Item VII
Name and Address of Transfer Agent:

Action Stock Transfer Corp
7069 S. Highland Dr., Suit 300
Salt Lake City, Utah 84121
801-274-1088
Fax 801-274-1099
Registered with the SEC

Item: VIII
Nature of the business:
A.

Cardio Infrared Technologies Inc.
Is a C Corporation

The business started in February 2006

The Fiscal Year is December 31

There has never been a filing in bankruptcy, receivership

The issuer is not now nor has ever been a shell company.

Merged with Cardio Infrared Technologies, Inc in July 2007

All notes payable are being paid according to the terms or according to agreement.

Control of the company changed in July 2007

The company started doing a 504 offering in December 2007

No 504 offering after January 2009

There is no pending or threatened legal action

B.
Business Description:

- Cardio Infrared Technologies, Inc. is a leading-edge developer and manufacture of fitness and weight loss equipment and products.
- First Phase of the Clinical Trials have been completed at a FDA-certified facility in Philadelphia directed by Dr. Richard M. Goldfarb M.D., FACS and the second and third phase is now completed and will be released as soon as possible.
- The Weight Loss, Fitness, Wellness, Nutrition and Anti-Aging Industry is an explosive growth market
  - The prevalence of over weight and obesity in the United States continues to increase at alarming levels. One third of the adult population is currently overweight or obese, and preadolescent and adolescent overweight/obesity is also on the rise.
  - According to leading experts, overweight/obesity is the second leading cause of preventable death particularly in this country but on the rise around the world.
  - Most adults don't get enough physical activity. Exercise can improve health impairments and prevent some diseases. It can also improve mood and emotional well being. However the key to a sensible workout is to take it slowly and to do it regularly.
  - Cardiovascular training, resistance training or weightlifting, flexibility training and good nutrition can also dramatically slow down the aging process.

Unique Selling Points

- Couples a cardio workout with the use of infrared heat.
- Detoxifies the body naturally.
- Uses infrared heat to stimulate the body's immune system.
- Helps Reduces inflammation from rheumatoid arthritis.
- Reduces physiological and mental/emotional stress.
- The infrared will counteract Seasonal Affective Disorder (SAD).
- Accelerates calorie burn and controls weight.

•Weight Loss and Fitness

- The Bike is programmed to step a client through a 40-minute cardio workout that is based on keeping the heart rate in the fat burning range. The bike adjusts the resistance for the user who simply needs to keep a steady speed and the bike does everything else.

•The unique feature of the Bike is that it uses infrared lamps to increase the calories burned by a factor of up to 10 times the normal amount burned in a 40-minute workout. This is accomplished by increasing the body's core temperature and metabolism.

The company's Primary SIC code is 5091 Sporting and Recreation goods
The company's Secondary SIC code is 5049 Professional equipment misc.

The company is an operational company with existing sales and is also a development stage company developing new products based on the infrared and exercise concept.

The company is not now nor do we believe that it will fall under governmental regulations.

The amount of money spent over the last year on research and development is estimated at $300,000 all of which the company has paid.

There has been no cost of compliance with environmental laws.

The company has a total of 4 employees.

Item IX
The nature of products.

The principal product of the Company is a new generation Infrared stationary bike. Which will be marketed into the health and wellness industry. Wellness Centers, Weight Loss Centers, Med Spas, Gyms, Doctors Offices, Day Spas, and other areas that are providing their clients with the latest and best type of service.

Distribution has been by direct sales and shows for the industries. The company is now setting up distributors around the world. We now have distributors in England, France, Germany, Poland, Spain Italy, Portugal, and Turkey.

The company has a unique type of equipment that gives it an advantage in that it combines the benefits of Infrared with light exercise to increase the metabolism, detoxification, overall well being, helping with arthritis, enhancing circulation in both deep and surface tissues, accelerating metabolism, boosting the immune system, and reducing pain and inflammation and numerous other benefits.

The company is not dependent on one or a few customers.

The company does not need any governmental approval however the equipment is in clinical trails in a FDA approved facility and we have made a filing with the FDA. The clinical trails are for marketing not governmental approval.

