Six Months Ended November 30, 2016 and 2015

1. NATURE OF OPERATIONS AND GOING CONCERN

Metalla Royalty & Streaming Ltd. (formerly Excalibur Resources Ltd.), ("Metalla" or the "Company") was incorporated under the laws of Canada on May 11, 1983. Metalla is a precious metals royalty and streaming company, engaged in the acquisition and management of precious metal royalties, streams and similar production-based interests. Previously, the Company was focused on the discovery, development, mining and ore trading of economically viable precious and base metal resources.

The Company's head office and principal address are located at 8 King St East, Suite 1010, Toronto, Ontario, Canada, M5C 1B5. The Company is listed on The Canadian Securities Exchange.

The current financial equity market conditions and the low price of the Company's common shares make it difficult to raise funds by private placements of shares, making the success of any alternative financing ventures uncertain. This uncertainty, in conjunction with the Company's inability to generate cash from operations, casts significant doubt upon the Company's ability to continue as a going concern. In addition to obtaining funding through private placements, management is examining other strategic alternatives to address the uncertainties discussed above, including reorganizations, mergers, sales of assets, and other forms of debt and equity financing. There is no assurance that any of these endeavours will be successful.

These condensed consolidated interim financial statements do not reflect any adjustments to the carrying values and classification of assets, or the amounts of, and classification of liabilities that would be necessary if the going concern assumption was not appropriate. Such adjustments could be material.

2. SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of Consolidation

These condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned subsidiaries: Excalibur Resources (US) Inc., High Stream Corp. and Metalla SEZC.

2.2 Statement of Compliance

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard ("IAS") 34 - *Interim Financial Reporting* using the accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the IAS Board. These interim financial statements were authorized for issue by the Board of Directors on January 30, 2017.

The accounting policies applied in these condensed consolidated interim financial statements are based on IFRS policies issued and outstanding as of the date the Board of Directors approved the statements. The same accounting policies and methods of computation are followed in these unaudited condensed consolidated interim financial statements as those applied in note 2 of the Company's most recent annual consolidated financial statements for the year ended May 31, 2016 and have been consistently applied throughout all periods presented, as if these policies had always been in effect. Any subsequent changes to IFRS that are given effect in the Company's annual financial statements for the year ending May 31, 2017 could result in the restatement of these condensed consolidated interim financial statements.

Six Months Ended November 30, 2016 and 2015

2.3 Basis of Presentation

These condensed consolidated interim financial statements have been prepared on a historical cost basis using the accrual basis of accounting except for financial instruments classified as fair value through profit or loss ("FVTPL"), which are stated at their fair values. The accounting policies have been applied consistently throughout all periods presented in these condensed consolidated interim financial statements.

2.4 Use of Estimates and Judgments

The application of the Company's accounting policies in compliance with IFRS requires the Company's management to make certain judgments, estimates and assumptions about the future and to exercise judgment in applying the Company's accounting policies. Actual results could differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. The impacts of changes to estimates are recognized in the period estimates are revised and in future periods affected. The critical judgments and assumptions made by management are, (but not limited to) the following:

- i) the inputs used in accounting for valuation of warrants and options which are included in the condensed consolidated interim statement of financial position;
- ii) the inputs used in accounting for stock-based compensation expense in the condensed consolidated interim statement of loss;
- iii) the existence and estimated amount of contingencies (*note 15 Commitments and Contingencies*).

3. NEW ACCOUNTING STANDARDS AND INTERPRETATIONS

Changes in Accounting Policies

There were no new or revised IASB standards and interpretations adopted by the Company on January 1, 2017.

4. INVESTMENT

On September 1, 2016 the Company acquired High Stream Corp. ("High Stream"), a privately-held specialty royalty and streaming finance company. Terms of the acquisition included consideration of up to 10,000,000 Company shares, once certain performance goals are achieved. To date, the Company has issued a total of 3,000,000 Company shares towards the purchase. At the Annual General and Special Meeting of the Company held on November 22, 2016, the majority shareholder of High Stream, Brett Heath, became President and a Director of the Company.

5. ROYALTY INTERESTS

Metalla is a precious metals royalty and streaming company engaged in the acquisition and management of precious metal royalties, streams and similar production-based interests.

