3) Security Information

Trading Symbol: ESCU
Exact title and class of securities outstanding: A Common
CUSIP: 29642R103
Par or Stated Value: 0.00001
Total shares authorized: 250 Million as of: December 31, 2015
Total shares outstanding: 41,135,058 as of: December 31, 2015

Additional class of securities (if necessary):

- See Notes to Financial Statements as of December 31st, 2015

Transfer Agent
Name: Pacific Stock Transfer
Address 1: 4045 South Spencer Street
Address 2: Suite 403
Address 3: Las Vegas, Nevada 89119
Phone: 702-361-3033
Is the Transfer Agent registered under the Exchange Act?* Yes: X No: ☐

**To be included in the OTC Pink Current Information tier, the transfer agent must be registered under the Exchange Act.*

List any restrictions on the transfer of security:

DTC Chill

Describe any trading suspension orders issued by the SEC in the past 12 months.

THERE IS A DTCC CHILL. ESCUE ENERGY INC. HAS A REGISTRATION STATEMENT on FORM S-1 IN REVIEW BY SEC. WHEN APPROVED, ESCUE ENERGY INC. WILL SUBMIT IT TO DTCC WITH A REQUEST TO REMOVE THE CHILL.

List any stock split, stock dividend, recapitalization, merger, acquisition, spin-off, or reorganization either currently anticipated or that occurred within the past 12 months:

On June 1st, 2015 the Company amended its Articles of Incorporation to reflect the following Corporate Action:

> *Article 1: Name of the Corporation: "The name of the Corporation is Escue Energy, Inc."*
>
> *Article 3: Authorized Shares: The Corporation is authorized to issue Three Hundred Ninety-one Million One Thousand (391,001,000) shares of capital stock of which Two Hundred Fifty Million (250,000,000) are Common Shares, $0.00001 par value per share and One Hundred Forty-one Million One Thousand (141,001,000) are Preferred Shares, $0.001 par value per share, with One Thousand (1,000) shares being Series A Preferred Stock, Four Million (4,000,000) shares being Series B Preferred Stock, Fifty Million (50,000,000) shares being Series F Preferred Stock, and Sixty Million (60,000,000) being Series G Preferred Stock.*
>
> *As of the effective date of this amendment, there shall be a One-for-Two Thousand (1-for-2000) reverse split of the Corporation's Common Stock such that every Two Thousand (2,000) shares of common stock, $0.00001 par value, issued and outstanding immediately prior to the effective date (the "Old Common Stock") shall be recombined, reclassified and changed into One (1) share of the Corporation's Common Stock, $0.00001 par value (the "New Common Stock") with any fractional interest rounded up to the nearest whole share.*

On June 23, 2015 the Certificate of Amendment to Articles of Incorporation of the Company (which was filed with the Secretary of State of Nevada on June 1st, 2015) was declared effective by FINRA – Corporate Actions, whereby the Company effectuated (i) a reduction in the number of authorized shares of common stock from 2,500,370,900 to

250,000,000; (ii) a change of name from eDoorways International Corporation to Escue Energy, Inc.; and (iii) a 1 – for - 2,000 reverse split of the Company's common stock, par value $0.00001 per share.

As a result of the Corporate Action, on July 22, 2015 the trading symbol of the Company became ESCU: PK

On September 1, 2015, the Company signed an agreement to purchase (acquire) two patents, [a] US 6394745B1 of 28-MAY-2002 Wind Turbine; and [b] Canada 2309850 of 2005/06/07 Wind Turbine.. Both are valued for a total value of $40 million, with consideration payable by share issuance for the same value, on or before November 30, 2015. The Company's financial conditions are expected to change significantly with new projects to use Wind Turbines, based on the two patents. The Company is now specializing in providing alternate energy solutions and is entering Green Technology.

