

Alternative Reporting Standard: Disclosure Guidelines for the OTCID Basic Market

Federal and state securities laws require issuers to provide *current information* to the public markets. With a view to facilitating compliance with these laws, OTC Markets Group has created these OTCID Disclosure Guidelines (“Guidelines”)¹ that set forth the disclosure obligations that make up the “Alternative Reporting Standard” for companies on the OTCID™ Basic Market and Pink Limited Market. Companies that do not make disclosure directly to the SEC (via EDGAR), a banking regulator, or a non-U.S. regulatory authority may provide disclosure under our “Alternative Reporting Standard.” We use information provided by companies under these Guidelines and in accordance with the OTCID Rules to determine eligibility for the OTCID Market or Pink Limited Market as applicable.²

¹ These Guidelines have been designed to encompass the “current information” requirements under state and federal securities laws, such as Rules 10b-5 and 15c2-11 of the Securities Exchange Act of 1934 (“Exchange Act”) as well as Rule 144 of the Securities Act of 1933 (“Securities Act”), and state Blue Sky laws. However, these Guidelines have not been reviewed by the U.S. Securities and Exchange Commission or any state securities regulator. These Guidelines do not constitute legal advice, and OTC Markets Group makes no assurance that compliance with our disclosure requirements will satisfy any legal requirements. These Guidelines may be amended from time to time, in the sole and absolute discretion of OTC Markets Group, with or without notice.

² OTC Markets Group may require companies with securities designated as “Caveat Emptor” or other compliance flags to make additional disclosures to qualify for the OTCID Basic Market.

Other OTCID Eligibility Requirements:

To remain on the OTCID Market, companies must continue to meet all other eligibility requirements of the [OTCID Rules](#) in addition to the disclosure requirements listed above.

On July 25, 2021, the Company entered into a Memorandum of Understanding ("MOU") to acquire all the assets and cannabis operations (includes 12 acres property, structure and cannabis licenses, and existing sales channels and distribution networks) from a private company situated in Northern California. Notes to the Condensed Consolidated Financial Statements

June 30, 2025

(Expressed in U.S. dollars)

(Unaudited)

1. Nature of Business and Continuance of Operations

Pharmagreen Biotech Inc. (“the Company”) was incorporated under the laws of the State of Nevada, U.S. on November 26, 2007, under the name Azure International, Inc. On October 30, 2008, and effective as of the same date, the Company filed Articles of Merger (“Articles”) with the Secretary of State of the State of Nevada, to effect a merger by and between Air Transport Group Holdings, Inc., a Nevada corporation and Azure International, Inc. As a result of the merger, the Company changed its name to Air Transport Group Holdings, Inc. The Company was previously in the business of providing technical advisory and appraisals to the aircraft and aviation business as well as providing sourcing for aircraft leases and parts. Pursuant to a Share Exchange Agreement with WFS Pharmagreen Inc. (“WFS”) on May 2, 2018, the Company changed its name to Pharmagreen Biotech Inc. and changed its principal business to the production of starter plantlets for the North American high CBD hemp and medical cannabis industries through the application of the proprietary plant tissue culture in vitro process called “Chibafreen”. This proprietary process will produce plantlets that will be genetically identical and free of pests and disease free with consistent and certifiable constituent properties. In 2022, the cannabis market in California and other states entered into a regression stage with the prices of the sun grown raw materials dropping below production costs including diminished demand for the sun grown material. Focusing on immediate revenues since Q2 2023, the Company has transitioned into a nutraceutical company formulating products from blends of therapeutic plants and fungi for sale.

Going Concern

These condensed consolidated financial statements have been prepared on the going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at June 30, 2025, the Company has earned insignificant revenues from operations, has a working capital deficit of \$2,571,646, and has an accumulated deficit of \$13,603,374. During the nine months ended June 30, 2025, the Company had cash outflows for operations of \$20,067. Furthermore, the Company has defaulted on its convertible notes. These factors raise substantial doubt upon the Company’s ability to continue as a going concern. These condensed consolidated financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

2. Significant Accounting Policies

(a) Interim Financial Statements

These unaudited condensed consolidated financial statements as of and for the nine months ended June 30, 2025, have been prepared in accordance with generally accepted accounting principles in the United States of America (“US GAAP”) and the interim reporting rules of the Securities and Exchange Commission (“SEC”). These condensed consolidated financial statements have been prepared on the same basis as the annual consolidated financial statements and in the opinion of management, reflect all adjustments, which include only normal recurring adjustments, necessary to present fairly the Company’s financial position, results of operations and cash flows for the periods shown. The results of operations for such periods are not necessarily indicative of the results expected for a full year or for any future period.

