635,374 for the 9 month period ended October 31, 2014, a difference of \$3,096,966.

The increase in cash used for operating activities was primarily due to:

- 1) An increase in the net loss of \$3,721,211 for the 9 month period ended October 31, 2015 compared to a net loss of \$2,393,615 for the 9 month period ended October 31, 2014, that accounts for a difference of \$1,327,596 resulting from lower revenues and higher expenses as discussed in the analysis of expenses above;
- 2) A decrease in non-cash based expensing of stock-based compensation of \$638,119 for the 9 month period ended October 31, 2015 compared to \$1,373,543 for the 9 month period ended October 31, 2014, that accounts for \$733,424 in a non-cash item that is added back to cash flow from operations;
- 3) Net cash outflow resulting from the net change in non-cash working capital items related to operations of \$1,134,294 for the 9 month period ended October 31, 2015 compared to a net cash inflow of \$108,860 for the 9 month period ended October 31, 2014, that accounts for a difference of \$1,243,154.

Offset by;

- 4) An increase in the non-cash expensing of accretion on debenture of \$91,296 for the 9 month period ended October 31, 2015, compared to \$34,088 for the 9 month period ended October 31, 2014, that accounts for a difference of \$57,208 non-cash item that is added back to cash flows from operations.
- 5) An increase in the common shares issued for debt of \$150,000 that is added back to cash flows from operations.

Expressed in tabular form, the increase in the net cash used for operations is as follows:

Increase in net loss	\$	(1,327,596)
Lower stock-based compensation		(733,424)
Higher outflows in non-cash working capital		(1,243,154)
Higher accretion of debentures		57,208
Add back common shares issued for debt		150,000
Increase in the net cash used for operations	\$	3,096,966

As at October 31, 2015 the Company had working capital of \$581,600 compared to negative working capital of \$1,607,194 as at January 31, 2015, a difference of \$2,188,794. This increase in working capital is primarily a result of higher cash and term deposits (by \$414,888), higher trade receivables (by \$57,810) and higher prepaid expenses (by \$626,207) as well as a decrease (\$1,089,889) in all current liabilities which is due to decreased debentures, decreased payables and lower deferred revenues.

The large increase in prepaid expenses was due to the prepayment of a long term marketing contract to grow the BreakingSports app and provide various strategic opportunities.

The Company has incurred losses and is not yet cash flow positive. The Company's ongoing ability to remain liquid will depend on a number of factors including the Company's continued ability to raise capital to fund operations.

Outstanding Share Data

As at October 31, 2015, the number of outstanding shares was 42,109,919 (January 31, 2015 – 29,095,634).

On February 12, 2015, Company issued 4,285,714 units at \$0.35 for gross proceeds of \$1.5 million. Each unit consists of one common share and one share purchase warrant at an exercise price of \$0.45 expiring in 24 months. Also, on February 12, 2015 the Company issued 428,571 shares at \$0.35 to satisfy debt of \$150,000. On March 12, 2015 the Company issued 8,125,000 units at \$0.40 for gross proceeds of \$3.25 million. Each unit consists of one common share and one half of one share purchase warrant. Each whole warrant exercise price is \$0.50 for a term of 18 months. On April 1, 2015 the Company issued 25,000 shares upon the exercise of 25,000 share purchase options at an exercise price of \$0.63 for proceeds of \$15,750. On July 2 and July 17, 2015, the Company issued 100,000 and 50,000 shares respectively upon the exercise of 150,000 broker warrants at an exercise price of \$0.45 for total proceeds of \$67,500.

As at December 30, 2015, the number of shares outstanding was 42,109,919.

As at October 31, 2015, the Company had 4,455,000 share purchase options outstanding (January 31, 2015 – 4,855,000). During the 9 month period ended October 31, 2015, the Company issued 550,000 new options at prices ranging from \$0.45 to \$0.62, 925,000 options were cancelled or expired and 25,000 options were exercised at a price of \$0.63.

Subsequent to the end of the period, on December 10, 2015, the Company granted 3.3 million options to board, management, staff and consultants. Each option is exercisable at \$0.25, vests over 24 months and expires on December 9, 2020. As at December 30, 2015, the number of outstanding options was 7,755,000.