Item X
Cardio Infrared Technologies, Inc. Facilities.

Cardio Infrared Technologies, Inc has three facilities the first is

1848 West 11th Street Suite M, Upland, CA 91786
This facility is rented and is the company's warehouse for equipment. This facility has operated since March 2006.

99 Fountainhead Cir, Henderson, NV 89052
This facility is rented and is listed as the Corporate Headquarters.

Bucks Country Clinical Research.
201 Sequoia Dr.
New Town, PA 18942
This facility is rented and operated by Bucks County Clinical Research the equipment is owed by the company.

DEA Project
24030 Mozzo
Bergamo C.F./P .iva 03572890162 Italy
This is our prototype and research facility. We are also doing some production work from this facility while we are setting up manufacturing in Las Vegas, NV

Part D Management and Control Structure

Item XI

The name of the chief executive officer, members of the board of directors, as well as control persons

A. Officers and Directors

Full Name. Wayne Keith Bailey

Directors.

1. Full Name Wayne K. Bailey
2. Business Address: 99 Fountainhead Cir.
   Henderson, NV 89052
3. Employment History: Cardio Infrared Technologies Inc
   April 1, 2007 to Present
   Better Bodies Inc
   September 2005 to Present
4. Compensation $60,000 per year
5. Number of issuer's shares owned
   Common Shares 200,666,924
   Preferred Shares 40,000

B. Legal/Disciplinary None

C. Disclosure of Family Relationships None

D. Disclosure of Related Party Transactions.

1. Name of related Person Wayne Bailey
2. Related Person's interest Loans to Company

3 & 4 Approximate Dollar Value $50,000 Plus interest

5.Mr. Bailey has loaned money to the company on an on going basis.

E. Disclosure of Conflicts of Interest. There are no conflicts of interest

Item XVI. Managements Discussion and Analysis or Plan of Operation.

Cardio Infrared Technologies, Inc is a manufacturer, distributor and developer of innovative health care products. The main focus for the company is exercise equipment that combines infrared heat with exercise. The company controls the patents for this technology. This combination of infrared heat and exercise can increase the number of calories burned in a session by a factor of ten. Clinical trials have proven the calorie burn leading to weight loss and inch loss.
In January 2009 the Company became aware that the Unit it was then selling was a knockoff of a patented product. Patented in The United States and Europe with pending patent in other contries. The patent for the United States was issued on February 15, 2000 Patent number 6,024,760. On confirmation that there was a valid Patent and the unit known, as the CardioCor[tm] was in fact a knockoff the Company immediately cancelled all orders for that equipment. The supplier acknowledged that their product was a copy of an existing product and they also knew about the patent and decided to disregard the Patent. The management of the company decided that the patent was valid and enforceable and the company will not be involved with a counterfeit product or products. Management negotiated with the patent holder and reached a tentative agreement in April 2009. The agreement was signed in November 2009. The agreement is an exclusive license for all infrared patents that are held by Mr. Fabio Marchesi worldwide. The agreement called for the payment to Mr. Marchesi of $50,000 in cash, 5,000 shares of Preferred B Stock restricted and a 7% royalty on all sales of infrared products or products that are based on the patents. After the license was signed the company started working on the design for the new units called BioFit[tm] . The design was undertaken at D.E.A. Project in Bergamo, Italy. This is the company that designed and manufactured the original infrared bike called the Infrafit. The new design was completed in February and the Company commissioned a Prototype to be built. The hardware on the prototype was complete in May 2010 but the software is still being completed. The BioFit[tm] infrared Bike is the ultimate design for the use of infrared and exercise, which is what the patent is all about. The new BioFit[tm]Infrared Bike will be produced and sold in the United States first, then exported to all parts of Europe. Orders are being received for

delivery starting in January and February 2011. To accomplish this a limited number of units have been ordered from the Bergamo, Italy facility for immediate delivery. The first three units will be delivered into a facility in Rome. Two other units will be delivered to our warehouse in the US.

