6. Describe the issuer’s Business, Products, and Services

A. Description of the issuer’s business operations:

Business Summary

The Company is both a consumer-direct indirect distributor of non-GMO (Genetically Modified Organisms) natural and organic foods in the United States. Foods and merchandise distributed indirectly is done through a network of independent non-stocking distributors, or “Health Merchants” built on the GreenPolkaDotBox.com online shopping platform. The platform was launched in December 2011 and through which is offered a wide array of healthy, natural, organic and specialty foods, and other products at low customer prices. The network of online wholesale stores called Health Merchants that are powered by Green PolkaDot Box is growing. As of the date of this report the number totals 260.

The Company’s mission is to provide a complete selection of nutrient-dense clean food and products to consumers at the lowest possible price and to educate all customers about the links between a nutrition-poor diet and chronic disease.

The Company purchases the majority of its merchandise directly from manufacturers, producers, and farmers and route it to our warehouses with the aim of maximizing handling efficiencies and eliminating many of the costs associated with traditional multiple-step distribution channels. Such traditional steps include purchasing from distributors as opposed to manufacturers and the use of central receiving, storing, and distributing warehouses.

“Buying Collective”

Our business model is based on creating a powerful buying collective. A “buying collective” is a group of consumers with similar purchasing needs and requirements that uses the leverage of its group size to influence the quality and pricing of the products it seeks to purchase. Green PolkaDot Box has carefully select name brand and trusted vendors that offer a wide variety of fresh and packaged foods and products at bargain prices.

Health-Conscious Products

We are dedicated to offering our customers products that are clean and safe. We not only use our collective bargaining power to be selective in the products we offer but use such influence to require our vendors to sell us “clean food.” ”Clean food” means certified organic foods of all varieties that are third party verified to be free of genetically modified organisms (“GMO”).

We aim to protect our consumers by insisting that food production is designed to exclude derivatives from GMO food crops and from dairy products injected with genetically modified growth hormone. In addition, we seek to exclude meat from animals fed from GMO feed. Our “buying collective” intends to only partner with vendors who provide certified organic animal proteins or 100% wild caught or grass fed animals.

We endeavor, when possible, to work exclusively with manufacturers and growers that produce certified organic foods. Our objective pertaining to clean organic food is not only intended to protect consumers but to provide a large customer base and reward those providers that offer “clean food.” By incentivizing providers to produce “clean food,” we support and protect the labor and economic investment of providers who produce “organic” and “clean food.”

Customers

Our commitment to providing “clean food” to our customers is a quality that is intended to capture the purchasing loyalty of health-minded consumers across the country. As of September 30, 2015, GPDB has approximately 26,000 registered customers, of which approximately 13,500 have placed at least one order. Our customer continues to grow through our marketing efforts and customer referral programs. In order to create awareness of our operations, we have partnered with numerous national organizations whose customers in aggregate represent large numbers of health-conscious people that would benefit from joining our buying collective. With the advent of the Health Merchant stores, scheduled to launch late November, the Company anticipates its marketing reach will extend to approximately 7,000,000 customers.

Supplier Relationships

We have direct purchase agreements with hundreds of manufacturers of organic and natural foods and products. Direct purchasing agreements allow us to cut out certain costs that are embedded in the traditional supply chain. Typically, a retailer purchases its inventory through a wholesaler. The wholesaler purchases the products from a distributor, which distributor purchases the products directly from the manufacturer. The traditional model requires the consumer to bear the burden of multiple mark-ups. Our model seeks to change these inefficiencies by cutting out the middle-men in the traditional distribution channel.

Because of high sales volume and rapid inventory turnover, we generally sell inventory before we are required to pay many of our suppliers, even though we take advantage of early payment discounts when available. To the extent that sales increase and inventory turnover becomes more rapid, a greater percentage of inventory is expected to be financed through payment terms provided by suppliers rather than by working capital.

Advanced Logistics

We currently own approximately \$598,547 in paid inventory, which is held in our approximately 40,000 square foot warehouse located in Mount Pleasant, Utah. This inventory is managed by an advanced warehouse management and delivery system that capitalizes on efficiencies of the Internet and a state-of-the-art online ordering system.

