NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2017 AND 2016

(Expressed in Canadian Dollars)

2. BASIS OF PRESENTATION *(continued)**(b) Statement of compliance to international financial reporting standards*

These unaudited condensed interim consolidated financial statements are prepared in accordance with International Accounting Standards 34, Interim Financial Reporting ("IAS34"), as issued by the International Accounting Standards Board ("IASB") and apply the same accounting policies and application as disclosed in the annual consolidated financial statements for the year ended December 31, 2016 other than noted below. They do not include all of the information and disclosures required by IFRS for annual statements. In the opinion of management, all adjustments considered necessary for fair presentation have been included in these unaudited condensed interim consolidated financial statements. Operating results for the period ended June 30, 2017 are not necessarily indicative of the results that may be expected for the full year ended December 31, 2017. For further information, see the Company's audited consolidated financial statements including the notes thereto for the year ended December 31, 2016.

(c) Basis of measurement

These unaudited condensed interim consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments, which are measured at fair value as explained in these condensed interim consolidated financial statements. These unaudited condensed interim consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

(d) Going concern of operations

The Company incurred a net loss of \$202,007 and \$357,472 during the three and six months ended June 30, 2017 respectively (three and six months of 2016 - \$423,372 and \$557,097 respectively) and, as of that date the Company's deficit was \$8,642,313 (December 31, 2016 - \$8,171,447). In the prior year, the Company had transformed to a merchant banking model and is dependent on obtaining new clients and making profitable investments to generate profit.

These unaudited condensed interim consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern. Accordingly, they do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and liquidate its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying condensed interim consolidated financial statements. Such adjustments could be material. The Company may periodically have to raise funds to continue operations and, although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

(e) Significant accounting estimates and judgments

The preparation of these unaudited condensed interim consolidated financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities at the date of the unaudited condensed interim consolidated financial statements and reported amounts of revenue and expenses during the reporting period. Actual outcomes could differ from these estimates. The unaudited condensed interim consolidated financial statements include estimates, which, by their nature, are uncertain. The impact of such estimates are pervasive throughout the unaudited condensed interim consolidated financial statements, and may require accounting adjustments based on future occurrences.

JUNE 30, 2017 AND 2016

(Expressed in Canadian Dollars)

2. BASIS OF PRESENTATION (continued)

(e) Significant accounting estimates and judgments (continued)

The estimates and underlying assumptions are reviewed on a regular basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected. The areas involving a higher degree of judgment or complexity, or areas where the assumptions and estimates are significant to the financial statements were the same as those applied to the Company's audited consolidated financial statements for the year ended December 31, 2016.

3. CHANGES IN ACCOUNTING POLICIES AND PRONOUNCEMENTS*Revenue recognition*

During the six months ended June 30, 2017, the Company began provided payment processing services. Revenue earned from payment processing is recorded when earned.

Investments in associated companies

The equity method is used to account for investments in associated companies where the Company has significant influence. The share of earnings, gains and losses, realized dispositions and write downs to reflect other than temporary impairment are recognized in income. The loss in value of an investment in an associated company is considered to be other than a temporary decline when there is significant or prolonged decline in the fair value of an investment below its carrying value. The Company's proportion of dividends paid by the associated company reduces the carrying value of the investment.

Changes in accounting policies

The Company has adopted the following new standards, along with any consequential amendments, effective January 1, 2017. These changes were made in accordance with the applicable transitional provisions.

IAS 7 – Statement of Cash Flows ("IAS 7") was amended in January 2016 to clarify that disclosures shall be provided that enable users of financial statements to evaluate changes in liabilities arising from financing activities.

IAS 12 – Income Taxes ("IAS 12") was amended in January 2016 to clarify that, among other things, unrealized losses on debt instruments measured at fair value and measured at cost for tax purposes give rise to a deductible temporary difference regardless of whether the debt instrument's holder expects to recover the carrying amount of the debt instrument by sale or by use; the carrying amount of an asset does not limit the estimation of probable future taxable profits; and estimates for future taxable profits exclude tax deduction resulting from the reversal of deductible temporary differences.

Recent accounting pronouncements

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods commencing on or after January 1, 2017. Many are not applicable or do not have a significant impact to the Company and have been excluded. The following have not yet been adopted and are being evaluated to determine their impact on the Company.

3. CHANGES IN ACCOUNTING POLICIES AND PRONOUNCEMENTS– continued*Recent accounting pronouncements – continued*

IFRS 2 – Share-based Payment (“IFRS 2”) was amended by the IASB in June 2016 to clarify the accounting for cash-settled share-based payment transactions that include a performance condition, the classification of share-based payment transactions with net settlement features and the accounting for modifications of share-based payment transactions from cash-settled to equity-settled. The amendments are effective for annual periods beginning on or after January 1, 2018, with earlier application permitted.

