Note 13: Supplemental information with respect to cash flows

The accompanying notes are an integral part of these consolidated financial statements.

1. Nature of operations and going concern:

A.I.S. Resources Limited (the “Company” or “A.I.S.”) was incorporated under the laws of Bahamas Islands. On December 20, 2018, the Company continued as a British Columbia corporation and is now governed by the Business Corporations Act (British Columbia). The business of A.I.S. is to hold various investments in marketable securities and to directly invest in exploration and evaluation assets.

The head office and principal address of the Company are located at Suite 2300 – 1177 West Hastings Street, Vancouver, British Columbia, Canada V6E 2K3. The Company’s records office and registered office is located at Suite 700 - 1199 West Hastings Street, Vancouver, British Columbia, Canada, V6E 3T5.

The condensed interim consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern which assumes that the Company will continue its operations and will be able to realize the carrying value of its assets and discharge its liabilities in the normal course of business. At March 31, 2019, the Company had working capital deficit of $1,148,668 and an accumulated deficit of $11,829,133. The ability of the Company to continue as a going concern is dependent upon the continued financial support from related parties, the ability of the Company to raise equity financing to continue investment activities and upon future profitable operations or proceeds from disposition of investments. Given the operating losses accumulated in the last number of years, the Company’s ability to realize its assets and discharge its liabilities depends on continued support from its directors, the ability to raise further funds to provide working capital and ultimately on generating future profitable operations. These uncertainties cast a significant doubt on the ability of the Company to continue operations as a going concern. The condensed interim consolidated financial statements do not reflect adjustments to the carrying values of assets, liabilities or reported results should the Company be unable to continue as a going concern.

2. Basis of preparation and significant accounting policies:

Statement of compliance

These condensed interim consolidated financial statements for the three months ended March 31, 2019 have been prepared in accordance with International Accounting Standards (IAS) 34 Interim Financial Reporting using the accounting policies adopted by the Company in its most recent annual financial statements.

These condensed interim consolidated financial statements should be read in conjunction with the Company’s audited financial statements for the year ended December 31, 2018, which were prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (IASB).

The condensed interim consolidated financial statements were approved by the Board of Directors and authorized for issue on May 30, 2019.

Basis of consolidation and presentation

The condensed interim consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments which are valued at fair value through profit or loss. Historical cost is generally based on the fair value of the consideration given in exchange for assets. In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information.

2. Basis of preparation and significant accounting policies (continued):

These consolidated financial statements incorporate the financial statements of the Company and its controlled subsidiary. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The consolidated financial statements include the accounts of the Company and its direct wholly-owned subsidiary, AIS Resources S.A., an Argentina company. All significant intercompany transactions and balances have been eliminated.

The financial statements of a subsidiary are included in the consolidated financial statements from the date that control commences until the date that control ceases. When the Company ceases to control a subsidiary, assets, liabilities and non-controlling interests of the subsidiary are derecognized at their carrying amounts at the date when control is lost. Investment retained in the former subsidiary is recognized at its fair value and any gain or loss resulting from deconsolidation is recorded through profit or loss.

The financial statements are presented in Canadian dollars which is the functional currency of the Company and its subsidiary.

3. Cash deposits:

The Company had cash deposits of $51,306 at March 31, 2019 (December 31, 2018 - $73,349).

4. Account Receivable

Accounts receivable comprises USD $139,498 receivable from the Company's exploration partner MGX Mineral Inc. pursuant to the option agreement for Salitinas, Salinas Grandes property. *(Note 8d)*

The exploration and evaluation assets of the Company were based in Argentina as at March 31, 2019. (Note 8)

15. Financial instruments and financial risk management:

(a) Fair Value:

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

15. Financial instruments and financial risk management (continued):

The Company, through its financial assets and liabilities, has exposure to the following risks from its use of financial instruments.

The fair value of the other investment is disclosed in Note 7 of the consolidated financial statements and is based on inputs that are based on other observable data – Level 2.

The Company's financial instruments as at March 31, 2019 and December 31, 2018 include cash, accounts receivable, other investments, accounts payable, due to related parties and promissory notes. The fair value of these financial instruments, approximate their carrying amounts due to their short terms to maturity.

(b) Credit risk:

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Cash and cash equivalent deposits are placed with financial institutions that have a high credit rating and the Company considers the credit risk on bank deposits to be insignificant. The Company considers the credit risk on loans receivable to be low. The carrying amounts of cash, cash equivalent deposits, accounts receivable and notes receivable represents the maximum exposure to credit risk.

The Company avoids complex investment vehicles with higher risk such as asset-backed commercial paper and derivatives contracts and acquires equity investments.

(c) Liquidity risk:

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions without incurring unacceptable losses or risking harm to the Company's reputation. The companies, in which A.I.S. holds shares, have varying degrees of liquidity and there is no assurance that the investment can be sold at the quoted market price.

The Company maintained cash at March 31, 2019 in the amount of $51,306 (December 31, 2018 - $73,349), to meet short-term business requirements of $1,454,648 (December 31, 2018 - $1,122,167). All payables are current.

(d) Market risk:

Market risk is the risk that changes in market prices, such as foreign exchange rates, commodity prices and interest rates will affect the Company's net earnings or the value of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

(e) Equity price risk:

Equity price risk arises from the fluctuations in the trading price of equity securities. The Company monitors the mix of marketable securities in its investment portfolio based on market expectations. The investments are recorded at fair value which is affected by changes in the market price of the equity securities. The nature of the equity investments exposes the Company to significant equity price risks.

15. Financial instruments and financial risk management (continued):

(f) Interest rate risk:

The Company is not exposed to significant interest rate risk.

(g) Foreign exchange risk

Foreign currency exchange risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency.

The Company has financial assets and liabilities denominated in the American dollar (USD) and Argentinian Pesos (ARS). The Company does not hedge its exposure to fluctuations in foreign exchange rates.

The following is an analysis of Canadian dollar equivalent of financial assets and liabilities that are denominated in USD and ARS:

	March 31, 2019	December 31, 2018
	$	$

16. Management of capital structure:

The Company considers the amount of capital it requires in proportion to the associated risks. Generally, it is the Company policy to operate with an under leveraged financial position but as conditions warrant, it may from time to time depart from this policy and use debt. Liquidity and cash management is the highest priority. Therefore, adjustments may be made to the capital structure in light of changes in economic conditions and the risk characteristics of the investment portfolio. The capital structure can be adjusted in a variety of ways as circumstances may change, including: purchasing shares for cancellation (Normal Course Issuer Bid); issuing new common and preferred shares; and increasing or repaying long-term debt. The Company's objectives when managing capital are the safeguarding of assets.

The Company's share capital is not subject to external restrictions.

The Company has not paid or declared any dividends since date of incorporation, nor are any contemplated in the foreseeable future.

16. Subsequent events:

Subsequent to the three months ended March 31, 2019, the following events occurred:

i) 400,000 stock options exercisable at $0.28 and 100,000 stock options exercisable at $0.20 expired unexercised. *(Note 11)*

ii) The Company concluded to not pursue the Salitinas, Salinas Grandes property acquisition option agreement based on unsatisfactory results from the drilling program.