Our website orders come through an e-commerce platform called Magento Enterprise. The order is transferred in real time to our warehouse management system called WISE, provided by Royal 4 Systems, Inc. We run a batch picking methodology in the warehouse. As the orders come into

WISE, they are batched to picking carts. The batches of orders are sorted by pick location. All orders are picked and placed on the cart. The cart is sectioned off with each order having its own section. Once the orders have been picked, the cart is taken over to a verification station. The operator of the station scans the order number into WISE and starts the verification process. Each item in the warehouse has a scan-able UPC code. The operator scans each item associated with each order. If the item does not belong in the order, an error comes up and the operator is alerted. Once all items have been successfully scanned and verified, the order is transferred over to a pack-out station. All of the items for that order are wrapped, boxed, void- filled and processed through our shipping software, which shipping and software is provided by FedEx. Once the order is shipped, the tracking information from FedEx is fed back to WISE and the shipment is completed. WISE then transfers the tracking information back to Magento and Magento sends out a shipping email to the customer with the tracking number and other information.

Website and Consumer Tools

The Company's website, www.greenpolkadotbox.com, offers an expansive selection of frozen/refrigerated and packaged foods and other products geared towards health-conscious customers. Because the Company has leveraged relationships with vendors, we are able to provide our customers with a wide variety of products in a single purchasing platform. Furthermore, our website provides customers with time-saving tools which use advanced software that enables consumers to sort through large inventory and customize their selections based upon their dietary needs, brand preferences and product type. Our website also boasts volumes of educational content that allows customers to understand the impact of food on their bodies and the benefits they can get from the healthy food available on our website.

Customer Services Center

Our Legendary Customer Service staff, currently consisting of two full and one part-time employees, is trained and dedicated to providing high levels of service with the aim of developing a stronger sense of loyalty in the customer base. Our staff is also dedicated to researching the best prices available to consumers. When the customer services staff is not providing service to our customers they are tracking the highs and lows of market prices for the products we carry so that we can ensure that we provide lower prices. Furthermore, we employ a full-time staff customer dedicated to thoroughly vetting products offered or to be offered to our customers by scrutinizing the dietary contents and ingredients of the products, as well as seeking verification of ingredient content.

“Living Produce”

The Company has acquired 40-acres of land in Sanpete County, Utah to develop a Living Produce® growing center. Our intention is to expand the benefits of the buying collective by giving customers the ability to purchase fresh produce: superior to organically grown produce, at wholesale prices. Similar to the packaged food business segment, we intend to use the leverage of our buying collective to provide high-quality Living Produce at a discounted price to our Customers. In anticipation of the Living Produce launch, we have developed an innovative system for shipping packaged goods and fresh-harvested Living Produce in a specially packed box.

Competition

The organic and natural food and products industry is highly competitive. Consumers have many choices in the club or customer retailer industry. Our largest competition comes from customer

warehouses or other buying collectives such as Costco, Walmart's Sam's Club and BJ's. We also compete with smaller regional and local retailers of organic, natural, gourmet and other specialty foods that focus on health-conscious consumers such as The Good Earth, Whole Foods and Trader Joe's. Other competitive forces include conventional retail grocery stores.

We believe that our mission to provide low-cost products within a specific food category, natural and organic, gives us a competitive advantage over customer warehouses that do not have the variety, selection and exclusivity that targets health conscious consumers. We carefully research the current market prices of well-known retail merchants, including online stores, for all the products in our customer offering and then price those products at an average of 10%-15% below the lowest competitive prices found.

We believe that competitive pricing will generate greater customer loyalty, which in turn will increase the customer base and product turnover.

We believe that we have a substantial competitive advantage over competitors who wish to enter the buying collective and/or health-conscious product market. We believe that it could take approximately 18 to 24 months for a competitor to launch a similar website. The primary reason for such a barrier to entry is that a potential competitor would have to invest a great deal of time to develop: (i) sales channel alliances; (ii) buying agreements with nationally recognized food manufacturers and farmers; (iii) distribution and fulfillment facilities; and (iv) efficient logistics systems. However, if a competitor could survive the time investment, we believe we could benefit because the emergence of other websites in our space would serve to validate the business category.

