Management's Discussion and Analysis or Plan of Operation.

A. Plan of Operation. The Company is attempting to grow in the medical equipment diagnostic and biotech space and execute its business plan. For the twelve months ended December 31, 2017 and 2016, we had no revenues, and incurred a net losses of \$138,894 and \$5,767 for the twelve months ended December 31, 2017 and 2016, respectively. We have an accumulated deficit since inception of \$10,330,572

For the foreseeable future, our operating plan is dependent upon both the ability to conserve existing cash resources and the ability to obtain additional capital through equity financing and/or debt financing in an effort to provide the necessary funds and cash flow to meet our obligations on a timely basis and to operate our business in an efficient and economical manner. In the event that we are unable to conserve existing cash resources and/or obtain the additional and necessary capital, the Company may have to cease or significantly curtail our operations. This could materially impact the Company's ability to continue as a going concern for a reasonable period of time.

Liquidity and Capital Resources

As of December 31, 2017, we had cash of \$40,583 and working capital of \$37,349. This compares to cash of \$-0- and a working capital deficit of \$9,183 at December 31, 2016.

Based on anticipated operating and administrative expenses, the Company will not have sufficient cash resources to finance its operations except for several months unless we are able to raise additional equity financing and/or debt financing in the immediate future. We have commenced, and will continue to pursue, efforts to raise additional equity financing and/or debt financing from a variety of sources and means. There are no assurances that we will be able to obtain any additional financing and, even if obtained, that such financing will be in a sufficient amount to be able to continue operations for a sufficient period until the Company is able to generate sufficient revenues and become profitable.

Basis of Presentation

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States of America.

Use of Estimates

In preparing financial statements, management makes estimates and assumptions that affect the reported amounts of assets and liabilities in the balance sheet and revenue and expenses in the statement of expenses. Actual results could differ from those estimates.

Cash and Cash Equivalents

For purposes of the statement of cash flows, the Company considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

Related parties

The Company follows subtopic 850-10 of the FASB Accounting Standards Codification for the identification of related parties and disclosure of related party transactions.

Pursuant to Section 850-10-20 the Related parties include a) affiliates of the Company; b) Entities for which investments in their equity securities would be required, absent the election of the fair value option under the Fair Value Option Subsection of Section 825-10-15, to be accounted for by the equity method by the investing entity; c) trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management; d) principal owners of the Company; e) management of the Company; f) other parties with which the Company may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests; and g) Other parties that can significantly influence the management or operating policies of the transacting parties or that have an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests.

Commitments and contingencies

The Company follows subtopic 450-20 of the FASB Accounting Standards Codification to report accounting for contingencies. Certain conditions may exist as of the date the consolidated financial statements are issued, which may result in a loss to the Company but which will only be resolved when one or more future events occur or fail to occur. The Company assesses such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against the Company or unasserted claims that may result in such proceedings, the Company evaluates the perceived merits of any legal proceedings or unasserted claims as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company's consolidated financial statements. If the assessment indicates that a potential material loss contingency is not probable but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, and an estimate of the range of possible losses, if determinable and material, would be disclosed.

Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case the guarantees would be disclosed. Management does not believe, based upon information available at this time, that these matters will have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows. However, there is no assurance that such matters will not materially and adversely affect the Company's business, financial position, and results of operations or cash flows.

Revenue recognition

The Company follows paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company will recognize revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the product has been shipped or the services have been rendered to the customer, (iii) the sales price is fixed or determinable, and (iv) collectability is reasonably assured.

Concentrations of Risk

Cash and cash equivalents deposited with financial institutions are insured by the Federal Deposit Insurance Corporation ("FDIC"). The Company did not hold cash in excess of FDIC insurance coverage at a financial institution as of December 31, 2017 and 2016.

Property and equipment

Property and equipment is recorded at cost and depreciated on the straight-line method over the estimated useful lives. Expenditures for normal repairs and maintenance are charged to expense as incurred. The cost and related accumulated depreciation of assets sold or otherwise disposed of are removed from the accounts, and any gain or loss is included in operations.

Derivative Financial Instruments

The Company does not use derivative instruments to hedge exposures to cash flow, market, or foreign currency risks. The Company evaluates all of its financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. For derivative financial instruments that are accounted for as liabilities, the derivative instrument is initially recorded at its fair value and is then re-valued at each reporting date, with changes in the fair value reported as charges or credits to income. For option-based derivative financial instruments, The Company uses the Black-Scholes option-pricing model to value the derivative instruments at inception and subsequent valuation dates. The classification of derivative instruments, including whether such instruments should be recorded as liabilities or as equity, is re-assessed at the end of each reporting period. Derivative instrument liabilities are classified in the balance sheet as current or non-current based on whether or not net-cash settlement of the derivative instrument could be required within 12 months of the balance sheet date.

Fair Value Measurements

In September 2006, the FASB issued ASC 820 which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The provisions of ASC 820 were effective January 1, 2008.

