

KEY CAPITAL CORPORATION

4300 N. Miller Road, Suite 230, Scottsdale, AZ 85251

COMPANY INFORMATION AND DISCLOSURE STATEMENT

Period ending December 31, 2014

As used in this disclosure statement the terms “we”, “us”, “our”, “Key Capital” and the “Company” means, Key Capital Corporation, a Georgia corporation.

1) Name of the issuer and its predecessors (if any)

Current since April 13, 1998:	Key Capital Corporation
April 18, 1996 to April 13, 1998:	Elite Computer Services, Inc.
Before April 18, 1996:	ABCOR Computer Services, Inc.

Key Capital Corporation was incorporated in the State of Georgia on January 26, 1996 as ABCOR Computer Services, Inc. and following a Plan of Merger changed its name to Elite Computer Services Inc. on April 18, 1996. The Company changed its name to Key Capital Corporation on April 13, 1998 and on March 15, 2012 the Company was registered to do business in Arizona.

2) Address of the issuer’s principal executive offices

Company Headquarters

4300 N. Miller Road
Suite 230, Scottsdale, AZ 85251
Tel: +1 480-745-2565
Fax: +1 480-745-2565
Email: info@keycapitalgroup.com
Website: www.keycapitalgroup.com

Website(s): www.keycapitalgroup.com

3) Security Information

Trading Symbol: KCPC
Exact title and class of securities outstanding: Common Shares
CUSIP: 493074207
Par or Stated Value: \$0.001
Total shares authorized: 300,000,000 as of: December 31, 2014
Total shares outstanding: 38,292,334 as of: December 31, 2014

Additional class of securities:

Nil

Transfer Agent

Signature Stock Transfer, Inc.
2632 Coachlight Court
Plano, TX 75093-3850
Phone: (972) 612-4120
Fax: (972) 612-4122

Is the Transfer Agent registered under the Exchange Act?

Yes

List any restrictions on the transfer of security:

Of the Company's issued and outstanding shares totaling 38,292,334 shares, 8,140,500 are unrestricted regular shares, and the balance of the issued and outstanding shares, 30,151,834, are restricted shares.

Describe any trading suspension orders issued by the SEC in the past 12 months.

Nil

List any stock split, stock dividend, recapitalization, merger, acquisition, spin-off, or reorganization either currently anticipated or that occurred within the past 12 months:

Nil

4) Issuance History

Over the past two fiscal years the following shares were issued as a settlement of Convertible Debt, Private Placement pursuant to Section 4(a)(2) Private Placement provision and pursuant to Rule 701 Employee Benefit Plan as per the following in chronological order.

2013 Q1	Section 4(a)(2) Private Placement 15,000 Restricted Shares in consideration of \$3,000
2013 Q2	Section 4(a)(2) Private Placement 320,000 Restricted Shares in consideration of \$80,000
2013 Q3	Section 4(a)(2) Private Placement 11,500,000 Restricted Shares in consideration of \$1,2700,000 and Rule 701 Employee Benefit Plan 104,000 Restricted Shares
2013 Q4	Section 4(a)(2) Private Placement, 330,000 Restricted Shares in consideration of \$32,500 and Rule 701 Employee Benefit Plan 200,000 Restricted Shares
2014 Q1	Rule 701 Employee Benefit Plan 996,000 Restricted Shares and Rule 701 Employee Benefit Plan 150,000 Restricted Shares following exercise of 10 cent options
2014 Q2	Section 4(a)(2) Private Placement, 362,000 Restricted Shares in consideration of \$141,000 and Rule 701 Employee Benefit Plan 133,334 total Restricted Shares
2014 Q3	Section 4(a)(2) Private Placement, 175,000 Restricted Shares in consideration of \$57,485
2014 Q4	Section 4(a)(2) Private Placement, 149,000 Restricted Shares in consideration of \$33,000 and Rule 701 Employee Benefit Plan 2,090,000 total Restricted Shares

- A. Any jurisdictions where the offering was registered or qualified;
 Nil – Not applicable, the Company has not engaged in any offering
- B. The number of shares offered;
 Nil – Not Applicable
- C. The number of shares sold;
 As in A above
- D. The price at which the shares were offered, and the amount actually paid to the issuer;
 As in A above
- E. The trading status of the shares;
 Restricted Shares
- F. Whether the certificates or other documents that evidence the shares contain a legend (1) stating that the shares have not been registered under the Securities Act and (2) setting forth or referring to the restrictions on transferability and sale of the shares under the Securities Act.
 Yes

5) **Financial Statements**

Please note that the 2014 Q4 Statements have been posted to OTC Markets.