4) Issuance History

List below any events, in chronological order, that resulted in changes in total shares outstanding by the issuer in the past two fiscal years and any interim period. The list shall include all offerings of equity securities, including debt convertible into equity securities, whether private or public, and all shares or any other securities or options to acquire such securities issued for services, describing (1) the securities, (2) the persons or entities to whom such securities were issued and (3) the services provided by such persons or entities. The list shall indicate:

Date	Name of the person/Entity who received the shares	Nature & Issuance	Number of Shares Issued	Price per share	Consideration Paid
	(a)	(b)	(c)	(d)	(e)
3/25/2014	THE KIMMONS FAMILY|PARTNERSHIP LTD	Debt Conversion	1,456,702,076	$ 0.002500	$ 3,641,755
3/25/2014	CHRIS MITCHELL	Compensation	188,941,497	$ 0.002500	$ 472,354
3/25/2014	AJW QUALIFIED PARTNERS, LLC	Debt Conversion	39,499,520	$ 0.002500	$ 98,749
4/14/2014	DAMIAN LANCE KIMMONS	Compensation	150,000,000	$ 0.002500	$ 375,000
10/26/2015	ESCUE WIND SL	Patent Purchase	40,000,000	$ 1.00000	$ 40,000,000

D. Notes to the Financial Statements as of December 31st, 2015:

NOTE 1 - RECENT COMPANY BACKGROUND

Escue Energy Inc., or the Company, is a Nevada corporation, incorporated in 1988. It was formerly known as Technicraft Financial, Ltd. Between 1988 and 1994, GK Intelligent Systems, Inc. between 1994 and 2005, M Power Entertainment, Inc. between 2005 and 2007, eDoorways Corporation between 2007 and 2010, eDoorways International Corporation between 2010 and 2015.

Until 2014, the Company was hopeful of completing the development of a web-based lifestyle information enhancement and problem solving gateway and continued to look for all the avenues to raise the needed capital. With no money, the development did not complete and was shelved.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company's ability to continue as a going concern is dependent upon its ability to obtain the necessary financing to meet its obligations and pay the liabilities arising from normal business operations when they come due, to fund possible future acquisitions, and to generate profitable operations in the future. Management plans may continue to provide for its capital requirements by issuing additional equity securities and debt. Until August 30th, 2015, the outcome of these matters could not be predicted, especially there were no activities.

On September 1, 2015, this company signed an agreement to purchase two patents, [a] US 6394745B1 of 28-MAY-2002 Wind Turbine; and [b] Canada 2309850 of 2005/06/07 Wind Turbine, both are valued for a total value of $40 Million. In October 2015, 40 million shares were issued to the Seller and its nominees. The financial conditions are expected to change significantly with new projects to use Wind Turbines, based on these two patents.

This company is now specializing to provide alternate energy solutions and entering Green Technology.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

This summary of significant account policies of the Company is presented to assist in understanding the Company's financial statements. The financial statements and the notes are the representation of the Company's management, who are responsible for their integrity and objectivity. These accounting policies conform to U.S. generally accepted accounting principles ("US GAAP") and have been consistently applied in the preparation of the financial statements.

Basis of Presentation

Even with the purchase of Wind Turbine Patents, this company would continue to be in the development stage, until the new projects take off. This company has therefore used the enterprise reporting under the provisions of Statement of Financial Accounting Standards ("SFAS") no. 7. The accompanying financial statements are prepared in accordance with accounting principles generally accepted in the United States of America.

Principles of Consolidation

The financial statements include the accounts of the Company and its subsidiaries. Intercompany transactions and balances have been eliminated. Equity investments through which we exercise significant influence over but do not control the investee and are not the primary beneficiary of the investee's activities are accounted for using the equity method where applicable. Investments through which we are not able to exercise significant influence over the investee and which do not have readily determinable fair values are accounted for under the cost method where applicable.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reporting amounts of revenues and expenses during the reported period. Actual results will differ from those estimates. Included in these estimates are legal risks and exposures, valuation of stock-based compensation, the potential outcome of future tax consequences of events that have been recognized in the financial statement or tax returns.

