ASIA BROADBAND, INC.
(A Development Stage Company)
Note to the Financial Statements
For the Year Ended December 31, 2015

1. Nature of Business

Asia Broadband, Inc. was incorporated under the laws of the State of Nevada on January 24, 1996 as Gemini Marketing, Inc. The name was changed to Merendon International, Inc. on March 19, 1999 and then to Asia Broadband, Inc. on December 20, 2000. The Company was inactive during the period from January 24, 1996 to March 19, 1999. The Company's common stock is currently quoted on the OTC Pink operated by OTC Markets Group, Inc. In 2000, the Company initially owned a 75% interest in Shanghai Broadband Network, Inc. ("SBN"), a company formed under the laws of the People's Republic of China by the Company and two independent business partners. The Company increased its interest in SBN to 90% and then to 93% in September 2003, and finally to 96% in May 2004. In 2005 the Company became inactive and is currently inactive as of December 31, 2015. The Company is in the development stage and has a limited operating history.

Going Concern

The Company has suffered recurring losses and has no assurance of future profitability. The Company will continue to require financing from external sources to finance its operating and investing activities until sufficient positive cash flows from operations can be generated. There is no assurance that financing or profitability will be achieved, accordingly, there is substantial doubt about the Company's ability to continue as a going concern.

These financial statements have been prepared on the basis that the Company will be able to continue as a going concern and realize its assets and satisfy its liabilities and commitments in the normal course of business and do not reflect any adjustments which would be necessary if the Company is unable to continue as a going concern.

2. Summary of Significant Accounting Policies

Basis of Presentation

These financial statements are prepared in accordance with accounting principles generally accepted in the United States. The Company is currently in the development stage and presents its financial statements in accordance with Statement of Financial Accounting Standard ("SFAS") No. 7, "Accounting and Reporting by Development Stage Enterprises".

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States requires the Company's management to make estimates and assumptions which affect the amounts reported in these consolidated financial statements, the notes thereto, and the disclosure of contingent assets and liabilities at the date of the financial statement. Actual results could differ from those estimates.

Fair Value of Financial Instruments

The fair value of the Company's financial instruments, which consist of cash, receivables, accounts payable and accrued liabilities, due to related parties and convertible notes payable, approximate their carrying values due to their short term or demand nature with the exception of the convertible notes payable. The fair value of the convertible notes payable was calculated using discounted cash flow analysis and approximates the carrying value as the interest rate implicit in the notes payable is similar to current market rates.

Revenue Recognition

The Company follows the provisions of Staff Accounting Bulletin ("SAB") No. 104 "Revenue Recognition" and Emerging Issues Task Force ("EITF") 00-21 "Accounting for Revenue Arrangements with Multiple Deliverables" for accounting and recognizing revenue. In accordance with SAB No. 104, revenue from the sale of programs and supplemental learning materials is recognized upon delivery of the product when persuasive evidence of an arrangement exists, the price is fixed or determinable and collection is probable. If collectibility will not be considered probable, revenue will be recognized when the fee is collected. In an arrangement with multiple deliverables, the Company assesses if the delivered item(s) constitute separate units of accounting in accordance with the following criteria: The deliverable item(s) has value to the customer on a standalone basis, there is objective and reliable evidence of the fair value of the undelivered item, and whether the delivery arrangement is considered probable and substantially in the control of the vendor.

Revenue from enrolment in the educational programs is deferred and recognized as the programs are delivered and services are provided. Annual licensing and franchise fees from registered schools are recognized over the term of the license. The portion of the program revenue allocated to the sales of supplemental learning materials and the revenue from independent sales of these materials will be recognized as the products are delivered and the refundable period has expired. Revenue from basic access fees is deferred and recognized over the term of the service period and when the refundable period has expired.

Property and Equipment

Property and equipment is recorded at cost less accumulated depreciation. Depreciation is provided on a straight-line basis over the estimated useful life of the assets.

Leasehold improvements are depreciated over the lesser of the lease term and the expected useful life of the improvements.

Impairment of Long-Lived Assets and Goodwill

The Company applies the recommendations of the SFAS 144, "Accounting for the Impairment or Disposal of Long-Lived Assets". SFAS 144 requires that companies (1) recognize an impairment loss only if the carrying amount of a long-lived asset is not recoverable based on its undiscounted future cash flows and (2) measure an impairment loss as the difference between the carrying amount and fair value of the asset. In accordance with the provisions of SFAS No. 142, management reviews the carrying value of its goodwill annually for indicators of impairment in value. The fair value of the reporting unit is compared to the carrying value in order to determine if impairment exists. Adjustments to

reflect impairment in value, if necessary, are recorded to the extent the carrying value of the goodwill exceeds the implied fair value of the reporting unit goodwill.