As at October 31, 2015 the Company had a total of 9,514,003 warrants and nil finders' warrants outstanding (January 31, 2015 – nil and 355,921). During the period the Company granted a total of 9,664,003 warrants. On February 12, 2015, in connection with a private placement financing, 4,285,714 warrants were issued with an exercise price of \$0.45 for 24 months. Also on February 12, 2015, in connection with the issuance of a \$500,000 debenture, the Company issued 1,315,789 warrants at an exercise price of \$0.50 for 24 months. On March 12, 2015, in connection with a private placement financing, 4,062,500 warrants were issued with an exercise price of \$0.50 for 18 months. During the 9 month period on July 2 and July 17, 2015, the Company issued 100,000 and 50,000 shares respectively upon the exercise of 150,000 broker warrants at an exercise price of \$0.45 for total proceeds of \$67,500.

During the period on September 3, 2015, 355,921 finders' warrants expired.

As at December 30, 2015 the number of warrants outstanding was 9,514,003 and the number of finders warrants outstanding was nil.

SEGMENTED INFORMATION

The Company had two geographical segments as at and for the periods ended October 31, 2015 and 2014, comprising head office and general operations of Breaking Data International and Poynt Inc. in Canada and its wholly-owned subsidiary, DTI, in the United States.

	As at and for the period ended October 31, 2015			As at and for the period ended October 31, 2014		
	Canada	United States	Total	Canada	United States	Total

SUBSEQUENT EVENTS AND NEWS

On December 10, 2015 the Company issued a corporate update that included the following items:

- a) On December 10, 2015, the Company granted 3.3 million options to board, management, staff and consultants, of which 2.45 million options were issued to 4 directors of the board and 3 members of management. Each option is exercisable at \$0.25, vests over 24 months and expires on December 9, 2020.
- b) BreakingSports App launched in early 2015, has continued to grow with over 800,000 downloads to date. In addition, last month the app delivered over 50 million notifications and over 300,000 unique pieces of news.
- c) The Company is pleased to announce the appointment of Rajiv “Roger” Rai to its board of directors. Roger will be replacing Keith Yokomoto, who is moving on to pursue other interests.

SIGNIFICANT ACCOUNTING POLICIES

Refer to Note 2 to the interim unaudited condensed consolidated financial statements for a description of our significant accounting policies.

ISSUED STANDARDS NOT YET ADOPTED

- a) IFRS 9 – Financial Instruments

IFRS 9 (2009) introduced new requirements for the classification and measurement of financial assets. Under IFRS 9 (2009), financial assets are classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows.

IFRS 9 (2010) introduced additional changes relating to financial liabilities and IFRS 9 (2013) introduced hedging guidance. On July 24, 2014, the IASB issued the final version of the standard, which supersedes all previous versions (IFRS 9 (2014)).

The Company does not intend to early adopt IFRS 9 (2014) in its financial statements and will adopt it for the annual period beginning on January 1, 2018, which is the mandatory adoption date specified in IFRS 9 (2014).

- b) IFRS 15 - Revenue from Contracts with Customers

IFRS 15 - Revenue from Contracts with Customers - is effective for annual periods beginning on or after January 1, 2018, and provides new requirements for recognizing revenue. The new standard's core principle is for a company to recognize revenue to depict the transfer of goods or services to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services. The new standard sets out enhanced disclosures about revenue, provides guidance for transactions that were not previously addressed comprehensively and improves guidance for multiple-element arrangements. The Company intends to adopt the new Standard on its effective date and has yet to consider the impact on its financial reporting.

For the standards not yet adopted the Company does not expect that these standards will have a significant impact on the Company's consolidated financial statements.

