Item 3. Interim financial statements:

The Company's financial statements for the period ended September 30, 2011 are attached hereto.

Item 4. Management's discussion and analysis or plan of operation:

Plan of Operation:

The Company has restructured its business to focus solely on mineral exploration and production. The Company management structure and business has changed with the resignation of Joshua Suarez. The Company has divested itself of its medical imaging business and has redirected its focus to mineral exploration. The Company is looking to create and develop a portfolio of precious and base metal properties. The Company is dedicated to exploring and developing cost effective operations in proven areas where mineral exploration is progressive.

The business model consists of the following steps.

1. Targeting prolific past producers with consistent historical assays.
2. Entering into joint venture work option agreements.
3. Locking in JV option work agreements over a period of years to develop the property
4. This cost effective approach enables the Company to Develop the properties for little or no cost as the annual maintenance fees due to the government are offset by the amount of money spent on property exploration and development by our partners. Any surplus of expenditures beyond what is due to maintain the properties can then be applied as portable assessment credits towards the maintenance of other properties that are not yet producing revenue but which have good prospects of doing so in the future.

This model is labour and capital intensive in the beginning but as the properties are nurtured and developed they will increase in value as more "modern" methods are used to continue and update past property assays and data. The end goal is to bring these properties to the point of drilling at which point due to the high cost the Company would then look for a JV, partnership while retaining a Net Smelter Royalty on behalf of the Company. The Company feels that if current macro economic conditions continue to exist, the business model and its underlying assets should experience an increase in valuations. The Company expects that it will need to raise additional funds within the next twelve (12) months in order to sustain operations. In regards to the Company capital structure management will do a review at the end of Q4 2011 and will use all tools at its disposal in regards to making sure that the Company will be able to finance all their exploration commitments.

ITEM XVI: Management's Discussion and Analysis or Plan of Operation.

Cautionary Statements Use of Forward Looking Statements

Except for statements of historical fact, some information in this document contains "forward-looking statements" that involve substantial risks and uncertainties. You can identify these forward-looking statements by words such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "should," "will," "would" or similar words. The statements that contain these or similar words should be read carefully because these statements discuss our future expectations, contain projections of our future results of operations or of our financial position, or state other forward-looking information. We believe that it is important to communicate our future expectations to our investors. However, there may be events in the future that we are not able accurately to predict or control.

Further, we urge you to be cautious of the forward-looking statements which are contained in this annual report because they involve risks, uncertainties and other factors affecting our operations, market growth, service, products and licenses. The factors listed in this section as well as other cautionary language in this document and events in the future may cause our actual results and achievements, whether expressed or implied, to differ materially from the expectations we describe in our forward-looking statements. The occurrence of any of the events described as risk factors or other future events could have a material adverse effect on our business, results of operations and financial position.

Since our common stock is considered a "penny stock" we are ineligible to rely on the safe harbor for forward-looking statements provided in Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities and Exchange Act of 1934, as amended (the "Exchange Act").