Stock-Based Compensation

The Company accounts for stock-based employee compensation arrangements in accordance with the provisions of Accounting Principles Board opinion No. 25, "Accounting for Stock Issued to Employees", ("APB No. 25") and complies with the disclosure provisions of SFAS No. 123 "Accounting for Stock-Based Compensation". Under APB No. 25, compensation expense for employee options is recognized based on the difference, if any, on the date of grant between the fair market value of the Company's stock and the amount an employee must pay to exercise the options and acquire the Company's stock. Compensation expense is recognized immediately for past services and pro-rata for future services over the option-vesting period. No compensation expense was recorded under the intrinsic method of accounting in the reporting periods as the exercise price equa The Company applies SFAS No. 123, "Accounting for Stock-Based Compensation" ("SFAS 123") to account for stock options granted to non-employees using the fair value based method prescribed in SFAS 123. Stock-based compensation for non-employees is re-measured on each balance sheet date until such options vest. Compensation expense is recognized immediately for past services and pro-rata for future services over the option-vesting period.

In December 2002, the Financial Accounting Standards Board ("FASB") issued SFAS No. 148, "Accounting for Stock-Based Compensation – Transition and Disclosure, an amendment to SFAS No. 123". This statement amends SFAS No. 123 to provide alternative methods of transition for a voluntary change to the fair value-based method of accounting for stock-based employees' compensation. In addition, this statement amends the disclosure requirements of SFAS No. 123 to require prominent disclosures of pro-forma information in both annual and interim financial statements.

Research and Development

Research and development costs are charged to operations as incurred.

Loss Per Share

Loss per share is computed in accordance with SFAS No. 128, "Earnings Per Share". Basic loss per share is calculated by dividing the net loss available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution of securities that could share in earnings of an entity. In loss periods, dilutive common equivalent shares are excluded as the effect would be anti-dilutive. Basic and diluted loss per share are the same for the periods presented in these consolidated financial statements.

Comprehensive Income

SFAS No. 130, "Reporting Comprehensive Income", establishes standards for reporting and presentation of comprehensive income (loss). This standard defines comprehensive income as the changes in equity of an enterprise except those resulting from stockholder transactions.

Income Taxes

Income taxes are accounted for using the liability method which requires the recognition of income taxes payable or refundable for the current year and deferred tax liabilities and assets for the future consequences of events that have been recognized in the Company's financial statements or tax returns. Under this method, tax liabilities and assets are determined based on the temporary differences between the financial statement carrying amounts and tax bases of assets and liabilities using enacted tax rates in effect in the years in which the differences are expected to reverse. A valuation allowance is recorded to reduce deferred income tax assets recognized by the amount of any deferred income tax benefits that, based on available evidence, are not expected to be realized.

3. Convertible Notes Payable

In February 2004 and March 2004, the Company issued 1,000,000 units and 145,000 units at a price of \$2 per unit for aggregate gross proceeds of \$2,290,000 to a stockholder and four unaffiliated investors. Each unit consisted of two shares of Class A voting common stock, one Class A common share purchase warrant (the "Equity Warrant"), one convertible debenture with a principal amount of \$1, and one common share purchase warrant (the "Debt Warrant"). Each Equity Warrant entitled the holder to purchase one share of Class A common stock of the Company at \$0.60 per share for a period of two years exercisable commencing on the date which is 18 months after the date of issuance of the Equity Warrant. Each Debt Warrant entitles the holder to purchase one share of Class A voting common stock of the Company at \$1 per share for a period of two years and exercisable commencing on the date which is 18 months after the date of issuance of the Debt Warrant.

Each of the two convertible debentures bears interest at 2% per annum. The convertible debenture with the principal of \$1,000,000 will mature on February 15, 2006 and the convertible debenture with the principal amount totaling \$145,000 will mature on various dates in March 2006

The holders of the notes could elect to convert the outstanding principal under the notes in whole, into fully paid, restricted shares of the Company's Class A common stock at \$0.80 per share at maturity date. The Company also has the right to redeem the debentures, upon 10 days' written notice to the holder, by paying 105% of the outstanding principal amount plus accrued and unpaid interest.

The Company accounted for the convertible debentures in accordance with EITF No. 00-27 and accordingly, the proceeds from the sale of the 1,145,000 units were allocated between the various equity and debt instruments based on their relative fair values. The difference between the allocated fair value and the face value of the convertible debenture was recorded as a debt discount. No beneficial conversion feature was recorded as the quoted market value of the common stock on the commitment date was less than the proceeds allocated to the convertible instruments. The aggregated debt discount is amortized to interest expense over the term of the related debt using the effective interest rate method. Upon conversion of the underlying debt into common stock, a pro-rata share of the unamortized debt discount is recorded as interest expense.

The fair values of the Equity and Debt Warrants were calculated at the date of issuance using the Black Scholes option pricing model with the following assumptions: dividend yield – Nil; risk-free interest rate – 1.67%; expected volatility of 323% and expected lives of 2 years. The difference between the allocated fair value and the face value of the convertible debenture of \$451,732, was recorded as a debt discount and is being amortized over the term of the debt and has been fully amortized.

On July 1, 2015 the Company recognized \$1,092,052 in Debt Cancellation Income related to \$892,000 in convertible debentures that were beyond the Statute of Limitations for the collection of corporate debt along with the accrued interest associated with the stale debentures.