RELATED PARTY TRANSACTIONS

The following balances and transactions with related parties and key management personnel are included in the accompanying interim condensed consolidated financial statements:

- a. As of October 31, 2015 the Company had \$58,538 (October 31, 2014 - \$62,150) of accounts payable due to two officers of the Company (one of whom is also a director of the Company) and another director of the Company.
- b. Research and development consultants compensation of \$157,500 were incurred with one officer of the Company during the 9 month period ended October 31, 2015 (October 31, 2014 - \$135,000). The officer was compensated for his role as Chief Technology Officer.
- c. Management consulting compensation expenses of \$315,000 were incurred with two officers of the Company during the 9 month period ended October 31, 2015 (October 31, 2014 - \$315,000), one of which is also a director of the Company. These two officers were compensated for their roles as Chief Executive Officer and Chief Financial Officer for the Company.
- d. Business development consultant compensation of \$nil were incurred during the 9 month period ended October 31, 2015 (October 31, 2014 - \$45,900) with a former officer of the Company. This former officer was compensated for his role as VP, Product Management for the Company.
- e. No Share Purchase Options were granted to officers of the Company during the 9 month period ended October 31, 2015 (October 31, 2014 – nil).

DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROLS OVER FINANCIAL REPORTING

Management has established and continues to complement a system of disclosure controls and procedures and internal controls over financial reporting. This system is designed to provide reasonable assurance that material information relating to the issuer and its subsidiaries are available and reported to senior management and permits timely decisions regarding public disclosure. As of October 31, 2015, the Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on this evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that the Company's disclosure controls and procedures, as defined in Multilateral Instrument 52-109 – Certification of Disclosure in Issuer's Annual and Interim Filings are effective, except as noted below, to ensure that the information required to be disclosed in reports that are filed or submitted under Canadian Securities legislation are recorded, processed, summarized and reported within the time period specified in those rules.

As noted in previous quarterly and annual MD&A's the Company's disclosure controls and procedures are indicative of many small and growing companies. Consequently, management has identified certain weaknesses that currently exist in the disclosure controls and procedures including, but not limited to, the segregation of duties and expertise in specific areas of public disclosure. The existence of these weaknesses is partially compensated for by senior management monitoring these issues, and in the case of complex or extraordinary transactions, consulting with external experts to advise management in their analysis and conclusions.

Throughout the year management continued to address, as required, steps to improve disclosure controls and procedures and internal controls over financial reporting. However, no specific changes to disclosure controls and procedures were made during the period. The Company recognizes this is an ongoing and dynamic process and continues to focus on internal controls related to financial reporting and disclosure controls and procedures and is committed to further improvements in the future.

RISKS AND UNCERTAINTIES

Limited Operating History

The Company has a limited operational history. The Company has never paid dividends and has no present intention to pay dividends. The Company is in the early commercialization stage of its business and therefore will be subject to the risks associated with early stage companies, including uncertainty of revenues, markets and profitability and the need to obtain additional funding. The Company will be committing, and for the foreseeable future will continue to commit, significant financial resources to marketing, product development and research. The Company's business and prospects must be considered in light of the risks, expenses and difficulties frequently encountered by companies in the early stage of development. Such risks include the evolving and unpredictable nature of the Company's business, the Company's ability to anticipate and adapt to a developing market, acceptance by consumers of the Company's products and the ability to identify, attract and retain qualified personnel. There can be no assurance that the Company will be successful in doing what is necessary to address these risks.

Key Personnel

The investigative research technology industry involves a high degree of risk, which a combination of experience, knowledge and careful evaluation may not be able to overcome. The success of the Company may be dependent on the services of its senior management and consultants. The experience of these individuals may be a factor contributing to the Company's continued success and growth. The loss of one or more of its key employees or consultants could have a material adverse effect on the Company's operations and business prospects. In addition, the Company's future success will depend in large part on its ability to attract and retain additional highly skilled technical, management, sales and marketing personnel. There can be no assurance that the Company will be successful in attracting and retaining such personnel and the failure to do so could have a material adverse effect on the Company's business, operating results and financial condition.

Additional Financing Requirements

In order to accelerate the Company's growth objectives, it will need to raise additional funds from lenders and equity markets in the future. There can be no assurance that the Company will be able to raise additional capital on commercially reasonable terms to finance its growth objectives. The ability of the Company to arrange such financing in the future will depend in part upon the prevailing capital market conditions as well as the business performance of the Company. There can be no assurance that the Company will be successful in its efforts to arrange additional financing on terms satisfactory to the Company. If additional financing is raised by the issuance of common shares from the treasury of the Company, control of the Company may change and shareholders may suffer additional dilution.

