The Company has a 50% ownership of a joint venture oil well located in Alberta, Canada and generates oil revenue entirely from this well. The Company is evaluating other business opportunities at present to build shareholder value.

2. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

The accompanying unaudited interim consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules of the Securities and Exchange Commission, and should be read in conjunction with the unaudited financial statements and notes thereto contained in the Company’s most recent Annual Financial Statements filed with the SEC on Form 10-K. In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of financial position and the results of operations for the interim period presented have been reflected herein. The results of operations for the interim period are not necessarily indicative of the results to be expected for the full year.

Notes to the financial statements which would substantially duplicate the disclosures contained in the unaudited financial statements for the most recent fiscal period, have been omitted.

Recent Accounting Pronouncements

There are no new accounting pronouncements issued or effective that had, or are expected to have, a material impact on the Company’s financial statements.

Basis of Presentation

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned Canadian subsidiary (also named CN Resources Inc.). All inter-company amounts and transactions are eliminated,

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States necessarily requires management to make estimates and assumption that affect the amounts reported in the financial statements. We regularly evaluate estimates and judgments based on historical experiences and other relevant facts and circumstance. Actual results could differ from those estimates.

Basic and Diluted Net Income (Loss) per Common Share

Basic net income (loss) per common share is computed by dividing net income (loss) by the weighted-average number of common shares outstanding during the period. Diluted net income (loss) per common share is determined using the weighted-average number of common shares outstanding during the period, adjusted for the dilutive effect of common stock equivalents. In periods when losses are reported, the weighted-average number of common shares outstanding excludes common stock equivalents, because their inclusion would be anti-dilutive. For the quarter

ended August 31, 2018, basic and diluted income per common share is the same because there were no common stock equivalents outstanding.

3. DUE TO DIRECTOR

The director loans the Company money from time to time on an interest-free due-on-demand basis. The Company also pays a monthly fee of \$2,000 to the director to cover general expenses and management fees. As of August 31, 2018, the balance owed to the director amounted to \$101,795

The Company is currently using the office space from its President and CEO on a rent free basis. As of August 31, 2018 and May 31, 2018, the Company made a total investment in the amount of CAD \$6,350,000 (USD \$4,852,160) and CAD \$6,350,000 ((USD \$4,892,165), respectively. Item 4. Management's Discussion and Analysis of Financial Conditions and Results of Operations.

This section of this quarterly report includes a number of forward-looking statements that reflect our current views with respect to future events and financial performance. Forward-looking statements are often identified by words like: believe, expect, estimate, anticipate, intend, project and similar expressions, or words which, by their nature, refer to future events. You should not place undue certainty on these forward-looking statements, which apply only as of the date of this report. These forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical results or our predictions.

The following discussion and analysis presents management's perspective of our business, financial condition, and overall performance. This information is intended to provide investors with an understanding of our past performance, current financial condition, and outlook for the future, and should be read in conjunction with our Annual Financial Statements.

Overview of the Company

CN Resources Inc. is an independent energy company engaged in the exploration, development, production, and sale of crude oil. Our operations are conducted through a 100% wholly owned Ontario Corporation (also named CN Resources Inc.) which owns a producing joint venture oil well in the Redwater area in Alberta, Canada.

During the quarter ended August 31, 2018, crude oil price is still depressed at a historical low level. The Board of Directors has decided to take a cautious approach to further investments in this sector until a clear visibility can be obtained before venturing into any capital commitment.

The Company's immediate core strategy is to create and enhance shareholder value by acquiring sustainable business with stable cash flow. The Company will not acquire any business in early stage of development.

Results of Operations

The following is a discussion of our results of operations, financial condition and capital resources. You should read this discussion in conjunction with our Financial Statements and the Notes thereto contained elsewhere in this Quarterly Report. Comparative results of operations for the periods indicated are discussed below.

The following table sets forth certain of our oil operating information for the three-month ended August 31, 2018 and 2017

	Three-month ended

Production revenue (net of royalty)	\$ 11,652	\$ 19,718
Production cost	\$ 21,104	\$ 8,418

The decrease in production revenue for the three-month period ended August 31, 2018 compared with August 31, 2017 is due to slight decrease in production volume of a usual nature. The increase in production cost is due to production costs allocation timing differences by the operator, costs related to February, March and May 2018 was recorded in this quarter and resulted a significant increase in production costs increase.

For the three months ended August 31, 2018, we generated \$83,972 cash in operating activities (August 31, 2017 - \$(17,315)) and generated cash of \$40,005 (August 31, 2017 - \$(1,077,480)) in investing activities.

Based on that evaluation, the Principal Executive Officer and Principal Financial Officer have concluded that these disclosure controls and procedures are not effective due to limited segregation of duties, lack of independent directors, and no written internal control procedure manual.