Reclassification

Certain amounts in the financial statements of the prior year have been reclassified to conform to the presentation of the current year for comparative purposes.

Cash and Cash Equivalents

The Company considers all highly liquid temporary cash investments with an original maturity of three months or less, when purchased, to be cash equivalents.

Concentration of Credit Risks

The Company is subject to concentrations of credit risk primarily from cash and cash equivalents.

The Company's cash and cash equivalents accounts are held at financial institutions and are insured by the Federal Deposit Insurance Corporation, or the FDIC, up to $250,000. As of December 31, 2015, there were no cash balances in excess of federally insured limits.

Product Concentration

The Company worked on a web-based personal lifestyle information enhancement and problem solving gateway, lifestyle information source, and business-to-consumer marketplace. The developers could not complete for various reasons. Also, there were no activities since 2012 until now.

Fair Value of Financial Instruments

The Company accounts, for assets and liabilities measured at fair value on a recurring basis, in accordance with ASC Topic 820, Fair Value Measurements and Disclosures, or ASC 820. ASC 820 establishes a common definition for fair value to be applied to existing generally accepted accounting principles that require the use of fair value measurements, establishes a framework for measuring fair value, and expands disclosure about such fair value measurements.

ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Additionally, ASC 820 requires the use of valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are prioritized below:

Level 1: Observable inputs such as quoted market prices in active markets for identical assets or liabilities.
Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data.
Level 3: Unobservable inputs for which there is little or no market data, which require the use of the reporting entities own assumptions.

The Company did not have any Level 2 or Level 3 assets or liabilities as of December 31, 2015.

Additional Disclosures Regarding Fair Value Measurements

The carrying value of cash and cash equivalents, accounts receivable, accounts payable and accrued expenses, interest payable, advances payable, and notes and convertible promissory notes payable approximate their fair value due to the short maturity of these items.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in its convertible instruments in accordance with ASC 815.

ASC 815 generally provides three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument.

The Company accounts for convertible instruments (when it has determined that the embedded conversion options should not be bifurcated from their host instruments) in accordance with ASC 470-20, Debt with Conversion and Other Options. Accordingly, the Company records, when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their earliest date of redemption. The Company also records when necessary deemed dividends for the intrinsic value of conversion options embedded in preferred shares based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note.

ASC 815-40, Contracts in Entity's own Equity, provides that, among other things, generally, if an event is not within the entity's control, such contract could require net cash settlement and shall be classified as an asset or a liability.

The Company needs to determine whether the instruments issued in the transactions are considered indexed to the Company's own stock. The Company's outstanding instruments did not contain a fixed conversion rate at December 31, 2015. The embedded conversion feature associated with such instruments at December 31, 2015 is not significant.

Revenue Recognition

The Company recognizes revenue on arrangements in accordance with ASC Topic 605-10-S99, Revenue Recognition-Overall-SEC Materials. Revenue is recognized only when the price is fixed or determinable, persuasive evidence of an arrangement exists, the service is performed, and collectability of the resulting receivable is reasonably assured. Since inception and until now, this company has not earned any revenue.

Accounts Receivable, Net

Accounts receivable represent amounts due from customers on product and other sales. These accounts receivable, which are reduced by an allowance for doubtful accounts, are recorded at the invoiced amount and do not bear interest. The Company evaluates the collectability of its accounts receivable based on a combination of factors, including whether sales were made pursuant to letters of credit. In cases where management is aware of circumstances that may impair a specific customer's ability to meet its financial obligations, management records a specific allowance against amounts due, and reduces the net recognized receivable to the amount the Company believes will be collected. For all other customers, the Company maintains an allowance that considers the total receivables outstanding, historical collection rates and economic trends. Accounts are written off when all efforts to collect have been exhausted.

Advertising

The Company expenses advertising costs as incurred. In 2015, the Company did not spend any money for the advertising.