Protection of Intellectual Property

Although the Company does not believe that its products infringe the proprietary rights of any third parties, there can be no assurance that infringement or invalidity claims (or claims for indemnification resulting from infringement claims) will not be asserted or prosecuted against the Company or that any such assertions or prosecutions will not materially adversely affect the Company's business, financial condition or results of operations. Irrespective of the validity or the successful assertion of such claims, the Company could incur significant costs and diversion of resources with respect to the defense thereof which could have a material adverse effect on the Company's business, financial condition or results of operations. The Company's performance and ability to compete are dependent to a significant degree on its proprietary technology.

While the Company will endeavor to protect its intellectual property, there can be no assurance that the steps taken by the Company will prevent misappropriation of its technology or that agreements entered into for that purpose will be enforceable. The laws of other countries may afford the Company little or no effective protection of its intellectual property. While the Company's technology is developed and owned by the Company, it may in the future also rely on technology licenses from third parties. There can be no assurance that these third party licenses will be, or will continue to be, available to the Company on commercially reasonable terms. The loss of, or inability of the Company to maintain, any of these technology licenses' could result in delays in completing its product enhancements and new developments until equivalent technology could be identified, licensed, or developed and integrated. Any such delays would materially adversely affect the Company's business, results of operations and financial condition.

Competition

The Company may not be able to compete successfully against current and future competitors, and the competitive pressures the Company faces could harm its business and prospects. Broadly speaking, the market for investigative research technology is competitive. The level of competition is likely to increase as current competitors improve their product offerings and as new participants enter the market. Many of the Company's current and potential competitors have longer operating histories, larger customer bases, greater name and brand recognition and significantly greater financial, sales, marketing, technical and other resources than the Company. Additionally, these competitors have research and development capabilities that may allow them to develop new or improved products that may compete with products the Company markets and distributes.

New technologies and the expansion of existing technologies may also increase competitive pressures on the Company. Increased competition may result in reduced operating margins as well as loss of market share. This could result in decreased usage of the Company's products and may have a material adverse affect on the Company's business, financial condition and results of operations.

Implementation Delays

Most of the Company's customers will be in a testing or a preliminary use stage of utilizing the Company's products and may encounter delays or other problems during their introduction of the Company's products. A decision not to implement these products, or a delay in implementation, could result in a delay or loss of related revenue or could otherwise harm the Company's businesses and prospects. The Company will not be able to

predict when a customer that is in a testing or a preliminary use phase will adopt a broader use of the Company's products.

Limited Customer Feedback Respecting Products

The Company's revenue will depend on the number of customers who use the Company's products. Accordingly, the satisfactory design of the Company's product is critical to the Company's business, and any significant product design limitations or deficiencies could harm the Company's business and market acceptance. To date, the features and functionality reflected in the Company's product have been based on its internal design efforts and on feedback from a limited number of customers and potential customers. This limited feedback may not have resulted in an adequate assessment of customer requirements. Therefore, the currently specified features and functionality of the Company's product may not satisfy current or future customer demands. Furthermore, even if the Company identifies the feature set required by customers in the Company's market, it may not be able to design and implement products incorporating features in a timely and efficient manner, if at all.

Developing Markets

The market for the Company's product is relatively new and continues to evolve. If the market for the Company's product fails to develop and grow, or if the Company's product does not gain market acceptance, the Company's business and prospects will be harmed.

Technological Change

The investigative research technology industry is susceptible to technological advances and the introduction of new products utilizing new technologies. Further, the investigative research technology industry is also subject to customer preferences and to competitive pressures which can, among other things, necessitate revisions in pricing strategies, price reductions and reduced profit margins. The success of the Company will depend on its ability to secure technological superiority in its product and maintain such superiority in the face of new products. While the Company believes that its product will be competitive, no assurances can be given that the product of the Company will be commercially viable or that further modification or additional products will not be required in order to meet demands or to make changes necessitated by developments made by competitors which might render the product of the Company less competitive, less marketable, or even obsolete over time.

