CONSOLIDATED FINANCIAL STATEMENTS AND INDEPENDENT AUDITORS' REPORT

INBANKSHARES, CORP. AND SUBSIDIARY

December 31, 2018

INDEPENDENT AUDITORS' REPORT

Board of Directors InBankshares, Corp. Aurora, Colorado

We have audited the accompanying consolidated financial statements of InBankshares, Corp. and Subsidiary, which are comprised of the consolidated statement of financial condition as of December 31, 2018, and the related consolidated statements of operations, comprehensive loss, changes in stockholders' equity and cash flows for the year then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of InBankshares, Corp. and Subsidiary at December 31, 2018, and the results of their operations and their cash flows for the year then ended, in conformity with U.S. generally accepted accounting principles.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

NOTE 1 - SUMMARY OF ACCOUNTING POLICIES

The accounting and reporting policies of InBankshares Corp. and Subsidiary conform to U.S. generally accepted principles and to general practice within the banking industry. The following is a summary of the significant accounting and reporting policies:

Nature of Operations

InBankshares Corp. is a bank holding company that was formed in 2017 as a Delaware corporation, under the name FFP Group, Inc., for the purpose of pursuing business opportunities in financial services. In 2018, FFP Group, Inc. formally commenced operations, completed a capital raise, acquired International Bank (see note 2), and changed its name to InBankshares Corp. ("IBC").

IBC owns 100% of the stock of International Bank ("the Bank"), which operates under the name InBank following the acquisition by IBC. IBC and the Bank are collectively referred to as "the Company."

The Company provides a full range of banking and mortgage services to individual and business customers. IBC is headquartered in Aurora, Colorado. The Bank is chartered in Raton, New Mexico, and operates seven full-service branches located in Aurora and Trinidad, Colorado, and in Raton, Cimarron, Angel Fire and Springer, New Mexico. The Company is also in the process of opening an eighth branch in Greenwood Village, Colorado.

The Company is subject to competition from other financial institutions for loans and deposit accounts. The Company is also subject to regulation by certain governmental agencies and undergoes periodic examinations by those regulatory agencies. IBC's primary regulator is the Federal Reserve, and the Bank's primary regulators are the Federal Deposit Insurance Corporation and the State of New Mexico's Financial Institution Division.

Basis of Consolidation

The accompanying consolidated financial statements include the consolidated totals of the accounts of IBC and the Bank. All significant intercompany accounts and transactions have been eliminated in consolidation.

For 2018, the consolidated financial statements include the activities of the Bank only since the June 21, 2018 date of acquisition by IBC.

Use of Estimates

In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the statement of financial condition and revenues and expenses for the period. Actual results could differ significantly from those estimates.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Material estimates that are particularly susceptible to significant change in the near-term relate to the determination of the allowance for loan losses, the fair value of real estate held for sale, and the fair value of investment securities available for sale. In connection with the determination of the allowance for loan losses, management assesses estimated future cash flows from borrowers' operations and the liquidation of loan collateral based on loan performance, internal evaluations of borrower credit quality using financial information provided by borrowers, and internal valuations or independent appraisals of the real estate and other loan collateral depending on the significance of the collateral. In connection with the determination of the fair value of real estate held for sale, management performs internal valuations or obtains independent appraisals depending on the significance of the properties. In connection with the determination of the fair value of investment securities available for sale, management obtains valuations from a third-party pricing and interest rate risk modeling provider.

As described in Note 2, the application of purchase accounting in connection with the acquisition of International Bank involved significant estimates.

Significant Group Concentrations of Credit Risk

Most of the Company's activities are with customers located within the Company's areas of operations. A majority of the Company's loans are related to real estate, and borrowers' abilities to honor their loans are dependent upon the continued economic viability of the areas in which the Company lends. Note 6 discusses the types of lending in which the Company engages. Note 4 discusses the securities in which the Company invests.

Cash and Cash Equivalents

Cash and cash equivalents include cash, transaction accounts at other financial institutions, interest-bearing balances at the Federal Reserve Bank and other correspondent banks, and federal funds sold. For the Consolidated Statement of Cash Flows, net cash flows are reported for customer loan and deposit transactions.

Balances in transaction accounts at other financial institutions may exceed amounts covered by federal deposit insurance, and federal funds sold are unsecured. Management regularly evaluates the credit risk associated with other financial institutions and believes that the Company is not exposed to any significant credit risks on cash and cash equivalents.

Investment Securities

The Company's investment securities are classified as "available for sale" and accordingly carried at estimated fair value, with changes in the unrealized gains and losses excluded from earnings and reported in other comprehensive income.

The amortized cost of debt securities available for sale is adjusted for amortization of purchase premiums and accretion of purchase discounts. Premiums and discounts are recognized in interest income using the interest method over the terms of the securities. For mortgage-backed and other asset-backed securities, the term of the security is the expected life of the security given estimated paydowns. For other securities, the term of the security is the final maturity or the earliest call date, if applicable, except in the case of purchase discounts which are accreted to final maturity. The accretion and amortization methodology conforms to Accounting Standards Update 2017-08, Receivables-Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization of Purchased Callable Debt Securities, which was early adopted by the Company in 2018.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Gains and losses on the sale of securities are determined using the specific identification method.

Management evaluates securities for other-than-temporary impairment ("OTTI") on at least a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. For securities in an unrealized loss position, management considers the extent and duration of the unrealized loss, and the financial condition and near-term prospects of the issuer. Management also assesses whether it intends to sell, or it is more likely than not that it will be required to sell, a security in an unrealized loss position before recovery of its amortized cost basis. If either of the criteria regarding intent or requirement to sell is met, the entire difference between amortized cost and fair value is recognized as an impairment charge to earnings. For debt securities that do not meet the aforementioned criteria, the amount of impairment is split into two components as follows: 1) OTTI related to credit loss, which is recognized as an impairment charge to earnings, and 2) OTTI related to other factors, which is recognized in other comprehensive income. The credit loss is defined as the difference between the present value of the cash flows expected to be collected and the amortized cost basis. For equity securities, the entire amount of impairment is recognized through earnings.