Software Development Costs

Costs incurred in the research and development of software products are expensed as incurred until technological feasibility has been established. After technological feasibility is established, any additional costs are capitalized in accordance with ASC No. 985-30, Software-Research and Development. Costs of maintenance and customer support are charged to expense when related revenue is recognized or when those costs are incurred, whichever occurs first. The Company believes that the current process for developing software is essentially completed concurrently with the establishment of technological feasibility; accordingly, no software development costs have been capitalized at December 31, 2015.

Share-Based Payment

The Company accounts for stock-based compensation in accordance with ASC Topic 718, Compensation-Stock Compensation, or ASC 718. Under the fair value recognition provisions of this topic, stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as an expense on a straight-line basis over the requisite service period, which is the vesting period.

Recent Accounting Pronouncements

Recent accounting pronouncements have been issued but deemed by management to be outside the scope of relevance to the Company.

Basic and Diluted Earnings per Share

Basic earnings per share are calculated by dividing income available to stockholders by the weighted-average number of shares of Common Stock outstanding during each period. Diluted earnings per share are computed using the weighted average number of shares of Common Stock and dilutive Common Stock share equivalents outstanding during the period. Dilutive Common Stock share equivalents consist of shares issuable upon the exercise of stock options and warrants (calculated using the modified-treasury stock method).

	For the years ended December 31,			
	2015		2014	
Numerator:				
Net loss attributable to common stock	$	(3054848)	$	(2593848)
Denominator:				
Denominator for basic earnings per share-				
Weighted average shares outstanding		1135058		2270117716
Denominator for diluted earnings per share-				
Weighted average shares outstanding		1135058		2270117716
Basic earnings per share	$	(2.691359)	$	(0.001143)
Diluted earnings per share	$	(2.691359)	$	(0.001143)

Property and Equipment

Property and equipment are recorded at cost and are depreciated on a straight-line basis over their estimated useful lives of three years. Maintenance and repairs are charged to expense as incurred. Significant renewals and betterments are capitalized.

Depreciation expense amounted to $0 during 2015.

Impairment of Long-Lived Assets and Amortizable Intangible Assets

The Company follows ASC 360-10, *"Property, Plant, and Equipment,"* which established a *"primary asset"* approach to determine the cash flow estimation period for a group of assets and liabilities that represents the unit of accounting for a long-lived asset to be held and used. Long-lived assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less cost to sell.

Intangible Assets - Goodwill

The excess of the purchase price over net tangible and identifiable intangible assets of business acquired is carried as Goodwill on the balance sheet. Goodwill is not amortized, but instead is assessed for impairment at least annually and upon the occurrence of certain triggering events or substantive changes in circumstances that indicate that the fair value of goodwill may be impaired. Measurement of the impairment loss, if any, is based on the difference between the carrying value and fair value of reporting unit. The goodwill impairment test follows a two-step process. In the first step, the fair value of a reporting unit is compared to its carrying value. If the carrying value of a reporting unit exceeds its fair value, the second step of the impairment test is performed for purposes of measuring the impairment. In the second step, the fair value of the reporting unit is allocated to all of the assets and liabilities of the reporting unit to determine an implied goodwill value. If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of goodwill, an impairment loss will be recognized in an amount equal to that excess. There were no material impairments to the carrying value of long-lived assets and intangible assets subject to amortization during the years ended December 31, 2015, and 2014.

Acquisitions

The Company recognizes the assets acquired, the liabilities assumed, and any non-controlling interest in the acquired at the acquisition date, measured at their fair values as of that date. Contingent purchase consideration is recorded at fair value at the date of acquisition. Any excess purchase price over the fair value of the net assets acquired is recorded as goodwill. Within one year from the date of acquisition, the Company may update the value allocated to the assets acquired and liabilities assumed and the resulting goodwill balances as a result of information received regarding the valuation of such assets and liabilities that was not available at the time of purchase. Measuring assets and liabilities at fair value requires the Company to determine the price that would be paid by a third party market participant based on the highest and best use of the assets or interests acquired. Acquisition costs are expensed as incurred.