The Company displayed at the Anti-Aging Show in Las Vegas this past December 2010. The equipment arrived two days late but was the hit of the show when it arrived. The attendees comments were very positive and the reactions were "it is spectacular".

The last year has been a trying time for the company but a great year. Acquiring the exclusive license for the patents will provide the company the opportunity to not only manufacture and market the unit and the technology but to develop a great number of additional equipment based on the technology. The company has another piece of equipment that is in current development that utilizes the technology. The BioFit[tm] and the new BioDream[tm] will be featured at the Anti-Aging Show in Las Vegas this December. We have secured a larger booth for the show, which will allow room for both pieces of equipment and for demonstration space. This will be a great venue for the introduction both the BioFit[tm] and the BioDream[tm] both pieces of equipment feature all the best of the original technology and all of the latest developments and patented technology from Mr. Marchesi. The technology behind the patent and all of the knowledge that the inventor has accumulated is now at the disposal of the company. Mr. Marchesi will be featured at the show in December and will be there to answer questions and conduct seminars for the attending participants. Mr. Marchesi has joined the management team of Cardio as a consultant and will be an active member of the team. Mr. Marchesi has secured the distribution rights for all of our products in Italy.

The company believes that the new BioFit[tm] products will increase sales dramatically in the current market and open new markets for the company and its products. However to complete the new product, manufacture and distribute the company must seek additional capital. It will require $500,000 to purchase the inventory and put the units into production this year.
The projections for the new product far exceed the sales that have been experienced to date. The market demographics are must larger and the profit per unit is much higher then the existing products. The Company has a PPM that was being used to secure the money required to bring the production to the United States and the overall agreement was based on the stock price and conversion to free trading stock after a year but problems with the DTCC put a hold on the money for the time being. The company as expended considerable time and money trying to resolve the issue however the DTCC will not respond and apparently they do not have to abide by due process, they are just a independent bureaucracy. This action is injuring the stockholder, customers and the company. If they had not taken this action Cardio Infrared Technology Inc would be employing around 40 people in the United States by this time. Instead we are still getting our equipment manufactured in Italy at a much higher cost.

MARKET: The overall health and fitness industry is conservatively estimated at $61 billion per year. The BioFitt[m] market is the health and fitness industry. There are fewer than 100 manufacturers of fitness equipment that operate in the US to meet this growing demand with combined annual sales of approximately $3 billion. Larger companies include ICON Health & Fitness, Nautilus, Life Fitness, Precor, and Cybex. The growth forecasts for this market are estimated at 20% per annum. The BioFit[tm] and the BioDream[tm] will be able to capture 2.7% of this overall market. Which is $81 million per year or 2,025 units per year. With a projected profit of $12 to 16 Million.

The Company over the last year has secured $300,000 in new funding. The company has used the money to secure the patents and to produce the Prototype. The money has allowed the company to come though a very tough time with no products to sell and now have our own line of products to manufacture and sell worldwide. The last two years has been a rebirth for the company and opportunities that are now available.

The company has elected to write off all of the inventory and other assets associated with the CardioCor^{tm} unit and all costs that have been capitalized regarding market development, sales, advertizing costs and all other costs associated with the unit. The total write off including accounts receivable, deposits and inventory is $635,581. This is a onetime charge. The inventory will be destroyed. The company will also contact all those who have purchased the CardioCor^{tm} or the CelluBike^{tm} and provide an upgrade to the new BioFit^{tm} . The old units will need to be destroyed.

New funding needs to be secured over the next few months and to that end the company has a Private Placement Memorandum that could be used to secure the new funding required for the production and marketing of the new units. With the funding production and marketing management feels that sales could very quickly reach $500,000 per month with a profit of 20% of sales.

Market Trends

Four market trends combine to indicate a strong demand for health and fitness equipment and BioFit^{m} technology

1. Aging population;
2. Overall health consciousness of the population;
3. Rising health costs;
4. Innovation in fitness equipment.