Nonmarketable Equity Investments

The Company, as a member of the Federal Home Loan Bank system, is required to maintain an investment in the capital stock of the Federal Home Loan Bank of Dallas. The Company also maintains an immaterial investment in the common stock of Farmer Mac to facilitate access to certain Farmer Mac services. The Company further has a Simple Agreement for Future Equity (SAFE Investment) in Neat Capital, Inc., a 2015 mortgage lending start-up that leverages fintech. These investments have no active markets and no quoted market price, and/or are held for restricted purposes. For reporting purposes, such investments are carried at cost under the caption "nonmarketable equity investments" and periodically evaluated for impairment.

Loans

The Company grants real estate, commercial and consumer loans to customers. A substantial portion of the loan portfolio is represented by various types of real estate secured loans in the Company's market areas. The ability of the Company's borrowers to honor their contracts is dependent upon the real estate and general economic conditions in these areas.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off are reported at their outstanding unpaid principal balances adjusted for charge-offs, the allowance for loan losses, any deferred fees or costs on originated loans, and purchase discounts. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of direct origination costs, are deferred and recognized as an adjustment of the related loan yield using the interest method.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Past due loans are any loans for which payments of interest, principal or both have not been received within the timeframes designated by the loan agreements. Loans with payments in arrears but for which borrowers have resumed making scheduled payments are considered past due until arrearages are brought current. Loans that experience insignificant payment delays or payment shortfalls generally are not considered past due. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

The accrual of interest on any loan is discontinued at the time the loan is 90 days past due unless the loan is well secured and in process of collection. Additionally, loans are placed on nonaccrual at an earlier date if collection of principal or interest is considered doubtful. When placing a loan on nonaccrual status, interest accrued to date is generally reversed and is charged against the current year's interest income. Payments received on a loan on nonaccrual status are applied against the balance of the loan. A loan is returned to accrual status when principal and interest are no longer past due, and collectability is no longer doubtful.

Troubled debt restructurings are loans for which concessions in terms have been made as a result of the borrower experiencing financial difficulty. Generally, concessions granted to customers include lower interest rates and modification of the payment stream to lower or defer payments. Interest on troubled debt restructurings is accrued under the new terms if the loans are performing and full collection of principal and interest is expected. However, interest accruals are discontinued on troubled debt restructurings that meet the Company's nonaccrual criteria.

Generally, loans are charged off in whole or in part no later than 120 days after they become past due unless the loan is in the process of restructuring or collection and those efforts are deemed likely to be successful. Charge off amounts are determined based upon the carrying amount of loans and the amount estimated to be collectible as determined by analyses of expected future cash flows and the liquidation of loan collateral.

Purchased Loans

Loans acquired in the acquisition of the Bank by IBC were recorded at the amount paid, such that there was no carryover of the allowance for loan losses existing at the time of acquisition. Losses on purchased loans that are incurred subsequent to acquisition are recognized by a charge to the provision for loan losses.

Purchased loans are accounted for individually or aggregated into pools of loans based on common risk characteristics (e.g., loan type). The Company estimates the amount and timing of expected cash flows for each purchased loan or pool, and the expected cash flows in excess of amount paid is recorded as interest income over the remaining life of the loan or pool (accretable yield). The excess of the loan's or pool's contractual principal and interest over expected cash flows is not recorded (nonaccretable difference).

Over the life of the loan or pool, expected cash flows continue to be estimated. If the present value of expected cash flows is less than the carrying amount, a loss is recorded. If the present value of expected cash flows is greater than the carrying amount, it is recognized as part of future interest income.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Allowance for Loan Losses

The allowance for loan losses is a valuation allowance for probable incurred credit losses and is established through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, including those for loans charged-off by the Bank prior to the acquisition by IBC, are credited to the allowance.

The allowance consists of specific and general components as follows:

The specific component relates to loans that are considered impaired and is comprised of valuation allowances calculated on a loan-by-loan basis. Impaired loans are all specifically identified loans for which it is probable that the Company will not collect all amounts due according to the contractual terms of the loan agreement. Factors considered by management in determining whether a loan is impaired include payment status, collateral value, the borrower's financial condition and overall loan quality as determined by an internal loan grading system. Included in impaired loans are all nonaccrual loans, all accruing troubled debt restructurings, and all loans purchased at a discount as a result of deteriorated credit quality. Loans that experience insignificant payment delays or payment shortfalls generally are not considered impaired. For impaired loans for which repayment is expected solely from the collateral, impairment is measured based on the fair value of the collateral. For other impaired loans, impairment may be measured based on the fair value of the collateral or on the present value of expected future cash flows discounted at the loan's original effective interest rate. When the measure of the impaired loan is less than the recorded investment in the loan, the impairment is recorded through a valuation allowance.

The general component relates to non-impaired loans and is based on historical loss experience adjusted for the effects of qualitative factors that are likely to cause estimated credit losses as of the evaluation date to differ from the portfolio's historical loss experience. Qualitative factors include the following: economic conditions; industry conditions; changes in lending policies and procedures; trends in the volume and terms of loans; the experience, ability and depth of lending staff; levels and trends in delinquencies and impaired loans; levels and trends in charge-off and recovery activity; levels and trends of loan quality as determined by an internal loan grading system; portfolio concentrations.

Although the allowance contains a specific component, the entire allowance is available for any loan that, in management's judgment, should be charged off.

On a quarterly basis, management estimates the allowance balance required using the criteria identified above in relation to the relevant risks for each of the Company's major loan segments. Significant overall risk factors for both the Company's commercial and consumer portfolios include the strength of the real estate market and general economic activity in the Company's market areas. Although the economy in the Aurora and Denver area is currently strong and diversified, the Company's other market areas are smaller with less robust economic activity.

The quality of the Company's loan portfolio is assessed as a function of the levels of past due loans and impaired loans, and internal credit quality ratings which are updated quarterly by management. The ratings on the Company's internal credit scale are an important part of the Company's overall credit risk management process and are considered in the determination of the allowance for loan losses, and are grouped as follows:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Pass - Loans with minimal to average identified credit risk. These loans have borrowers considered creditworthy who can repay the debt in the normal course of business. Borrowers have a sound primary and secondary repayment source, with sufficient cash generation to meet ongoing debt service requirements. Loans are typically fully secured with marketable, margined collateral.