6) **Describe the Issuer's Business, Products and Services**

- A. Description of the issuer's business operations;

Key Capital is building accretive streaming interests in mined commodities and energy production. Through provision of structured third party loan financing of mining and energy production projects Key Capital retains life-of-mine interests in the production of mines containing gold, silver, or base metals, or in energy products.

In the natural resource industry, mining companies are typically funded through various traditional institutional resource financing sources. A number of operations have been funded, particularly the past ten years, through alternative structured financing by companies established to provide capital through streaming royalty or alternative structured funding.

However, while the larger mine operators continue to have numerous avenues for funding, mid-market mining and energy companies have far fewer funding options. Having identified this void, Key Capital seeks to work with these mid-market companies through the acquisition of an interest in their mine or energy production negotiated on a case-by-case basis. Key Capital then arranges the securitized financing required to enable commencement or expansion of commercial production.

The Company's approach to resource industry project funding is based upon a hybrid version of metals streaming, also referred to as volumetric production payments (VPPs) or metal purchase agreements. Metal streaming was pioneered in its current form by Silver Wheaton in 2004 and is a financing arrangement whereby a company offers a sum of capital and/or shares upfront, often prior to the construction of mine infrastructure, in exchange for a mine life interest in production once that mine enters production.

Key Capital employs a hybrid case-by-case approach through alternative structured mine production financing arrangements that secure a life of mine streaming interest in all commodity production. This approach can provide

mid-market mining and energy production companies the opportunity to achieve early production, despite the unknown future value of any additional reserves beyond those technically established as feasibly minable or producing at the time of financing.

Key Capital structured finance or metal streaming agreements are an accretive financing tool that can enable resource owners to reduce dilution and accelerate production, while still retaining full control of their projects. Key Capital seeks interests in metals and mineral production through these agreements.

Key Capital has entered into agreement with Red Rock Assets LLC, a related party, pursuant to which Red Rock Assets intends to raise project funding for Key Capital originated resource and energy projects. In this regard, Red Rock Assets is introducing an innovative high-yield product to the fixed interest market. The Company currently has six resource and energy industry projects that it has entered into financing agreements with conditional upon continued due diligence.

The Company to date has spent considerable time and resources on developing its structured financing and streaming business. While the Company expects future clients to cover certain development costs on a project-by-project basis, to date the Company has carried all costs, none of which are borne directly by customers.

The financing of operational infrastructure of mining operations is competitive, yet for mid-market mining companies there is an identified niche where many such companies experience difficulty securing project financing, especially in the current market conditions.

Since the financing agreements are based on projected commodity output, the upside for Key Capital is potentially large if actual commodity production were to exceed the projected output or the market price of the respective commodities were to rise. The structured commercial production financing enables both Key Capital and its mid-market partners to leverage capital to achieve their respective goals and potentially deliver strong ROIs.

Competitive position analysis:

Strengths – Internal

- Proven business model
- Passion and vision
- Industry experience and expertise
- Product innovation
- Industry contacts – finance and mining
- Timely product offering
- Product advantages
- Major potential client base
- Website marketing strategy
- Experienced management team
- Diversified distribution strategy

Strengths – External

- Mining is a high value, high growth global industry
- All mining companies seek financing, especially mid-market miners
- Streaming is a relatively new financing application for miners
- Limited competition for streaming in the mid-market mining sector
- Potential for rapid brand recognition
- Early transactions under discussion

Weaknesses

- The Company's business is newly established
- First transactions still in process
- Limited funding for corporate expansion

- Small company in a large global market

Opportunities

- Funding availability through institutional lenders
- Internal expertise to assist junior miners in funding applications
- Structured financing and streaming for smaller miners is largely untapped
- Global markets opportunity
- Large numbers of small mine operators – many opportunities
- All miners require financing
- Able to offer non-equity financing
- Able to offer hybrid financing structures

Threats

- Downturn in mining industry
- Global economic deterioration
- Downturn in commodity prices

Methods of Competition

Marketing Strategy

The Company's marketing strategy is designed to capitalize on an identified niche in the resource funding market sector – to provide alternative structured financing to an identified target market, the mid-market operators seeking funding to bring their mine projects into production.

