6) Describe the Issuer's Business, Products and Services

Describe the issuer's business so a potential investor can clearly understand the company. In answering this item, please include the following:

A. a description of the issuer's business operations;

We were incorporated in Delaware on July 3, 1996, under the name IHS of Virginia, Inc., as a wholly owned subsidiary of Integrated Healthcare Systems, Inc. We were their primary operating subsidiary until September 30, 1999. On December 29, 2000 Ultraque, LLC, a Delaware limited liability company owned by Michael J. Black, our Chairman, President and Chief Financial Officer, purchased all of our outstanding common stock. On August 28, 2001, Ultraque was merged into our Company and our name was changed to Healthnostics, Inc. by amendment to the Certificate of Incorporation, as a new Delaware corporation.

From 2001 until July 2010, we operated as a healthcare software and internet information company, and in June 2010, management decided to expand the Company's operations and change its strategic direction by diversifying its business interests. During the period from June 2010 to October 2010 we acquired technology rights and assets from two companies. In July 2010 we acquired the manufacturing rights and assets of Medical Products Corporation and marketing rights for Worldwide Wipes Corp. In October 2010 we acquired the rights to manufacture Micro-Fill 2160 and the MobileCleanRoom technology from its inventor.

In April 2011 we formalized our management consulting and investment group into the HNS Fund Co., in order to expand upon our investment and outreach strategy.

In July 2011 the Depository Trust Company ("DTC") imposed a "chill" on the depositing of Healthnostics, Inc. common stock, which severely impacted the Company's operations. DTC remained unresponsive and in July 2012, management revised its strategy and scaled back Healthnostics' plans and operations. While the Company retains its acquired manufacturing and distribution operations, assets and technologies, it has embarked on a consolidation and re-focus of its operations.

The first step in this re-focus process is the rescission of the divestment and reinstatement of our original operations with the return of MedBioWeb Corp. Healthnostics, Inc. and MedBioWeb Corp., agreed to the transfer of medbioworld.com, familymedicalnet.com and the MedGuardian software technology back into Healthnostics, Inc. This transaction has been recorded as operationally effective April 1, 2013.

While working to monetize the MedBioWeb assets, the Company continues to evaluate new business prospects and acquisition possibilities. At present our revenue is generated through HNS Fund Co., investments, consulting and advisory services.

B. Date and State (or Jurisdiction) of Incorporation:

Incorporated on July 3, 1996 in Delaware. Please refer to Section 6 A. above for more details.

C. the issuer's primary and secondary SIC Codes;

. The Company's primary and secondary SIC Codes are 7371 and 7389.

D. the issuer's fiscal year end date;

December 31

E. principal products or services, and their markets;

A. Our business is comprised of three segments; Internet Portal Services, Patient Care Monitoring Systems and Management Consulting Services. The following overview describes our key products, services and markets:

1. Internet Portal Services.

This segment provides Internet-based healthcare and bioscience information, educational resources and references. Our offerings for healthcare and bioscience professionals help them find the latest up-to-date information, resources and reference material instantly. Our online offerings for consumers/patients help them become better informed about healthcare choices in order to make informed decisions concerning their healthcare. We reach a substantial audience of clinically active healthcare professionals and research oriented bioscience professionals, and to a lesser degree, health-involved consumers/patients.

BakedAmerican.com. In February 2014 the Company announced development of a new web-based project, BakedAmerican.com, a medical marijuana and recreational cannabis consumer website focused on product information, dispensary locator and resources. The new site will allow consumers and patients to identify, rate and explore legal marijuana dispensaries and compare experiences and products. On December 1, 2014 we announced the sale of BakedAmerican.com to Stragenics, Inc., in exchange for 5,000,000 shares of restricted common stock for which we value the transaction at \$175,000. At the request of the acquirer, Healthnostics, Inc., agreed to revised the transaction whereby the 5,000,000 shares were cancelled and the Company received in its stead, a promissory note for \$175,000 due on November 30, 2015 with interest at 6%.

MedBioWorld, one of the largest medical and bioscience portals on the Internet, lists 8,200 journals within 80 medical and bioscience specialties; the home pages of 7,000 medical and bioscience associations; and links to over 2,000 bioscience companies.

FamilyMedicalNet is built around the concept of consumers selecting access points to the best information on every possible health and medical subject from all over the Internet, including primary and secondary sources that are shown to be reliable and up-to-date.

2. Patient Care Monitoring Systems

MedGuardian is our patient care improvement and medical error reduction software system for hospitals. This care improvement and error reduction process significantly contributes to lower overall patient treatment costs for a hospital. It is a product initiative that is designed to radically improve the way healthcare is applied to patients in an acute care hospital setting. The system captures, integrates and compiles clinical data from all the various departments and many other sources within or outside the hospital, integrates the data with pertinent quality and risk management data supplied through MedGuardian. This provides a continuing analysis and reporting of each patient's clinical treatments and outcomes.

Errors and liability claims can be reduced by capturing and tracking hospital patient, staff or visitor occurrences

and incidents prior to them becoming liability insurance claims. The hospital and its insurance carrier can then increase the likelihood of successfully adjudicating the event. The hospital can subsequently identify and implement the steps needed to eliminate a recurrence and thereby reduce future risk occurrences and costs. This process improvement can have beneficial effects on the delivery of healthcare and provide significant cost savings to the parties involved.

We believe that the combination of our Internet Portal Services and Patient-care Monitoring Systems makes us well positioned to create improvement in the way information is accessed, analyzed and used by the healthcare and bioscience professionals and consumer/patients. Coupling pertinent healthcare information with patient monitoring oversight systems, enables increased efficiency, better decision making and, ultimately, higher quality of patient care at lower cost.

3. Management Consulting Services.

Our investing and consulting group, called the HNS Fund Co., works with new and emerging companies that have a business models that demonstrates a willingness to succeed. We provide corporate guidance, and in certain cases, investment to assist these operations in their growth and development. We have primarily focused on healthcare technology and manufacturing. Besides providing capital, HNS Fund services include strategic advice, mergers and acquisitions, and corporate services—regulatory affairs, finance and accounting.

B. Distribution methods of the products or services;

MedBioWorld.com: Internet website

FamilyMedicalNet.com Internet website

MedGuardian: In development

Management Consulting: Services provided directly to client