Special mention - Loans with potential credit weaknesses which deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of repayment prospects or the Company's credit position at some future date. These loans exhibit characteristics such as declining or stressed financial condition of the borrower and declining or narrow collateral coverage.

Substandard - Loans inadequately protected by the current financial condition and paying capacity of the borrower or the collateral pledged, if any. These loans have a well-defined weakness or weaknesses that jeopardize the repayment of the debt. These loans are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. In some instances, though not all, the weakness or weaknesses in these loans will necessitate nonaccrual treatment.

Doubtful - Loans in this category have all the weaknesses inherent in those classified as Substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The probability of loss is extremely high, but because of certain important and reasonably specific factors that may work to the advantage and strengthening of the loans, classification as a loss is deferred until more exact status may be determined. Loans classified as doubtful necessitate nonaccrual treatment.

Loss - Loans considered loss are considered uncollectable and of such little value that their continuance as a bankable asset, even with a valuation allowance, is not warranted. This does not mean the loans have no recovery or salvage value, but rather it is not practical or desirable to defer a charge-off even though a partial recovery may be affected in the future. Loans classified as a loss are charged-off in the period they are deemed uncollectible.

Determination of the allowance is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. While management uses available information to recognize losses on loans, changes in economic conditions or borrower circumstances may necessitate revisions in future years. In addition, the Company's banking regulators, as an integral part of their examination process, periodically review the Company's allowance. Such agencies may require the Company to recognize additional losses based on their judgments about information available to them at the time of their examination.

Premises and Equipment

Land is carried at cost. Buildings, furniture and equipment are stated at cost less accumulated depreciation. Depreciation expense is computed using the straight-line method over the estimated useful lives of the assets – generally 15 to 40 years for buildings and improvements, and 3 to 7 years for furniture and equipment. Maintenance and repairs, which do not extend the useful lives of premises and equipment, are charged to expense as incurred.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Real Estate Held for Sale

Assets acquired through, or in lieu of, loan foreclosure are held for sale and are initially recorded at fair value when acquired (less an estimate of cost to sell), establishing a new cost basis. If fair value declines subsequent to acquisition, a valuation allowance is recorded through earnings. Operating expenses relative to foreclosed real estate are expensed as incurred, while certain improvements may be capitalized if the expenditures are likely to be recaptured upon disposition of the real estate. Gain or loss on sale, if any, is recognized at the time of sale.

Intangible Assets

Core Deposit Intangible

The core deposit intangible resulted from IBC's acquisition of the Bank in 2018, and represents the excess of the fair value of deposits acquired over their book value at the time of acquisition. The core deposit intangible is amortized to expense over a ten year period using an accelerated method. In addition, the core deposit intangible is assessed at least annually for impairment, and any impairment losses are recognized in earnings in the period identified.

Goodwill

Goodwill resulted from IBC's acquisition of the Bank in 2018, and represents the excess of the purchase price over the fair value of acquired tangible assets and liabilities and identifiable intangible assets. Goodwill is assessed at least annually for impairment, and any impairment losses are recognized in earnings in the period identified.

Income Taxes

Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities (excluding deferred tax assets and liabilities related to other comprehensive income). Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. Realization of deferred tax assets is dependent upon the generation of a sufficient level of future taxable income and recoverable taxes paid in prior years. Management periodically assesses the deferred tax asset, and a valuation allowance is recorded if the full amount is not expected to be realized.

A tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination presumed to occur. Tax benefits recognized are the amount of the benefit that is greater than 50% likely of being realized upon examination. No tax benefits are recognized if they do not meet the "more likely than not" test.

The Company files a consolidated income tax return inclusive of IBC and the Bank; however, income tax expense is allocated to the entities on a separate return basis. The Company is no longer subject to U.S. federal income tax examinations by tax authorities for years before 2015.

Comprehensive Income

Comprehensive income consists of net income and other comprehensive income. The only component of other comprehensive income consists of net unrealized holding gains and losses on available for sale securities, net of related tax effects.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Earnings Per Share

Basic earnings per share is computed by dividing net income or loss by the weighted average number of shares outstanding. Diluted earnings per share is calculated using the weighted average number of shares determined for basic earnings per share, plus the effect of dilutive instruments using the treasury stock method.

Stock-Based Compensation

The cost of stock-based compensation is the grant-date fair value of the instruments issued, and is recorded as expense over the vesting period of the award. Forfeitures are accounted at the time they occur.

Off- Balance Sheet Financial Instruments

In the ordinary course of business, the Company enters into off-balance-sheet financial instruments consisting of commitments to extend credit, unused lines of credit, standby letters of credit and undisbursed loans in process. These financial instruments are recorded in the financial statements when they are funded.

The Company is exposed to credit risk on its off-balance sheet financial instruments. In conjunction with the determination of the allowance for loan losses, and using the same criteria, the Company estimates an allowance for probable incurred credit losses on off- balance sheet credit exposures. Provisions for the allowance are recorded as a component of other noninterest expense, and the allowance is carried as a component of other liabilities.

Transfers of Financial Assets

Transfers of financial assets are accounted for as sales when control over the assets has been relinquished and, for loan participations sold, incoming cash flows on the base loan are allocated to all participants on a pro-rata basis. Control over transferred assets is deemed to be relinquished when the assets have been isolated from the Company, the transferree obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Loss Contingencies

Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable, and an amount or range of loss can be reasonably estimated. Management does not believe there are currently any such matters that will have a material effect on the financial statements.

Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants, excluding transaction costs. When measuring fair value, entities should maximize the use of observable inputs and minimize the use of unobservable inputs. The following describes the three levels of inputs that may be used to measure fair value:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

- Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.
- Level 2 Inputs Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.
- Level 3 Inputs Unobservable inputs that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

Applicable Accounting Standards Updates Not Yet Effective

The Financial Accounting Standards Board issued Accounting Standards Update 2016-01, Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. Under the new standard, certain equity investments are required to be carried at fair value, with changes in fair value recognized in net income. This applies to equity investments with readily determinable fair values that are not consolidated or carried on the equity method. Debt securities classified as available for sale will continue to be carried at fair value with changes in fair value recorded through other comprehensive income. The standard is effective for the Company beginning January 1, 2019, and is not expected to have a significant impact on the consolidated financial statements.

