1. Nature of the Company

Cerro Grande Mining Corporation (the Company or CEG) and its subsidiaries is a mining, exploration and development company which produces gold, silver and copper, with operations mainly in Chile. The Company was incorporated under the Canada Business Corporations Act, and its Common Shares are listed on the Canadian Securities Exchange (“CSE”) trading under the symbol “CEG” and on the OTCQB trading under the symbol CEGMF. The Company is domiciled in Canada and the address of its records office is 1 King Street West, Suite 4009 Toronto Ontario M5H 1A1, Canada. The registered office is Royal Bank Plaza, South Tower, 200 Bay Street Suite 3800, Toronto, ON M5J 2Z4, Canada.

The company’s only significant subsidiary is Compañía Minera Pimentón (Pimentón).

These consolidated financial statements have been prepared on a basis which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. As at June 30, 2015, the Company has a negative working capital of \$3,484 (September 30, 2014 – negative \$2,747).

While the Company has operations generating revenue it continues to be reliant on financing from related parties to finance its operations and working capital. The Company continues to seek to reduce operating costs, the certainty of future profitability expectations and availability of sources of additional financing if required in the future cannot be assured at this time and accordingly, these material uncertainties may cast significant doubt about the Company’s ability to continue as a going concern. The consolidated financial statements do not include adjustments to the carrying values and classifications of recorded assets and liabilities and related revenues and expenses that might be necessary should the Company be unable to continue as a going concern and those adjustments may be material.

2. Basis of presentation

a. Statements of compliance

These unaudited condensed interim consolidated financial statements are expressed in thousands of US dollars and have been prepared in compliance with International Financial Reporting Standards (“IFRS”) as issued by the International Standards Board (“IASB”) including IAS34 Interim Financial Reporting. The condensed interim consolidated financial statements should be read in conjunction with the Company’s annual consolidated financial statements for the year ended September 30, 2014 which have been prepared in accordance with IFRS as issued by the IASB.

The accounting policies and the application adopted are consistent with those disclosed in Note 3 to the Company’s consolidated financial statements for the year ended September 30, 2014 except as described below.

The Company has adopted the following new and revised standards, along with any consequential amendments, effective October 1, 2014.

(Expressed in thousands of U.S. dollars, except share and per share amounts)

IFRIC 21 Levies (“IFRIC 21”) was issued in May 2013 and is an interpretation of IAS 37 – Provisions, Contingent Liabilities and Contingent Assets (“IAS 37”), on the accounting for levies imposed by governments. IAS 37 sets out criteria for the recognition of a liability, one of which is the requirement for the entity to have a present obligation as a result of a past event (“obligating event”). IFRIC 21 clarifies that the obligating event that gives rise to a liability to pay a levy is the activity described in the relevant legislation that triggers the payment of the levy. IFRIC 21 is effective for annual periods commencing on or after January 1, 2014. There was no impact on the Company’s financial statements upon adoption of IFRIC 21 on October 1, 2014.

IFRS 15 Revenue from Contracts with Customers (“IFRS 15”) was issued to clarify the principles for recognizing revenue. IFRS 15 establishes principles to address the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity’s contracts with customers. IFRS 15 will be effective for annual periods beginning on or after January 1, 2014, with early adoption permitted. There was no impact on the Company’s financial statements upon adoption of IFRS 15 on October 1, 2014.

The preparation of condensed interim consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities and expenses.

All financial information presented in USD has been rounded to the nearest thousand unless otherwise stated.

These condensed interim consolidated financial statements were approved by the Board of Director on August 27, 2015.

b. Use of estimates and judgments

The preparation of the condensed interim consolidated financial statements in conformity with IFRS requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed interim consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The Company also makes estimates and assumptions concerning the future. The determination of estimates requires the exercise of judgment based on various assumptions and other factors such as historical experience and current and expected economic conditions. Actual results could differ from those estimates.

The more significant areas requiring the use of management estimates and assumptions relate to future cash flow estimates for asset impairments/reversals, any asset retirement obligation, estimation of useful lives of mining properties, plant and equipment, stock-based compensation and the provision for income taxes and composition of future income tax assets and liabilities. These estimates and judgments have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the financial period.

Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Mineral resources and reserves estimates are used in the calculation of impairment estimation, amortization and forecasting the timing and payment of close down, restoration costs and clean-up costs.

As of June 30, 2015 both these Debentures plus interest, totaling \$424, have matured and \$360 has been repaid as the creditors did not exercise their options. Due to the Company's cash flow deficit, \$67 remains payable to creditors of the C Debenture. Debenture D has been fully paid.

The conversion price of the Debentures is CA\$0.10 per share convertible into up to 10,102,114 common shares of the Company. In the month of December 2013 the equivalent of \$ 850 were exercised and converted into 8,500,000 common shares. This resulted in the reclassification of \$518 from long-term debt and \$362 from the equity component of convertible debentures to share capital. At September 30, 2014 the carrying value classified within long-term debt is \$107 and within the equity component of convertible debentures is \$65. The Debentures had been issued in payment of cash advances made in April and May 2013 by Compañía Minera Chañar Blanco S.A. a Company owned by Mario Hernández, who is also director of the Company and Compañía Minera Auromín Ltda. a Company owned by David Thomson, who is also director of the Company. Under the term of the debentures, the maximum amount convertible into Common Shares is such that each of Hernandez and Thomson do not hold, directly or indirectly, more than 19.99% of the issued and outstanding Common Shares of the Company as at the date of conversion and therefore \$160 remain as convertible unsecured debentures.
- c) On November 7, 2011 the Company obtained a mortgage with Bice Bank of Unidad de Fomento (UF) 19,600 (\$790). The mortgage bears interest at a fixed rate of 5.13% per annum. The mortgage is secured by certain fixed assets with an approximate value of \$1,023.
- d) On November 5, 2014 the company issued a Debenture for \$100 with a maturity date of November 5, 2017 related to a "Gold Loan" agreed to by the parties for an equivalent amount.
