## Cautionary Note Regarding Forward-Looking Statements

This disclosure form includes certain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These statements, which involve risks and uncertainties, relate to the discussion of our business strategies and our expectations concerning future operations, margins, profitability, liquidity and capital resources and to analyses and other information that are based on forecasts of future results and estimates of amounts not yet determinable. We use words such as “may”, “will”, “should”, “expects”, “intends”, “plans”, “anticipates”, “believes”, “estimates”, “seeks”, “expects”, “predicts”, “could”, “projects”, “potential” and similar terms and phrases, including references to assumptions, in this form to identify forward-looking statements. These forward-looking statements are made based on expectations and beliefs concerning future events affecting us and are subject to uncertainties, risks and factors relating to our operations and business environments, all of which are difficult to predict and many of which are beyond our control, that could cause our actual results to differ materially from those matters expressed or implied by these forward-looking statements. These risks and other factors are as follows:

- our lack of revenues to date
- recent worldwide and domestic economic trends and financial market conditions could adversely impact our financial performance;
- our potential need for additional capital, which, if not available on acceptable terms or at all, could restrict our future growth and severely limit our operations;
- our brands could fail to achieve more widespread consumer acceptance, which may limit our growth;
- the failure of even a few of our independent wholesale distributors to adequately distribute our products within their territories could harm our sales and result in a decline in our results of operations;
- an impairment in the carrying value of our goodwill or other acquired intangible assets could negatively affect our operating results and shareholders’ equity;
- changes in consumer preferences and trends could adversely affect demand for our products;
- there is substantial competition in our industry and the many factors that may prevent us from competing successfully;

We assume no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons actual results could differ materially from those anticipated in, or implied by, these forward-looking statements, even if new information becomes available in the future.

## **Item 6. – Issuer’s Business, Products and Services.**

### **A. Business Operations**

International Sustainability Group, Inc. (“ISG” or the Company”) is a publicly traded green technology corporation registered in the State of Nevada, having its headquarters in West Chester, Pennsylvania, focusing on commercial scale production and sales of various natural algae species. The Company is building a state of the art commercial scale R&D facility in West Chester, PA to adapt the acquired patented technology to other processes.

Initially ISG specialized in green energy audits, green engineering, design-build and life safety compliance. ISG has entered into the Algae market, by the acquisition of a patented indoor commercialized algae development technology. This technology has been successfully developed and tested to produce commercial large-scale algae in an indoor environment using artificial light in vertical photo-bioreactors (PBR). ISG’s patented, third party validated algae technology enables it to produce algae continuously (24X7) and control the growth environment for optimum yields. In addition, the vertical nature of the PBR’s enables to reduce the land requirement significantly as compared to other technologies such as open pond. Algae products have been used in multiple industries such as nutraceutical, pharmaceutical, animal feed and bio-fuel, presenting a massive growth potential to the Company.

In order to increase revenue (bring revenue faster) ISG decided to enter into negotiations to acquire algae production and distribution facilities including a health product manufacturing facility. ISG has entered in to memorandum of agreements with some of these companies and waiting to complete the due-diligence audit and acquisition process. These facilities are producing revenue and earning a profit.

ISG plans to first address the requirements of premium markets such as nutraceutical and pharmaceutical, and later focus on the bio-fuel market after a significant production capacity expansion.

In order to increase revenue, ISG decided to enter into negotiations to acquire algae production and distribution facilities, including a health product manufacturing facility. ISG has entered into agreements with following companies after completing the due-diligence process. These facilities are currently producing revenue and

earning a profit. The companies are:

- Alimentos Naturales Gopal S.A.C. (located in Peru)
- Productos Naturales Govinda S.A.C (located in Peru)

The Company is not a "Shell Company" within the meaning of Rule 405 of the Securities Act, nor if the Company were a registrant would the Company be considered a shell company within the meaning of Rule 405.

ISG Health, a wholly owned subsidiary of the International Sustainability Group, develops and distributes innovative sports medicine devices and algae-based nutritional products to the health and wellness market, and owns technology that helps consumers manage joint pain, improve mobility and increase strength. ISG Health appointed Jonathan Bender as the subsidiary President and Mathew Ward as the Vice President.

Costs and effects of compliance with federal, state and local environmental laws are minimal.

The Company has 3 employees, is not bound by long-term contracts, and when necessary, the Company relies on the services of independent consultants and contractors to perform various professional services. As our operations increase, we anticipate engaging additional employees; however, we do not plan to add employees until the business is substantially increased, and we have generated adequate funds to support our operations.

Our growing line of algae-based nutritional products are designed to support health through a formulation of nature's minerals, proteins, antioxidants, vitamins and omegas.

These new products are "AlgaeUP™ Energy Bar", "AlgaeUP™ Energy Drink mix" and "AlgaeUP™ supplement capsules." All three have been specially formulated using blue green algae Spirulina as its main ingredient. Each product will allow our customers to achieve optimal health and fitness.

All three new AlgaeUP™ products have a mixture of Spirulina, Vegetarian Glucosamine Sulfate and other natural flavorful ingredients. These ingredients are the building blocks of good health. They are a natural source of energy, mental clarity and other healthy properties. All this while helping to lubricate your joints, improve your vision and provide other heart healing properties to your body.

The company has started building the algae commercial laboratory and pilot plant in 510 Banard St., West Chester, Pennsylvania.

- B. The Company is a Nevada corporation, incorporated in 1990.
- C. The Company's primary SIC code is 191 – General farms, primarily crop.
- D. The Company's fiscal year end date is December 31.
- E. Principal products and their markets – see “A” above.