The Financial Accounting Standard Board issued Accounting Standards Update 2016-13, Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. Under the new standard, the Company will be required to convert from the existing incurred-loss model for determining the allowance for loan losses to an expected-loss model. An expected-loss model will determine the allowance for loan losses balance based upon credit losses expected to be incurred over the life of the loan portfolio, and will consider not only current credit conditions but also reasonable supportable expectations of future credit conditions. The standard will also require securities held to maturity to be evaluated for impairment under an expected-loss model. The standard is effective for the Company beginning January 1, 2021. The Company has not yet completed an evaluation of the impact of the new standard on its consolidated financial statements and accounting practices.

Accounting Standards Update 2016-02, *Leases (Topic 842)*: Under the new standard, the Company will be required to record a right-of-use asset for leased property and also record a corresponding lease liability. In general, rather than expense lease payments as they are made as currently done under operating lease guidance, the right-of-use asset will be amortized to expense over the lease term and lease payments will reduce the lease obligation. The standard is effective for the Company beginning January 1, 2020. The Company has not yet completed an evaluation of the impact of the new standard on its consolidated financial statements and accounting practices.

Accounting Standards Update 2014-09, Revenue from Contracts With Customers (Topic 606). The new standard prescribes a five-step model to determine the amount and timing of revenue recognition related to the related to the consideration the Company expects to receive from the transfer of goods and services. The standard does not apply to financial instruments, and accordingly will not impact the Company's recognition of interest income on its loans and investment securities, and will not impact the Company's recognition of revenue from sales or transfers of loans and investment securities. The standard is effective for the Company beginning January 1, 2019, and is not expected to have a significant impact to the consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Subsequent Events

Management evaluates events occurring subsequent to the balance sheet date, through the date the financial statements are eligible to be issued, to determine whether the events are material and require recognition or disclosure in the financial statements. With respect to the December 31, 2018 financial statements, Management has considered subsequent events through April 29, 2019.

NOTE 2 – ACQUISITION OF INTERNATIONAL BANK

On June 21, 2018, IBC acquired Raton Capital Corporation and its wholly owned subsidiary, International Bank, in a \$46,293,000 cash purchase of Raton Capital Corporation's common stock. Raton Capital Corporation was merged with and into IBC, resulting in International Bank becoming a wholly owned subsidiary of IBC.

The assets acquired and liabilities assumed in the transaction were recorded at their estimated acquisition date fair value as follows:

			Fair Value Adjustments

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Immediately following the acquisition, the Company sold a substantial portion of the investment portfolio that had been classified as held-to-maturity by the seller. The sale price was treated as the acquisition date fair value for these securities, with securities not immediately liquidated valued based on information provided from the Company's third-party bond accounting provider.

Valuation adjustments to loans were based on internal assessments of credit quality and the amount of loans estimated to be collectible based on historical loan performance, loan grades, collateral levels and management's expectation of future cash flows. The valuation adjustments were substantially determined on a loan-by-loan basis. No fair value adjustments were made with respect to interest rate measures as most loans mature or reprice within one to three years and current rates within the portfolio were deemed consistent with market conditions. The total loan purchase discount was \$4,543,000, which includes the \$3,050,000 allowance for loan loss of the seller (reclassified to purchase discount as a result of the acquisition), and the \$1,493,000 additional fair value adjustment.

Valuation adjustments to real estate held for sale and premises were based on internal analyses and broker pricing opinions.

The core deposit intangible was valued by an independent third-party specialist using an income approach.

The valuation adjustment to the subordinated debentures was based on an analysis provided by the Company's third-party bond accounting provider using metrics for similar instruments with the same remaining maturity.

Adjustments to the deferred tax asset and income taxes receivable were based on the final income tax return of Raton Capital Corporation and the tax attributes carrying over to IBC and the Bank, along with the tax effect of the fair value adjustments.

Goodwill was adjusted such that it is carried at the amount by which the purchase price exceeded the acquired intangible assets and liabilities and the core deposit intangible.

Legal, investment banking and personnel costs related to the acquisition total approximately \$1,008,000 for 2018 and are included as a component of Professional Fee expense.

NOTE 3 – LOSS PER SHARE

Basic loss per share of (\$0.40) for 2018 is based on the net loss of \$1,500,000 and 3,760,253 weighted average shares outstanding during the year. Diluted loss per share of (\$0.40) for 2018 is based on the \$1,500,000 net loss and 3,763,726 weighted average shares including the effect of dilutive instruments.

The Company had only 151,000 shares outstanding as of June 21, 2018, at which time the first close of the 2018 capital raise occurred in connection with the acquisition of International Bank and 6,765,400 shares were issued. On a pro-forma basis, basic and diluted loss per share would have been (\$0.21) if the weighted average is calculated based on share activity only from June 21, 2018 through December 31, 2018.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

NOTE 4 - INVESTMENT SECURITIES AVAILABLE FOR SALE

The amortized cost and fair value of investment securities available for sale, with gross unrealized gains and losses, follows:

	December 31, 2018										
	Amortized	Unre	ross ealized	Unr	ross ealized		Fair				
	Cost	Gains (in the		Losses ousands)			Value				
<u>Debt securities</u>			(III till)	ousunus,	,						
Residential mortgage-backed: U.S. Agency	\$ 94,338	\$	266	\$	(87)	\$	94,517				
Commercial mortgage-backed: U.S. Agency	7,722		7		(14)		7,715				
Student loan pools: U.S. Agency	9,695		1		-		9,696				
Student loan pools: other issuers	6,657		-		(58)		6,599				
State and municipal	6,401		28				6,429				
	\$ 124,813	\$	302	\$	(159)	\$	124,956				

The Company purchases only high-grade investment securities. U.S. agency mortgage-backed securities are comprised entirely of mortgage-backed bonds and collateralized mortgage obligations issued by Freddie Mac and Fannie Mae, and U.S. agency student loan pools are issued by Sallie Mae. Other student loan pools are issued by various organizations, and are all rated "AAA" as of December 31, 2018 by a by a nationally recognized statistical rating organization. State and municipal securities are comprised of bonds issued by various states and municipalities, and are all rated "Baa2" or better as of December 31, 2018 by a nationally recognized statistical rating organization, except for one \$250,000 unrated bond.

