BIGSUPERSEARCH.COM, INC.
(A DEVELOPMENT STAGE ENTERPRISE)
NOTES TO THE FINANCIAL STATEMENTS

NOTE I - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business

The Company, BIGSUPERSEARCH.COM, INC., is an online advertising and technology company that provides advertising solutions for consumers, publishers and advertisers. The primary recognizable function is that of an online search engine.

The Company was incorporated under the laws of the State of California on November 15th, 2005 and operates as a C corporation. Big Super Search ("The Company") is an online advertising and technology company that provides advertising solutions for consumers, publishers and advertisers. The Company offers advertisers the ability to reach Internet users throughout the global community via contextually targeted keywords. The Company utilizes "Pay per click" or the sale of "keywords" - as people search for that keyword and click on a link; we get paid by the advertiser. The other way is to offer search service with advertising on the side targeted by keyword like Google, MSN, Yahoo, AOL and other top tier Search Portals as a private label. Our intent is to license our SETE(tm) Search Engine Technology Engine platform to hundreds of thousands of Blogs, second tier portals and others via a Search Widget that will enable them to convert traffic via their sites to revenue.

The Company has a calendar year end for reporting purposes.

Basis of Presentation

The accompanying financial statements are presented in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

Development Stage Company

The Company is in the development stage as more fully defined in Statement No.7 of the Financial Accounting Standards Board. The Company is in the business of researching, developing and commercializing new technologies.

In a development stage company, management devotes most of its activities to preparing the business for operations. The ability of the Company to emerge from the development stage with respect to any planned principal business activity is dependent upon its successful efforts to raise additional equity financing and/or attain profitable operations.

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments with original maturities not exceeding three months to be cash equivalents.

Accounts Receivable

Customer accounts receivable are reported at the amount management expects to collect on balances outstanding as of the balance sheet dates. The Company expects to collect on all accounts receivable as of the balance sheet dates and, as such, does not consider an allowance for doubtful accounts receivable necessary.

See compilation report.

(A DEVELOPMENT STAGE ENTERPRISE)
NOTES TO THE FINANCIAL STATEMENTS

Property, Equipment and Depreciation

Property and equipment are recorded at cost. Depreciation is provided over the estimated useful lives of the related assets using the straight-line method for financial statement purposes. The Company uses other depreciation methods (generally accelerated) for tax purposes where appropriate. Amortization of leasehold improvements is computed using the straight-line method over the shorter of the remaining lease term or the estimated useful lives of the improvements. The estimated useful lives of property and equipment are as follows:

Furniture and Fixtures	5 – 7 years
Office Equipment	3 – 5 years
Transportation Equipment	5 years

Use of Estimates

In preparing financial statements, management makes estimates and assumptions that affect the reported amounts of assets and liabilities in the balance sheet and revenue and expenses in the income statement. Actual results could differ from those estimates.

Revenue Recognition

The Company operates under a traditional search engine revenue model which is patterned after Yahoo and Google, and will rely on Pay per Click, Cost per Click and Banner Ads and the development of Affiliate programs. Pay per click (PPC) is an Internet advertising model used on websites, in which advertisers pay their host only when their ad is clicked. Advertisers typically bid on keyword phrases relevant to their target market. Pay per Click rates are determined by the popularity of the ads content. Cost per click (CPC) is the amount of money an advertiser pays search engines for a single click on its advertisement that brings one visitor to its website. A web banner is a form of online advertising which entails embedding an advertisement into a web page. It is intended to attract traffic to a website by linking to the website of the advertiser. The web banner is displayed when a web page that references the banner is loaded into a web browser. This event is known as an "impression". When the viewer clicks on the banner, the viewer is directed to the website advertised in the banner. This event is known as a "click through". Impressions and click through are sold to advertisers on a predetermined calculated ratio. The Company intends to create additional revenue streams by developing Vertical Search Portals for specific Vertical markets: Dating, Travel, Automotive, etc. In addition to the traditional revenue generating mechanisms, the Company will attempt to acquire other revenue generating web sites in order to bolster its bottom line. The Company as of October 1st, 2015 will begin plans for on line wholesale/retail merchandise sales utilizing global platforms in 2016.

NOTE 2 – ADDITIONAL FUNDS

Management's plans for continued existence include selling additional stock or borrowing additional funds to pay overhead expenses while current marketing efforts continue to raise its prospects of future sales. The Company will consult with Investment Bankers to explore PIPE financing as a viable future funding option as capital as needed. In addition, the Company's small core group of initial accredited shareholders possesses the vested interest and financial ability to provide additional future financial support.

NOTE 3 - DOMAINS

The Company presently controls two Domains, www.bigsupersearch.com and www.grandaddy.com. Both Domains were purchased through godaddy.com at different intervals; bigsupersearch.com was acquired in September of 2005 and the web site and software were developed internally. The Company is an online advertising and technology company that provides high quality and relevant advertising solutions for consumers, publishers and advertisers. Grandaddy.com was acquired in September of 2007 and is presently an inactive domain, to date there has been no design or software development performed. The Domain was acquired for future development as a Meta Search Engine. A meta-search engine is a search tool that sends user requests to several other search engines and/or databases and aggregates the results into a single list or displays them according to their source. Metasearch engines enable users to enter search criteria once and access several search engines simultaneously. Metasearch engines operate on the premise that the Web is too large for any one search engine to index it all and that more comprehensive search results can be obtained by combining the results from several search engines. This also may save the user from having to use multiple search engines separately.
