### **Item 5. Financial Statements**

The Issuer's Interim Financial Statements for the Quarter ending June 30, 2014, and accompanying Notes to Financial Statements, were both filed with OTC Markets on August 14, 2014 and are incorporated herein by reference.

## **Item 6. Describe the Issuer's Business, Products and Services**

**A. Description of the Issuer's Business Operations:** Hop-on, Inc. (HPNN.PK) Since 2003, the Company has continually obtained essential patent portfolio license agreements for mobile communications, computing and home entertainment devices.

These carefully negotiated "have made" license rights permit Hop-on to have patented products made by third parties, in addition to the standard rights to "make, use and sell". The license rights to essential patents have been received from Qualcomm, Motorola, InterDigital, Lucent, NEC, Alcatel, Ericsson, Nokia, Philips, Siemens, and now from an Android platform and give Hop-on a stronger position to manufacture, market and distribute than the likes of major OEMs.

Worldwide patent law amendments have allowed patent owners a more aggressive means of preventing patent infringement than was previously available, including the ability to pursue injunctive relief. While headlines abound with patent wars among Samsung, Apple and Google, patent owners are also winning judgments against the many less known manufacturers in evolving markets, such as China.

With insurmountable judgments levied against some Chinese firms, many are being forced to adjust their business practices. Working with a holder of "have made" licenses, like Hop-on, permits existing Chinese and other international firms to continue in business, forgoing the need for audits that would identify years of non-compliance and provide the evidence needed for compensatory damages.

Hop-on has intimate relationships with many Chinese manufacturers and has a history of successfully monetizing patent portfolios under Hop-on and other brands. It is now uniquely positioned to fill an ever increasing gap in the Chinese OEM and ODM mobile communications, computing and home entertainment devices marketplace.

Hop-on is well known for the invention of the disposable cell phone in 2001, being named one of the "Top Ten Inventions of the Year" by Time magazine. The disposable and rechargeable phone market is now a billion dollar industry.

Hop-on, Inc. ("the Company") was formed under the laws of Nevada on March 16, 1993 under the name of New Discoveries Publishing Corporation and adopted later as NWDP.com, Inc. In May 2005, the Company changed its name to Hop-on, Inc. The Company was also qualified to transact business in the State of California on March 24, 1999.

In 2001 the Company shifted emphasis to develop and market wireless phone products. The Company is the developer and manufacturer of the world's first disposable, recyclable and contract free cell phone. Its initial IS-95 CDMA phones provided a much-needed alternative to full service cellular contracts and prepaid calling. The Company targets its phones to both emerging market carriers, domestic and international carriers, and resellers needing an entry level priced phone.

Beginning in 2002 through 2004, the Company secured essential patents and licensing agreement for GSM and GPRS technology from Nokia, NEC, Alcatel, Siemens, Phillips, Motorola, Lucent Technologies and Ericsson. 2003, The Company authorized a preferred series of stock for 10,000,000 shares. The Company began shipping to the Mexican market homologated phones with the largest carrier in Latin America. The Company also continued to sell various cell phone accessories throughout the United States.

Through 2006, the Company established operations in India, the world's second largest emerging market, and began development of WiFi cell phone technology. The Company's ever expanding line of products included three new CDMA phones models, as well as phones featuring cameras and MP3 players. Hop-on also continued to ship phones to the largest Mexican wireless carrier and introduced GSM technology to the U.S. market.

In 2007, the Company expanded the company into the Internet gaming market with the source code of a "client-served based, on-line gaming software." The Company is pursuing gaming licenses for legal Internet gambling to be played over personal cell phones and PDAs. Hop-on is currently in beta testing for the gaming software and has plans for the full-scale launch of this new venture as soon as the licenses are obtained.

In 2008, Hop-on continued to promote and homologate its phones in the U.S. and abroad. The company is focusing on Tier 1 and Tier 2 carriers and on main-stream distribution. It has currently brought five new phones to market. Hop-on is also in final negotiations for a Joint Venture with a foreign OEM (Original Equipment Manufacturer) to increase shareholder equity and its asset base.

