On March 7, 2016 Barton Hollow, LLC, a Nevada limited liability company, and stockholder of the Issuer, filed an Application for Appointment of Custodian pursuant to Section 78.347 of the Act in the District Court for Clark County, Nevada. Barton Hollow was subsequently appointed custodian of the Issuer by Order of the Court on April 26, 2016 (the "Order"). In accordance with the provisions of the Order, Barton Hollow thereafter moved to: (a) reinstate the Issuer with the State of Nevada; (b) provide for the election of interim officers and directors; and (c) call and hold a stockholder meeting.

On May 17, 2016, Barton Hollow, together with the newly-elected director and officer of the Issuer, caused the Issuer to enter into a Letter of Intent to merge with Biochar Now, LLC, a Colorado limited liability company. Pursuant to the Letter of Intent, the parties thereto would endeavor to arrive at, and enter into, a definitive merger agreement providing for the Merger transaction described therein. As an inducement to the members of Biochar Now, LLC. to enter into the Letter of Intent and thereafter transact, the Issuer caused to be issued to its members 20,000,000 shares of its common stock.

Subsequently, on June 1, 2016, the Issuer and Biochar Now, LLC entered into a definitive Agreement and Plan of Merger (the “Merger Agreement”). Concomitant therewith, the stockholders of the Issuer elected Bill Beierwaltes, the President of Biochar Now, LLC, Chief Executive Officer and Director of the Issuer, who, along with Barton Hollow, ratified and approved the Merger Agreement and Merger.

Pursuant to the terms of the Merger Agreement, the Issuer anticipates the Merger will close in the 3rd quarter of 2016. The Merger is designed as a reverse subsidiary merger pursuant to Section 368(a)(2)(E) of the Internal Revenue Code. That is, upon closing, Biochar Now, LLC. will merge into a newly-created subsidiary of the Issuer with the members of Biochar Now, LLC receiving shares of the common stock of the Issuer as consideration therefor. Upon closing of the Merger, Biochar Now, LLC. will be the surviving corporation in its merger with the wholly-owned subsidiary of the Issuer, therefore has become the wholly-owned operating subsidiary of the Issuer.

5. Describe the Issuer’s Business, Products and Services

A. Description of the Issuer’s Business Operations

The Company’s current operations have been focused upon its reorganization and the pursuit of viable merger or other business combination candidates. On June 1, 2016, the Company entered into the Merger Agreement with Biochar Now, LLC, a Colorado limited liability company. The Company expects that such transaction will close in 3rd quarter, 2016, however there can be no guaranty that it in fact will. Should the merger close, the business of the Issuer will become that of Biochar Now.

Biochar Now, Inc. (hereinafter “Biochar Now” or the “Company”) is a biochar production and sales company headquartered in Loveland, Colorado.

Biochar Now, Inc. produces and sells high-quality biochar, a charcoal-based supplement that can be used in a number of markets, including agriculture, plastics, nutrient pollution and mercury removal, water and carbon sequestration, and more. We developed a successful, alternative technology to produce our biochar that is not used by any of our competitors and gives us a unique advantage in the industry.

The applications of biochar are vast and reach across a multitude of industries. Adding biochar to soil provides for increased soil fertility and crop yields. Adding biochar to the soil surrounding abandoned mines helps to sequester heavy metals and stop those contaminants from leeching into local water supplies. Biochar can act as a filter in any number of industries: oil and gas production areas, landfills, smokestacks, etc. Biochar can be used as a bio-filler in polymers production. These are just a handful of the industries biochar can have a large and immediate impact in.

The cutting edge production method we have developed offer a number of economic and environmental benefits over traditional biochar production. Biochar Now uses a slow pyrolysis technology that turns large pieces of wood into our product, whereas most competitors use fast burning technology that needs to be fed woodchips. Due to the natural variability in size, mass, and moisture content of the woodchips, this fast method fails to create a consistent product. The slow burning method we have developed delivers a consistently reliably, high-quality biochar, offering both bottom line value and environmental gain to our customers.

Should the merger close, the Company’s principal product will be biochar, available in a variety of sizes for optimal use in its many applications. The Company’s competitive advantage comes from its unique production method that produces

a more consistent and high-quality product than is otherwise available. The Company's sales team sells its products throughout the country.
