PART C BUSINESS INFORMATION

Item 8: The nature of the issuer's business.

BUSINESS DEVELOPMENT: Yinfu Gold Corporation was incorporated in the State of Wyoming on September 1, 2005 under the name Ace Lock and Security Inc. and established a fiscal year at the end of March 31. Yinfu Gold Corporation (formerly known as "Element92 Resources Corp.") was originally incorporated under the laws of the State of Wyoming as Ace Lock & Security Inc. On March 5, 2007, we filed a Certificate of Amendment with the Wyoming Secretary of State to change our name to Yinfu Gold Corporation and increased our authorized capital to 1,000,000,000 common shares. On November 18, 2010, the Company received a notification from the Financial Industry Regulatory Authority ("FINRA") that the Company's change of name from Element92 Resources Corp. to

Yinfu Gold Corporation has been posted as effective with FINRA. The Company was established as an exploration stage company engaged in the search for commercially viable minerals.

On January 25, 2010, the Company entered into a sales and purchase agreement to acquire three gold mines, namely, Rongcheng gold mine, Penglai gold mine and Wendeng gold mine, in exchange for 90,000,000 restricted shares of the Company's common stock. The acquisition of Wendeng gold mine was terminated on March 30, 2010 and the number of shares was concurrently reduced to 76,500,000 pursuant to a revised sales and purchase agreement dated March 31, 2010. On June 15, 2010, the acquisition of Penglai gold mine was terminated. Based on data from due diligence, the management of the Company determined that the value of Rongcheng gold mine was far below the agreed purchase value and they entered into negotiations with the owners of Rongcheng for a price reduction. On February 4, 2011, the owners of Rongcheng gold mine elected to terminate the sale of the mine in accordance with the terms of the sale and purchase agreement and all shares were returned to the Company for cancellation.

On June 1, 2010 and June 11, 2010, the Company acquired 100% equity interest in Joyous Fame International Limited at the cost of US\$78,795,000 and a 28% equity interest of Legarleon Precious Metals Limited ("LPM") at the cost of US\$3,458,700. In September, the Company acquired a further 23% equity interest of LPM at the cost of US\$2,841,300.

In January, 2011, the Company's management determined that they were not in control over the investment in LPM and thus, it has been recorded as investments of the Company rather than a related subsidiary. The Company has not regained control over LPM, as a result, the subsidiary has not been consolidated during the year ended March 31, 2011 and year ended March 31, 2012.

On March 29, 2012, the management decided to cancel the investment in LPM and canceled 1,800,000 common shares the Company previously issued for the investment.

On September 12, 2012, the Company through its wholly-owned Hong Kong subsidiary, Element Resources International Ltd., entered into a definitive agreement to provide technical and management services for the Niutoushan Copper Ore mine and Monk Bridge Copper-gold Ore mine of Zongyang County, Anhui Province, China.

The mine has been in production since May 2011 and produces 150 tons of ore per day, with an average of 2.03g / ton of gold. Average monthly revenues amount to RMB 1.85 Million. (Approximately US\$294,000). The Company subsequently terminated this agreement on February 28, 2014 due to the expiration of a mineral exploration license.

The exploration license was upgraded into a full production license with an expected approval period of 15 years grant from the Indonesian Government. Initial Exploration and mine design and plans were conducted and production was due to start in March 2013, after the issuance of the production license. Yinfu management negotiated terms to acquire a 51% ownership of the Kalimantan coal mine for 3.3 million restricted shares in Yinfu Gold Corporation. The value of the mine was USD\$1,250,000 to be paid by 3.3 million restricted Yinfu

NOTE 1 – BASIS OF PRESENTATION

The accompanying unaudited condensed financial statements of Yinfu Gold Corporation have been prepared in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP") and the rules of the Securities and Exchange Commission. Certain information and note disclosures normally included in audited financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to those rules and regulations, although the Company believes that the disclosures made are adequate to make the information not misleading. The unaudited condensed financial statements should be read in conjunction with the audited financial statements and notes thereto contained in the Annual Report for the year ended March 31, 2014. In the opinion of management, the financial statements contain all adjustments, consisting of normal recurring adjustments, necessary to present fairly the financial position, results of operations and cash flows of the Company for the periods presented. The results for the period ended December 31, 2014 are not necessarily indicative of the results to be expected for the entire fiscal year ending March 31, 2015 or for any future period.