In 2009, Hop-on lost a major sale of phones to a distributor in Mexico. Hop-on also dissolved the equity and joint venture with the OEM manufacture. Hop-on filed a lawsuit against a prior acquisition for Fraud and Breach of Contract. The opposition received a default judgment against Hop-on for approximately \$20,000.00. Hop-on will file to set the default aside and pursue litigation.

In 2010, Hop-on signed distribution agreement with USACIG, Inc for distributing "The Electric Cigarette and The Electric Cigar". Hop-on also signed a distribution agreement with Re-Medical for distribution of its heath care products.

In 2011, Hop-on acquired USAcig, Inc. assets for preferred series C Stock of Hop-on. USAcig, Inc. is a US-based manufacturer of nicotine products with proprietary ingredients for the electronic cigarette market, including doses of nicotine delivered by vaporized water, propylene glycol, nicotine solution and other non-carcinogens.

In 2012, Hop-on operated a Mobile Network Virtual Operator in Mexico, to promote phone sales for Cancun International Airport with emergency and concierge services.

In 2013, Hop-on launched the World's First Disposable Smartphone, and developed a newly designed electronic cigarette.

In 2014, Microsoft and Hop-on signed a patent agreement for Android and Chrome devices. Hop-on signed a contract with TeleEpoch.

#### **B. Date and State of Incorporation**

Nevada – March 16, 1993

#### **C. The Issuer's Primary and Secondary SIC Codes**

**Primary SIC Code:** 3661

**Secondary SIC:** 4813

#### **D. The Issuer's Fiscal Year End Date**

December 31

#### **E. Principal Products or Services and Their Markets**

**Hop-on, Inc.** The Company is a global electronics business service provider with headquarter in the United States. The company mission is to enable clients to gain and maintain market share through a range of services covering end-to-end support of necessary license agreements, legal assistance, product design, engineering, manufacturing and logistics. Over the past 20 years, Hop-on has successfully secured essential patents for GSM, TDMA and CDMA technologies, and is respected for developing the world's first disposable cell phone. Hop-on's current focus is on providing competitive license agreement packages to manufacturers and distributors of devices using Android and Chrome OS.

**Hop-on Wireless, Inc.** is a wholly owned subsidiary that is on the cutting edge of wireless technology. Our success in securing essential patents for GSM and CDMA technologies have resulted in license agreements with Qualcomm, Motorola, Inter Digital, Lucent, NEC, Alcatel, Ericsson, Nokia, Philips and Siemens.

**Hop-on Telecom** Division focuses on worldwide, industry specific cell phone solutions.

**Hop-on Mobile S. de R.L. de C.V.**, Mexico is a wholly owned subsidiary.

**USAcig, Inc.** is a wholly owned subsidiary that specialized in electronic cigarettes and production of “The Electric Cigarette™” (TEC) and “The Electric Cigar™”.

**Re-Medical, Inc.** is an IP development company for alternative medicines. The Company does not handle, sell, produce or distribute cannabis, nor does it intend to.

**Mobile Gaming Corp, Inc.**, [www.webcasinos.com](http://www.webcasinos.com) a wholly owned subsidiary focusing on “Web Casinos” provides Hop-on’s core gambling interactive gaming technology that is based on a proprietary software solution. Hop-on is positioned to provide a next generation wagering solution for mobile and interactive multimedia broadband networks. This will address security and interoperability issues raised by mobile, PC, and Satellite TV wagering. Mobile Gamine Corp provides best of breed technology and competitive solutions to fill the need for authentication, access control, charging in a mobile network, PC and Satellite Television for live interactive wagering in legal jurisdictions. Hop-on has the capability of creating a new “white label” branding solution for company that wants to take advantage of the multibillion dollar industry in real-time. Amidst the Facebook era, we are surrounded by a generation of savvy Internet users that are looking for new social media channels. Web Casinos offer the new media for On-line Poker, Black Jack, Baccarat and other venues for social wagering.

#### **Item 7. Describe the Issuer’s Facilities**

The Company utilizes a PO BOX 940, Temecula CA 92593-0940 as a mailing address only. The Company also satellite offices in Shenzhen, China and Temecula, California. The cost of the office in Shenzhen is carried by the OEM partner in China.