As defined in ASC 820, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). The Company utilizes market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable. The Company classifies fair value balances based on the observations of those inputs. ASC 820 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurement).

The three levels of the fair value hierarchy defined by ASC 820 are as follows:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. Level 1 primarily consists of financial instruments such as exchange-traded derivatives, marketable securities and listed equities.

Level 2 – Pricing inputs are other than quoted prices in active markets included in level 1, which are either directly or indirectly observable as of the reported date. Level 2 includes those financial instruments that are valued using models or other valuation methodologies. These models are primarily industry-standard models that consider various assumptions, including quoted forward prices for commodities, time value, volatility factors, and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Substantially all of these assumptions are observable in the marketplace throughout the full term of the instrument, can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace. Instruments in this category generally include non-exchange-traded derivatives such as commodity swaps, interest rate swaps, options and collars.

Level 3 – Pricing inputs include significant inputs that are generally less observable from objective sources. These inputs may be used with internally developed methodologies that result in management's best estimate of fair value.

Income Tax Provisions

The Company follows Section 740-10-30 of the FASB Accounting Standards Codification, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the fiscal year in which the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the fiscal years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the Statements of Income and Comprehensive Income in the period that includes the enactment date.

The Company adopted section 740-10-25 of the FASB Accounting Standards Codification (“Section 740-10-25”) with regards to uncertainty income taxes. Section 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under Section 740-10-25, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Section 740-10-25 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures.

Net income (loss) per common share

Net income (loss) per common share is computed pursuant to section 260-10-45 of the FASB Accounting Standards Codification. Basic net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. Diluted net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock and potentially outstanding shares of common stock during the period. The weighted average number of common shares outstanding and potentially outstanding common shares assumes that the Company incorporated as of the beginning of the first period presented.

There were no potentially dilutive shares outstanding for the twelve months ended December 31, 2017 and 2016.

Cash flows reporting

The Company adopted paragraph 230-10-45-24 of the FASB Accounting Standards Codification for cash flows reporting, classifies cash receipts and payments according to whether they stem from operating, investing, or financing activities and provides definitions of each category, and uses the indirect or reconciliation method (“Indirect method”) as defined by paragraph 230-10-45-25 of the FASB Accounting Standards Codification to report net cash flow from operating activities by adjusting net income to reconcile it to net cash flow from operating activities by removing the effects of (a) all deferrals of past operating cash receipts and payments and all accruals of expected future operating cash receipts and payments and (b) all items that are included in net income that do not affect operating cash receipts and payments. The Company reports the reporting currency equivalent of foreign currency cash flows, using the current exchange rate at the time of the cash flows and the effect of exchange rate changes on cash held in foreign currencies is reported as a separate item in the reconciliation of beginning and ending balances of cash and cash equivalents and separately provides information about investing and financing activities not resulting in cash receipts or payments in the period pursuant to paragraph 830-230-45-1 of the FASB Accounting Standards Codification.

Stock Compensation

The Company follows Financial Accounting Standard No. 123R (ASC 718), “Share-Based Payment” as interpreted by SEC Staff Accounting Bulletin No. 107 for financial accounting and reporting standards for stock-based employee compensation plans. It defines a fair value based method of accounting for an employee stock option or similar equity instrument.

The Company uses the Black-Scholes option valuation model for estimating the fair value of traded options. This option valuation model requires the input of highly subjective assumptions including the expected stock price volatility. There were no options outstanding for the twelve months ended December 31, 2017 and 2016.

The Company recorded stock-based compensation was \$75,000 and \$-0- for the twelve months ended December 31, 2017 and 2016, respectively.

NOTE 2 - GOING CONCERN

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern, which contemplates continuity of operations, realization of assets, and liquidation of liabilities in the normal course of business.

As reflected in the accompanying financial statements, the Company had an accumulated deficit at December 31, 2017 of \$10,330,572. This factor among others raise substantial doubt about the Company's ability to continue as a going concern.

While the Company is attempting to commence operations and generate revenues, the Company's cash position may not be significant enough to support the Company's daily operations. Management intends to raise additional funds by way of a public or private offering. Management believes that the actions presently being taken to further implement its business plan and generate revenues provide the opportunity for the Company to continue as a going concern. While the Company believes in the viability of its strategy to generate revenues and in its ability to raise additional funds, there can be no assurances to that effect. The ability of the Company to continue as a going concern is dependent upon the Company's ability to further implement its business plan and generate revenues.

The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

The consolidated financial statements do not contain any adjustments to reflect the possible future effects on the classification of assets or the amounts and classification of liability that may result should the Company be unable to continue as a going concern.

NOTE 3 - PROVISION FOR INCOME TAXES

Deferred income taxes are determined using the liability method for the temporary differences between the financial reporting basis and income tax basis of the Company's assets and liabilities. Deferred income taxes are measured based on the tax rates expected to be in effect when the temporary differences are included in the Company's tax return. Deferred tax assets and liabilities are recognized based on anticipated future tax consequences attributable to differences between financial statement carrying amounts of assets and liabilities and their respective tax bases.