There are many of these mid-market mine operators actively seeking project funding and the Company's strategy is to capitalize on this identified demand.

The Company has already entered into a number of conditional project funding agreements and is in discussion with other mining and energy companies regarding potential funding relationships. The Company plans to expand its sales activities over the current year through appointed representatives and our website and by attending leading international mining sector annual trade shows.

Deal Strategy

The Company seeks to arrange structured financing for mid-market mine operators who are in the early stages of development but who have proven the commercial viability of their respective resource projects. By working with mine operators at an early stage of development the Company is able to arrange structured or hybrid financing options to enable client mine properties to begin production. In consideration for arranging the financing the Company will receive a 35% to 50% interest in each client's mine production for the life of the respective mine. The Company's innovative structured financing or streaming agreements offer the Company the potential to realize substantial ongoing profits. The Company plans to secure its structured or streaming agreements by leveraging its involvement in a planned alternative resource industry financing business and through institutional funding interests on a deal-by-deal basis.

Although streaming is a relatively new funding process for mining projects, the companies that have established stream financing over the past eight years have been exceptionally successful. However, these companies, in general terms, are either limited in their ability to take on many projects or are seeking only much larger projects than our Company is initially targeting.

We are aiming to establish an industry presence and brand name through direct initiatives and through our website in order to attract inquiry from the many mid-market mine operators seeking project funding.

Plan of Operation for the next twelve months

The Company's structured financing and streaming business has been well received by the mid-market sector mining and energy companies, particularly those with which the Company has entered into conditional agreements with and with those that it is currently discussing structured funding options with.

The Company has identified a niche market within the mid-market mining and energy sectors of the resources market where these companies as they progress their mine or energy project viability studies are actively seeking project funding for their imminent production-phase infrastructure and plant funding. The Company's approach to offering the arrangement of project funding to this mid-market sector in return for a life of mine interest in production (streaming) has been very well received and the market need for such financings of sub-\$150 million each is global and extensive.

The Company has the corporate, financial, and analytical expertise to assist potential client companies in the preparation of their funding submissions and further has assembled a team of resource industry specialists that can assist the facilitation of funding applications and viability studies that are required in order for such financings to proceed.

The Company expects its agreement with Red Rock Assets LLC to become a significant factor in the funding of its resource and energy project funding opportunities. In this regard, the Company has been approached by a number of major institutional interests expressing interest in participation in the structured financing high yield product.

The Company will also actively solicit its mine project funding opportunities directly and through its appointed representatives as well as through its website, which will be used to create brand awareness.

The Company believes its approach to the funding of junior mining projects is unique in the industry and has substantiated this through test marketing to the target market projects.

B. Date and State (or Jurisdiction) of Incorporation:

Key Capital Corporation was first incorporated in the State of Georgia on January 26, 1996 as ABCOR Computer Services, Inc. and following Agreement and Plan of Merger changed its name to Elite Computer Services Inc. on April 18, 1996. The Company changed its name to Key Capital Corporation on April 13, 1998, and on March 15, 2012 the Company was registered to do business in Arizona.

C. Issuer's primary and secondary SIC Codes;

The Primary SIC Code is 1040 – Gold and Silver Ores

The Secondary SIC Code is 6795 – Mineral Royalty Traders

D. Issuer's fiscal year end date;

December 31st

E. Principal products or services, and their markets;

The Company offers the arrangement of plant and infrastructure financing on a structured financing and/or streaming basis to mining and energy projects globally that are able to progress to commercial production. There is a significant market opportunity for the Company to provide these financing facilities to the many mid-market mining companies that have advanced their exploration or operations to proven resources or are have completed at least one of the feasibility study stages: either order of magnitude (1st stage), preliminary feasibility (2nd stage), or detailed feasibility (3rd stage).

