Cash at End of Year	$ 349	$ 3,035

See accompanying Notes to the Consolidated Financial Statements.

Note 1. Organization, Nature of Operations, Business Condition and Significant Accounting Policies

Organization – On July 30, 2010, the owners of APMD Holdings, Inc., a Texas corporation, ("APMD") entered into an Agreement and Plan of Merger whereby a newly-formed, wholly-owned subsidiary of Gold and Silver Mining of Nevada, Inc. ("CJT") was merged with and into APMD, which merger closed on August 16, 2010 (the "Merger"). As a result, APMD became a wholly-owned subsidiary of CJT and its name was changed to CJT Mining, Inc. As consideration, CJT issued 212,000,000 shares of common stock to the APMD shareholders. In addition, CJT had 28,852,037 common shares outstanding, of which 24,000,037 common shares were redeemed in exchange for a $300,000 promissory note payable to the CJT former majority shareholder. The note payable was secured by the shares redeemed, which shares are reflected as treasury stock in the accompanying consolidated financial statements.

The Merger was accounted for as a reverse acquisition. APMD was considered the accounting acquirer since the former APMD shareholders remained in control of the combined entity after the transaction. Also, the officers and directors of APMD became the officers and directors of CJT. The historical financial statements prior to the Merger are those of APMD restated for the effects of the equivalent of a 1-for-1.67794 stock split. No assets or liabilities were acquired or assumed from CJT.

Name Change – In September 2013 The Company changed its name to Gold and Silver Mining of Nevada Inc.

Consolidation – The accompanying consolidated financial statements include the operations and transactions of APMD (now CJT Mining, Inc.) for all periods presented and the operations and transactions of CJT from August 16, 2010. Inter-company balances and transactions have been eliminated in consolidation. APMD before the reorganization and CJT and CJT Mining, Inc. (formerly APMD) after the reorganization are referred to herein as "the Company."

Use of Estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Nature of Operations and Business Condition – The Company is a mineral exploration company with properties in the State of Nevada. The success of the Company is dependent on the Company's ability to obtain all necessary permits, raise sufficient financing to complete exploration of the properties, develop the properties, and obtain profitable production from the properties or obtain proceeds from the disposition of such properties. The Company's properties may be subject to changes in existing government regulations relating to mining, which may result in the withholding the issuance of required permits. The Company may be impeded in its ability to acquire surface rights sufficient to explore and operate its mineral properties. These risks may adversely affect the investment in the properties and may result in the impairment or loss of all or part of the Company's investment in the properties.

The Company is an exploration-stage company as most of its efforts have been devoted to raising capital and mineral exploration activities. At December 31, 2016, the Company had a stockholders' surplus of $11,1747,598 and negative working capital of $1,352,402. At December 31, 2016 and since that date, notes payable with principal and accrued interest of $1,352,402 were and continue to be in default. The Company suffered losses of $208,776 during the year ended December 31, 2016 and had accumulated a deficit for the period from January 1, 2006 (date of inception) through December 31, 2016 of $4,331,711. The Company used $121,904 of cash in its operating activities during the year ended December 31, 2016 and used $3,174,990 of cash in its operating activities during the period from January 1, 2006 (date of inception) through December 31, 2016. As a result of these matters, there is substantial doubt about the Company's ability to continue as a going concern. Its ability to continue to meet its obligations and carry out its planned exploration activities is uncertain and dependent upon its ability to obtain further financing and ultimately to obtain profitable operations.

The Company will require additional financing, which if not raised, would result in the curtailment of these activities. In the foreseeable future the Company will likely remain dependent on the issuance of debt and paid-in capital to raise funds to explore its properties, and on the availability of project financing for the development of the Company's properties. The Company is seeking additional financing; however, there can be no assurance that it will be successful in obtaining such financing or on terms acceptable to the Company.

There can be no assurances that the Company's activities will be successful or that sufficient funds can be raised in a timely manner. These financial statements do not include any adjustments related to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern.

Property and Equipment – Property and equipment consists of office equipment and is stated at cost. Depreciation is computed using the straight-line method. Estimated useful lives are 5 years. Depreciation expense for the years ended December 31, 2014 and 2013 was $175 and $425, respectively.

All costs to obtain claims to mineral properties and explore those properties for commercial mineral interests have been expensed as exploration costs. If commercial mineral reserves are identified, then from that date forward development costs incurred, including the cost to remove overburden, will be capitalized and depleted as identified reserves are extracted. Capitalized costs are evaluated annually for impairment. No costs of mineral properties have been capitalized through December 31, 2012, and therefore no impairment has been recognized through that date.