The provision for refundable federal income tax consists of the following for the 12 months ending:

	December 31, 2017	December 31, 2016
Federal income tax benefit attributable to:		
Net operating loss	\$ 47,224	\$ 1,961
Less, valuation allowance	(47,224)	(1,961)
Net benefit	<u>\$ -</u>	<u>\$ -</u>

The cumulative tax effect at the expected rate of 34% on the net deferred tax amount is as follows:

	June 30, 2017	June 30, 2016
Deferred tax attributed:		
Deferred tax benefits	\$ 3,512,394	\$ 3,465,171
Less valuation allowance	(3,512,394)	(3,465,171)
Net Deferred Tax Asset	<u>\$ -</u>	<u>\$ -</u>

At December 31, 2017 and 2016, the Company had a net operating loss ("NOL's") carry forward in the amount of \$10,330,572 and \$10,191,678, respectively, available to offset future taxable income. The Company established valuation allowances equal to the full amount of the deferred tax assets due to the uncertainty of the utilization of the operating losses in future periods. The Company has not filed its federal tax returns since inception and therefore, the NOL's will not be available to offset future taxable income until the tax returns are filed with the respective federal tax authorities.

A reconciliation of the Company's effective tax rate as a percentage of income before taxes and federal statutory rate for the periods ended December 31, 2017 and 2016 is summarized below.

	<u>2017</u>	<u>2016</u>
Federal statutory rate	(34.0)%	(34.0)%
State income taxes, net of federal benefits	0.0	0.0
Valuation allowance	34.0%	34.0%

NOTE 4 – CONVERTIBLE NOTES PAYABLE

On March 1, 2016, the Company executed and delivered a \$3,850 Convertible Promissory Note to a vendor for past due services performed for the Company. The Convertible Note is non-interest bearing until March 1, 2017. After March 1, 2017, the note accrues interest at 5% at which time all principal shall be due and payable in full. The Convertible Note is convertible by the holder, at their election, into a mutually agreed upon number of shares of the Company's common stock. This Convertible Promissory Note was paid in full on January 24, 2017.

On June 29, 2017, the Company signed a Convertible Promissory Note (the Note) in connection with a long term loan received from a related party controlled by the Company's CEO (Holder) for a total of One Hundred Thousand and 00/100 Dollars (\$100,000.00). The Note is payable together with interest thereon at the rate of five percent (5%) per annum on the unpaid balance.

1. Maturity Date; Interest Payments.

All outstanding principal together with interest on the Note shall be due June 29, 2022 ("Maturity Date"). The Company shall make quarterly interest payments of Five Hundred Dollars (\$500.00), commencing August 1, 2017, and continuing on the first calendar day of each succeeding three months during the term of the Note or until paid in full, provided, however, that the first interest payment hereunder shall also include any unpaid interest between the date of the Note and June 29, 2022. As of December 31, 2017, none of the interest has been paid.

2. Conversion of Principal and Interest Owed.

Optional Conversion into Common Stock. Either of the Holder or the Company, each in its sole discretion and election, may convert any part or all of the outstanding principal and/or interest on this Note into shares of common stock of the Company obtained by dividing (i) any amount of part or all of the outstanding principal and/or interest on the Note, by (ii) the 10-day VWAP of Company common stock prior to the date of conversion; provided, however, that the price of conversion shall not be less than \$0.000001 per share. The Company follows the guidance of ASC Subtopic 470-20 Debt with Conversion and Other Options to evaluate as to whether beneficial conversion feature exists. The Management concluded that the issuance of the convertible notes did not contain a beneficial conversion feature. The unpaid balance and accrued interest was \$102,534 at December 31, 2017.

NOTE 5 – EQUITY TRANSACTIONS

Shares Authorized and Activity

The Company was established with two classes of stock, common stock – 90,000,000 shares authorized at a par value of \$0.001 and preferred stock 10,000,000 shares authorized at a par value of \$0.001. At December 31, 2017, the Company has issued 88,754,205 shares of Common Stock and -0- shares of preferred stock.

On March 8, 2017, the Company issued 70,000,000 unregistered shares of the Company's common stock to the former president of the Company for services performed for the Company. The shares were valued at \$75,000 or \$0.0011 per share.

Additional Paid-in Capital

For the reporting period ended December 31, 2017 and 2016, respectively, the majority stockholder of the Company contributed \$10,163 and -0- as capital to the Company.

NOTE 6 – RELATED PARTY TRANSACTIONS

Free Office Space

The Company has been provided office space by its majority stockholder and chief executive officer at no cost. The management determined that such cost is nominal and did not recognize the rent expense in its financial statements.

NOTE 7 – SUBSEQUENT EVENTS

On January 25, 2018, the following individuals were appointed to the Company. Zhi Cao was appointed Chief Executive Officer, President and a Director. Zhujun Coa, was appointed Chief Financial Officer and Treasurer. Jianhao Li was appointed Secretary. In addition, Shawn Mesaros resigned as the Company's CEO, COO, President, Treasurer, Secretary and Director.