Scientific studies have shown that a thirty- minute session using infrared wide-spectrum light can result in the loss of toxins and stored fats in the body by up to ten times the level traditional exercise alone can achieve. Infrared heat helps to promote the body's capillary system, which will increase blood circulation to the surface of the skin. Because of the deep penetrating heat from infrared, (infrared is the only heat that penetrates the skin's surface up to 3") health professionals have used infrared lamps for many years to treat muscle and joint problems. Infrared heat ensures an increased flow of oxygen rich blood to painful areas which helps to ease aches and pains, stiffness or soreness from arthritic conditions, tired overworked muscles or even poor posture.

Infrared combats the effects of daily stress and wakes up the immune system. Deep radiant infrared heat results in rising of the body's core temperature, which actually induces an artificial fever. This, in turn, activates and stimulates the body's immune system. Combined with the elimination of toxins and wastes from the body, the overall health and resistance to disease is noticeably improved so you feel and look better.

Health costs are rising faster every year, which has started a ground swell of people looking for ways to stay healthy longer.

INDUSTRY ANALYSIS

Market research in this area has outlined that the competition for this industry's highly profitable resources depends on a company's ability for unique product designs and effective marketing. Although established companies have some advantages in brand-name recognition, emerging companies can compete effectively to gain large market share through unique innovative product designs and effective/proven marketing skills

The market and the opportunity for this type of equipment are enormous and can be capitalized on quickly. However for a small company it will put a great strain on capital and on management. The rewards and profits will be well worth the risks and the work.

Item XVIII Material Contracts.

Cardio Infrared Technologies Inc entered into an Exclusive Intellectual License Agreement with Fabio Paolo Marchesi on November 21, 2009. The agreement gives Cardio Infrared Technologies Inc the exclusive rights to patents owned by Mr. Marchesi that has to do with the Combination of Infrared and Exercise. The agreement covers all of the rights to the patents in the US and worldwide to design develop and start the production and distribution of a new revolutionary, reliable, and modern Italian design, Infrared-bike and other cardio infrared systems or other systems, based on the best and correct application of his Intellectual Property and Patents, in the US market and worldwide. This agreement covers but is not limited to patents 6,024,760 and 6,409,744 and all other patents relating to infrared or the use of infrared. This agreement covers all intellectual property relating to infrared technology. The agreement is an exclusive license for all infrared patents that are held by Mr. Fabio Marchesi worldwide. The agreement called for the payment to Mr. Marchesi of $50,000 in cash, 5,000 shares of Preferred B Stock restricted and a 7% royalty on all sales of infrared products or products that are based on the patents. After the license was signed the company started working on the design for the new units. The design was undertaken at D.E.A. Project in Bergamo, Italy. This is the company that designed and manufactured the original infrared bike called the Infrafit

Date: May 1, 2011

___/s/Wayne Keith Bailey____ Wayne Keith Bailey, CEO

CARDIO INFRARED TECHNOLOGIES, INC. NOTES TO THE FINANCIAL STATEMENTS SEPTEMBER 30, 2011

Cardio Infrared Technologies Inc, [the "Company"] was engaged in the Sales and Distribution of the Cardio-Cor Infrared Bike. The Company was informed by the inventor of the Technology that the Cardio-Cor was a knockoff of a patent that was held by Fabio Marchesi patent Number 6,024,760. The Company discontinued the sales and distribution of the Cardio-Cor immediately. The Company acquired all of the rights to the patents for the United States and the world.

Effective November 21, 2009 as approved by our shareholders and board of directors, we entered into an agreement to acquire all of the rights and exclusive intellectual property license on all US and International patents held by Fabio Marchesi that concern the use of Infrared and Exercise or any use of infrared.

The financial statements have been prepared on a going concern basis which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred losses since the second quarter of 2009. The ability to continue as a going concern is dependent upon the Companies ability to obtain the necessary capital to fund and put into production the New Infrared Equipment developed over the last year.

NOTE 2 - SUMMARY OF SIGNIFCANT ACCOUNTING POLICIES

Basis of Presentation
The Company uses the accrual basis of accounting and accounting principles generally accepted in the United States of America ("GAAP" accounting) are the financial statements are presented in US dollars. The Company has adopted a December 31 fiscal year end.