- a) On August 23, 2016, the Company acquired of a 2% Net Smelter Royalty ("NSR") on the Mirado mine project ("Mirado") located in Kirkland Lake, Ontario, from Orefinders Resources Inc. ("Orefinders"). A secured one-year loan of \$450,000 was provided in return for a financing bonus of \$180,000 plus 1,500,000 common shares of Orefinders', valued at \$90,000. In addition to the loan, the Company made an investment of \$50,000 in return for an unsecured royalty capped at a

maximum of \$105,000, payable out of Orefinders' profits from processing the stockpile, after paying all processing costs and repayment of the Loan. The acquisition proceeds will be used primarily as deposits on the trucking and milling contracts for the project.

The Company also acquired i) a 2% NSR with total proceeds to be capped at \$1,000,000 on certain revenues from Orefinders' potential future production, ii) the right to purchase a 1% NSR during the life of Mirado for an additional \$2,000,000 after Orefinders attains commercial production and iii) a right of first refusal to provide any future stream financing component to Orefinders on its possible future Phase Two production from expansion of the open pit once a PEA has been completed and provided the financing is on reasonable and competitive commercial terms consistent with industry standards. Orefinders may elect, at its option, to buy out 1% of the prior NSR for the sum of \$1,000,000.

Metalla is funding these investments through a one-year, \$500,000 loan (plus financing fees). See note 6 (b)(iv) *Other Loans* and note 8 *Warrants*.

b) On November 18, 2016, the Company acquired the following royalties:

i) 1% NSR granted by Goldcorp on the Hoyle Pond Extension Property:

The Hoyle Pond mine has been in production since 1985 and represents one of the highest grade mines in Ontario averaging a grade of over 14 grams per ton since 2011 on its portion of the extension property. Production over the last four years has averaged 150,000 – 160,000 ounces of gold (Au) annually. The NSR will cash flow once 500,000 ounces have been produced.

ii) an NSR of up to a 1.5% granted by Tahoe Resources on the West Timmins extension properties subject to a buyback of 0.75% for \$750,000:

The West Timmins mine is owned and operated by Tahoe Resources. Production in Timmins has averaged over 140,000 ounces of gold (Au) annually since 2014. The royalty will cash flow immediately once the company mines on the extension property.

iii) a 1.5% NSR assumed by Osisko Mining on the Desantis properties with a buyback of 0.5% for \$1 million. Osisko Mining recently purchased the property from Excellon Resources and is a historical producing operation that contains a historical resource.

Total consideration for these royalties includes \$6,000,000 cash and \$4,000,000 in shares of Metalla. To date the Company has delivered \$1,500,000 and \$1,000,000 in shares (10,000,000 pre-consolidated) shares. The balance of the purchase price will be paid upon production milestones being achieved by the operators of the mines.

6. SUBSCRIPTION RECEIPTS and OTHER LOANS

a) Subscription Receipts

On June 25, 2014 a shareholder advanced \$100,000 to the Company, for working capital, as part of a future private placement. On November 30, 2016 the shareholder converted this loan to equity shares as part of a private placement (see note 7 *Capital Stock*).

b) Other Loans

i) On September 12, 2014 a shareholder advanced \$50,000 to the Company as a one-year 12% bridge loan. During the six months ended November 30, 2016 and 2015, \$1,512 was recorded as interest expense. To November 30, 2016, a total of

\$13,299 (2015 – 7,299) has been recorded accrued as interest expense for this loan.

- ii) On November 6, 2014 a shareholder advanced US\$50,000 (\$57,500) to the Company in the form of a royalty note on production from San Pedro. No payments were made due to lack of production at San Pedro. On May 6, 2016, the shareholder converted the loan to 2,875,000 common shares as a subscriber to a private placement.
- iii) On April 16, 2015 a shareholder advanced US\$50,000 (\$65,000) to the Company as a 15% bridge loan. During the six months ended November 30, 2016, \$2,169 (2015 - \$2,295) was recorded as interest expense. As at November 30, 2016 a total of \$15,840 (2015 - \$7,299) has been accrued as interest expense, and \$12,663 remains unpaid.
- iv) On August 11, 2016, a shareholder advanced \$500,000 to the Company as a one-year, 15%, unsecured loan. Additional finance fees for the loan will include a \$250,000 cash payment, 1,000,000 Orefinders' shares and 2,500,000 (pre-consolidated) five-year warrants, and a fair value of \$150,656 was allocated to warrants expense and contributed surplus. (see *note 8 Warrants*). During the six months ended November 30, 2016, \$22,808 (2015 - \$nil) was accrued as interest expense.
- v) On August 30, 2016, a shareholder loaned \$50,000 to the Company for one month, which was repaid on September 30, 2016. This loan is non-interest bearing however the financing fee included 250,000 (pre-consolidated) five-year warrants and a fair value of \$12,033 was allocated to warrants expense and contributed surplus (see *note 8 Warrants*).