Sales and Marketing

To date substantially all sales and marketing have been through marketing agreements with national organizations such as the Organic Consumers Association, the Hippocrates Health Institute, the Natural Solutions Foundation, Citizens for Health, the National Health and Wellness Club, Natural News and Mission Possible many of which were formed specifically to raise awareness and to create a coalition of people that are interested in healthy lifestyles and dietary consciousness. In addition, we offer an incentive program that rewards current customer for referring new customers to the buying collective. Our rewards program, called "PolkaDot Rewards," enables customers to earn points on purchases of customers they refer, which points can be used to reduce or even eliminate the cost of products they purchase.

We intend to broaden the scope of our marketing campaigns through a growing network of Health Merchants.

Government Regulations

Our warehouse operations and the products that we sell in the United States are subject to regulation by state and local health departments, the USDA and the United States Food and Drug Administration, which generally impose standards for product quality and sanitation and are responsible for the administration of bioterrorism legislation. Our warehouse has not yet been subject to an inspection but we anticipate that such an inspection will occur once annually by state or federal authorities.

We believe that we are in material compliance with all federal, provincial, state and local laws applicable to our operations.

Intellectual Property

We have submitted two trademark applications intended to protect our name and logo. We license software used in our warehouse facility under non-exclusive license agreements that are generally non-transferable and have a perpetual term. When necessary we endeavor to enter into agreements with our employees and contractors and with parties with whom we do business in order to limit access to and disclosure of any proprietary information and production processes.

Employees

As of September 30, 2015, we had 18 employees, of which 14 are full time.

GREEN POLKADOT BOX INCORPORATED
NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
For the Nine Months Ended September 30, 2015

NOTE 1 – ORGANIZATION AND BASIS OF PRESENTATION

On January 18, 2008, The Green Polka Dot Box, LLC (“GPDB LLC”) was organized as a limited liability company (LLC) under the laws of the State of Utah.

On December 30, 2011, GPDB LLC filed Articles of Conversion with the Secretary of State of Utah to form a new corporation, The Green Polka Dot Box, Inc. (“GPDB”) and convert GPDB LLC to a C Corporation. The conversion was effective at the end of business December 31, 2011 for 2012. As a result, on January 2, 2012, GPDB LLC transferred all of its assets and liabilities to GPDB. Also, on January 2, 2012, GPDB issued 26,735,925 shares of common stock (100,000,000 authorized, no par value) to the members of the LLC in exchange for their units. The conversion was completed as 1 unit for 1 share. All options and warrants were also converted on a 1:1 basis.

On February 29, 2012, GPDB entered into an Agreement and Plan of Merger to give effect to a reverse acquisition of GPDB by Vault America, Inc. (“Vault”), through its wholly owned subsidiary Green PD Acquisitions, Inc., whereby GPDB became a wholly-owned subsidiary of Vault (the resultant entity, the “Company”).

Prior to the closing of this transaction and pursuant to a certain Common Stock Purchase Agreement dated February 2, 2012, Vault sold 1,044,133 of its 1,144,324 issued and outstanding common shares, 460 of its 790 issued and outstanding Preferred Series A shares and 1,000 of its issued and outstanding 1,000 Preferred Series B shares to GPDB in exchange for \$280,000. Simultaneous to the purchase of these shares, Vault spun out its subsidiary. Then, pursuant to the Agreement, Vault issued 9,919,028 common shares to the GPDB shareholders, in exchange for the 26,735,925 shares that GPDB had outstanding and simultaneously the 1,044,133 Vault common shares, the 460 Vault Preferred Series A shares and the 1,000 Vault Preferred Series B shares mentioned above, were cancelled. Also pursuant to the Agreement, Vault issued 33,000 common shares in exchange for its remaining 330 Preferred Series A shares.

This transaction was accounted for as a reverse acquisition. GPDB is the surviving company and the acquirer for accounting purposes. Following the completion of reverse merger, The Company changed its name from Vault America, Inc. to Green PolkaDot Box Incorporated. The Company also changed its reporting year-end from October 31 to December 31.