Use of Estimates and Assumptions
The preparation of financial statements in conformity with accounting principles generally accepted in the United States of assets requires management to make estimates and assumptions that affect the reported amounts and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and the expenses during the reporting period. Actual results could differ from those estimates.

Financial Instruments
The carrying value of the Company's financial instruments approximates their fair value because of the short maturity of these instruments.

NOTE 3 - SUMMARY OF SIGNIFCANT ACCOUNTING POLICIES (CONTINUED)

Income Taxes
Income taxes are accounted for under the assets and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. Use of net operating loss carry forwards for income tax purposes may be limited by Internal Revenue Code section 382 if a change of ownership occurs.

Basic Income (Loss) Per Share
Basic income (loss) per share is calculated by dividing the Company's net loss applicable to common shareholders by the weighted average number of common shares during the period. Diluted earnings per share is calculated by dividing the Company's net income available to common shareholders by the diluted weighted average number of shares outstanding during the year. The diluted weighted average number of shares outstanding is the basic weighted number of shares adjusted for any potentially dilutive debt or equity. There are no such common stock equivalents outstanding as of March 31, 2011

Dividends
The Company has not adopted any policy regarding payment of dividends. No dividends have been paid during any of the periods shown.

Impairment of Long-Lived Assets
The Company continually monitors events and changes in circumstances that could indicate carrying amounts of long-lived assets may not be recoverable. When such events or changes in circumstances are present, the Company assesses the recoverability of long-lived assets by determining whether the carrying value of such assets will be recovered t

Impairment of Long-Lived Assets (Continued)

hrough undiscounted expected future cash flows. If the total of the future cash flows is less than the carrying amount of those assets, the Company recognizes an impairment loss based on the excess of the carrying amount over the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or the fair value less costs to sell.

Advertising Costs
The Company's policy regarding advertising is to expense advertising when incurred.

Revenue Recognition
The Company recognizes revenue when products are fully delivered or services have been provided and collection is reasonably assured.

Stock-Based Compensation
Stock-based compensation is accounted for at fair value in accordance with SFAS No. 123 and 123 (R) (ASC 718) To date, the Company has not adopted a stock option plan and has not granted any stock options.

New Authoritative Accounting Guidance
On July 1,2009, the Accounting Standards Codification ("ASC") became the Financial Accounting Standards Board ("FASB") officially recognized source of authoritative U.S. generally accepted accounting principles applicable to all public and non-public non-governmental entities, superseding existing FASB, AICPA, EITF and related literature. Rules and interpretive releases of the SEC under the authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. All other accounting literature is considered nonauthoritative. The switch to the ASC affects the away companies refer to U.S. GAAP in financial statements and accounting policies. Citing particular content in the ASC involves specifying the unique numeric path to the content through the Topic, Subtopic, Section and Paragraph structure.

FASB ASC Topic 260, "Earnings Per Share." On January 1,2009, the Company adopted new authoritative accounting guidance under FASB ASC Topic 260, "Earnings Per Share," which provides that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method.

FASB ASC Topic 820, "Fair Value Measurements and Disclosures." New authoritative accounting guidance under ASC Topic 820,"Fair Value Measurements and Disclosures," affirms that the objective of fair value when the market for an asset is not active is the price that would be received to sell the asset in an orderly transaction, and clarifies and includes additional factors for determining whether there has been a significant decrease in market activity for an asset when the market for that asset is not active. ASC Topic 820 requires an entity to base its conclusion about whether a transaction was not orderly on the weight of the evidence. The new accounting guidance amended prior guidance to expand certain disclosure requirements. The Company adopted the new authoritative accounting guidance under ASC Topic 820 during the first quarter of 2009. Adoption of the new guidance did not significantly impact the Company's consolidated financial statements.