(b) Basis of Presentation

The accompanying condensed consolidated financial statements have been prepared in accordance with US GAAP and are expressed in U.S. dollars. These consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, WFS Pharmagreen Inc. (“WFS”), and its 89.7% owned subsidiary 1155097 BC Ltd. (“115BC”), companies incorporated in British Columbia, Canada. All inter-company accounts and transactions have been eliminated. The Company’s fiscal year-end is September 30.

2. Significant Accounting Policies (continued)

(c) Use of Estimates and Judgments

The preparation of these condensed consolidated financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company regularly evaluates estimates and assumptions related to the equity component of convertible notes, fair value of derivative liabilities, fair value of stock-based payments, and deferred income tax asset valuation allowances. The Company bases its estimates and assumptions on current facts, historical experience, and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by the Company may differ materially and adversely from the Company's estimates. To the extent there are material differences between the estimates and the actual results, future results of operations will be affected.

The Company applies judgment in the application of the going concern assumption which requires management to take into account all available information about the future, which is at least, but not limited to 12 months from the end of the reporting period.

(d) Derivative Liabilities

The Company reviews the terms of convertible debt issuances to determine whether there are embedded derivative instruments, including embedded conversion options, which are required to be bifurcated and accounted for separately as derivative financial instruments. In circumstances where the host instrument contains more than one embedded derivative instrument, including the conversion option, that is required to be bifurcated, the bifurcated derivative instruments are accounted for as a single, compound derivative instrument.

Bifurcated embedded derivatives are initially recorded at fair value and are then revalued at each reporting date with changes in the fair value reported as non-operating income or expense. When the equity or convertible debt instruments contain embedded derivative instruments that are to be bifurcated and accounted for as liabilities, the total proceeds received are first allocated to the fair value of all the bifurcated derivative instruments. The remaining proceeds, if any, are then allocated to the host instruments themselves, usually resulting in those instruments being recorded at a discount from their face value. The discount from the face value of the convertible debt, together with the stated interest on the instrument, is amortized over the life of the instrument through periodic charges to interest expense.

The Company has adopted a sequencing approach to allocating its authorized and unissued shares when the number of such shares is insufficient to satisfy all convertible instruments or option type contracts that may be settled in shares. Specifically, the Company allocates its authorized and unissued shares based on the inception date of each instrument, with shares allocated first to those instruments with the earliest inception dates. Instruments with later inception dates for which no shares remain to be allocated are reclassified to asset or liability.

2. Significant Accounting Policies (continued)

(e) Revenue Recognition

The Company generates revenues from its proprietary blend of therapeutic plants and fungi, a nutraceutical wellness product.

The Company accounts for its revenue transactions under Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 606, *Revenue from Contracts with Customers* (“ASC Topic 606”). In accordance with ASC Topic 606, the Company recognizes revenues when its customers obtain control of its product for an amount that reflects the consideration it expects to receive from its customers in exchange for that product. To determine revenue recognition for contracts that are determined to be in scope of ASC Topic 606, the Company performs the following five steps: (i) identify the contract(s) with a customer; (ii) identify the performance obligations in the contract; (iii) determine the transaction price; (iv) allocate the transaction price to the performance obligations in the contract; and (v) recognize revenue when (or as) the Company satisfies the performance obligation. The Company only applies the five-step model to contracts when it is probable that the Company will collect the consideration it is entitled to in exchange for the goods or services it transfers to the customer. Once the contract is determined to be within the scope of ASC Topic 606, the Company assesses the goods or services promised within each contract and determines those that are performance obligations and assesses whether each promised good or service is distinct. The Company then recognizes as revenue the amount of the transaction price that is allocated to the respective performance obligation when such performance obligation is satisfied.

The transaction price is based on the consideration that the Company expects to receive in exchange for its products and includes the fixed per-unit price of the product and variable consideration in the form of trade credits, vouchers, and rebates. The per-unit price is based on the Company’s established wholesale acquisition cost less a contractually agreed upon distributor discount with the customer.

(f) Recently Adopted Accounting Pronouncements

The Company has implemented all new accounting pronouncements that are in effect and that may impact its consolidated financial statements and does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.

3. Inventory

Inventory consisted of finished goods held at held with third party distributors. At June 30, 2025, the carrying value of inventory was \$6,471 (September 30, 2024 – \$7,970).

