Management's Discussion and Analysis or Plan of Operation

KMA Global Solutions International, Inc. ("KMAG" or the "Issuer") was incorporated on March 9, 2006 under the laws of the State of Nevada. The Company's fiscal year end is January 31. The Company has never been subject to bankruptcy, receivership or any similar proceeding.

On September 17, 2012 KMAG shares were suspended from trading for the period beginning September 17, 2012 and ending on September 28, 2012. No further action has been taken and KMAG plans on engaging a market maker to file a Form 15c-211 in order to reinstate the Company's prior trading status.

KMAG is the assignee of active patents issued by the U.S. Patent and Trademark Office (as well as corresponding foreign patents granted in Germany, Spain, France, Italy, Netherlands, United Kingdom and Mexico). These patents relate to a sew-on security label, which anticipates and incorporates RFID technology, improvements and manufacturing processes. KMAG also has patent applications pending in the U.S. (as well as corresponding foreign patent applications in Mexico, Germany, Spain, France, Italy, Netherlands, United Kingdom and Canada) relating to its dual technology EAS label and high speed process, which anticipates and incorporates RFID technology and improvements thereof.

KMAG has been engaged in the Electronic Articles Surveillance (EAS) industry since inception. Shrinkage (the value of goods which are not paid for) is caused primarily by shoplifting and employee theft. Products manufactured in the EAS industries are designed to act as a deterrent to control the problem of merchandise theft. To address this market opportunity, KMAG built the necessary infrastructure to be a source for EAS solutions worldwide.

KMAG continues to develop new products for the retail marketplace and the latest product is called the Gemini Tag. This tag is a Dual Tag which provides both EAS and RFID coverage for retailers developing a RFID solution while needing to protect their merchandise. The Gemini Tag is being made in China using a long time manufacturing source which provides similar solutions to KMAG. We anticipate the product to be in the market by Fiscal 2013. KMAG has spent \$65,000 in developing this product as it is designed to fit specific retailer demand.

The Gemini Tag will need in-market testing during Q4 2012 which will allow for sales cycle to begin in Q1 2013.

KMAG continues to produce high speed equipment and seek new clients in this market. KMAG developed high speed packaging line equipment which can apply, read and write a RFID tag in a variety of different tag configurations onto a variety of consumer packaging. Specifically we are working with a customer that will use this equipment for tracking merchandise from production throughout distribution to the customers dock. The opportunity is based on applying RFID tags to different packaging containing liquids that allow for reading with confidence. This closed loop start up phase will transition into point of purchase retail solution which will allow for third party use at retail.

KMAG has developed a new solution called the fashion shoe tag which is sold in the retail sector to protect Fashion Footwear (that is, footwear that is sold at a price point that attracts a greater threat as a theft item) without damaging the shoe. The solution has been developed to contain both EAS and RFID technology. Further R&D expenditures will occur as we develop more sophisticated solutions for niche markets.

KMAG continues to promote and sell EAS solutions and develop products used by its retail customers in both EAS and RFID. KMAG continues to promote the existing business and has augmented its existing intellectual property and knowledge of the RFID industry.

Although there is no present agreement or understanding for KMAG to make any particular acquisition, it does intend to attempt to seek out, entertain and evaluate proposals for acquisition of other assets and/or business opportunities in exchange for shares of its common stock. There cannot be any assurance that any such acquisition proposals will be made to or located by KMAG, and it is likely that any which the board of directors might entertain may be on terms that would be deemed unfavorable to and have a dilutive effect on KMAG's existing shareholders.

KMA Global Solutions International Inc. is located at 438 Gibraltar Drive, Suite 11, Mississauga Ontario. We are located in a 4800 square foot facility where current operations and record keeping takes place.

Results of Operations

The following discussion of the financial condition and results of operations should be read in conjunction with the financial statements included herewith. The discussion should not be construed to imply that the results discussed herein will necessarily continue in the future, or that any conclusion reached herein will necessarily be indicative of actual operating results in the future.

Sales

The Company's sales increased \$2,022,430 or 1543% to \$2,153,500 for the three months ended October 31, 2012 compared to \$131,070 for the three months ended October 31, 2011 and increased \$5,954,912 or 1432% to \$6,370,614 for the nine months ended October 31, 2012 compared to \$415,702 for the nine months ended October 31, 2011. This increase over last year is primarily due to increasing sales in our current EAS business and increase in sales of our fashion shoe tag and hard tags product lines. Sales in our RFID product lines have also contributed to the increase in sales over the previous year.

Gross Profit

The Company's gross profit was \$398,200 or 18% of sales for the three months ended October 31, 2012, compared with \$35,469 or 27% of sales for the three months ended October 31, 2011 and \$1,179,904 or 19% of sales for the nine months ended October 31, 2012, as compared with \$127,119 or 31% of sales for the nine months ended October 31, 2011. This corresponds with planned margins for the market. Increase in sales also resulted in discounted sales pricing.

Net Operating Expenses

Net Operating Expenses were \$224,522 or 10% of sales for the three months ended October 31, 2012, compared with \$42,832 or 33% of sales for the three months ended October 31, 2011 and \$660,497 or 10% of sales for the nine months ended October 31, 2012, as compared to \$142,672 or 343% for the nine months ended October 31, 2011. The decrease in ratio of operating expenses to sales is primarily due to the significant increase in sales offset by increased spending primarily in outside consulting fees, travel and research and development expenses.

Operating Income (Loss)

Operating Income before taxes was \$173,678 or 8% of sales for the three months ended October 31, 2012 as compared with an operating loss of \$7,363 or -6% of sales for the three months ended October 31, 2011 and \$519,407 or 8% of sales for the nine months ended October 31, 2012, as compared with an operating loss of \$15,553 or -4% of sales for the nine months ended October 31, 2011. The increase in operating income for the three and nine months ended October 31, 2012 compared to the three and nine months ended July 31, 2011 is due to a significant increase in sales in both EAS & RFID product lines, offset by increase in operating expenses primarily in outside consulting, travel and research and development expenses.

Capital Resources

The Company had, for the nine months ended October 31, 2012, current assets of \$1,280,131 and current liabilities of \$652,947.

For the nine months ended October 31, 2012, the Company had a cash balance of \$79,677. The Company does not have any bank indebtedness and cash is achieved from the collection of receivables which average 60 days payment cycle. Management believes that the Company will generate sufficient cash from its operating activities.

There are no off-balance sheet arrangements.
