ML Capital Group, Inc.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1 – ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization

ML Capital Group, Inc. (the “Company”) was incorporated in the State of Nevada on September 22, 2009.

The Company’s business consists of providing consulting services to both public and private companies, concentrating primarily on early stage companies, small businesses and emerging growth companies. The Company has embarked upon an expansion into developing products and services that are focused on the electronic cigarettes (e-cigs) industry. The Company further diversified to a global holdings company focusing on acquisitions in luxury travel, leisure and lifestyle industries. MLCG’s business model looks to identify under-valued “brick and mortar” luxury tour operators to be acquired, re-branded and integrated within the Company’s luxury tourism portfolio.

In April 2015, the Company’s board of directors approved a 1 for 4,000 reverse stock split. The number of shares of common stock has been adjusted to reflect the split for all periods presented.

Significant Accounting Policies

Basis of presentation and consolidation

The consolidated financial statements include the accounts of the company and wholly owned subsidiary. All inter-company balances and transactions are eliminated in consolidation.

The Company has adopted Accounting Standards Update No. 2014-10, Development Stage Entities (Topic 915): Elimination of Certain Financial Reporting Requirements. The adoption of this ASU allows the Company to remove the inception to date information and all references to development stage.

Going concern

As reflected in the accompanying financial statements, the Company had a net Income of (\$474,040) and net cash provided by operating activities of (\$354,050) for the twelve months ended December 31, 2017. However, the net income is a result of the change in the derivative liability and the net cash provided by operations is not adequate to continue operations. The Company has total assets of \$122,567 and an accumulated deficit of \$12,902,471 as of September 30, 2017. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The ability of the Company to continue as a going concern is dependent on the Company’s ability to further implement its business plan, raise additional capital, and generate continue as a going concern. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

Revenue recognition

Pursuant to the guidance of ASC Topic 605 and ASC Topic 360, the Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the purchase price is fixed or determinable and collectability is reasonably assured. The company recognizes revenue from product sales during the period in which the product is delivered, which is generally at the at the point of sale.

Inventories

Inventories are stated at the lower of cost of market using the first-in; first-out (FIFO) cost method of accounting.

Use of estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities,

revenues, expenses, and the related disclosures at the date of the financial statements and during the reporting period. Actual results could materially differ from these estimates. Significant estimates in the 2016 and 2015 periods include the valuation of stock-based compensation and derivative liabilities.

Cash and cash equivalents

For purposes of the statement of cash flows, the Company considers all highly liquid instruments purchased with a maturity of three months or less and money market accounts to be cash equivalents.

Fixed assets

Fixed Assets are stated at historical cost less depreciation. Cost of acquisition is inclusive of taxes, duties, freight, installation and allocated incidental expenditure during construction/ acquisition.

Fair value financial instruments

The carrying amounts reported in the balance sheets for accounts payable, accrued expenses and amounts due to related party approximate their fair value based on the short-term maturity of these instruments. The fair value of the Company's derivative liabilities was determined based on the estimated intrinsic value of the embedded conversion feature which approximates fair value due to the terms of conversion and a modified Black Scholes method incorporating Monte Carlo simulation.

The Company measures its financial and non-financial assets and liabilities, as well as makes related disclosures, in accordance with ASC Topic 820, *Fair Value Measurements and Disclosures* ("ASC Topic 820").

ASC Topic 820 provides guidance with respect to valuation techniques to be utilized in the determination of fair value of assets and liabilities. Approaches include, (i) the market approach (comparable market prices), (ii) the income approach (present value of future income or cash flow), and (iii) the cost approach (cost to replace the service capacity of an asset or replacement cost). ASC Topic 820 utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into six broad levels. The following is a brief description of those six levels:

Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs in which little or no market data exists, therefore developed using estimates and assumptions developed by us, which reflect those that a market participant would use.

The Company adjusts the derivative liability resulting from the embedded conversion option on its convertible debt to fair value at each balance sheet date. The fair value of the derivate liability is estimated using level 3 inputs. The following tables summarize our financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2017:

	Balance at Dec 31, 2017	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Fair value of derivative liability for embedded conversion options	\$ -	\$ —	\$ —	-

Stock-based compensation

The Company accounts for stock-based instruments issued to employees in accordance with ASC Topic 718. ASC Topic 718 requires companies to recognize in the statement of operations the grant-date fair value of stock options and other equity-based compensation issued to employees. The Company accounts for non-employee share-based awards in accordance with ASC Topic 505-50.

