## **PART A. GENERAL COMPANY INFORMATION**

### **Item I. The exact name of the issuer and its predecessor (if any).**

Anasazi Energy Corporation (the “Company”, and together with all of its subsidiaries, “Anasazi”) was originally incorporated in Nevada as Royal Blue Explorations, Inc. On June 18, 2008, the Company’s name was changed to CH4 Energy, Inc. On March 26, 2014, the Company’s name was changed to High Sierra Acquisitions, Inc. by an amendment filed with the Nevada Secretary of State after approval by the Company’s directors and shareholders. On November 4, 2014, the Company’s name was changed to Anasazi Energy Corporation by an amendment filed with the Nevada Secretary of State after approval by the Company’s directors and shareholders.

On May 31, 2016 the Company entered into a Reorganization and Stock Purchase Agreement (“RSPA”) with Solar Quartz Technologies Limited, incorporated in New Zealand. The agreed value of the transaction assets is US\$530 million. On July 12, 2016, the transaction closed into escrow and on October 1, 2016, was finalized completely and the transaction closed.

As part of the Closing, the Company issued shares of common stock in ANSZ to the shareholders of SQT that are equivalent to 95% of the Company’s total outstanding shares. The Company does not anticipate any further reorganization of its common stock. The Company has begun the process of engaging an independent accountant to prepare audited financial statements and become fully reporting with the Securities and Exchange Commission (“SEC”), and subsequently apply to trade on the more senior OTCQX exchange or NASDAQ. The Company anticipates qualifying to trade on a more senior exchange in the first quarter of 2017.

#### **Item VI. The nature of the issuer's business**

##### **Item VI. Description of the issuer's business, products and services.**

*The following discussion and analysis should be read in conjunction with the accompanying unaudited condensed consolidated financial statements and related notes included elsewhere in this report. It contains forward-looking statements that reflect our future plans, estimates, beliefs and expected performance. The forward-looking statements are dependent upon events, risks and uncertainties that may be outside our control. Our actual results could differ materially from those discussed in these forward looking statements. Factors that could cause or contribute to such differences include, but are not limited to, the following risks and uncertainties:*

Anasazi Energy Corporation (the "Company", and together with all of its subsidiaries, "Anasazi") was originally incorporated in Nevada as Royal Blue Explorations, Inc. On June 18, 2008 the Company's name was changed to CH4 Energy, Inc. On March 26, 2014, the Company's name was changed to High Sierra Acquisitions, Inc. by an amendment filed with the Nevada Secretary of State after approval by the Company's directors and shareholders. On November 4, 2014, the Company's name was changed to Anasazi Energy Corporation by an amendment filed with the Nevada Secretary of State after approval by the Company's directors and shareholders. The Company has begun the process of changing its name to Solar Quartz Technologies, Inc.

The Company's primary SIC code is 1382 Oil and Gas Exploration Services. The Company currently has a September 30 fiscal year end.

## ***Business Overview***

Anasazi Energy Corporation (“Anasazi” or the “Company”) was initially founded to engage in the acquisition, development and production of oil and gas properties as an independent oil and gas company. The principal business of Anasazi will now materially change as a result of closing the transaction with SQT.

### ***Initial Leased Oil and Gas Property***

For the period ended September 30, 2016, the Company owned a 3% working interest in three producing oil wells, having completed the acquisition of the Glide-Williams mineral lease in September 2014. From September 2014 through December 31, 2014, the Company owned a 95% working interest in these leases, but all but 3% of the interest was reassigned back to the assignors effective December 31, 2014. The 3% working interest was reassigned back to the assignors effective October 1, 2016. The lease covers 120 acres in Kern County, California, northwest of Bakersfield, CA. Two wells were drilled in 1956 and one in 1964 to depths of 7,800 feet and 7,600 feet respectively, both being completed in the Randolph Sand. The wells produce with minimal operating expenses. Based on an independently appraised engineering SEC valuation, we initially capitalized the oil and gas properties at \$500,000 and issued 4,400,000 shares of common stock for the assignment of the lease.

### ***Acquisition of SQT***

On May 31, 2016 the Company entered into a Reorganization and Stock Purchase Agreement (“RSPA”) with Solar Quartz Technologies Limited, incorporated in New Zealand. The agreed value of the transaction assets is US\$530 million. The transaction closed into escrow on July 12, 2016 and was finally completed and closed effective October 1, 2016.

As part of the closing, the Company issued shares of common stock to SQT equivalent to 95% of the Company’s currently outstanding shares. The Company does not anticipate any further reorganization of its common stock. The Company has begun the process of engaging accountants and auditors to prepare audited financial statements and become fully reporting with the SEC, and subsequently apply to trade on the more senior OTCQX exchange or NASDAQ. The company anticipates qualifying to trade on a more senior exchange during the first quarter of 2017.

### ***Business of SQT***

#### ***High-tech Solar, SemiConductor & High-End Electronics HPQSManufacturing Facility***

SQT is a new Technology Company with a highly experienced management and technical team capitalizing on 6 years’ of experience in all facets of the high-tech manufacturing and processing of High Purity Silica and associated high purity silica products. They have a proven ability to

process and manufacture HPQ into High Purity Quartz Sand (HPQS) which are sold to the global solar, electronics and semi-conductor industries.

Solar Quartz Technologies Limited is not a mineral resource company but a High-Tech Refining and Processing enterprise group focused on the production of commercial quantities of High Purity Quartz Sand ("HPQS"), an essential component necessary for the manufacture of PV Solar Panels, Semi-conductors and in fact all high-end electronics. The longevity of the SQT projects is also assured due to SQT's wholly-owned extensive supplies of silica feedstock raw material for refining HPQs mineral deposits (Aus IMM JORC 14 million tonnes) located in Queensland, Australia.

SQT's primary focus is on reestablishing a new Commercial Scale highly profitable production factories for commercial quantities (30,000-50,000 tpa.) of High Purity Quartz Sand from new commercial facilities in both Australia and the USA.

The SQT management team has had extensive hands on experience in all technical and operational management area of the highly lucrative HPQS manufacturing business.

We believe SQT has limited competition, as there are only a handful of organizations capable of manufacturing appropriate high quality commercial quantities of HPQS globally. HPQS is traditionally in a position of under supply compared to global requirements. The burgeoning global demand for large capacity power generating solar farms both in the US and worldwide is further accentuating the high demand for high purity silica production.

#### *PV Solar Panel Feedstock Production Materials*

SQT has attracted a high degree of interest from large potential Joint Venture Global end-users of Solar Grade silicon metal necessary for the production of all PV solar panels. SQT's sole ownership of large mineral deposits of high purity silica/quartz feedstock provides substantial cost advantages compared to global pricing of such high purity silica/quartz feedstock. We believe SQT is well positioned to become a dominant global supplier of all raw materials required in the production of both PV Solar panels, and HPQS to many segments of the Semi-conductor, and the high-end electronics manufacturing industries.
