The accompanying notes are an integral part of these consolidated financial statements

The accompanying financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) under the accrual basis of accounting. All inter-company balances and transactions have been eliminated in consolidation. The Company has adopted a December 31 year end.

NOTE 2 – ORGANIZATION AND BUSINESS BACKGROUND

China Good Electric Inc. (the "Company") was incorporated as Triangle Uranium Corporation. On May 17, 1984, the Company changed its name to Planisol, Inc., and on October 10, 2007, the Company changed its name to China Good Electric, Inc. The Company was administratively abandoned and reinstated in September 2017 through a court appointed guardian – Custodian. The Company's common shares are quoted on the "Pink Sheets" quotation market under the symbol "CGDL".

In October 2017, the Board of Directors of the Company approved to issue 60,000 control shares of Convertible Preferred Series A Stock to Mr. Orlando Hernandez, for its services in connection with reorganization of the Company and as consideration for the acquisition of Victory Yacht Sales Corp. Such issuance gave Mr. Hernandez a majority of the then issued and outstanding voting power, or 80%, of the Company, resulting in a change in control of the Company. Mr. Hernandez was also the holder of 100% interest of Victory Yacht Sales Corp., our operating subsidiary organized and exiting under the laws of the State of Florida ("Victory").

The above issuance gave Victory Shareholders and/or their assigns a 'controlling interest' in the Company representing approximately 57% of the issued and outstanding shares of the Company's Common Stock. The Company and Victory were hereby reorganized, such that the Company acquired 100% of the Capital Shares of Victory, and Victory became wholly-owned operating subsidiary of the Company.

NOTE 4 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Cash and cash equivalents

The Company considers all highly liquid investments with original maturities of three months or less as cash equivalents. As of December 31, 2016 and 2015, the Company had no cash or cash equivalent balances in excess of the federally insured amounts, respectively. The Company's policy is to invest excess funds in only well capitalized financial institutions.

Fixed assets

Fixed assets are carried at cost. Depreciation is computed using the straight-line method of depreciation over the assets estimated useful lives. Maintenance and repairs are charged to expense as incurred; major renewals and improvements are capitalized. When items of fixed assets are sold or retired, the related cost and accumulated depreciation is removed from the accounts and any gain or loss is included in income.

Fair value for financial assets and financial liabilities

The Company follows paragraph 825-10-50-10 of the FASB Accounting Standards Codification for disclosures about fair value of its financial instruments and paragraph 820-10-35-37 of the FASB Accounting Standards Codification ("Paragraph 820-10-35-37") to measure the fair value of its financial instruments. Paragraph 820-10-35-37 establishes a framework for measuring fair value in U.S. GAAP, and expands disclosures about fair value measurements. To increase consistency and comparability in fair value measurements and related disclosures, Paragraph 820-10-35-37 establishes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three levels of fair value hierarchy defined by Paragraph 820-10-35-37 are described below:

- Level 1 Quoted market prices available in active markets for identical assets or liabilities as of the reporting date.
- Level 2 Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date.
- Level 3 Pricing inputs that are generally observable inputs and not corroborated by market data.

The carrying amounts of the Company's financial assets and liabilities, such as accounts payable and accrued expenses approximate their fair values because of the short maturity of these instruments.

The Company does not have any assets or liabilities measured at fair value on a recurring or a nonrecurring basis, consequently, the Company did not have any fair value adjustments for assets and liabilities measured at fair value at December 31, 2016 and 2015 nor gains or losses are reported in the statement of operations that are attributable to the change in unrealized gains or losses relating to those assets and liabilities still held at the reporting date for the years ended December 31, 2016 and 2015.

NOTE 4 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Stock based compensation

The Company recognizes compensation costs to employees under FASB Accounting Standards Codification 718 "*Compensation - Stock Compensation*" ("ASC 718"). Under ASC 718, companies are required to measure the compensation costs of share-based compensation arrangements based on the grant-date fair value and recognize the costs in the financial statements over the period during which employees are required to provide services. Share based compensation arrangements include stock options and warrants. As such, compensation cost is measured on the date of grant at their fair value. Such compensation amounts, if any, are amortized over the respective vesting periods of the option grant.

Equity instruments issued to other than employees are recorded on the basis of the fair value of the instruments, as required by FASB Accounting Standards Codification 505, *Equity Based Payments to Non-Employees*. In general, the measurement date is when either a (a) performance commitment, as defined, is reached or (b) the earlier of (i) the non-employee performance is complete or (ii) the instruments are vested. The measured value related to the instruments is recognized over a period based on the facts and circumstances of each particular grant as defined in the FASB Accounting Standards Codification.

Income taxes

Income taxes are determined in accordance with ASC Topic 740, "Income *Taxes*" ("ASC 740"). Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted income tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Any effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

ASC 740 prescribes a comprehensive model for how companies should recognize, measure, present, and disclose in their financial statements uncertain tax positions taken or expected to be taken on a tax return. Under ASC 740, tax positions must initially be recognized in the financial statements when it is more likely than not the position will be sustained upon examination by the tax authorities. Such tax positions must initially and subsequently be measured as the largest amount of tax benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the tax authority assuming full knowledge of the position and relevant facts.

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to be applied to taxable income in the years in which those temporary differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the statement of income in the period that includes the enactment date. A valuation allowance is provided for deferred tax assets if it is more likely than not these items will either expire before the Company is able to realize their benefits, or that future deductibility is uncertain.

For the years ended December 31, 2016 and 2015, the Company did not have any interest and penalties associated with tax positions. As of December 31, 2016 and 2015, the Company did not have any significant unrecognized uncertain tax positions.

NOTE 4 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Net loss per share

The Company reports earnings (loss) per share in accordance with FASB Accounting Standards Codification 260 *"Earnings per Share"* ("ASC 260"). This statement requires dual presentation of basic and diluted earnings (loss) with a reconciliation of the numerator and denominator of the earnings (loss) per share computations. Basic net income (loss) per share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. If applicable, diluted earnings per share assume the conversion, exercise or issuance of all common stock instruments such as options, warrants and convertible securities, unless the effect is to reduce a loss or increase earnings per share. Therefore no diluted loss per share figure is presented. There were no adjustments required to net loss for the periods presented in the computation of basic loss per share.

The Company has not issued any options or warrants or similar securities since inception.

Other parties and ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests.

The consolidated financial statements shall include disclosures of material related party transactions, other than compensation arrangements, expense allowances, and other similar items in the ordinary course of business. However, disclosure of transactions that are eliminated in the preparation of consolidated or combined financial statements is not required in those statements. The disclosures shall include: a. the nature of the relationship(s) involved; b. a description of the transactions, including transactions to which no amounts or nominal amounts were ascribed, for each of the periods for which income statements are presented, and such other information deemed necessary to an understanding of the effects of the transactions on the financial statements; c. the dollar amounts of transactions for each of the periods for which income statements are presented and the effects of any change in the method of establishing the terms from that used in the preceding period; and d. amounts due from or to related parties as of the date of each balance sheet presented and, if not otherwise apparent, the terms and manner of settlement.

NOTE 4 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Recently issued accounting standards

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)," on revenue recognition. This guidance provides that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This guidance also requires more detailed disclosures to enable users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The original effective date of this guidance was for interim and annual reporting periods beginning after December 15, 2016, early adoption is not permitted, and the guidance must be applied retrospectively or modified retrospectively. In July 2015, the FASB approved an optional one-year deferral of the effective date. As a result, we expect to adopt this guidance on January 1, 2018. We have not yet determined our approach to adoption or the impact the adoption of this guidance will have on our financial position, results of operations or cash flows, if any.

In February 2016, the FASB issued an accounting standards update which modifies the accounting for leasing arrangements, particularly those arrangements classified as operating leases. This update will require entities to recognize the assets and liabilities arising from operating leases on the balance sheet. This guidance is effective for fiscal and interim periods beginning after December 15, 2018 and is required to be applied retrospectively to all leasing arrangements. We are currently assessing the effects this guidance may have on our financial statements.

Other pronouncements issued by the FASB or other authoritative accounting standards groups with future effective dates are either not applicable or are not expected to be significant to the Company's financial position, results of operations or cash flows.
