1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION

ACL International Ltd. (the "Company") is an Alberta, Canada Corporation with common shares listed on the TSX Venture Exchange under the trading symbol "ACL". The Company's principal office is located at Suite 1600, 144 - 4 Avenue SW, Calgary, Alberta T2P 3N4.

On January 26, 2015, the Company entered into a letter of intent ("LOI") with Blue Sky International Holdings, Inc. with regard to an acquisition of oil and gas interests in the North Sumatra region of Indonesia.

Under the terms of the LOI, the Company was to acquire 100% of the issued and outstanding shares of Blue Sky Langsa Ltd. ("BSL"), effective January 1, 2015, from Blue Sky International Holdings, Inc.

The Company entered into an Amended and Restated Asset Purchase Agreement dated April 30, 2015 with Blue Sky Langsa Ltd. pursuant to which the Company has agreed to acquire from BSL a 50% interest in a Technical Assistance Contract for a block referred to as "Langsa TAC" located offshore, North Sumatra, Indonesia with an effective date of January 1, 2015. The purchase price of C$9,924,600 was paid with C$100,000 in cash and issued 81,871,667 Common Shares in the capital of ACL at a deemed price of C$0.12 per Common Share to certain nominees of BSL (the "Transaction").

On June 30, 2015 TSX Venture Exchange accepted the Company's application for a change of business from a general insurance brokerage issuer to an oil and gas issuer. In addition, the Company met the requirements to be listed as a TSX Venture Tier 1 issuer. Effective July 2, 2015, the listing of the Company's shares was transferred from the NEX to the TSX Venture exchange.

On June 29, 2015 the Company paid C$762,786 ($800,000 Australian) to acquire a 38.25% working interest in a Production Sharing Contract for the block referred to as "South Block A" (the "Assets") located onshore, North Sumatra, Indonesia, from Peak Oil & Gas (Australia) Pty Ltd. ("Peak"). The acquisition had an effective date of May 1, 2015 and closed on July 2, 2015. The Company acquired of all of the issued and outstanding shares of Peak Oil & Gas SBA Pte Ltd., ("POGSBA"), a loan in the amount of US$4,164,763 which was due to Peak from POGSBA. POGSBA owns 75% of the issued and outstanding shares of Renco Elang Energy Pte. Ltd. which owns a 51% working interest in the Assets and is the operator.

The disclosures provided below are incremental to those included with the annual consolidated financial statements. Certain information and disclosures normally included in the notes to the annual consolidated financial statements have been condensed or have been disclosed on an annual basis only. Accordingly, these condensed interim Consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended March 31, 2015.

The consolidated financial statements of the Company include the accounts of all of its subsidiaries. Subsidiaries are entities controlled by the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that currently are exercisable are taken into account. Assets, liabilities, revenues and expenses of the subsidiaries are recognized in accordance with the Company's accounting policies. Inter-company transactions and balances are eliminated upon consolidation. Transactions with non-controlling interests are treated as transactions with equity owners of the Company. Gains or losses on disposals to non-controlling interests are computed and recorded in equity.

These condensed interim Consolidated financial statements have been prepared on a going concern basis in accordance with International Financial Reporting Standards (IFRS) which contemplates the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business.

Financial assets and liabilities are offset and the net amount is reported on the condensed interim consolidated balance sheets only when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

The consolidated financial statements have been prepared on the historical cost basis except for the revaluation of certain financial assets and financial liabilities to fair value.

These financial statements are presented in Canadian dollars (unless stated otherwise), which is also the Company's functional currency.

These condensed interim consolidated financial statements and the accompanying notes were authorized for issuance in accordance with a resolution of the Board of Directors on November 30, 2015.

2. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies applied during the six month period ended September 30, 2015 are the same as those described and disclosed in Note 2 of the March 31, 2015 audited Consolidated financial statements.

3. FINANCIAL INSTRUMENTS

a) **Overview**

The Company's activities expose it to a variety of financial risks that arise as a result of its operating and financing activities such as credit risk, liquidity risk, foreign currency risk and interest rate risk. The Company manages its exposure to these risks by operating in a manner that minimizes this exposure.

b) **Fair value of financial instruments**

The Company's financial instruments as at September 30, 2015 included cash, trade receivables, trade payables, accrued liabilities, and long-term debt. The carrying amounts for short term financial assets and liabilities, which includes trade receivables, trade payables and accrued liabilities approximate fair values due to the immediate or short-term maturities of these financial instruments. Cash is classified as fair value through profit and loss and therefore are recorded at fair value.

Management estimated the fair value of its long-term debt taking into account market rates of interest, the condition of any related collateral and the current conditions in credit markets applicable to the Company based on recent transactions. The estimated fair value of long-term debt approximates its carrying value.