***Income Taxes* –** At December 31, 2014, the Company has operating loss carry forwards of approximately $1,840,000 that if not used will begin to expire in 2026. Years open to audit by the Federal and state tax authorities are 2009 through 2013. There were no uncertain tax positions at December 31, 2014.

Note 2. Notes Payable

The notes payable to third parties were initiated from 2006 through 2009 and consist of eight notes. Certain of the notes were issued with common shares. The proceeds were allocated between the notes payable and the common stock based on their relative fair values. The allocation resulted in allocating $240,258 to the notes payable and $174,242 to the common stock. The resulting discount to the notes payable of $174,242 was amortized to interest expense over the term of the notes payable. Accrued interest on the notes payable of $69,437 is included in the notes payable balance as of December 31, 2012 and 2011. Two of the notes payable, for a total of $100,000, are payable to a third-party that the Company cannot locate. These two notes have been outstanding since March 2009.

The notes were not paid at their maturity dates. Interest continues to be accrued on the notes at 15% per annum but is not being asserted by the note holders; therefore, the interest that accrued during the years ended December 31, 2014 and 2013 of $47,175 and $47,175, respectively, has been recognized as a contribution to paid-in capital during each of those years. The $469,937 balance due under the notes payable is in default, is due currently and has been classified as a current liability at December 31, 2016.

On August 16, 2010, the Company issued 28,852,037 shares of common stock to the Gold and Silver Mining of Nevada, Inc. shareholders for no consideration and immediately redeemed 24,000,037 of those shares from the principal Gold and Silver Mining of Nevada, Inc. shareholder in exchange for a $300,000 promissory note. The note is secured by the shares redeemed, which are recognized as treasury stock. The note accrued interest at 10% per annum until it matured June 12, 2011. The Company did not make any payments on the note. On April 4, 2012, the Company renegotiated the terms of the note, which reduced the note payable and accrued interest to $250,000, with no interest accruing over its remaining term. The balance is payable in $50,000 increments every Year. At the date of the renegotiation, the carrying value of the note was discounted for interest imputed at 15% per annum, which resulted in an initial debt discount of $68,488. The discount is being amortized over the remaining term of the note. At December 31, 2014 the note has been satisfied in full.

The carrying amount of the notes payable approximate their fair values based on current market interest rates.

Note 3. Related Party Notes Payable

Related party notes payable were initiated during 2008 and 2009 and consist of 14 notes payable that bore interest at 15% per annum, totaling $257,000 to Russell Anderson, a shareholder and the brother of an officer of the Company. Certain of the notes were issued with common shares. The proceeds were allocated between the notes payable and the common stock based on their relative fair values. The allocation resulted in allocating $156,216 to the notes payable and $100,784 to the common stock. The resulting discount to the notes payable of $100,784 was amortized to interest expense over the term of the notes payable. Accrued interest on the related party notes payable of $80,000 is included in the related party notes payable balance as of December 31, 2016. The notes were not paid at their maturity dates. Interest continues to be accrued on the notes at 15% per annum but is not being asserted by the related party note holder. The $455,458 balance due under the related party notes payable is in default, is due currently and has been classified as a current liability at December 31, 2016.

Note 4. Assignment of Mineral Claims

In order to finance the mineral interest claim filings and exploration costs, the Company assigned a 50% interest in its mineral interest claims to Brian Collins, doing business as Collins Mining, (“Collins”) on September 28, 2010. As a result, the Company will only recognize 50% of the revenue from any mining production that may occur in the future from the mineral interest claims and the Company will bear its share of the exploration, development and production costs.

Note 5. Note Receivable and Subsequent Event

On February 10, 2014 the Company entered into an agreement whereby it will sell up to 31,000,000 Class “A” common shares to Bonanza Mines, Inc. for a 25% interest in a $50,000,000 Promissory Note issued by the Colindo Trust. The transaction has occurred and the shares have been issued.

Note 6. Reverse Split of Common Shares

On March 1, 2016, the Company’s 1 for 2,000 reverse stock split became effective. As a result of the reverse stock split, every 2,000 shares of the Company's issued and outstanding common stock automatically combined into one issued and outstanding share of common stock with the provision that no stockholder would be reduced to less than 1 share.

Note 7. Class A Preferred Stock

In June, 2016 the company authorized 4 Class A Preferred Shares and issued 4 Class A Preferred Shares to N. Fred Anderson. The Class A Preferred Shares are a super voting stock and have voting authority equal to 4 times the issued and outstanding common stock of the company.