The “shop” section of the website provides members with hundreds of popular name brand products including healthy foods, supplements, cooking products, and, household and personal care products. The members can find their favorite brands and items they are already using in their daily diet. Products are priced at the best value possible based on wholesale bulk volume purchasing and membership rewards programs; and, then delivered directly to their homes.

The Company raised investment capital from the founder and private investors to fund the “start-up” of the Company, research the organic and natural foods and products industry and market opportunities, and the design and development of a state-of-the-art website and online shopping. The Company began selling its products in December of 2011.

Going Concern

These consolidated financial statements have been prepared on a going concern basis, which implies that the Company will continue to realize its assets and discharge its liabilities in the normal course of business. The Company began generating revenues in 2011 and generated losses from operations totaling of \$2,027,555 for the nine months ended September 30, 2015 and has accumulated losses of \$22,683,425 through September 30, 2015.

The Company had raised investment capital from the founder and private investors from the sale of the former LLC units of as well as certain convertible notes to assist them in acquiring certain fixed assets as well as provide some necessary working capital for development and start-up costs.

During the nine months ended September 30, 2015, the Company raised \$830,798 through the sale of 1,563,595 shares of common stock and 5,000 shares of preferred stock. The Company believes it will need to raise

approximately and additional \$5,000,000 to continue operations to a point where it may achieve positive cash flow through the expansion of facilities and sales.

The consolidated financial statements do not include any adjustments relating to the carrying amounts of recorded assets or the carrying amounts and classification of recorded liabilities that may be required should the Company be unable to continue as a going concern.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Unaudited Interim Financial Information

We have prepared the accompanying financial statements pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”) for interim financial reporting. These consolidated financial statements are unaudited and, in our opinion, include all adjustments, consisting of normal recurring adjustments and accruals necessary for a fair presentation of our consolidated balance sheets, operating results, and cash flows for the periods presented. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) have been omitted in accordance with the rules and regulations of the SEC.

Basis of Presentation

The accompanying financial statements are prepared in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents

The Company considers all highly liquid debt instruments and other short-term investments with maturity of three months or less, when purchased, to be cash equivalents. The Company maintains cash balances at one financial institution that is insured by the Federal Deposit Insurance Corporation.

Fixed Assets

The Company has fixed assets comprising of leasehold improvements, warehouse equipment, furniture and computer software and equipment, which are reflected on the books net of accumulated depreciation. Depreciation is calculated using the straight-line method over the estimated useful lives of the related assets ranging from 3 years to 10 years. Costs of maintenance and repairs that do not improve or extend the life of the respective assets are charged to expense as incurred.

Inventory

Inventory is valued at the lower of cost (on a first-in, first-out (FIFO) basis) or market. Inventory of \$598,547 as of September 30, 2015 consists of finished goods that are packaged and awaiting shipment including shipping supplies. The Company has set up a reserve for obsolescence of inventory based on its estimate of goods that may not sell prior to their “best if used by” date. The inventory reserve is \$8,000 and \$8,000 at September 30, 2015 and 2014, respectively.

Recoverability of Long-Lived Assets

The Company reviews the recoverability of their long-lived assets on a periodic basis whenever events and changes in circumstances have occurred which may indicate a possible impairment. The assessment for potential impairment is based primarily on the Company's ability to recover the carrying value of its long-lived assets from expected future cash flows from its operations on an undiscounted basis. If such assets are determined to be impaired, the impairment recognized is the amount by which the carrying value of the assets exceeds the fair value of the assets. Fixed assets to be disposed of by sale are carried at the lower of the then current carrying value or fair value less estimated costs to sell.

Fair Value of Financial Instruments

The carrying amounts reported in the consolidated balance sheets for cash and cash equivalents, accounts receivable, accounts payable and notes payable approximate fair value because of the immediate or short-term maturity of these financial instruments and the stated interest rate is equivalent to rates currently available. For the warrants that are classified as derivatives, fair values were calculated using the Black-Scholes pricing model.