Fair Value Measurements

For certain financial instruments, including accounts receivable, accounts payable, interest payable, advances payable and notes payable, the carrying amounts approximate fair value due to their relatively short maturities.

On January 1, 2008, the Company adopted ASC 820-10, *"Fair Value Measurements and Disclosures."* ASC 820-10 defines fair value, and establishes a three-level valuation hierarchy for disclosures of fair value measurement that enhances disclosure requirements for fair value measures. The carrying amounts reported in the consolidated balance sheets for receivables and current liabilities each qualify as financial instruments and are a reasonable estimate of their fair values because of the short period of time between the origination of such instruments and their expected realization and their current market rate of interest. The three levels of valuation hierarchy are defined as follows:

Level 1 inputs to the valuation methodology are quoted prices for identical assets or liabilities in active markets.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The Company did not identify any non-recurring assets and liabilities that are required to be presented in the balance sheets at fair value in accordance with ASC 815.

In February 2007, the FASB issued ASC 825-10 *"Financial Instruments."* ASC 825-10 permits entities to choose to measure many financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. ASC 825-10 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company adopted ASC 825-10 on January 1, 2008. The Company chose not to elect the option to measure the fair value of eligible financial assets and liabilities.

Borrowings

Borrowings are recognized initially at cost which is the fair value of the proceeds received, net of transaction costs incurred. In subsequent periods, borrowings are stated at amortized cost using the effective yield method; any difference between fair value of the proceeds (net of transaction costs) and the redemption amount is recognized as interest expense over the period of the borrowings.

Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. Where the Company expects a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain.

The Company recognizes the estimated liability to repair or replace products sold still under warranty at the balance sheet date. This provision is calculated based on past history of the level of repairs and replacements.

Legal Matters

In the ordinary course of our business, we may be subject to various claims, pending and potential legal actions for damages, investigations relating to governmental laws and regulations and other matters arising out of the normal conduct of our business. We are not aware of any material pending legal proceedings to which we are a party or of which any of our properties is the subject.

Special Purpose Entities

The Company does not have any off-balance sheet financing activities.

Net Income per Share

The Company computes net income (loss) per share in accordance with ASC 260-10, *"Earnings Per Share."* The basic net loss per common share is computed by dividing the net loss by the weighted average number of common shares outstanding. Diluted net loss per share gives effect to all dilutive potential common shares outstanding during the period using the *"as if converted"* basis..

NOTE 3 - NOTES PAYABLE

As of December 31, 2015 $350,625 was outstanding together with the accrued interest.

NOTE 4 - STOCKHOLDERS' DEFICIT

Common Stock

There is currently only one class of common stock. Each share common stock is entitled to one vote.

With the certificate of Amendment to Articles of incorporation, filed with the Nevada Secretary of State on 1st June 2015, and declared effective by FINRA-Corporate Actions on June 23rd, 2015. The Company also effectuated a reduction in the number of authorized shares of common stock from 2,500,370,900 to 250,000,000 and a 1-for-2000 reverse split of the company's common stock $0.00001 per value per share. The effect of reverse split is given retrospective effect as per SAB Topic 4.C.

The authorized number of shares of common stock of the Company at December 31, 2015 was 250,000,000 shares with a par value per share of $0.00001. Authorized shares that have been issued and outstanding are 41,135,058 as of December 31, 2015

Preferred Stock- Series A

Series A Convertible Preferred Stock, or Series A Preferred Stock, have a par value of $0.001 per share.

Series A – The Series A Preferred Stock is not entitled to dividends, has no liquidation preference and is not convertible into shares of common stock. With respect to voting rights, the shares, collectively, are entitled to that number of votes which shall equal Seventy-five percent (75%) of all eligible votes.

As on December 31, 2015 there are 1,000 shares as authorized, issued and outstanding.