7. CAPITAL STOCK

Authorized: an unlimited number of common shares without par value

- i) On May 6, 2016 the Company completed a non-brokered private placement financing for cash and loan conversions totalling \$200,000, through the issuance of 10,000,000 common shares at \$0.02 per share.
- ii) On November 22, 2018 the shareholders of the Company approved a resolution to consolidate the Company's shares on the basis of one (1) new share for up to three (3) old shares.
- iii) On September 1, 2016 the Company acquired High Stream for consideration of up to 10,000,000 (pre-consolidated) Company shares, once certain performance goals are achieved. To date, the Company has issued a total of 3,000,000 (pre-consolidated) Company shares towards the purchase. See *note 4 Investment*.
- iv) On November 18, 2016, the Company acquired 100% of NSRs on certain properties located in Timmins, Ontario. Total consideration for the NSRs is \$6,000,000 and \$4,000,000 in Metalla shares. To date, the first milestone of \$1,500,000 cash and \$1,000,000 in shares (10,000,000 pre-consolidated shares) required to close the transaction, have been delivered. See *note 5 (b) Royalty Interests*.

(In Canadian dollars)

Six Months Ended November 30, 2016 and 2015

- v) On November 30, 2016 the Company completed a private placement financing for 23,717,900 Units (pre-consolidated), each unit consisting of one common share and one half of one common share purchase warrant. Each full warrant is exercisable to acquire one common share at \$0.15 (\$0.45 post-consolidated) for a period of two years. Total consideration of \$2,371,790 for the private placement included: \$2,253,235 cash, the conversion of a \$100,000 short-term loan and \$13,500 project evaluation services which were rendered in exchange for 45,000 Units. Finder's fees of \$5,055 were paid and the Company issued 144,500 (pre-consolidated) warrants in connection with this financing. The warrants were assigned a fair value of \$511,387 using the relative fair value method. Under this method this fair value was allocated to the warrants based on the estimated value of the warrants using the Black-Scholes option pricing model, as a percentage of this Black-Scholes value plus the value of the common stocks based on the market closing price on November 30, 2016. The original Black-Scholes option pricing model used the following assumptions: share price \$0.10 (pre-consolidated), forfeiture rate 0%, dividend yield 0%, expected volatility 100%, a risk-free interest rate of 0.70% and an expected life of 2 years.

Issued and outstanding common shares at November, 2015 and 2016:

	Number of Shares	Value
Balance - May 31, and November 30, 2015	82,924,831	\$16,719,348

8. WARRANTS

- i) From May 31, 2015 to May 31, 2016, there were no warrants issued and a total of 4,500,000 warrants expired, unexercised.
- ii) On August 11, 2016, the Company issued 2,500,000 warrants to a shareholder who loaned the Company \$500,000 in the form of an unsecured, one-year loan. See note 6(b(iv)) Other Loans.

Using a Black Scholes pricing model, the assumptions used to calculate the fair value of these warrants were:

Share price (pre-consolidation)	\$0.09
Strike price (pre-consolidation)	\$0.15
Risk-free interest rate	0.66%
Expected life (years)	5
Expected volatility	100%

- iii) On August 30, 2016, the Company issued 250,000 (pre-consolidated) warrants to a shareholder who loaned the Company \$50,000, in the form of a one month short-term note payable. See note 5(b)(v) *Other Loans*.

Using a Black Scholes pricing model, the assumptions used to calculate the fair value of these warrants were:

Share price (pre-consolidation)	\$0.08
Strike price (pre-consolidation)	\$0.15
Risk-free interest rate	0.60%
Expected life (years)	5
Expected volatility	100%
Expected dividend yield	Nil
Fair value of warrants	12,033

- iv) On September 19, 2016, the Company issued 1,000,000 (pre-consolidated) warrants to a shareholder who advanced the Company \$200,000 as the lead order for the private placement (November 30).

Using a Black Scholes pricing model, the assumptions used to calculate the fair value of these warrants were:

Share price (pre-consolidation)	\$0.10
Strike price (pre-consolidation)	\$0.15
Risk-free interest rate	0.60%
Expected life (years)	5
Expected volatility	100%
Expected dividend yield	Nil
Fair value of warrants	100,000

- v) On November 30, 2016, the Company completed a private placement for 23,717,900 units which included 11,791,450 warrants, exercisable for two years at an exercise price of \$0.15 (\$0.45 post-consolidation). Further, in connection with the same private placement, the Company issued an additional 144,500 warrants as finder's fees on the same terms as the private placement warrants.