For financial instruments measured at fair value, disclosure about the inputs to fair value measurements are required, including their classification within a fair value hierarchy that prioritizes the significance of inputs used in making fair value measurements.

Level 1 Fair Value Measurements – quoted prices in active markets for identical assets or liabilities;

Level 2 Fair Value Measurements – inputs other than quoted prices included in Level 1 that are observable for the asset or liabilities, either directly (i.e. as prices) or indirectly (i.e. from derived prices); and

Level 3 Fair Value Measurements– inputs for the asset or liability that are not based upon observable market data.

Cash is based on Level 1 inputs of the fair value hierarchy.

c) **Financial risk management**

The Company's financial instruments are exposed to certain financial risks, including credit risk, foreign currency risk, interest rate risk and liquidity risk.

Credit risk

The Company is exposed to credit risk resulting from the possibility that counterparties may default on their financial obligations, or if there is a concentration of transactions carried out with the same counterparty or of financial obligations which have similar economic characteristics such that they could be similarly affected by changes in economic conditions.

The Company's financial instruments that are exposed to concentrations of credit risk relate primarily to cash, and trade receivables from partners in the oil and gas assets. Cash is in place with major financial institutions.

The Company has evaluation and monitoring processes in place and writes off accounts when they are determined to be uncollectible.

As at September 30, 2015, the Company's maximum exposure to credit risk is through the following assets:

Receivables	$	1,485,430
Net credit risk	$	1,485,430

Foreign currency risk
The Company is exposed to the financial risk related to fluctuations of foreign exchange rates. The Company conducts business operations in Indonesia and has U.S. dollar denominated revenue and indebtedness and is therefore exposed to cash flow risks associated with fluctuations in the relative value of the Canadian and U.S. dollar. A significant change in the currency exchange rate of the Canadian dollar relative to the U.S. dollar could have a material effect on the Company's results of operations, financial position and cash flows. The Company does not engage in hedging activities or use financial instruments to reduce its risk exposure.

At September 30, 2015, the Company is exposed to currency risk through the following assets and liabilities denominated in U.S. dollars:

Cash	$	141,245
Prepaid Expense		133,539
Trade payables and accrued liabilities		(583,563)
Long-term debt		(863,913)
Net exposure	$	(1,172,692)

Based on the above net exposure at September 30, 2015, and assuming all other variables remain constant, a 10% depreciation or appreciation of the Canadian dollar against the U.S. dollar would result in a decrease or increase of $ 117,269 in the Company's other comprehensive income (loss).

Interest rate risk
All of the Company's indebtedness bears interest at fixed rates and as a result the Company is not exposed to significant interest rate risk arising from long-term debt.

Liquidity risk
Liquidity risk is the risk that the Company cannot meet a demand for cash or fund its short and long-term obligations as they come due. Liquidity risk also includes the risk of not being able to liquidate assets in a timely manner at a reasonable price.

The Company manages its liquidity risk through cash and debt management. The Company's objective in managing liquidity risk is to increase revenues, minimize operational costs and to maintain sufficient liquidity in order to meet these operational requirements at any point in time. The Company's ability to obtain funding from external sources may be restricted if the Company's financial performance and condition deteriorate. In addition, credit and capital markets are subject to inherent global risks that may negatively affect the Company's access and ability to fund its short-term and long-term debt requirements. The Company mitigates these risks by actively monitoring market conditions and diversifying its sources of funding and debt maturity.

4. DISCONTINUED OPERATIONS

On March 3, 2014 the Company sold the property, equipment and customer accounts of its U.S. operations for net sales proceeds of $ 3,204,664 including transaction costs of $178,396. The Company realized a loss from discontinued operations of $ 2,804,844.

On May 1, 2014, the Company completed the sale of all of its shares (51%) in its Canadian subsidiary Anthony Clark Insurance Brokers Ltd. to an arm's length third party for cash consideration of approximately $13,000,000, before repayment of certain senior debt and adjustments. As the transaction contemplated the sale of all or substantially all of the Company's assets shareholder approval was obtained on April 14, 2014 and TSX Venture Exchange approval on April 22, 2014. The Company paid certain liabilities in the amount of $7,942,971 from the sale proceeds including debt settlement $6,101,475, legal expenses $277,221 and severance and outstanding compensation of $1,564,275. The transaction resulted in a gain on sale of discontinued operations of $12,095,558.

There were no activities in discontinued US operations however a loss of $22,990 resulted due to insurance cost and reversal of consultancy fees accrual during the six months ended September 30, 2015.

The gain (loss) from discontinued operations for the three month period ended September 30, 2015 and 2014 is summarized below:
