**AXIS ENERGY CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(An Exploration Stage Company)**  
**September 30, 2013**

---

**NOTE 1 – ORGANIZATION AND DESCRIPTION OF BUSINESS**

Axis Energy Corporation (hereinafter "the Company") was incorporated on June 10, 1998 under the laws of the State of Nevada primarily for the purpose of acquiring and developing resource properties. The Company conducts operations primarily from its offices in Vancouver, British Columbia, Canada. The Company had an option at incorporation to acquire a resource property in British Columbia, but after a period of exploration, the property was abandoned in the year ended December 31, 2000. Since then, the Company has examined various opportunities but has not as yet made a commitment to any project.

The financial statements have been prepared in accordance with generally accepted accounting principles for the interim financial information and Rule 8 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of the Company's management, all adjustments (consisting of only normal accruals) considered necessary for a fair presentation have been included.

For further information, refer to the financial statements and notes thereto included in the Company's Annual Report for the year ended December 31, 2012.

The Company's year-end is December 31.

**NOTE 2 – ACCOUNTING POLICIES**

This summary of significant accounting policies of Axis Energy Corporation is presented to assist in understanding the Company's financial statements. The financial statements and notes are representations of the Company's management, which is responsible for their integrity and objectivity. These accounting policies conform to accounting principles generally accepted in the United States of America and have been consistently applied in the preparation of the financial statements.

Basic and Diluted Loss Per Share

Loss per share was computed by dividing the net loss by the weighted average number of shares outstanding during the period. The weighted average number of shares was calculated by taking the number of shares outstanding and weighting them by the amount of time that they were outstanding. Basic and diluted loss per share are the same, as inclusion of common stock equivalents would be anti dilutive.

Going Concern

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. The Company has suffered recurring losses from operations since inception. At September 30, 2013 the Company had a positive working capital of \$16,083, but incurred recurring losses, an accumulated deficit of \$709,482, and negative cash flow from operations. These factors raise doubt about the Company's ability to continue as a going concern. Continuation of the Company is dependent on achieving sufficiently profitable operations and

**AXIS ENERGY CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(An Exploration Stage Company)**  
**September 30, 2013**

---

possibly obtaining additional financing. Management has and is continuing to raise additional capital from various sources. There can be no assurance that the Company will be successful in raising additional capital should it decide additional capital is required.

The financial statements do not include any adjustment relating to the recoverability and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

Equipment and amortization

The Company records the purchase of equipment at cost and amortizes the assets over their estimated useful life using the straight line basis over five years.

Use of Estimates

The process of preparing financial statements in conformity with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions regarding certain types of assets, liabilities, revenues, and expenses. Such estimates primarily relate to unsettled transactions and events as of the date of the financial statements. Accordingly, upon settlement, actual results may differ from estimated amounts.

Exploration Stage

The Company began its exploration stage on June 10, 1998 at which time it commenced the exploration of its British Columbia property which was subsequently abandoned.

Cash and Cash Equivalents

The Company considers all highly liquid instruments with maturity of three months or less at the time of issuance to be cash equivalents. As at September 30, 2013, the Company did not have any cash equivalents.

Financial Instruments

Fair Value:

The fair value of cash and cash equivalents, accounts payable and accrued liabilities and loans to related party were estimated to approximate their carrying values due to the immediate short-term maturity of these financial instruments.

Risk

The Company maintains its cash accounts in primarily in one commercial bank in Vancouver, British Columbia, Canada. Canadian dollar amounts are insured up to a maximum of \$100,000 Canadian per account. However, the Company's business checking account, which is maintained in United States dollars, is not insured.

The Company is subject to currency risks, which management believes are insignificant. The accompanying financial statements do not include any adjustments that might result from the eventual outcome of the risks and uncertainties described above.

Comprehensive Loss

In accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 220, "*Comprehensive Income*" ("ASC 220"), comprehensive income

**AXIS ENERGY CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(An Exploration Stage Company)**  
**September 30, 2013**

---

consists of net income and other gains and losses affecting stockholder's equity that are excluded from net income, such as unrealized gains and losses on investments available for sale, foreign currency translation gains and losses and minimum pension liability.

Oil and Gas Property

The Company follows the full cost method of accounting for oil and gas operations whereby all costs associated with the acquisition, exploration and development of oil and gas properties will be capitalized in cost centers on a country-by-country basis. These capitalized amounts include the costs of unproved properties, internal costs directly related to acquisitions, development and exploration activities, asset retirement costs and capitalized interest. They include geological and geophysical studies, and costs of drilling both productive and non-productive wells.

Amortization will be calculated for producing properties by using the unit-of-production method based on proved reserves before royalties, as determined by management of the Company or independent consultants. Unproved reserves are exempt from amortization and are subject to annual assessment as noted below. Sales of oil and gas properties will be accounted for as adjustments of capitalized costs, without any gain or loss recognized, unless such adjustments significantly alter the relationship between capitalized costs and proved reserves of oil and gas attributable to a cost center. Costs of abandoned oil and gas properties will be accounted for as adjustments of capitalized cost and written off to expense.

A ceiling test will be applied to each cost center by comparing the net capitalized costs to the present value of the estimated future net revenue from production of proved reserves, based on commodity prices in effect as at the Company's year-end and based on current operating costs, discounted by 10%, less the effects of future costs to develop and produce the proved reserves, , plus the lower of costs or estimated fair value of unproved properties net of impairment, and less the effects of income taxes. Any excess capitalized costs are written off to operations.

Unproved properties will be assessed for impairment on an annual basis by applying factors that rely on historical experience. In general, the Company may write-off any unproved property under one or more of the following conditions:

- i) there are no firm plans for further drilling on the unproved property;
- ii) negative results were obtained from studies of unproved property;
- ii) negative results were obtained from studies conducted in the vicinity of the unproved property; or
- iv) the remaining term of the unproved property does not allow sufficient time for further studies or drilling.

Asset Retirement Obligations

The Company will recognize a liability for future asset retirement obligations associated with oil and gas properties. The estimated fair value of the asset retirement obligation will be based on current cost escalated at an inflation rate and discounted at a credit adjusted risk-free rate. This liability will be capitalized as part of the cost of the related asset and amortized over its useful life. The liability will accrete until the Company settles the obligation. As of March 31, 2012 the Company did not have any asset retirement obligations.

---

Fair Value Measurements

Effective January 1, 2008, the Company adopted) Accounting Standards code (“ASC”) topic 820 “*Fair Value Measurements and Disclosures*”, for all financial instruments and non-financial instruments accounted for at fair value on a recurring basis. ASC 820 establishes a single definition of fair value and a framework for measuring fair value, sets out a fair value hierarchy to be used to classify the source of information used in fair value measurement and expands disclosures about fair value measurements required under other accounting pronouncements. It does not change existing guidance as to whether or not an instrument is carried at fair value.

The Company defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities, which are required to be recorded at fair value, the Company considers the principal or most advantageous market in which the Company would transact and the market-based risk measurements or assumptions that market participants would use in pricing the asset or liability, such as inherent risk, transfer restrictions and credit risk. The Company has adopted ASC 825, “*Financial Instruments*”, which allows companies to choose to measure eligible financial instruments and certain other items at fair value that are not required to be measured at fair value. The Company has not elected the fair value option for any eligible financial instruments.

Revenue Recognition

The Company recognizes revenue when a contract is in place, minerals are delivered to the purchaser and collectability is reasonably assured

Foreign Currency Translation

The Company's functional currency is US dollars. Foreign currency balances are translated into US dollars as follows:

Monetary assets and liabilities are translated at the period-end exchange rate. Non-monetary assets are translated at the rate of exchange in effect at their acquisition, unless such assets are carried at market or nominal value, in which case they are translated at the period-end exchange rate. Revenue and expense items are translated at the average exchange rate for the period. Foreign exchange gains and losses arising are included in the determination of net income for the respective periods.

Derivative Instruments

The Company follows ASC topic 815, “*Derivatives and Hedges*”. This standard established accounting and reporting requirements for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. In general, this standard requires that an entity recognize all derivatives as either assets or liabilities in the balance sheet and measure those instruments at fair value.

If certain conditions are met, a derivative may be specifically designated as a hedge, the objective of which is to match the timing of gain or loss recognition on the hedging derivative with the recognition of (i) the changes in the fair value of the hedged asset or liability that are

**AXIS ENERGY CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(An Exploration Stage Company)**  
**September 30, 2013**

---

attributable to the hedged risk or (ii) the earnings effect of the hedged forecasted transaction. For a derivative not designated as a hedging instrument, the gain or loss is recognized in income in the period of change.

Historically, the Company has not entered into derivatives contracts to hedge existing risks or for speculative purposes. At September 30, 2013 the Company has not engaged in any transactions that would be considered derivative instruments or hedging activities.

Income Taxes

The Company accounts for income taxes under an asset and liability approach that requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been recognized in the Company's financial statements or tax returns. In estimating future tax consequences, all expected future events other than enactment of changes in the tax laws or rates are considered. Due to the uncertainty regarding the Company's future profitability, the future tax benefits of its losses have been fully allowed for and no net tax benefit has been recorded in the financial statements during the periods presented

Net Income (loss) Per Common Share

Net income (loss) per common share is calculated using the weighted average number of common shares outstanding during the period. Diluted net income (loss) per common share is calculated using the treasury stock method which uses the weighted average number of common shares outstanding during the period and also includes the dilutive effect of potentially issuable common shares. Dilutive net income (loss) per share on the potential exercise of the equity-based financial instruments is not presented where the effect is anti-dilutive.

Recent Accounting Pronouncements

The Company adopts new accounting pronouncements relating to generally accepted accounting principles applicable to the Company as they are issued, which may be in advance of their effective adoption date. Management does not believe that any recently issued but not yet effective standards, if currently adopted, would have a material effect on these financial statements.

**NOTE 3 – PREFERRED STOCK**

The Company's directors authorized 10,000,000 preferred shares with a par value of \$0.01. The preferred shares will have rights and preferences set from time to time by the Board of Directors. As of September 30, 2013 the Company has no preferred shares issued and outstanding.

**NOTE 4 – COMMON STOCK**

The Company is authorized to issue 75,000,000 shares of \$0.001 par value common stock. All shares have equal voting rights, are non-assessable and have one vote per share. Voting rights are not cumulative and, therefore, the holders of more than 50% of the common stock could, if they choose to do so, elect all of the directors of the Company.

**AXIS ENERGY CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(An Exploration Stage Company)**  
**September 30, 2013**

---

On February 18, 2000, the Company declared a forward stock split of 1.4 shares for 1. On February 15, 2003, the Company declared a reverse split of 10 share to 1 share. These financial statements give retroactive effect to those stock splits.

There were no share options or warrants outstanding as at September 30, 2013.

**NOTE 5 – RELATED PARTY TRANSACTIONS**

At September 30, 2013, Due to Related Party amounted to \$11,106 representing advances made by a director of the Company. These amounts are unsecured, non-interest bearing, and have no specific terms of repayment.