Using a Black Scholes pricing model, the assumptions used to calculate the fair value of these warrants were:

Share price	\$0.30
Strike price	\$0.45
Risk-free interest rate	0.70%
Expected life (years)	2
Expected volatility	100%
Expected dividend yield	Nil
Fair value of warrants	511,387

The weighted average contractual life remaining for stock options at November 30, 2016 is 4.19 years (2015 – 2.38 years).

The above options were not included in the computation of diluted net loss per share as they are anti-dilutive.

Option-pricing models require the use of highly subjective estimates and assumptions including the expected stock price volatility. Volatility is based on the historical volatility of comparable companies. Changes in the underlying assumptions described in note 8 can materially affect the fair value estimates.

The Company has valued the options granted to non-employees based on the fair value of the equity instruments granted in the absence of a reliable estimate of the fair value of the goods and services received.

10. EXPLORATION and EVALUATION EXPENSE

Historically, the Company was focused on the discovery, development, mining and ore trading of economically viable precious and base metal resources.

The Compensation cost for key management personnel during the six months ended November 30, 2016 and 2015 is as follows:

	2016	2015
	\$	\$
Management consulting fees	124,088	64,000
Stock-based compensation	383,028	-
	507,116	64,000

13. CAPITAL DISCLOSURES

The Company's objective when managing capital is to maintain its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders.

The Company includes equity, comprised of issued capital stock, warrants, contributed surplus and deficit, in the definition of capital.

The Company's primary objective with respect to its capital management is to ensure that it has sufficient cash resources to fund the acquisition and management of precious metal royalties, streams and similar production-based interests. To secure the additional capital necessary to pursue these plans, the Company will attempt to raise additional funds through the issuance of equity and warrants, debt or by securing strategic partners.

The Company is not subject to externally imposed capital requirements and there has been no change with respect to the overall capital risk management strategy during the six months ended November 30, 2016.

14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company may be exposed to a variety of financial risks by virtue of its activities, in particular: interest rate risk, credit risk, commodity price risk, currency risk and liquidity risk. The overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on financial performance.

Risk management is carried out by Management under policies approved by the Board of Directors. Management is charged with the responsibility of establishing controls and procedures to ensure that financial risks are mitigated in accordance with the approved policies.

(a) Interest Rate Risk

Interest rate risk is the risk that the future cash flows or fair value of a financial instrument will fluctuate because of changes in market interest rates. Financial assets and financial liabilities with variable interest rates expose the Company to cash flow interest rate risk. The Company's cash earns interest at market rates. The Company's other loans payable incur interest at fixed rates. The Company does not use derivative instruments to reduce its exposure to interest rate risk.

(b) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they fall due. The Company manages its liquidity risk by forecasting cash flows from operations and anticipated investing and financing activities. Senior Management is also actively involved in the review and approval of planned expenditures.

At November 30, 2016, the Company had \$553,761 (May 31, 2016 - \$4,101) of cash to settle current trade and other payables of \$765,416 (May 31, 2016 - \$296,837). These liabilities are short-term and due within 12 months. Certain loans are interest bearing – See *note 6 Subscription Receipts and Other Loans*. These trade payables and loans have been used as working capital.

Historically the Company has relied on equity financings, loans and ore sales to fund its activities. Management's current budgeting also includes additional sources of financing including cash flows from royalty and streaming investments, potential stock options exercises and debt financing.

Metalla's future success is highly dependent on viable production results of potential royalty and streaming partners and securing adequate financing through the above-mentioned sources, to advance its projects and meet its ongoing obligations.

(c) Credit Risk

The Company is not exposed to any credit risks attributable to customers and does not engage in any significant revenue activities. The Company's cash is held in a major Canadian financial institution.

(d) Commodity Price Risk

The future profitability of the Company is directly related to the market price of gold, silver and copper.

(e) Currency Risk

Currency risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will fluctuate because of changes in foreign exchange rates. The Company's functional currency is the Canadian dollar. The Company has funded in the past, and may fund in the future, certain operations, including corporate and administrative expenses in US dollars or other foreign currencies. The Company has been subject to gains and losses due to fluctuations in certain foreign currencies including US dollars and Mexican pesos against the Canadian dollar. Management believes the sensitivity of fluctuations in foreign currencies to be immaterial to the net loss.

(f) Fair Value

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision.

Changes in assumptions could significantly affect estimates.

The carrying values of cash, sundry receivables and trade and other payables and certain loans approximate fair values due to the relatively short-term maturities of these instruments.