IFRS 9 – Financial Instruments (“IFRS 9”) was issued by the IASB as a complete standard in July 2014 and will replace IAS 39 Financial Instruments: Recognition and Measurement (“IAS 39”). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9, except that an entity choosing to measure a financial liability at fair value will present the portion of any change in its fair value due to changes in the entity’s own credit risk in other comprehensive income, rather than within profit or loss. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted.

IFRS 15 - Revenue From Contracts With Customers (“IFRS 15”) proposes to replace IAS 18 - Revenue, IAS 11 - Construction contracts, and some revenue-related interpretations. The standard contains a single model that applies to contracts with customers and two approaches to recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue is recognized. New estimates and judgmental thresholds have been introduced, which may affect the amount and/or timing of revenue recognized. IFRS 15 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted.

IFRS 16 – Leases (“IFRS 16”) was issued in January 2016 and replaces IAS 17 – Leases as well as some lease related interpretations. With certain exceptions for leases under twelve months in length or for assets of low value, IFRS 16 states that upon lease commencement a lessee recognises a right-of-use asset and a lease liability. The right-of-use asset is initially measured at the amount of the liability plus any initial direct costs. After lease commencement, the lessee shall measure the right-of-use asset at cost less accumulated depreciation and accumulated impairment. A lessee shall either apply IFRS 16 with full retrospective effect or alternatively not restate comparative information but recognise the cumulative effect of initially applying IFRS 16 as an adjustment to opening equity at the date of initial application. IFRS 16 requires that lessors classify each lease as an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. Otherwise it is an operating lease. IFRS 16 is effective for annual periods beginning on or after January 1, 2019. Earlier adoption is permitted if IFRS 15 has also been applied.

Employee share option plan

The shareholders of the Company approved the Company's existing stock option plan, the "Plan", to be administered by the directors of the Company. Under the Plan, the Company may grant to directors, officers, employees and consultants options to purchase shares of the Company. The Plan provides for the issuance of stock options to acquire up to 10% of the Company's issued and outstanding capital. The plan is a rolling plan as the number of shares reserved for issuance pursuant to the grant of stock options will increase as the Company's issued and outstanding share capital increases.

The fair value at grant date is determined using a Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk-free interest rate for the term of the option. The Company grants all employee stock options with an exercise price equal to or greater than the market value of the underlying common shares on the date of grant.

15. CAPITAL MANAGEMENT

The Company considers its capital to be shareholders' equity, which is comprised of preferred shares, common shares, contributed surplus, warrants and deficit. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company's objective when managing capital are:

- to allow the Company to respond to changes in economic and/or marketplace conditions by maintaining the Company's ability to purchase new investments;
- to give shareholders sustained growth in value by increasing shareholders' equity; while
- taking a conservative approach towards financial leverage and management of financial risks.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2017 AND 2016

(Expressed in Canadian Dollars)**15. CAPITAL MANAGEMENT - continued**

The Company's management reviews its capital structure on an on-going basis and makes adjustments to it in light of changes in economic conditions and the risk characteristics of its underlying investments. The Company's current capital is composed of its shareholders' equity and, to-date, has adjusted or maintained its level of capital by:

- a) raising capital through equity financings; and
- b) realizing proceeds from the disposition of its investments

The Company raises capital, as necessary, to meet its needs and take advantage of perceived opportunities and, therefore, does not have a numeric target for its capital structure. Funds are primarily secured through equity capital raised by way of private placements. There can be no assurance that the Company will be able to continue raising equity capital in this manner.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company invests all capital that is surplus to its immediate operational needs in short term, liquid and highly rated financial instruments, such as cash, and short term guarantee deposits, all held with major Canadian financial institutions. The Company and its subsidiaries is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management during the six months ended June 30, 2017 and the year ended December 31, 2016.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2017 AND 2016

(Expressed in Canadian Dollars)**16. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT – continued**

The Company's has loans receivable outstanding and a significant portion of the Company's assets are currently comprised of financial instruments which can expose it to several risks, including market, liquidity, credit and currency risks. As a result of the change in business, there are new risks, objectives, policies and procedures compared to the previous year as discussed below. A discussion of the Company's use of financial instruments and their associated risks is provided below:

Market risk

Market risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will significantly fluctuate because of changes in market prices. The Company is exposed to market risk in trading its investments and unfavourable market conditions could result in dispositions of investments at less than favorable prices. In addition, a significant portion of the Company's investments are in the resource sector. The Company mitigates this risk by attempting to have a portfolio which is not singularly exposed to any one issuer, with exception to the Company having one position as at June 30, 2017 which made up of approximately 33% (December 31, 2016 – 51%) of the total equity portfolio. (See Note 9).

For the three and six months ended June 30, 2017, a 10% decrease in the closing price of this concentrated position would result in an estimated increase in net loss of \$15,000 (2016 - \$nil).

For the three and six months June 30, 2017, a 10% decrease (increase) in the closing prices of its other portfolio investments would result in an estimated increase (decrease) in net loss of \$30,200 (2016 - \$nil).