Preferred Stock- Series B

As on December 31, 2015 there are 1,100 shares as authorized in Preferred Stock – Series B, with the par value of $0.001 per share. No shares are issued in Preferred Stock – Series B.

The holders of Series B Preferred Stock are not entitled to dividends and the shares of Series B Preferred Stock carry no liquidation preference. The shares of Series B Preferred Stock are convertible into shares of common stock, at any time, at a rate of 3.15 shares of common stock for each one share of Series B Preferred Stock.

Preferred Stock- Series C

As on December 31, 2015 there are 1,000 shares as authorized in Preferred Stock – Series C, with the par value of $0.001 per share. No shares are issued in Preferred Stock – Series C.

Preferred Stock- Series D

As on December 31, 2015 there are 1,000 shares as authorized in Preferred Stock – Series D, with the par value of $0.001 per share. No shares are issued in Preferred Stock – Series D.

Preferred Stock- Series F

As on December 31, 2015 there are 50,000,000 shares as authorized in Preferred Stock – Series F, with the par value of $0.001 per share. 50,000 shares are issued and outstanding in Preferred Stock – Series F.

The holders of Series F Preferred Stock shall receive a dividend of 5% per annum, payable quarterly on the last day of each calendar quarter. Any accrued dividends may be converted into common stock, at the holder's option, at a rate equal to the closing price of the Company's common stock on the date each dividend is declared.

The shares of Series F Preferred Stock include a liquidation preference equal to $50,000, plus unpaid accrued dividends. Each share of Series F Preferred Stock carries 1 vote. The shares of Series F Preferred Stock are convertible into shares of common stock, 90 days after issuance, at a rate of conversion of 5 shares of common stock for each one share of Series F Preferred Stock.

Preferred Stock- Series G

As on December 31, 2015 there are 60,000,000 shares as authorized in Preferred Stock – Series G, with the par value of $0.001 per share. 47,696 shares are issued and outstanding in Preferred Stock – Series G

The holders of Series G Preferred Stock are not entitled to dividends and the shares of Series G Preferred Stock carry no liquidation preference. Each share of Series G Preferred Stock carries 1vote. The shares of Series G Preferred Stock are convertible into shares of common stock, six months after issuance, at a rate of conversion of 1.5 shares of common stock for each one share of Series G Preferred Stock.

Preferred Stock- Series H

As on September 30th, 2015 there are 10,000,000 shares as authorized in Preferred Stock – Series H, with the par value of $0.001 per share. 5,953 shares are issued and outstanding in Preferred Stock – Series H

The holders of Series H Preferred Stock are not entitled to dividends and the shares of Series H Preferred Stock carry no liquidation preference. Each share of Series H Preferred Stock carries 1vote. The shares of Series H Preferred Stock are convertible into shares of common stock, 90 days after issuance, at a rate of conversion of 5 shares of common stock for each one share of Series H Preferred Stock.

NOTE 5 - RECLASSIFICATIONS

Certain reclassifications have been made to prior year balances to conform to the current year presentation.

NOTE 6 - INCOME TAXES

Deferred income taxes are provided using the liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carry-forwards, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of the changes in tax laws and rates of the date of enactment.

When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying balance sheets along with any associated interest and penalties that would be payable to the taxing authorities upon examination.

Applicable interest and penalties associated with unrecognized tax benefits are classified as additional income taxes in the statements of operations.

A reconciliation of the Company's effective tax rate to the statutory federal rate is as follows:

	Years Ended December 31,

	2015	2014
Statutory federal rate	-34.0%	-34.0%
State income taxes net of federal income tax benefit	-5.2%	-5.2%
Permanent differences for tax purposes, primarily due non-cash financing costs	14.7%	7.3%
Change in valuation allowance	24.5%	31.9%
Effective income tax rate:	0.0%	0.0%

The components of the deferred tax assets and liabilities are as follows:

	December 31, 2015	December 31, 2014
Deferred tax assets:		
Net operating loss carryovers	$ 3,054,848	$ 2,593,848
Stock-based compensation	-	-
Other temporary differences	-	-
Total deferred tax assets	3,057,848	2,593,848
Valuation allowance	(3,054,848)	(2,593,848)
Net deferred tax asset	$ -	$ -

At December 31, 2015, the Company had available net operating loss carryovers of approximately $3 million that may be applied against future taxable income and expires at various dates between 2026 and 2031, subject to certain limitations. The Company has a deferred tax asset arising substantially from the benefits of such net operating loss deduction and has recorded a valuation allowance for the full amount of this deferred tax asset since it is more likely than not that some or all of the deferred tax asset may not be realized.

NOTE 7 - CONTINGENCIES

The management reviewed with the legal team and concludes that there are no disputes remaining unresolved and hence there are no contingent liabilities as of December 31, 2015

NOTE 8 - GOING CONCERN

As reported in the consolidated financial statements, the Company has an accumulated deficit of $3,054,848 as of December 31, 2015 and there were no revenue since inception.

With the purchase of the patents, this company is now entering the green technology, with lots of potential in the revenue stream.

NOTE 9 - EARNINGS PER SHARE

The following table sets forth the information to compute basic and diluted net income per share attributable to the Company for 2014:

	Par Value: 0.001 Common Stock Shares	$	Stockholders' Equity (Deficit)
Ending balance, December 31, 2014	2,270,117,716	2,270,117	(2,593,248)
Common stock issued as the premium value of the patents acquired	40,000,000	40,000,000	$ -
Reverse Split	(2,278,982,658)	-	$ -
Net Income (Loss)	-	-	$ (461,000)
Ending balance, December 31, 2015	41,135,058	42,270,117	(3,054,848)

NOTE 10 - PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

For the Periods Ended:	12/31/2015	12/31/2014
Property, plant and equipment consist of the following:		
Equipment	$ 0	$ 0
Computers and software	0	0
Other equipment	0	0
Total property, plant and equipment	0	0
Less:		
Accumulated depreciation	0	0
Current depreciation expense	0	0
Total accumulated depreciation	0	0
Net property, plant and equipment	$ 0	$ 0
Intangible assets consist of:		
Patents and the premium value for the patents	$40,000,000	
Goodwill	$ 0	$ 0
Less:		
Impairment	0	0
Net intangible assets	$ 0	$ 0

Depreciation expense was $ 0 in 2015 as well as in 2014.

NOTE 11 - RELATED PARTY TRANSACTIONS

[a] Officer's compensation; and
[b] Patent purchase from Escue Wind S.L, a Spanish Corporation by share issuance in Oct-2015.

NOTE 12 - NOTES PAYABLE

Notes payable for the periods ended;	12/31/2015	12/31/2014
Notes Payable - related parties	0	0
Notes Payable – Others	300,000	300,000
Total Notes Payable	300,000	300,000
Less Current Portion	300,000	300,000
Long Term Notes Payable	$ 0	$ 0
All are classified as short term by the Company. Accrued interest on these notes totaled.	$ 50,625	$ 23,625

NOTE 13 – Other Revenue in 2014

By applying the law of limitation, this company removed the payables from the books and accounted it as other income. Also, this company negotiated and settled the debt obligations and accounted the gain as other income.

NOTE 14 – Acquisition of patents by share issuance

The Company entered into a Patent Sale Agreement, dated September 1, 2015, with Escue Wind S.L., a Spanish corporation, having its principle place of business in Malaga, Spain (the "Seller"). Pursuant to the agreement the Company became obligated to issue an aggregate of 40,000,000 shares of the Company's Common Stock with a total value of $40,000,000. In October 2015, 40 million shares were issued to the Seller and its nominees. With the right to use the patent, the doors are open for this Company to market the game changing technology in Rural Electrification as per the Company's new business plan.