The future success of the Company will be influenced by its ability to continue to develop new competitive products. Although the Company is committed to the development of new products and the improvement of its existing product, there can be no assurance that these research and development activities will prove profitable, or that products or improvements resulting there from, if any, will be successfully produced and marketed. The investigative research technology industry is characterized by technological change, changes in user and customer requirements, new product introductions and new technologies and the emergence of new industry standards and practices that could render the Company's technology obsolete or have a negative impact on sales margins the Company's product may command. The Company's performance will depend, in part, on its ability to enhance its existing product, develop new proprietary technology that addresses the sophisticated and varied needs of its prospective customers and respond to technological advances and emerging industry standards and practices on a timely and cost-effective basis. The development of technology entails significant

technical and business risks. There can be no assurance that the Company will be successful in using new technologies effectively or adapting its product to customer requirements or emerging industry standards.

Strategic Alliances

The Company's growth and marketing strategies are based, in part, on seeking out and forming strategic alliances and working relationships. There can be no assurance that existing strategic alliances and working relationships will not be terminated or modified in the future, nor there any assurance that new relationships, if any, will afford the Company the same flexibility under which the Company currently operates.

Resolution of Product Deficiencies

Difficulties in product design, performance and reliability could result in lost revenue, delays in customer acceptance of the Company's products, and/or lawsuits, and would be detrimental, perhaps materially, to the Company's market reputation. Serious defects are frequently found during the period immediately following the introduction of new products or enhancements to existing products. Undetected errors or performance problems may be discovered in the future. Moreover, known errors which the Company considers minor may be considered serious by its customers. If the Company's internal quality assurance testing or customer testing reveals performance issues and/or desirable feature enhancements, the Company could postpone the development and release of updates or enhancements to its current product or the release of new products. The Company may not be able to successfully complete the development of planned or future products in a timely manner, or to adequately address product defects, which could harm the Company's business and prospects. In addition, product defects may expose the Company to liability claims, for which the Company may not have sufficient liability insurance. A successful suit against the Company could harm its business and financial condition.

Management of Growth

The Company may be subject to growth-related risks including capacity constraints and pressure on its internal systems and controls. The Company's ability to manage its growth effectively will require it to continue to implement and improve its operational and financial systems and to expand, train and manage its employee base.

The inability of the Company to deal with this growth could have a material adverse impact on its business, operations and prospects. While management believes that it will have made the necessary investments in infrastructure to process anticipated volume increases in the short term, the Company may experience growth in the number of its employees and the scope of its operating and financial systems, resulting in increased responsibilities for the Company's personnel, the hiring of additional personnel and, in general, higher levels of operating expenses. In order to manage its current operations and any future growth effectively, the Company will also need to continue to implement and improve its operational, financial and management information systems and to hire, train, motivate, manage and retain its employees. There can be no assurance that the Company will be able to manage such growth effectively, that its management, personnel or systems will be adequate to support the Company's operations or that the Company will be able to achieve the increased levels of revenue commensurate with the increased levels of operating expenses associated with this growth.

Negative Cash Flow and Absence of Profits

The Company has not earned any profits to date and there is no assurance that it will earn any profits in the future, or that profitability, if achieved, will be sustained. A significant portion of the Company's financial resources will continue to be directed to the development of its products and to marketing activities. The success of the Company will ultimately depend on its ability to generate revenues from its product sales, such that the business development and marketing activities may be financed by revenues from operations instead of external financing.

There is no assurance that future revenues will be sufficient to generate the required funds to continue such business development and marketing activities.

Conflicts of Interest

Certain proposed directors and officers of the Company may become associated with other reporting issuers or other Companies which may give rise to conflicts of interest. In accordance with the *Canada Business Corporations Act*, directors who have a material interest or any person who is a party to a material contract or a proposed material contract with the Company are required, subject to certain exceptions, to disclose that interest and generally abstain from voting on any resolution to approve the contract. In addition, the directors are required to act honestly and in good faith with a view to the best interests of the Company, as the case may be. Certain of the directors have either other employment or other business or time restrictions placed on them and accordingly, these directors will only be able to devote part of their time to the affairs of the Company.

No Key Man Insurance

The Company does not currently have key man insurance in place in respect of any of its senior officers or personnel.