Liquidity Risk

Liquidity risk is the risk that the Company is not able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure and financial leverage. As at June 30, 2017, the Company's current liabilities totaled \$663,351 and cash totaled \$1,111,222. The Company generates cash flow from advisory fees, loan interest payment processing services, and rental income.

The Company manages liquidity risk by reviewing the amount of cash available, to ensure that it can meet its current obligations. There is no guarantee that the Company will be able to continue to meet its current obligations. See Note 2.

| | Carrying amount | Contractual cash flows | Year 1 | Year 2-3 | Year 4-5 | Greater than 5 years |

| Accounts payable and accrued liabilities | \$ 621,517 | \$ 621,517 | \$ 621,517 | \$ - | \$ - | \$ - |

| Loan payable | 50,000 | 65,058 | 8,400 | 16,800 | 16,800 | 23,058 |

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's accounts and other receivables and notes receivable.

The Company monitors the credit risk and credit standing of its customers on a regular basis. See Note 4 for an aging analysis of other receivables. At December 31, 2016, the Company's share subscription receivables consist of receivables from a small number of the Company's "Class – A" preferred share subscribers. Three subscribers make up 46%, 29% and 10% respectively of the amount owing. The full amount of share subscription receivables was received during the six months ended June 30, 2017.

Currency Risk

The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. The Company operates in Canada and a portion of its loans receivable and investments are in United States dollars. A significant change in the currency exchange rates between the United States dollar relative to the Canadian dollar could have an effect on the Company's results of operations, financial position or cash flows. The Company has not hedged its exposure to currency fluctuations.

Fair value of financial instruments

The Company has determined the carrying values of its financial instruments as follows:

- i. The carrying values of cash, accounts receivable, and accounts payable and accrual liabilities approximate their fair values due to the short-term nature of these instruments.
- ii. Notes receivable, long-term notes receivable and long-term investments are carried at amounts in accordance with the Company's accounting policies.
- iii. Mortgages payable approximate their fair values due to the short time since they were received.
- iv. Prior to maturity, the outstanding notes receivable are carried at their discounted value. Following their maturity, loans receivable are carried at their estimated realizable value.

The following table illustrates the classification and hierarchy of the Company's financial instruments, measured at fair value in the consolidated statements of financial position as at June 30, 2017 and December 31, 2016:

| | Level 1 | Level 2 | Level 3 | |

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2017 AND 2016

(Expressed in Canadian Dollars)**16. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT – continued**Level 3 Hierarchy

The following table presents the changes in fair value measurements of financial instruments classified as Level 3 for the six months ended June 30, 2017 and year ended December 31, 2016. These financial instruments are measured at fair value utilizing non-observable market inputs. The net realized losses and net unrealized gains are recognized in the consolidated statements of loss.

| | Six months ended June 30, 2017 | Year ended December 31, 2016 |
|---|-----------------------------------|------------------------------------|
| Investments classified as Level 3, fair value | | |
| Balance, beginning of year | \$ 200,000 | \$ 138,000 |
| Purchase at cost - shares | - | 162,500 |
| Exchanged for Level 1 investments | - | (95,205) |
| Unrealized (loss)/gain | - | 3,710 |
| Foreign exchange loss | - | (9,005) |
| Balance, end of period | \$ 200,000 | \$ 200,000 |

Within Level 3, the Company includes private company investments which are not quoted on an exchange. The key assumptions used in the valuation of these instruments include (but are not limited to) the value at which a recent financing was done by the investee, company-specific information, trends in general market conditions and the share performance of comparable publicly-traded companies. The fair values of all of the private company investments held by the Company were determined by recent financings done by the investee other than that described in Note 9(iii).

As valuations of investments for which market quotations are not readily available, are inherently uncertain, may fluctuate within short periods of time and are based on estimates, determination of fair value may differ materially from the values that would have resulted if a ready market existed for the investments. Given the size of the private investment portfolio, such changes may have a significant impact on the Company's financial condition or operating results.

For those investments valued based on a recent financing or transaction price, management has determined that there are no reasonably possible alternative assumptions that would change the fair value significantly as at June 30, 2017 and December 31, 2016. A +/- 25% change in the fair value of these Level 3 investments as at June 30, 2017 will result in a corresponding +/- \$50,000 (December 31, 2016 - +/- \$50,000). While this illustrates the overall effect of changing the values of the unobservable inputs by a set percentage, the significance of the impact and the range of reasonably possible alternative assumptions may differ significantly between investments, given their different terms and circumstances. The sensitivity analysis is intended to reflect the significant uncertainty inherent in the valuation of private investments under current market conditions, and the results cannot be extrapolated due to non-linear effects that changes in valuation assumptions may have on the estimated fair value of these investments. Furthermore, the analysis does not indicate a probability of changes occurring and it does not necessarily represent the Company's view of expected future changes in the fair value of these investments. Any management actions that may be taken to mitigate the inherent risks are not reflected in this analysis.