Income Taxes

Effective January 2, 2012, the Company converted from operating its business as a limited liability company (LLC) to operating its business as a C Corporation. Prior to the conversion, the Company was treated as a partnership for federal and state income tax purposes, and all losses generated through December 31, 2011 were passed through to the individual members of the LLC and taxed at their respective tax rates.

The Company accounts for income taxes utilizing the liability method of accounting. Under the liability method, deferred taxes are determined based on differences between financial statement and tax bases of assets and liabilities at enacted tax rates in effect in years in which differences are expected to reverse. Valuation allowances are established, when necessary, to reduce deferred tax assets to amounts that are expected to be realized.

The Company also follows the guidance related to accounting for income tax uncertainties. In accounting for uncertainty in income taxes, the Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more likely than not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. No liability for unrecognized tax benefits was recorded as of September 30, 2015 and 2014.

Revenue and Cost Recognition

The Company generates revenue from the sale of (1) its products and (2) Health Merchant distributorships. The Company generally recognizes merchandise sales revenue from the sale of its products as follows:

- 1) Persuasive evidence of an arrangement exists;
- 2) Delivery has occurred;
- 3) The price to the buyer is fixed or determinable, and
- 4) Collectability is reasonably assured.

Cost of sales includes all product purchases, packaging supplies, shipping, freight and duties costs. Health Merchant distributorships were sold during the nine months of 2015 at \$1,997 each. Acquisition costs ranging from 10% to 40% were paid on Health Merchant sales.

Stock-Based Compensation

The Company records stock-based compensation at fair value as of the date of grant and recognizes the corresponding expense over the requisite service period (usually the vesting period), utilizing the Black-Scholes option-pricing model.

The volatility component of the calculation is based on the historic volatility of the Company's stock or the expected future volatility. The expected life assumption is primarily based on historical exercise patterns and employee post-vesting termination behavior. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

Loss Per Share of Common Stock

Basic net loss per common share is computed using the weighted average number of common shares outstanding. Diluted earnings per share (EPS) include additional dilution from common stock equivalents, such as stock issuable pursuant to the exercise of stock options and warrants. Common stock equivalents are not included in the computation of diluted earnings per share when the Company reports a loss because to do so would be anti-dilutive for periods presented.

Reclassifications

Certain prior period amounts in the consolidated financial statements have been reclassified to conform to the current period's presentation.

Recently Adopted Accounting Pronouncements

The Company has implemented all new accounting pronouncements that are in effect and that may impact its consolidated financial statements and does not believe that there are any other new pronouncements that have been issued that might have a material impact on its financial position or results of operations.

NOTE 3 – INVENTORY

The Company only holds finished goods inventory. As of September 30, 2015, the Company has \$598,547 in inventory comprising of the deliverable merchandise to customers. Inventories are accounted for using the first-in first-out ("FIFO") and are valued at the lower of cost or market value. This valuation requires us to make judgments, based on currently-available information, about the likely method of disposition, such as through sales to individual customer, returns to product vendors, or liquidations, and expected recoverable values of each such disposition. These assumptions about future disposition of inventory are inherently uncertain. The Company has analyzed the inventory as of September 30, 2015 and recorded a reserve for inventory obsolescence of \$8,000 based on the estimated amount of inventory that may not sell prior to its "best if used by" date.

NOTE 4 – FIXED ASSETS

Fixed assets as of September 30, 2015 and December 31, 2014 were as follows:

Assets	Estimated Useful Lives (Years)	September 30, 2015	December 31, 2014

NOTE 7 – MEMBERSHIP AGREEMENTS – REWARD POINT LIABILITY AND DEFERRED REVENUE

The Company's customers have had the option of entering into four distinct membership agreements. "Founding Trust Membership" – the "Founding Trust Membership" was a lifetime membership agreement, that required the member to pay \$2,000. Upon payment of this fee, the member received 2,000 reward points, plus an additional bonus of 500 points (value of \$2,500 per member, \$1 per point). In addition to the 2,500 reward points received for signing up, each member had the opportunity to receive an additional 2,000 points over 18 months if the criteria in the agreement are met. The Company has accounted for these "Founding Trust Membership Fees" as "deferred revenue" for the initial 2,000 reward points paid for, and the balance of the fees as "reward point liability". The Company has classified the initial \$2,000 of deferred revenue to current period revenue based on a formula of the initial 2,500 points being used. Since the members receive 2,500 points initially, 2,000 they pay for and 500 they are given, these points are reclassified 80% (2,000/2,500) to revenue and 20% (500/2,500) as an offset to cost of sales. Additionally, the 500 points are classified as a deferred cost and written off to cost of sales when the 20% of the first 2,500 points per member are redeemed. The Company accrued the additional 2,000 bonus points monthly in accordance with the agreement as "deferred costs" and "reward point liability" as well. In addition, the "Founding Trust" members are able to earn points for referrals to future members that sign up. As the points are redeemed in the members' sales, the "deferred costs" and "reward point liability" are offset to the cost of sales in the current period.

Charter Membership – the “Charter Membership” is a lifetime membership agreement that requires the member to pay \$1,000. Upon payment of this fee, the member receives 1,000 reward points, plus an additional bonus of 400 points (value of \$1,400 per member, \$1 per point). In addition to the 1,400 reward points received for signing up, each member has the opportunity to receive an additional 600 points over 15 months if the criteria in the agreement are met. The Company has accounted for these “Charter Membership Fees” as deferred revenue for the \$1,000 paid.

The Company has classified the \$1,000 of deferred revenue to current period revenue based on a formula of the initial 1,400 points being used. Since the members receive 1,400 points initially, the deferred revenue is recorded as current period revenue based on 80% of the first 1,400 points used (1,000/1,400). The Company accrues the additional 600 bonus points monthly in accordance with the agreement as “deferred costs” and “reward point liability” as well. In addition, the “Charter” members are able to earn points for referrals to future members that sign up. As the points are redeemed in the members’ sales, the deferred costs are classified to the cost of sales in the current period.

As of December 31, 2012, the “Founding Trust Membership” and “Charter Membership” are no longer available to customers.

“Rewards” – the “rewards” members pay an annual membership fee of \$125 that is classified as deferred revenue and amortized by the Company over 12 months. The “rewards” members have the availability to earn rewards points for shopping in accordance with their agreement. As of December 31, 2012, the reward membership is no longer available to new customers but existing reward members can continual to renew their reward membership annually. “Club” – the “Club” members’ pay an annual membership fee of \$50 that is classified as deferred revenue and amortized by the Company over 12 months. The “club” agreement was an early agreement the Company offered which enables the members to pay \$50 per year to shop on the site. There is no reward point system for this membership class. “Club” members were offered the opportunity to upgrade their membership to the “Rewards” membership for \$75. For the period ended September 30, 2015 and December 31, 2014, the Company has a total of \$287,845 and \$238,876, respectively, in deferred revenue for “Rewards” and “Club” membership fees.

NOTE 8 – INCOME TAXES

On December 30, 2011, the Company filed Articles of Conversion with the Secretary of State of Utah to form a new corporation, The Green Polka Dot Box, Inc. and convert the LLC into a C Corporation. The conversion was effective at the end of business December 31, 2011 for 2012. As a result, on January 2, 2012, the Company transferred all of its assets and liabilities to The Green Polka Dot Box, Inc. Also, on January 2, 2012, the Company issued shares of common stock (had 100,000,000 authorized, no par value) to the members of the LLC in exchange for their units.

Deferred income taxes are determined using the liability method for the temporary differences between the financial reporting basis and income tax basis of the Company’s assets and liabilities. Deferred income taxes are measured based on the tax rates expected to be in effect when the temporary differences are included in the Company’s tax return. Deferred tax assets and liabilities are recognized based on anticipated future tax consequences attributable to differences between financial statement carrying amounts of assets and liabilities and their respective tax bases.

As of September 30, 2015, there is no provision for income taxes, current or deferred.

At September 30, 2015, the Company had a net operating loss carry forward in the amount of \$16,642,516, available to offset future taxable income through 2034. The Company established valuation allowances equal to the full amount of the deferred tax assets due to the uncertainty of the utilization of the operating losses in future periods.