The amortized cost and fair value of debt securities available for sale at December 31, 2018, by contractual maturity and by average life, are shown below. Expected maturities may differ from contractual maturities because obligors may have the right to call or prepay obligations, and for mortgage-backed and asset-backed securities the repayment of the securities occurs on a monthly basis based on the repayment of the loans underlying the securities:

		Contractua	al Mat	urity		Avera	ige Lif	Life	
	An	nortized			A	mortized			
		Cost	Fai	ir Value	Cost		Fa	ir Value	
				(in the	ousano	ls)

Due after one through five years		13,618		13,628		38,716		38,740	
Due after five years through ten years		15,267		15,359		84,897		85,014	
Due after ten years	95,353			95,393					
:	\$	124,813	\$	124,956	\$	124,813	\$	124,956	

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Information pertaining to securities available for sale, with gross unrealized losses aggregated by investment category and length of time that individual securities have been in a continuous loss position, follows:

				December	r 31, 2018				
	Les	ss tha	n 12 mo	onths	Over 12 months				
	Number Gross of Unrealized Securities Losses Fair Value		of Unrealized		Number of Securities	Gross Unrealized Losses		Fair	Value
				(dollars in	thousands)				
Residential mortgage-backed: U.S. Agency	7	\$	(87)	\$ 38,465	-	\$	-	\$	-
Commercial mortgage-backed: U.S. Agency	1		(14)	4,300	-		-		-
Student loan pools: other issuers	2		(58)	6,599	-		-		-
	10	\$	(159)	\$ 49,364		\$	-	\$	-
						_			

At December 31, 2018, unrealized losses on mortgage-backed securities range from 0.08% to 0.35% of the securities' amortized cost basis, and on student loan pools range from 0.30% to 1.06% of the securities' amortized cost basis. Unrealized losses are due to differences in market yields as compared to yields available at the time securities were purchased. Management has performed analyses of investment credit quality and cash flows on securities with unrealized losses and does not believe that any securities are impaired due to reasons of credit quality. The Company has the ability and intent to hold investment securities for a period sufficient for recovery of cost, and fair value is expected to recover as bonds approach maturity. Accordingly, as of December 31, 2018, management believes the unrealized losses detailed in the table above are temporary.

The Company realized no gains or losses on sales and early redemptions of investment securities available for sale in 2018.

Investment securities with a fair value of \$69,680,000 at December 31, 2018, were pledged as collateral on public deposits, to secure borrowing facilities or for other purposes.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

NOTE 5 – NONMARKETABLE EQUITY INVESTMENTS

Nonmarketable equity investments are comprised of the following as of December 31, 2018 (in thousands):

Federal Home Loan Bank of Dallas - common stock	\$ 1,112
Farmer Mac - common stock	7
SAFE investment in Neat Capital	 2,000
	\$ 3,119

The SAFE investment in Neat Capital, Inc. ("Neat"), a 2015 mortgage lending start-up headquartered in Boulder, Colorado, is based on a \$20,000,000 valuation cap and entitles the Company to convert the investment into an equivalent amount of capital stock of Neat upon the successful closing of a stock offering by Neat, pursuant to the specifics of the SAFE agreement. The Company intends to license Neat's mortgage lending platform and utilize Neat for mortgage underwriting and other mortgage loan fulfillment services, but such activity had not commenced by December 31, 2018.

NOTE 6 - LOANS AND ALLOWANCE FOR LOAN LOSSES

Major classifications of loans at December 31, 2018 are as follows (in thousands):

Real Estate	
Commercial	\$ 83,354
Construction and land	42,558
Residential 1-4 family	25,480
Multifamily	1,751
Farmland	 10,524
	 163,667
Commercial - non real estate	19,144
Agricultural production	6,840
Consumer and other	 2,313
	191,964
Less net unearned loan fees	 (240)
	\$ 191,724

At December 31, 2018, loans in the preceding table are net of the original \$4,543,000 purchase discount. None of the discount was accreted in 2018 as at the end of the year management was still in the process of determining what portion of the discount, if any, represents future accretable yield based on expected cash flows of the underlying loans. The following table presents the allocation of the purchase discount to the Company's major loan segments:

	\$ 25,644

Securities Sold Under Agreements to Repurchase

Securities sold under agreement to repurchase are classified as secured borrowings and are recorded at the amount of cash received in connection with the transaction. Securities sold under agreement to repurchase mature within one year of the transaction date, have a fixed interest rate of 0.85%, and are collateralized by investment securities.

Federal Funds Purchased

The Company has unsecured federal funds lines at correspondent banks with a maximum credit limit of \$19,550,000 at December 31, 2018. The federal funds lines are uncommitted, and funding requests made by the Company are subject to the lending institutions' approval and funding availability at the time of request. Federal funds bear interest at variable daily rates established by the correspondents.

Federal Home Loan Bank Short-Term Borrowings

The Company is eligible to borrow from the Federal Home Loan Bank of Dallas on both a short-term and long-term basis, with a maximum credit limit of \$78,484,000 at December 31, 2018. Federal Home Loan Bank borrowings are secured by a blanket pledge of certain loans. At December 31, 2018, outstanding borrowings have fixed rates ranging from 2.40% to 2.60%, a weighted average rate of 2.54%, and mature within 30 days.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

NOTE 12 - SUBORDINATED DEBENTURES

The Company has a statutory business trust created for the purpose of providing trust preferred financing. In trust preferred financing, the Trust issues preferred securities to investors and common securities to the Company, and the Trust invests the proceeds in junior subordinated debentures issued by the Company. The Trust is considered a variable interest entity for which the Company is not the primary beneficiary, and the accounts of the Trust are not included in the Company's consolidated financial statements. Accordingly, the Company does not report preferred securities issued by the Trust on its consolidated balance sheets, nor does it report the interest expense on the preferred securities on its consolidated statements of operations. Rather, the Company reports the debentures payable to the Trust as a liability and the common securities as an asset. Interest expense from the debentures and interest income from the common securities is recorded in the consolidated statements of operations.

