**CAFÉ SERENDIPITY HOLDINGS, INC.**  
**Notes to Condensed Consolidated Financial Statements**

**Note 1 – Description of the Business and Summary of Significant Accounting Policies**

The Company was incorporated as DSE Fishman, Inc., in the State of Nevada on July 15, 2002. On May 14, 2008, DSE Fishman changed its name to Force Fuels, Inc. (“the Company”). At that time the primary focus of the Company became the development and marketing of a proprietary, zero emission hydrogen fuel cell/electric battery hybrid drive system for automotive utilization. In October 2009, the Company retained new management and began the process of exploring the feasibility of acquiring, developing and marketing of green energy products as well as regulated and standardized energy based products, including traditional hydrocarbon based oil and gas and solar and wind energy.

For the year ended July 31, 2014, the Company maintained minimal operations while exploring the feasibility of acquiring, developing, and marketing profitable business operations. The Company also was investigating other opportunities to diversify its business model.

On May 6, 2014, the Company entered into a Stock Purchase Agreement, dated as of May 6, 2014 with Café Serendipity, Inc. a Nevada corporation (“Café Serendipity”) whereby Café Serendipity would sell 100% of Café Serendipity’s outstanding capital common stock to the Company. As consideration for the Agreement, the Company agreed to issue 3,000,000 shares of common stock.

On December 15, 2014, Force Fuels, Inc. changed its name to Café Serendipity Holdings, Inc.

On July 23, 2015, the Company filed a Certificate of Amendment (the “Amendment”) with the Secretary of State of the State of Nevada to effect a reverse stock split of its outstanding shares of common stock and preferred stock at a ratio of 1 for 10 (the “Stock Split”), which Amendment became effective on August 13, 2015. Unless otherwise noted, all references herein to the number of common shares, price per common share or weighted average number of common shares outstanding have been adjusted to reflect this reverse stock split on a retroactive basis.

The Company's common shares are currently quoted on the OTC Pink market of OTC Markets Group, Inc. under the trading symbol “CAFS”. As used in this Report, unless otherwise stated, all references to the “Company”, “we,” “our”, “us” and words of similar import, refer to Café Serendipity Holdings, Inc.

**Going Concern**

The Company’s Consolidated Financial Statements included elsewhere in this Report have been prepared on a going concern basis, which implies the Company will continue to realize its assets and discharge its liabilities in the normal course of business.

The continuation of the Company as a going concern is dependent upon the ability of the Company sell our licenses or obtain necessary financing to continue operations, and the attainment of profitable operations. At April 30, 2016, and July 31, 2015 the Company had a working capital

deficit of \$3,353,496 and \$3,225,682, respectively and had accumulated losses of \$8,760,546 and \$8,031,376, respectively. These factors raise substantial doubt regarding the Company's ability to continue as a going concern. The Company's Consolidated Financial Statements included elsewhere in this Report do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

### **Basis of Presentation, Fiscal Year, and Principles of Consolidation**

These consolidated financial statements and related notes are presented in accordance with accounting principles generally accepted in the United States, and are expressed in U.S. dollars. These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary Café Serendipity, Inc. All intercompany transactions and balances have been eliminated. The Company has elected a fiscal year-end of July 31.

### **Use of Estimates**

The preparation of these consolidated financial statements in accordance with United States generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses in the reporting period. The Company bases its estimates and assumptions on current facts, historical experience and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by the Company may differ materially and adversely from the Company's estimates. To the extent there are material differences between the estimates and the actual results, future results of operations will be affected.

### **Cash and Cash Equivalents**

The Company considers all highly liquid instruments with a maturity of three months or less at the time of issuance to be cash equivalents. As of April 30, 2016 and July 31, 2015, the Company had \$29 and \$2,618, respectively in cash.

### **Property and Equipment, net**

Property and equipment is recorded at cost. Depreciation is computed using the straight-line method over the estimated useful lives of seven (7) years. The cost of assets sold or retired and the related amounts of accumulated depreciation are removed from the accounts in the year of disposal. Any resulting gain or loss is reflected in current operations.

Expenditures for maintenance and repairs are charged to operations as incurred. The capitalized cost of the oil properties will be amortized based on the units-of-production method. Costs incurred for property acquisition and further development activity will be capitalized and

amortized as previously noted. As of April 30, 2016 and July 31, 2015, the Company had no property and equipment.

## **Financial Instruments and Concentrations**

The fair values of financial instruments, which include cash, accounts payable, accrued liabilities, and convertible notes, were estimated to approximate their carrying values due to the immediate or short-term maturity of these financial instruments. Financial instruments that potentially subject the Company to credit risk consist principally of cash. Cash is deposited with a high quality financial institution.

## **Fair Value of Financial Instruments**

The fair value accounting guidance defines fair value as “the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.” The definition is based on an exit price rather than an entry price, regardless of whether the entity plans to hold or sell the asset. This guidance also establishes a fair value hierarchy to prioritize inputs used in measuring fair value as follows:

- Level 1: Observable inputs such as quoted prices in active markets;
- Level 2: Inputs, other than quoted prices in active markets, that are observable either directly or indirectly; and
- Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The carrying value of accounts payable and accrued liabilities are considered to approximate their fair value due to their short-term nature. For the warrants that are classified as derivatives, fair values were calculated using the Black-Scholes pricing model.

## **Basic and Diluted Net Income (Loss) per Share**

FASB Codification Topic 260, *Earnings per share*, requires dual presentation of basic and diluted earnings per share (EPS) with a reconciliation of the numerator and denominator of the EPS computations. Basic earnings per share amounts are based on the weighted average number of shares of common stock outstanding. If applicable, diluted earnings per share would assume the conversion, exercise or issuance of all potential common stock instruments such as options, warrants and convertible securities, unless the effect is to reduce a loss or increase earnings per share. Diluted net income (loss) per share on the potential exercise of the equity-based financial instruments is not presented where anti-dilutive.

The table below shows the earnings (loss) per share, basic and diluted, for the Nine Months ended April 30, 2016 and 2015:

	For the Nine Months Ended April 30,	
	2016	2015
Net loss	\$ (729,170)	\$(1,543,335)
Weighted average common shares outstanding	15,552,944	10,168,252
Earnings per share:		
Basic and diluted income per share from continuing operations	\$ (0.05)	\$ (0.15)

### Income Taxes

Income taxes are provided in accordance with FASB Codification Topic 740, *Accounting for Income Taxes*. A deferred tax asset or liability is recorded for all temporary differences between financial and tax reporting and net operating loss-carry forwards.

Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax asset will not be realized. Deferred tax assets and liabilities are adjusted for the effect of changes in tax laws and rates on the date of enactment.

### Revenue

The Company generates revenue from the sale of licenses. The Company generally recognizes merchandise sales revenue from the sale of its products as follows:

- 1) Persuasive evidence of an arrangement exists;
- 2) Delivery has occurred;
- 3) The price to the buyer is fixed or determinable, and
- 4) Collectability is reasonably assured.

For the nine months ended April 30, 2016, the Company did not recognized any revenue.

### Recently Issued Accounting Pronouncements

We have implemented all new accounting pronouncements that are in effect and that may impact our financial statements and do not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on our financial position or results of operations.

As consideration for the Agreement, the Company issued 3,000,000 shares of common stock valued at \$600,000. As a result of this Stock Purchase Agreement, the Company recorded goodwill of \$604,736 which represents the value of the common stock consideration and the net value of Café Serendipity at the time of the transaction.
