On September 10, 2012, the Board of Directors authorized a significantly reduced conversion formula for the convertibility of its Preferred B Shares into Common Shares. This action was taken as a proactive effort to help support an increased valuation of the company's common shares.

The following information is provided as brief guidance concerning the changes to the Certificate of

Designations portion of our Bylaws, as well as our Articles of Incorporation, which have been amended:

- Preferred A Shares are not convertible into common shares.
- Preferred B Shareholders may convert their Preferred B shares consistent with a declining conversion rate based on the increasing value of the common shares which can go as low as 20:1. This is a reduction from the previous conversion rate of 2000:1

Plan of Operation

- The mobile applications industry is in a state of rapid and explosive international growth fed by the increasingly larger number of smart phone mobile devices sold every day. With the addition of Verizon and Sprint as an iPhone provider in the US, the user base and the resulting demand for apps continues to grow. Action App is also well positioned in overseas markets with the majority of our foreign website traffic coming from Japan, the leading country in mobile subscription density per capita.
- Action App Corporation will continue to keep pace with the growth of the industry and user demand while expanding further into overseas markets where the growth potential is even higher than the U.S. For example, there are nearly 280 million mobile users in China and at the rate they are growing there will be more mobile web users in China than the entire population of the United States.
- Action App Corporation plans to aggressively expand by adding more mobile apps, improving current apps by using detailed integrated analytic data from our user

network, increasing affiliate marketing and advertising revenue of current and future apps, branching out into more applications categories other than entertainment and photography, porting our applications into the strongest competing mobile platform (Android), acquiring other apps and/or application companies, and translating all applications into more languages to increase revenue in non-English speaking markets.

Notes To Consolidated Financial Statements

Note A — Nature Of Business And Summary Of Significant Accounting Policies

Incorporate in the State of Delaware in September 2000 as Natell Corporation. The corporation changed its name to Title Consulting Services on March 23, 2009. On July 5, 2011 Title Consulting Services, Inc. a Delaware Corporation, redomiciled to Nevada from Delaware and changed its name to Andiamo Corporation (the "Company"). The Company is a holding company that owns a software application company.

Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting. Revenues are recognized at the time when the services are provided and earned and expenses are recorded when incurred.

Cash and Cash Equivalents

For purposes of the statement of cash flows, the Company considers all unrestricted highly liquid investments with an initial maturity of three months or less to be cash equivalents.

Income Taxes

The Company files as a regular C corporation for federal tax purposes. *Use of Estimates*

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Advertising

The Company expenses all advertising and marketing costs as incurred. Advertising and marketing costs for the quarter ended January 31, 2013 was \$596.

Fair Value of Financial Instruments

The Company believes that the carrying value of its current assets and current liabilities approximate the fair value of such items due to their short-term nature. The carrying amounts of cash, accounts receivable, accounts payable and other liabilities are carried at amounts that reasonably approximate their fair values.

Property and Equipment

Property and equipment are stated at cost. The Company provides for amortization on

the straight-line method and depreciation on the straight-line and MACRS methods over the estimated useful lives of the related assets. Major classes of property and equipment and their related lives are as follows:

Software - 3 to 15 years

Maintenance and repairs are expensed as incurred. Replacements and betterments are capitalized. *Asset Impairment*

When the Company has long-lived assets which have a possible impairment indicator, the Company estimates the future cash flows from the operation of these assets. Because events and circumstances frequently do not occur as expected, there will usually be differences between the estimated and actual future cash flow and these differences may be material. If the estimated cash flows recoup the recorded value of the assets, they remain on the books at that value. If the

net recorded value cannot be recovered, the assets are written down to their market value if lower than the recorded value.