Escue Energy negotiated the purchase price of the two patents [a] Patent# US 6.394.754.B1 filed on 5-28-2002 in USA; and [b] Patent# 2.309.850 filed on 6-7-2005 in Canada. Before signing the patent purchase agreement, Escue Energy got the valuation done by Kerry Capital Advisers, Inc., AN ACCREDITED ASSET VALUATION SPECIALIST IN BOSTON, MASSASSACHUSETTS, in April 2015. KERRY CAPITAL IS AN ACKNOWLEDGED EXPERT IN THE ASSESSMENT OF FINANCIAL AND INTANGIBLE ASSETS. The CEO of Kerry Capital Advisors, LLC is an MBA from Harvard Business School and has a successful 25-year private equity and investment banking track record of providing creative capital solutions to a wide variety of financing transactions. Besides the North American Market, he has a significant presence in the European Middle Market for over 3 decades in a variety of recapitalization, growth financing, leverage buyout, and consolidation transactions. He ran Bain Capital in Europe.

KERRY CAPITAL APPLIED A MULTIFACTORAL ANALYSIS THAT TOOK INTO CONSIDERATION A WIDE AND COMPREHENSIVE SET OF FACTORS TO ASSESS THE VALUE OF ESCU'S PATENT. Kerry Capital (a) reviewed certain publicly and privately available financial statements and business information on the company and the industry; (b) reviewed certain internal financial statements and other financial information on the company, including the patent summary; (c) reviewed certain detailed financial projections prepared by the company management; (d) reviewed and discussed with management information relating to certain strategic, financial, and operational benefits anticipated by the company management; and (e) performed such other analyses and considered such other factors as Kerry Capital has deemed appropriate including a review of publicly comparable companies. KERRY CAPITAL ALSO INVESTIGATED THE MARKET FOR THE TECHNOLOGY AND its RELATIVE VALUE TO OTHER COMPETITORS.

Kerry capital conducted (i) a discounted cash flow analysis to determine an implied value for the company; (ii) reviewed valuation metrics for comparable public companies such as EBITDA multiples, Book Value Multiples and valuation ranges as a percent of revenues; (iii) an EBITDA analysis; and (iv) a book value analysis.

Based on the valuation report, Escue Energy determined to issue shares for 40 million dollars shares and signed the Patent Sale Agreement

The seller, Escue Wind S.L., a Spanish Corporation with the principle place of business in Malaga, Spain did not share the historical costs of these two patents. Escue Energy has therefore adopted the patent value as per the Patent Sale Agreement dated 1-9-2015
In 2015, Escue Energy accounts the value of the patent @ the purchase value as per the agreement dated 1-9-2015 and the consideration by share issuance as on the same date.

The transferor being a corporate shareholder, beneficially owns more than 10% of any class of equity securities in Escue Energy.

FASB ASC Paragraph 845-10-15-4 requires to record the non-monetary assets exchanged for common stock, just prior to the public offering, at the seller's historical cost, as stated in SAB Topic 5.G.

Though the seller did not disclose the historical cost for the purposes of SAB Topic 5.G, Escue Energy adapted the cash value of $10 for the purposes of SAB Topic 5.G as in the Patent Sale Agreement dated 1-9-2015 and the balance as the premium value paid for the patent by share issuance as per the Patent Sale Agreement dated 1-9-2015

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

3rd March, 2016

To the Board of Directors of:
Escue Energy, Inc.

We have audited the accompanying balance sheets of **Escue Energy, Inc** as of December 31, **2015**, and the related statements of operations, changes in stockholders' deficiency and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly in all material respects, the financial position of **Escue Energy, Inc**. as of December 31, **2015** and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. This Company reports a loss of $ 37,603 from operations in **2015**, a negative cash flow of $ 954,167 from operations in **2015**, and a stockholders' deficiency of $ 364,539 as of December 31, **2015**. This company has earned no revenue in 2015 and until now. We have not come across any serious lapses in internal control. However, the management is informed the need to strengthen the internal controls for reconciling and updating the share registers. The financial statements do not include any adjustments that might result from this deficiency.