The interest rate on the debentures, common securities and preferred securities is 2.90% over three-month LIBOR and adjusts quarterly. Interest payments on the debentures by the Company, and distributions on the common securities and the preferred securities by the Trust, are coterminous and payable quarterly in arrears. However, the Company has a continual right, subject to events of default, to defer payment of interest on the debentures. The deferral period may not exceed twenty consecutive quarters or extend beyond the maturity date of the debentures. As a consequence of deferral of interest on the debentures, distributions on the common securities and preferred securities will also be deferred. In the event of deferral, interest payments on the debentures and distributions on the common securities and preferred securities are cumulative.

The debentures mature in 2033; however, the Company may redeem the debentures at any time. The common securities and preferred securities are subject to mandatory redemption upon repayment of the debentures. The Company also has the right to terminate the Trust and cause the debentures to be distributed to the holders of the common securities and preferred securities in liquidation of the Trust. Regulatory approval may be required for early redemption or liquidation.

The Company guarantees payments on the preferred securities, but only to the extent the Trust has sufficient funds on hand to make such payments. The Trust's sole source of income is interest from the debentures. In accordance with current tax law and banking regulations, interest expense on the debentures is tax deductible and the debentures are included as a component of regulatory capital.

The following summarizes the Company's trust preferred financing at December 31, 2018 (in thousands):

Contractual balance of subordinated debentures	\$	5,160
Less unamortized acquisition discount		(331)
Total subordinated debentrues	\$	4,829
Common securites, included in other assets	\$	160
Common securites, included in other assets	<u> </u>	16

An acquisition discount of \$343,000 is amortized to interest expense using the straight-line method over the remaining term of the debentures. Amortization in 2018 was \$12,000.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

NOTE 13 – INCOME TAXES

The Company's income tax benefit for the year ended December 31, 2018, is comprised of the following (in thousands):

Current federal benefit	\$ -
Current state benefit	
Total current benefit	-
Deferred federal benefit	(270)
Deferred state benefit	(20)
Total deferred benefit	(290)
Total tax benefit	\$ (290)

The following table reconciles the Company's income tax benefit at the statutory federal rate to the benefit amount recorded in the consolidated financial statements for the year ended December 31, 2018 (in thousands):

Taxes at statutory 21% federal rate	\$ (376)
Increase (decrease) in federal tax resulting from:	
Nontaxable municipal interest income	(20)
Nondeductible acquisition expenses	89
Nondeductible stock-based compensation	31
Other nondeductible expenses	6
State income taxes, net of federal effect	(20)
Income tax benefit	\$ (290)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

The Company's net deferred tax asset is comprised of the following at December 31, 2018 (in thousands):

Deferred tax assets	
Loan purchase discount	\$ 1,133
Allowance for loan losses	107
Real estate held for sale	357
Charitable contribution carryforwards	124
Federal net operating loss carryforwards	764
State net operating loss carryforwards	124
Premises and equipment	72
Stock-based compensation	76
Other	116
Total deferred tax assets	2,873
Deferred tax liabilities	
Core deposit intangible	(1,025)
Purchase discount on subordinated debentures	(83)
Federal Home Loan Bank stock	(3)
Net unrealized gain on securities available for sale	(30)
Total deferred tax liabilities	(1,141)
Net deferred tax asset	\$ 1,732

At December 31, 2018, the Company has \$3,638,000 of federal net operating loss carryforwards available to offset future federal taxable income. These carryforwards do not expire, but annual usage is limited to 80% of taxable income. The Company also has approximately \$3,600,000 of state net operating loss carryforwards available to offset future Colorado and New Mexico taxable income – the \$3,600,000 is an aggregate gross amount, and is ultimately apportioned among Colorado and New Mexico based on each state's apportionment methodology. The state net operating loss carryforwards do not currently have any annual usage limitations, but expire in 15-20 years if they are not utilized.

NOTE 14 – STOCKHOLDERS' EQUITY

Preferred Stock

The Company's Board of Directors has the continual authority to create one or more series of preferred stock from the 1,000,000 authorized shares, including designations, powers, preferences, rights, qualifications, limitations and restrictions. This includes voting rights, dividend and conversion rates, redemption prices and liquidation preferences. No preferred stock was issued or outstanding in 2018.

Non-Voting Common Stock

The Company's Board of Directors has the continual authority to create one or more series of non-voting common stock from the 20,000,000 authorized shares, including designations, powers, preferences, rights, qualifications, limitations and restrictions. This includes voting rights, dividend and conversion rates, redemption prices and liquidation preferences.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

In 2018, the Company designated 3,000,000 shares of non-voting common stock as Series A Non-Voting Common Stock, ranking *pari-passu* with voting common stock with respect to dividends and liquidation. The Series A Non-Voting Common Stock is convertible into voting common stock at any time or from time to time, at the direction of either the holder or the Company, provided that the holder will not own or control in the aggregate more than 9.9% of the voting common stock or of any class of voting securities issued by the Company. In the event of a voting common stock split or reverse-split, or similar reclassification or substitution of share class, the Series A Non-Voting Common Stock and/or conversion terms will be adjusted proportionately. During 2018, only Series A Non-Voting Common Stock was issued and outstanding.

The Company is required to maintain at all times a sufficient number of authorized but unissued shares of voting common stock to affect the conversion of all outstanding Series A Non-Voting Common Stock.

Restricted Stock

In 2018, the Company issued 150,000 shares of restricted voting common stock to certain executives and directors of the Company ("Founder Shares"), of which 7,500 were later forfeited in 2018. The shares vest in one-third annual installments on the first through third anniversary following the date of grant, and unvested shares are forfeited in the event a grantee ceases to be an employee or director of the Company, subject to certain exceptions for termination by the Company without cause (as defined in the award agreements) or for death of the executive or director. For vested shares, the Company has the right but not the obligation to repurchase the shares at fair value if the executive or director ceases to be an employee or director of the Company for any reason. Unvested shares may not be transferred, pledged or assigned by the holder, and the Company has the right of first refusal on transfers of vested shares. Holders of restricted stock are entitled to all rights of voting common stock, including rights to dividends and voting rights, only to the extent the shares are vested or the executive or director have made certain tax elections with respect to the shares.