NOTE – 2 GOING CONCERN UNCERTAINTIES

These condensed consolidated financial statements have been prepared assuming that the Company will continue as a going concern, which contemplates the realization of assets and the discharge of liabilities in the normal course of business for the foreseeable future.

As of December 31, 2014, the Company suffered the accumulated deficits of \$5,176,903 from prior years and suffered from a working capital deficit of \$738,472. The continuation of the Company as a going concern is dependent upon the continuing financial support from its stockholders or external financing. Management believes the existing stockholders will provide the additional cash to meet with the Company's obligations as they become due. However, there can be no assurance that the Company will be able to obtain sufficient funds to meet its obligations.

These factors raise substantial doubt about the Company's ability to continue as a going concern. These condensed consolidated financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets and liabilities that may result in the Company not being able to continue as a going concern.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Consolidation

On June 29, 2012, the Company incorporated Element Resources International Limited ("Element Resources"), in Hong Kong. Element Resources is a wholly owned subsidiary of the Company and has been reflected in the unaudited condensed consolidated financial statements.

The unaudited condensed consolidated financial statements include the accounts of the Company and its subsidiary, Element Resources. All inter-company accounts and transactions have been eliminated in consolidation.

Exploration stage company

The Company is considered an exploration stage company under the criteria set forth by the Securities and Exchange Commission ("SEC") since it has not yet demonstrated the existence of proven or probable reserves, defined by *SEC Industry Guide 7* at Dabao Lead-Zinc mine. As a result, and in accordance with accounting principles generally accepted in the United States ("U.S. GAAP") for exploration stage companies, all expenditures for exploration and evaluation of the Company's properties are expensed as incurred until mineralized material is classified as proven or probable reserves. Accordingly, substantially all expenditures for mine development and mill construction have been expensed as incurred. Certain expenditures, such as for rolling stock or other general-purpose equipment, may be capitalized, subject to evaluation for possible impairment of the asset. The Company expects to remain an exploration stage company for the foreseeable future and will not exit the exploration stage unless and until it demonstrates the existence of proven or probable reserves that meet SEC guidelines.

Proven or probable reserves

The definition of proven or probable reserves is set forth in *SEC Industry Guide 7*. Proven reserves are reserves for which (a) quantity is computed from dimensions revealed in outcrops, trenches, workings or drill holes; (b) grade and/or quality are computed from the results of detailed sampling; and (c) the sites for inspection, sampling and measurement are spaced so closely and the geologic character is so well defined that size, shape, depth and mineral content of reserves are well-established. Probable reserves are reserves for which quantity and grade and/or quality are computed from information similar to that used for proven reserves, but the sites for inspection, sampling, and measurement are farther apart or are otherwise less adequately spaced. The degree of assurance, although lower than that for proven reserves, is high enough to assume continuity between points of observation. In addition, reserves cannot be considered proven or probable until they are supported by a feasibility study, indicating that the reserves have had the requisite geologic, technical and economic work performed and are economically and legally extractable at the time of the reserve determination. As of December 31, 2014, none of the Company's mineralized resources met the definition of proven or probable reserves.

Use of estimates

Management uses estimates and assumptions in preparing these financial statements in accordance with US GAAP. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities in the balance sheet, and the reported revenue and expenses during the periods reported. Actual results may differ from these estimates.

Cash and cash equivalents

Cash and cash equivalents are carried at cost and represent cash on hand, demand deposits placed with banks or other financial institutions and all highly liquid investments with an original maturity of three months or less as of the purchase date of such investments.

Income taxes

Income taxes are determined in accordance with the provisions of ASC Topic 740, “Income Taxes” (“ASC Topic 740”). Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted income tax rates expected to apply to taxable income in the periods in which those temporary differences are expected to be recovered or settled. Any effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

For the Three and Nine Months Ended December 31, 2014 & 2013

ASC 740 prescribes a comprehensive model for how companies should recognize, measure, present, and disclose in their financial statements uncertain tax positions taken or expected to be taken on a tax return. Under ASC 740, tax positions must initially be recognized in the financial statements when it is more likely than not the position will be sustained upon examination by the tax authorities. Such tax positions must initially and subsequently be measured as the largest amount of tax benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the tax authority assuming full knowledge of the position and relevant facts.