Further new authoritative accounting guidance (Accounting Standards Update No. 2009-5) under ASC Topic 820 provides guidance for measuring the fair value of a liability in circumstances in which a quoted price in an active market for the identical liability is not available. In such instances, a reporting entity is required to measure fair value utilizing a valuation technique that uses (i) the quoted price of the identical liability when traded as an asset, (ii) quoted prices for similar liabilities or similar liabilities when traded as assets, or (iii) another valuation technique that is consistent with the existing principles of ASC Topic 820, such as an income approach or market approach. The new authoritative accounting guidance also clarifies that when estimating the fair value of a liability, a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. The forgoing new authoritative accounting guidance under ASC Topic 820 will be effective for the Company's consolidated financial statements beginning October 1,2009 and is not expected to have a significant impact on the Company's consolidated financial statements

FASB ASC Topic 825 "*Financial Instruments.*" New authoritative accounting guidance under ASC Topic 825,"Financial Instruments," requires an entity to provide disclosures about the fair value of financial instruments in interim financial information and amends prior guidance to require those disclosures in summarized financial information at interim reporting periods.

New Authoritative Accounting Guidance (continued}

FASB ASC Topic 855, "*Subsequent Events.*" New authoritative accounting guidance under ASC Topic 855, "Subsequent Events," establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. ASC Topic 855 defines (i) the period after the balance sheet date during which a reporting entity's management should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, (ii) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and (iii) the disclosures an entity should make about events or transactions that occurred after the balance sheet date. The new authoritative accounting guidance under ASC Topic 855 became effective for the Company's financial statements for periods ending after June 15,2009. Effective February 24, 2010, the FASB issued Accounting Standards Update ("ASU") No. 2010-09, "Subsequent Events (Topic 855): Amendments to Certain Recognition and Disclosure Requirements" which revised certain disclosure requirements. ASU No. 2010-09 did not have a significant impact on the Company's consolidated financial statements. The company evaluated subsequent events, which are events or transactions that occurred after March 31, 2011 through the issuance of the accompanying consolidated financial statements.
Management does not believe that any other recently issued but not yet effective accounting pronouncements, if adopted, would have an effect on the accompanying consolidated financial statements

NOTE 4 - RELATED PARTY TRANSACTIONS
The Company received periodic advances from its principal stockholder based upon the Company's cash flow needs.

NOTE 5-COMMON STOCK

Articles of Incorporation Amendment and Stock Split - The Company's Certificate of Incorporation, as amended, authorizes the issuance of up to 500,000,000 shares of common stock at a par value of $.000001 per share. Over the year ended September 30 2011 , the Company's Board of Directors ratified a three thousand to one reverse stock splits which became effective May 4 , 2011.

In August 2010 the Company entered into a Debt Conversion Agreement (the “Agreement”) and issued 12,000,200,000 shares as partial settlement of the debt. In December 2010 the Company entered into a Debt Conversion Agreement (the “ Agreement”) and issued 600 million common stock at an average of .0005 per share as partial settlement of debt. In March 2011 the Company entered into a Debt Conversion Agreement (the “Agreement”) and issued 400 million common shares as a partial settlement of the debt. In March the Company received and canceled 12,000,000,000 shares and the debt conversion was canceled. On May 4, 2011 the company did a reverse stock split of 3000 to 1. Stock was issued for stock 200,000,000. In June 2011 100,300,000 was issued in a debt conversion. In July 70,000,000 shares were issued for debt conversion.

Restricted Share Issuances - In July and September 2009, 11.2 million shares were issued to a consultant for public market help for the company. In October 2009 980 million shares was issued for the acquisition of the Maden Acquisition Trust. On May 3, 2009 1.5 Billion shares were issued to management for service and raising additional funding for the company. In August 2010 29 Billion shares were issued to management for service and raising additional funding fro the company.
Restricted Share Issuances (Continued)

Also in October 2009, the Company issued 250,000 shares of restricted Preferred B stock with a fair value of $.001 per share or $250 to the trustees of the Maden Trust. In 2009 and 2010 the Company issued 370,000 shares of preferred stock for services. In 2009 and 2010 the Company issued 107,057 shares of Preferred Stock for $371,219 or an average price of $3.47 per share. In July another $143,337 was received for 83,662 shares of Preferred B-2 stock at $1.71 per share.

In April 2011 Management had 27,000,000,000 shares canceled. Stock was issued to management of 200,000,000 shares.