4. Promissory Note Receivable

On February 5, 2023, the Company terminated the Memorandum of Understanding (“MOU”) described in Note 13. The advance of \$88,850 was converted into a non-interest-bearing note which matures on September 30, 2025.

The Company determines the allowance for credit loss (“ACL”) for loan receivable based on past loan loss experience, known and inherent risks, adverse situations that may affect the borrower’s ability to repay (including the timing of future payment), and economic conditions. The process is inherently subject to significant change as it required material estimates. As at June 30, 2025, the Company had \$88,850 (September 30, 2024 – \$88,850), respectively, of loan receivable and no related ACL recorded, respectively.

These notes are convertible in whole or in part, at any time until maturity, to common shares of the Company at \$0.0001 per share. The Company evaluated the convertible notes for a beneficial conversion feature in accordance with ASC 470-20 *Debt with Conversion and Other Options*. The Company determined that the conversion price was below the closing stock price on the commitment date, and the convertible notes contained a beneficial conversion feature. The Company recognized the intrinsic value of the embedded beneficial conversion feature of \$32,485 as additional paid-in capital and reduced the carrying value of the convertible note to \$nil. In connection with the issuance of the above convertible note, the Company evaluated the conversion option for derivative treatment under ASC 815-15, *Derivatives and Hedging*, and determined the conversion feature qualified as derivatives. The Company classified the conversion feature as a derivative liability at fair value. The initial fair value of the conversion feature was determined to be \$75,179.

7. Convertible Notes (continued)

The Company recognized the maximum intrinsic value of the embedded beneficial conversion feature of \$68,500, resulting in a loss on change in fair value of derivative liabilities of \$6,679, and reduced the carrying value of the convertible note to \$500. The carrying value was accreted over the term of the convertible note up to its face value.

The convertible note is currently in default. As at June 30, 2025, the carrying value of the convertible note was \$78,750 (September 30, 2024 – \$78,750), the accrued interest owing is \$95,145 (September 30, 2024 – \$81,009), and the fair value of the derivative liability was \$141,788 (September 30, 2024 – \$879,257).

- (c) On March 11, 2022, the Company entered into a convertible note with an unrelated party for \$30,000, which was due on January 18, 2023, and bears interest on the unpaid principal balance at a rate of 10% per annum. The note may be converted at any time after the date of issuance into shares of Company's common stock at a conversion price equal to the closing price on the day of receiving the notice to convert. In connection with the issuance of the above convertible note, the Company evaluated the conversion option for derivative treatment under ASC 815-15, *Derivatives and Hedging*, and determined the conversion feature qualified as derivatives. The Company classified the conversion feature as a derivative liability at fair value. The initial fair value of the conversion feature was determined to be \$15,011, which reduced the carrying value of the convertible note to \$14,989. The carrying value was accreted over the term of the convertible note up to its face value.

On January 18, 2023, the Company failed to repay the note upon maturity and is currently in default. As of June 30, 2025, the carrying value of the convertible notes was \$30,000 (September 30, 2024 – \$30,000), the accrued interest owing is \$9,929 (September 30, 2024 – \$7,685), and the fair value of the derivative liability was \$17,110 (September 30, 2024 – \$15,635).

8. Derivative Liabilities

The embedded conversion option of the Company's convertible notes described in Note 7 contain a conversion feature that qualifies for embedded derivative classification. The fair value of this liability will be re-measured at the end of every reporting period and the change in fair value will be reported in the statement of operations as a gain or loss on change in fair value of derivative liabilities. The table below sets forth a summary of changes in the fair value of the Company's Level 3 financial liabilities:

	\$
Balance, September 30, 2024	894,892
Change in fair value of embedded conversion option	(735,994)
Balance, June 30, 2025	158,898

The Company uses Level 3 inputs for its valuation methodology for the embedded conversion option liabilities as their fair values were determined by using the binomial model based on various assumptions. Significant changes in any of these inputs in isolation would result in a significant change in the fair value measurement. As required, these are classified based on the lowest level of input that is significant to the fair value measurement.

The following table shows the weighted-average inputs and assumptions used in the calculations:

	Exercise price	Stock price on measurement date	Expected volatility	Risk-free interest rate	Expected dividend yield	Expected life (in years)
As at September 30, 2024	\$0.0008	\$0.0042	206%	4.73%	0%	0.25
As at June 30, 2025	\$0.0006	\$0.0006	150%	4.29%	0%	0.50