Net loss per share

The Company calculates net loss per share in accordance with ASC Topic 260, “Earnings per Share.” Basic loss per share is computed by dividing the net loss by the weighted-average number of common shares outstanding during the period. Diluted income per share is computed similar to basic loss per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common stock equivalents had been issued and if the additional common shares were dilutive.

Foreign currencies translation

Transactions denominated in currencies other than the functional currency are translated into the functional currency at the exchange rates prevailing at the dates of the transaction. Monetary assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency using the applicable exchange rates at the balance sheet dates. The resulting exchange differences are recorded in the statement of operations.

The reporting currency of the Company is United States Dollars (“US\$”) and the accompanying financial statements have been expressed in US\$. In addition, the Company’s subsidiary in Hong Kong maintains its books and record in its local currency, Hong Kong Dollars (“HK\$”), which is functional currency as being the primary currency of the economic environment in which the entity operates.

In general, for consolidation purposes, assets and liabilities of its subsidiaries whose functional currency is not US\$ are translated into US\$, in accordance with ASC Topic 830-30, “Translation of Financial Statement”, using the exchange rate on the balance sheet date. Revenues and expenses are translated at average rates prevailing during the period. The gains and losses resulting from translation of financial statements of foreign subsidiary are recorded as a separate component of accumulated other comprehensive income within the statement of stockholders’ equity. The gains and losses are recorded as a separate component of accumulated other comprehensive income within the statement of stockholders’ equity.

Related parties

Parties, which can be a corporation or individual, are considered to be related if the Company has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Companies are also considered to be related if they are subject to common control or common significant influence.

Fair value of financial instruments

The carrying value of the Company's financial instruments: cash and cash equivalents, subscription receivable, notes receivable, accounts payable and loans from related parties approximate at their fair values because of the short-term nature of these financial instruments.

The Company also follows the guidance of the ASC Topic 820-10, "Fair Value Measurements and Disclosures" ("ASC 820-10"), with respect to financial assets and liabilities that are measured at fair value. ASC 820-10 establishes a three-tier fair value hierarchy that prioritizes the inputs used in measuring fair value as follows:

Level 1: Observable inputs such as quoted prices in active markets;

Level 2: Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Recent accounting pronouncements

The Company has reviewed all recently issued, but not yet effective, accounting pronouncements and do not believe the future adoption of any such pronouncements may be expected to cause a material impact on its financial condition or the results of its operations.

NOTE 4 - RESTRICTED ESCROW ACCOUNT

On November 20, 2014, the Company entered a Sale and Purchase Agreement (“Agreement”) between the Company and China Enterprise Overseas Investment & Finance Group Limited (“CEO”) and disclosed that the Company had issued a total of 800 million restricted common shares of the Company in the names of the shareholders of CEO in payment of US\$48 million reflecting the reported value of the rights, titles and interests in the business assets and all attendant or related assets of CEO.

Pursuant to the Agreement, on or before January 1, 2015, CEO was to deliver to the Company, duly authorized, properly and fully executed documents in English, evidencing and confirming the sale of 100% of the shares of CEO and its assets specifically detailing the assets and an asset valuation by a third-party valuator.

Additionally, the Agreement stated that both parties have agreed that all shares issued, pursuant to the terms and conditions of this agreement, shall be issued as soon as practicable following the signing of this agreement, but all shares so issued shall be held in escrow until all terms and conditions are met.

As of the date of this filing, the various terms and conditions of the Agreement have not been met, therefore, the share certificates representing the shares issued in the names of the CEO shareholders remain in escrow.

CEO is also required to provide the Company with audited financial statements prepared by a qualified Public Company Accounting Oversight Board auditor. However, the Company has not yet received the required audited financial statements from CEO.

Due to the delay in receiving the required third-party valuation, the audited financial statements for CEO and the duly authorized and fully executed documents in English, evidencing and confirming the sale of 100% of the shares of CEO and its assets, the Agreement between the Company and CEO has not yet closed.