There are no other substantial leases, assets or property, other than the intellectual property and the majority ownership of another public company which is detailed in the Financial Statements and the Notes to the Financial Statements, both of which were filed with OTCMarkets on August 13, 2014, and are incorporated by reference herein.

#### **Item 8. Officers, Directors and Control Persons**

##### **A. Names of Officers, Directors and Control Persons**

Peter Michaels, is the visionary, Chairman of the Board and Chief Executive Officer of Hop-on, Inc., a company that manufactures, develops and markets electronic cigarettes and wireless phones and

accessories. Michaels is best known for using his own inventive, cutting-edge technology to create, build and market the first disposable cell phone, which is the most cost-effective CDMA phone on the market worldwide. The disposable cell phone, sold through Walgreens, was named one of the “Top ten Inventions of the Year” by Time magazine. Michaels is also the developer of the lowest-priced GSM cell phone as well, which was launched in February 2005 in Cannes. Since founding Hop-on, Inc., on March 16, 1993, Michaels has set the pace for Hop-on’s tremendous growth and success, and has branched out into many other successful ventures as a result.

Michaels developed and successfully closed many multi-million dollar real estate transactions, including many involving casinos, raw land, single family residences and commercial projects. He attended the communications school at the University of Southern California, where he was an All-American athlete earning a full scholarship for track and field, and completed the Entrepreneur Program in 1988. After leaving USC, Michaels worked with his father to develop raw land in Riverside County into the Lakes Project, a 1,900 single-family residence master-planned community. The Lakes Project was the third largest master-planned development in Riverside history.

Following the success of The Lakes, Michaels received a contract to develop the casino and resort for the Pechanga Band of Indians. He was the original developer of the Pechanga Resort and Casino, which is ranked high as one of the most popular casinos in California. Michaels also started World Wide Web Casinos, a company that ABC’s Nightline called “the largest Internet Casino in the world.”

As a proponent for corporate diversification of income, Michaels has launched several affiliated companies to assist in World Wide Web Casinos’ success. The purchase of a patent for portable change carts used in casinos resulted in a company called Casino a La Carte, which was responsible for the licensing and manufacturing of change carts for the casino industry world-wide. Furthermore, through PJ Promotions, Michaels garnered national and international exposure for World Wide Web Casinos as the promoter and sponsor of numerous professional boxing events. The affiliated Internet graphics development firm, Digital Age, proved to be yet another fruitful venture, producing web pages for well-known clients and earning a Silver Cindy Award for the graphic design of the Net Pirates web page for World Wide Web Casinos.

Michaels then sought to tie-in land based Casinos to the Internet, by opening the St. James Casino in Antigua. He also synched actual land-based slot machines to the Internet slot machines. His spin-off software company, Binky Roo Software, developed the most secure software on the market to allow Internet gaming customers to gamble in a safe environment secure from hackers. Michaels developed credit card processing long before similar types of commerce were available. Michaels software was also animating images on Netscape’s browser before Java script was readily available. In addition, he acted as a consultant to the Little Hoover Commission of California, a gaming commission convened to educate California’s elected officials regarding legal gambling ventures.

Michaels is the technological mastermind behind all of his companies and is directly responsible for their day to day operations. He assembled and led key personnel in their specific fields to assure the success of the entire operation including gaming lawyers, securities lawyers, financial consultants, gaming consultants, casino management, computer programming and graphic specialists.

## **B. Legal/Disciplinary History**

None of the foregoing person(s) mentioned in Item 8, Paragraph A have, in the last five years, been the subject of: (1) a conviction in a criminal proceeding or named as a defendant in a pending criminal proceeding (excluding a traffic violation and other minor offenses); (2) The entry of an order, judgment, or decree, not subsequently reversed, suspended or vacated, by a court of competent jurisdiction that permanently or temporarily enjoined, barred, suspended or otherwise limited such person's involvement in any type of business, securities, commodities or banking activities; (3) A finding or judgment by a court of competent jurisdiction (in a civil action), the Securities & Exchange Commission, the Commodity Futures Trading Commission, or a state securities regulator of a violation of federal or state securities or commodities law, which finding or judgment has not been reversed; (4) The entry of an order by a self-regulatory organization that permanently or temporarily barred, suspended or otherwise limited such person's involvement in any type of business or securities activities.