At December 31, 2018, there are 142,500 Founder Shares outstanding of which none are vested but 132,500 have voting and dividend rights. Compensation cost attributable to Founder Shares for the year ended December 31, 2018 was \$238,000, with the fair value of the awards determined using the \$10.00 per share price of stock from the 2018 stock offering. Future compensation expense attributable to Founder Shares is \$1,187,000 presuming no shares are forfeited, and is recognizable in years 2019 through 2021.

Director Stock Compensation

Directors may elect to receive certain of their director fees in voting common stock, with the value of shares issued equal to the fee amount. In 2018, the Company accrued \$146,000 in stock-based compensation expense attributable to director fees for which the stock payment option was selected, which at the \$10.00 per share price of stock from the 2018 offering equates to approximately 14,600 shares of stock the Company is required to issue to settle the obligation.

Restrictions on Dividends

Various restrictions limit the extent to which dividends may be paid by the Bank to IBC. Generally, regulatory approval is required for the Bank to pay dividends in any calendar year that exceed the Bank's net profit for that year combined with its retained profits for the preceding two years. In addition, dividends paid by the Bank would be prohibited if the effect thereof would cause the Bank's capital to be reduced below applicable minimum capital requirements. No dividends were paid by the Bank to IBC in 2018.

InBankshares Corp. and Subsidiary NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

NOTE 15 - 401(k) and EMPLOYEE STOCK OWNERSHIP PLAN

The Company provides the International Bank 401(k) and ESOP Retirement Plan ("Plan") which is intended to be a 401(k) and profit sharing, stock bonus and employee stock ownership plan. Employees may participate in the Plan after meeting certain minimum service requirements. The Plan allows employees to make salary deferrals subject to certain limitations based on federal tax law, and requires the Company to make safe-harbor matching contributions equal to 100% of the first 3% of salary deferrals, and 50% of the next 3% of salary deferrals. The Plan also allows the Company to make discretionary profit-sharing and ESOP contributions. Employees are immediately 100% vested in the Company's safe harbor matching contributions, while other Company contributions vest to participants pro-rata over a four-year period. Safe harbor matching contributions are made in cash, while other Company contributions may be in cash or Company stock. For 2018, expense attributable to the plan totaled \$110,000, and no shares of Company stock were issued to or purchased by the Plan.

NOTE 16 - EQUITY INCENTIVE PLAN

The Company's 2018 Equity Incentive Plan ("Plan") allows for the Board of Directors or a designated committee of the Board to grant stock option, restricted stock, restricted stock unit and other equity awards to selected individuals. The nature of awards - including Plan participants, terms, conditions and timing - are at the discretion of the Board or its designated committee, subject to certain limitations specified in the Plan. The maximum number of shares that may be awarded under the Plan is 690,000, subject to proportional adjustments for stock splits, reverse-splits and similar substitutions or reclassifications in capitalization. Additionally, subject to certain limitations in the Plan, awards previously granted that expire unexercised or are forfeited are again available for issuance under the Plan. All equity awards issued pursuant to the Plan are subject to certain restrictions on transferability set forth in Plan, and are also subject to certain claw-back provisions for detrimental activity as set forth and defined in the Plan. The Plan automatically terminates in August, 2028, unless sooner terminated by the Board.

In 2018, the Company issued 84,500 restricted stock units under the Plan, all of which are outstanding but unvested as of December 31, 2018. The restricted stock units cliff vest three years from the date of grant, at which time the shares will be issued. Expense attributable to the Plan for 2018 was \$143,000, with the fair value of the awards determined using the \$10.00 per share price of stock from the 2018 stock offering

At December 31, 2018, there are 605,500 shares available for issuance under the Plan.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

NOTE 17 - FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the balance sheet. The contract amounts of those instruments reflect the extent of involvement the Company has in particular classes of financial instruments.

The Company's exposure to credit loss in the event of non-performance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amounts of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no breach of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's credit-worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary, by the Company upon extension of credit is based on management's credit evaluation of the customer. Collateral held varies, but may include accounts receivable, inventory, property, plant and equipment and real estate.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

The following financial instruments were outstanding at December 31, 2018 whose contract amounts represent risk (in thousands):

Commitments to extend credit	\$ 51,761
Standby letters of credit	 898
	\$ 52,659

At December 31, 2018, the Company has a \$14,000 allowance for credit losses on unfunded loan commitments included as a component of other liabilities. There was no provision for credit losses on unfunded loan commitments in 2018.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

NOTE 18 - REGULATORY MATTERS

Banks and bank holding companies are subject to various regulatory capital requirements administered by state and federal banking agencies. Capital adequacy guidelines, and additionally for banks prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weighting and other factors.

The Basel III Capital Rules became effective for the Bank on January 1, 2015, subject to a phase-in for certain provisions. Quantitative measures established by the Basel III Capital Rules to ensure capital adequacy require the maintenance of minimum amounts and ratios (set forth in the table below) of common equity tier 1 capital, tier 1 capital and total capital (as defined in the regulations) to risk-weighted assets (as defined), and of tier 1 capital to quarterly average assets (as defined).

The Bank's regulatory capital is comprised of the following: 1) Common equity tier 1 capital – consisting of common stock and related paid-in-capital, and retained earnings, less certain disallowed intangible assets and deferred tax assets; 2) Additional tier 1 capital – there are no components of tier 1 capital beyond common equity tier 1 capital; 3) Tier 2 capital - consisting of a permissible portion of the allowance for loan losses; and 4) total capital - the aggregate of all tier 1 and tier 2 capital. In connection with the adoption of the Basel III Capital Rules, the Bank elected to opt-out of the requirement to include most components of accumulated other comprehensive income in common equity tier 1 capital.

