Item 3 Financial Information for the Quarter ending June 30, 2012

The Financial Statements are an attachment at the end of the report.

Balance Sheet

Equity Statement

Profit and Loss Statement

NOTE: These financials are not comparative in nature, because the company was in Research and Development prior to the Reverse Merger in 2011.

Item 4 Management's Discussion and analysis or plan of operation

A. Plan of Operation.

The company has a selection of certain technologies which can be used for the production of electricity from waste rail ties. The company has secured a long term large feedstock supply of waste rail ties. GESI has also secured the land and placement for the waste to energy plant to be developed.

B. Financial Conditions.

GESI will develop financing based upon the project business plan with either debt or equity financing of the developed energy plant. GESI has no plans, and does not intend to raise monies for the plant from stock equity deals from its publicly traded stock. Develop marketing, financing and operating plans over the course of the next twelve months. It is anticipated that the company will need to raise a limited amount of additional capital during the project selection and build out time and there are no assurances that the company will be able to raise a sufficient amount of capital to meet its operational needs for plant development. The company anticipates spending funds on additional research and product development, especially in area of product design. The company does expect to purchase a plant and significant equipment through some form of financing on the project itself. The company expects to increase its number of employees from 4 to 15 employees. The company has received a grant and loan from the Government of Canada to develop this energy. It is through this financing option that the project shall continue. The electricity produced from the operation would tie directly back into the Western Canadian Power Grid as an alternative fuel source for Canada.

Although the company does not have consecutive years of operation in this field, it does expect to be a viable source of power for the Canadian people. The technology for capturing the energy is new, but, has been carefully selected as a resource by the Canadian Government and Green Energy.

Item 5 Legal Proceedings

No officers or directors of the Company have been involved in, convicted, or named as a defendant in a criminal proceeding.

- A. No officers or directors of the Company have had entered any order, judgment or decree enjoining, barring, suspending or otherwise limiting their respective involvement in any type of business, securities, commodities, or banking activities.
- B. No officers or directors of the Company have received a finding or judgment of a violation of federal or state securities or commodities law.
- C. No officers or directors of the Company have been the subject of any order temporarily barring, suspending, or otherwise limiting their respective involvement in any type of business or securities activities.

Item 6 Default on Senior Securities

The Company is not in any manner in Default of its obligations.

Item 7 Other Information

The company has no further information to add that has not previously been disclosed.
