#### NOTE 1. DESCRIPTION OF BUSINESS AND ACCOUNTING POLICIES

<u>Description of Business</u> – Itonis, Inc. (formerly Kenshou Inc.) (the "Company" or "Itonis") was incorporated on July 5, 2005 as Kenshou Inc. under the laws of the State of Nevada. On December 2, 2005, the Company changed its name to Itonis Inc.

The Company operates as a holding company and has embarked upon an aggressive plan to acquire high growth entrepreneurial companies that have established or are expected to establish themselves as leaders and successful enterprises in various market niches.

In 2013, the Company relocated its headquarter office to an expanded facility within Orange County, California, in conjunction with its development of its pharmaceutical operations.

<u>Use of Estimates and Assumptions</u> - The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

<u>Basis of Presentation</u> - These financial statements present the balance sheets and the related statements of operations, cash flows and stockholders' deficit of Itonis, Inc.

Fiscal Periods – The Company's fiscal year-end is November 30.

<u>Cash and Cash Equivalents</u> - For the purpose of the statements of cash flows, all highly liquid investments with an original maturity of three months or less are considered to be cash equivalents. The carrying value of these investments approximates fair value.

<u>Inventory</u>- The Company has capitalized \$18,000 in product costs related to Emesyl™. Sales are expected to commence during 2015.

<u>Capitalized License Fees</u>- The Company obtained a license for a mobile payment transfer application from MyECheck, Inc. The \$300,000 cost of the license has been capitalized.

<u>Accounts Payable-Related parties</u>- Amounts have been advanced by related parties to fund the operations of the Company. The advances are non-interest bearing, unsecured, and due on demand.

<u>Derivative liabilities</u> – The Company is contractually obligated to issue 1,200,000 more shares than it currently has issued. The values of these shares were originally recorded at their fair market value to determine the cost basis of the underlying transaction. The share liabilities are revalued at the end of each reporting period and the liabilities are adjusted to reflect current market value. The change in fair value is reflected separately in the Company's Statements of Operations. As of November 30, 2014, the fair value of the obligated shares was \$9,480.

Income Taxes - The Company accounts for its income taxes in accordance with FASB Codification Topic ASC 740-10, "Income Taxes", which requires recognition of deferred tax assets and liabilities for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and tax credit carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

<u>Earnings (loss) Per Share</u> - The Company reports earnings (loss) per share in accordance with FASB Codification Topic ASC 260-10 "Earnings Per Share", Basic earnings (loss) per share is computed by dividing income (loss) available to common shareholders by the weighted average number of common shares available. Diluted earnings (loss) per share is computed similar to basic earnings (loss) per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive. Diluted earnings (loss) per share has not been presented since the effect of the assumed exercise of options and warrants to purchase common shares (common stock equivalents) would have an anti-dilutive effect.

Fair Value of Financial Instruments - Accounting Standards Codification ("ASC") 820, Fair Value Measurements and Disclosures, requires disclosing fair value to the extent practicable for financial instruments that are recognized or unrecognized in the balance sheet. Fair value of financial instruments is the amount at which the instruments could be exchanged in a current transaction between willing parties. The Company considers the carrying amounts of cash, certificates of deposit, accounts receivable, accounts payable, notes payable, related party and other payables, customer deposits, and short term loans to

approximate their fair values because of the short period of time between the origination of such instruments and their expected realization. The Company considers the carrying amount of notes payable to approximate their fair values based on the interest rates of the instruments and the current market rate of interest.

#### Recent Accounting Pronouncements-

The Company has evaluated recent pronouncements through Accounting Standards Updates "ASU" 2015-02 and believes that none of them will have a material impact on the Company's financial position, results of operations or cash flows. The Company has elected to adopt 2014-10 "Development State Enterprises" and eliminated all inception to date reporting.

#### **NOTE 2. GOING CONCERN**

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. As of November 30 2014 the Company has incurred cumulative net losses of over \$14,500,000. Under current operations the Company requires capital for its operational and marketing activities to take place. The Company's ability to raise additional capital through the future issuances of common stock is unknown. The obtainment of additional financing, the successful development of the Company's contemplated plan of operations, and its transition, ultimately, to the attainment of profitable operations are necessary for the Company to continue operations. The ability to successfully resolve these factors raise substantial doubt about the Company's ability to continue as a going concern. These financial statements do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts of and classification of liabilities that might be necessary in the event the company cannot continue in existence.

#### NOTE 3. RELATED PARTY TRANSACTIONS

The provision for income taxes consists of approximately \$800 in State taxes for each of the years ended November 30, 2014 and 2013, respectively.

Deferred tax assets are comprised of the benefits of loss carry forwards for the years ended the November 30, 2014 and 2013 of approximately \$120,000 and

\$107,000, respectively. Losses prior to December 1, 2009 were incurred in different industries and in foreign jurisdictions and their use would be limited to offset federal and state income taxes. These losses would also be limited by the change of control provisions in Section 382 and 383 of the Internal Revenue Code.

Management has concluded that the use of these loss carry forwards would be severely restricted and the effect of these losses is not included in this report.

Deferred taxes arise from temporary differences in the recognition of certain expenses for tax and financial reporting purposes. As of November 30, 2014, the company had significant timing differences for tax reporting purposes for the non-cash recognition of liabilities due for committed shares in excess of authorized shares, shares issued for services, and shares issued for compensation. The expenses related to these liabilities are treated as permanent differences between financial and tax reporting.

At November 30, 2014 and 2013, management determined that realization of these loss carry forward benefits is not assured and has provided a valuation allowance for the entire amount of such benefits,

ASC 740 clarifies the accounting for uncertainty in income taxes and prescribes a recognition threshold, measurement attribute for the financial statement recognition and measurement of a tax position taken, or expected to be taken, in a tax return. Under ASC 740, we are required to recognize in the financial statements the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. ASC 740 also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods and disclosure. Our policy is to record interest and penalties related to unrecognized tax benefits in income tax expense. There were no unrecognized tax benefits recorded as of November 30, 2014 and 2013.