When fully phased in on January 1, 2019, the Basel III capital rules will require the Bank to maintain a minimum ratio of common equity tier 1 capital to risk-weighted assets of at least 4.5%, plus a 2.5% "capital conservation buffer" (which is added to the 4.5% common equity tier 1 capital ratio as the buffer is phased in, effectively resulting in a minimum ratio of common equity tier 1 capital to risk-weighted assets of 7% upon full phase in). The Bank will also be required to maintain a tier 1 capital to risk-weighted assets ratio of 6.0% (8.5% including the capital conservation buffer), a total capital to risk-weighted assets ratio of 8.0% (10.5% including the capital conservation buffer), and a tier 1 capital to quarterly average assets ratio of 4.0%.

The aforementioned capital conservation buffer phases in at 0.625% annually over a four-year period beginning January 1, 2016, and is designed to absorb losses during periods of economic stress. Banking institutions with capital ratios above the base minimums but below the effective minimums (which include the buffer) will face constraints on dividends, equity repurchases and compensation based on the amount of the shortfall.

The following table presents actual and required capital ratios as of December 31, 2018 for the Bank under the Basel III Capital Rules. The minimum required capital amounts presented include the minimum required capital levels as of December 31, 2018 based on the phase-in provisions of the Basel III Capital Rules and the minimum required capital levels as of January 1, 2019 when the Basel III Capital rules have been fully phased-in, and include the capital conservation buffer. Capital levels required to be considered well capitalized are based on prompt corrective action regulations, as amended to reflect changes under the Basel III Capital Rules.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Total capital (to risk weighted assets)	\$ 45,255	16.20%	\$ 27,583	9.88%	\$29,328	10.50%	\$27,932	10.00%
Tier 1 capital (to risk weighted assets)	44,827	16.05%	21,996	7.88%	23,742	8.50%	22,345	8.00%
Common equity tier 1 capital								
(to risk weighted assets)	44,827	16.05%	17,806	6.38%	19,552	7.00%	18,156	6.50%
Tier 1 capital (to average assets)	44,827	13.78%	13,010	4.00%	13,010	4.00%	16,262	5.00%

Regulatory authorities can initiate certain mandatory actions if the Bank fails to meet the minimum capital requirements, which could have a direct and material effect on the consolidated financial statements. Management believes, as of December 31, 2018, that the Bank meets all capital adequacy requirements to which it is subject and that the Bank exceeds the minimum levels necessary to be considered "well capitalized."

NOTE 19 – FAIR VALUE MEASUREMENTS

The following is a description of the Company's valuation methodologies for financial assets and liabilities recorded at fair value:

Securities Available for Sale – Debt securities are reported at fair value based upon measurements obtained from an independent pricing service. The fair value measurements for debt securities are determined by quoted market prices, if available (Level 1), or consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, market consensus prepayment speeds, credit information and the bonds' terms and conditions, among other things (Level 2).

Impaired Loans - The Company does not record loans at fair value on a recurring basis. However, from time to time, valuation allowances are recorded on these loans to reflect (1) the current appraised or market-quoted value of the underlying collateral, or (2) the discounted value of expected cash flows. In some cases, the properties for which market quotes or appraised values have been obtained are located in areas where comparable sales data is limited, outdated, or unavailable. Fair value estimates for impaired loans measured for impairment based upon the value of the collateral are obtained from independent appraisers or other third-party consultants, and for other impaired loans are based on discounted cash flow analyses (Level 3).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Real Estate Held for Sale - The Company does not record properties at fair value on a recurring basis. However, from time to time, valuation allowances are recorded on these properties to reflect the current appraised value of the properties. In some cases, the properties for which market quotes or appraised values have been obtained are located in areas where comparable sales data is limited, outdated, or unavailable. Fair value estimates for properties are obtained from independent appraisers or other third-party consultants (Level 3).

The following table provides the hierarchy and fair value for each major category of assets and liabilities recorded at fair value on a recurring basis as of December 31, 2018:

Accrued interest payable	-	93	-	93	93

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

The following summary presents the methodologies and assumptions used to estimate the fair value of the Company's financial instruments. The Company operates as a going concern and, except for investment securities and the trading portfolio, no active market exists for its financial instruments. Much of the information used to determine the fair value is highly subjective and judgmental in nature and, therefore, the results may not be precise. The subjective factors include, among other things, estimates of cash flows, risk characteristics, credit quality and interest rates, all of which are subject to change. Since the fair value is estimated as of the balance sheet date, the amounts that will actually be realized or paid upon settlement or maturity of the various financial instruments could be significantly different.

<u>Cash and Cash Equivalents</u>, Accrued Interest Receivable, Accrued Interest Payable, Federal Funds Purchased, Securities Sold Under Agreements to Repurchase and Other Short-Term Borrowings.

Fair value approximates carrying amount as these are assets held for the short term, or liabilities payable in the short term, likely to be realized or paid at their carrying amount.

Investment Securities Available for Sale

Fair value is provided by a third-party investment accounting provider and considers observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, market consensus prepayment speeds, credit information and the bonds' terms and conditions, among other things.

Nonmarketable Equity Investments

Fair value approximates carrying amount based on the securities' redemption or conversion provisions.

Loans, Net

For fixed rate loans, fair value is estimated by discounting contractual future cash flows using current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. For variable rate loans, fair value is estimated to be carrying amount due to the re-pricing provisions. Loans are presented net of the allowance for loan losses.

Deposits

Fair value for noninterest-bearing accounts and interest-bearing accounts with no stated maturity approximates carrying amount as these deposits are payable on demand and can be re-priced at any time. Fair value of interest-bearing time deposits is estimated by discounting future contractual cash flows using interest rates currently offered for time deposits of similar remaining maturities. Fair value does not incorporate the value of any core deposit intangible that might be recognized by an acquirer if the deposits were to be transferred in a business combination, nor the value of the core deposit intangible recognized as a result of the acquisition of the Bank by IBC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2018

Subordinated Debentures

Fair value is estimated to be carrying amount given the instrument's variable rate provisions and recent repricing in connection with the 2018 acquisition.

Off-Balance-Sheet Instruments

Fair value for off-balance-sheet instruments such as unfunded loan commitments and letters of credit is not estimated because of the difficulty in assessing the likelihood and timing of advances, and management believes that it is not feasible or practical to fairly and accurately disclose a fair value for these instruments.