Net loss per share of common stock

Basic net loss per common share is computed by dividing net loss available to common shareholders by the weighted average number of shares of common stock outstanding during the period. Diluted net loss per common share is computed by dividing net loss by the weighted average number of shares of common stock, common stock equivalents and potentially dilutive securities outstanding during each period.

Recent accounting pronouncements

Accounting standards that have been issued or proposed by FASB that do not require adoption until a future date are not expected to have a material impact on the financial statements upon adoption.

NOTE 2 – RELATED PARTY TRANSACTIONS

The Company's president from time to time, provides advances to the Company for working capital purposes. These advances were due on demand, non-interest bearing and included in due to related party on the accompanying balance sheets. At December 31, 2017, there are no significant related party advances outstanding.

NOTE 3 – CONVERTIBLE NOTES PAYABLE

On June 7, 2012, the Company entered into a convertible promissory note agreement with Morgan Wells Inc. Pursuant to the convertible promissory note agreement, the Company issued a note in the principal amount of \$5,000. The note bears interest at the rate of 8% per annum and matured on December 7, 2012. The note is convertible into common stock at 75% of the lowest closing market price for the Company's stock during the previous 20 trading days. In March 2016, \$2,000 of the principal was converted into 26,666,666 shares of common stock.

On February 28, 2014 the Company issued a convertible promissory note in the principal amount of \$30,000. The note bears interest at the rate of 8% per annum and matured February 28, 2015. The note is convertible into shares of the Company's common stock at 50% of the average of the lowest 2 trading prices during the 10 trading days immediately preceding the conversion date. The embedded conversion feature is required to be recorded as a derivative liability adjusted to fair value at each reporting date. The Company recorded an initial derivative liability of \$32,400 debt discount of \$30,000 and derivative expense of \$2,400. The debt discount of \$30,000 was amortized into interest expense over the term of the note.

On April 1, 2014 the Company entered into a note agreement whereby the Company issued a note payable with a principal amount of \$600,000 plus prepaid interest of \$60,000 and prepaid legal fees of \$5,000 for an aggregate amount of \$665,000. Additional interest of 8% on the outstanding balance is also incurred. The current holder shall have the right from time to time to convert all or any part of the outstanding and unpaid principal amount of this note into fully paid and non-assessable shares of common stock. The note matured on April 1, 2015 and is convertible, at the note holder's option, into common shares of the Company after 90 days at the lower of \$.0074 or 40% of the average closing price 20 days prior to conversion. The Company is to receive principal from the note of \$50,000 per month starting in April 2014 and for 11 months thereafter, for a total of \$600,000 of which \$350,000 was received during the year ended December 31, 2014. In addition, the Company has issued warrants to the note holder which vest in equal amounts, over the 12-month period. The note holder may purchase up to 2,771 shares of the Company's common stock at \$240 per share per warrant or convert the warrants to common stock on a formula as cashless warrants.

Because of the variable conversion option contained in the convertible note and the ratchet provision included in the warrant, the Company recorded derivative liabilities totaling \$1,706,747 upon issuance of the note, offset by a discount equal to the face value of the funded portion of the notes, which became convertible during the year ended December 31, 2014, or \$370,000, and initial derivative expense of \$1,536,747. During the three months ended March 31, 2015, the Company received an additional \$25,000 in financing from this note. NOTE 5 – LEASE

The Company leases approximately 500 sq/ft of office space on a month to month basis at a cost of \$400 per month.

NOTE 6 – INCOME TAXES

The Company has incurred aggregate net operating losses in excess of \$12,000,000 including over \$8,000,000 of stock compensation. The net operating loss carries forward for United States income taxes, which may be available to reduce future years' taxable income. These carryforwards will expire, if not utilized, starting in 2030. Management believes that the realization of the benefits from these losses appears more than likely due to the Company's limited operating history and continuing losses for United States income tax purposes. Accordingly, the Company has provided a 100% valuation allowance on the deferred tax asset to reduce the

asset to zero. Management will review this valuation allowance periodically and make adjustments as necessary.