The Company has established its presence through its website, the relationships of its officers, and through agents

that seek globally to secure introduction to the Company's leveraged financing opportunity.

7) Describe the Issuer's Facilities

The Company has established its operational headquarters in Scottsdale, Arizona and operates from shared offices that the Company currently occupies on a casual basis.

8) Officers, Directors, and Control Persons

A. Names of Officers, Directors, and Control Persons.

Directors:

President, Chief Executive Officer and Director – Christopher Nichols

Chris Nichols is a seasoned executive with over 15 years of leadership experience and manages the Company's operations. He has been the Vice President, Internet Services, for Key Capital since 2001 and was appointed to the Board in January 2012 as the Company's President/CEO. Mr. Nichols has provided innovative ideas and solutions to various industries, including early involvement in digital film and television production, as well as in trusted computing and Internet security where he was responsible for the development of a number of major security initiatives. His strengths in team management, business development, and administration provide for solid management of the Company's undertakings. Mr. Nichols is a graduate of Lewis & Clark College.

Chief Financial Officer, Director – Matthew Talbot

Matthew Talbot, is a CPA and finance professional responsible for the financial due diligence and project viability studies of the Company's project funding candidates and, following funding, financial performance monitoring. Matt started his career in complex audits with PricewaterhouseCoopers. He then spent five years at American Capital (NASDAQ:ACAS), which currently has around \$118 billion under management. At American Capital Strategies Ltd he managed a small team responsible for pre-investment due diligence, post-investment monitoring, in-depth analysis of under-performing companies, and quarterly valuation of portfolio companies. This team identified and analyzed opportunities for investment consideration and subsequently oversaw investment performance of investee companies. He then accepted a position in Financial Planning and Analysis for gategroup a Swiss-based listed company with 27,000 employees providing passenger services to the airline industry globally. Mr. Talbot is a Certified Public Accountant (Virginia). He studied accounting at the University of Florida and holds a Bachelor of Science and Accounting. He has strong management skills and excels in project and quantitative analysis, budgets & forecasts, and mergers & acquisitions.

Director – Mining Geology & Engineering - Donald Benard

Don Benard B.Sc., P.Eng., MAusIMM is the Company's lead geologist and mining engineer, having extensive resource industry experience and expertise in catastrophic risk management and modeling. His professional operational & mining experience extends over 25 years at numerous mines, including Corona's Jolu & Decade gold mines, Cogema's Cluff & Baker Lakes Uranium Mines and prospects, Cameco's Key Lake Uranium mine, all but one of Potash Corp's mines, and IMCC's K2 potash mine. At these mines, Mr. Bénard gained experience in a wide array of mining, with principal responsibilities for modeling, reserve & resource calculations, reconciliation, daily mill grade requirements and estimation, drilling programs, development of satellite mines, surface and underground exploration programs, budgeting, projections, and strategic planning.

Mr. Bénard was Chief Mine Geologist for Claude Resources, bringing the Seabee Gold Mine Project into successful production. Although Seabee entered production with a projection of only four years of reserves, Mr. Bénard was instrumental in creating Seabee's legacy as the longest running and most prolific gold mine in Saskatchewan's history. Mr. Bénard has many years of project & mine evaluation experience, particularly in China, Canada, USA, Mexico, the Middle East, and the Asia Pacific region. Mr. Bénard's expertise and experience in resource industry

regulatory and compliance disciplines includes the commodities Magnetite, Silver, Copper, Zinc, Gold, Phosphate, Bauxite and the industrial minerals Kaolin and Magnesite.

Mr. Bénard's various consulting and management appointments recently include appointments as Chief Geologist for Morningstar Gold Ltd (Australia) from February 2012 to July 2012, Non-Executive Chairman for Consolidated Iron Sands Limited (Australia) from 2008 to October 2013, Non-Executive Chairman for Luzon Iron Development Group Corporation (Philippines) from April 2011 to October 2013, Mineral Resource Manager – Precious Metals SBU for Saudi Arabian Mining Company (Ma'aden) (Saudi Arabia) for two years to March 2014, and Geology Director for the Bissa Gold mine for Nord Gold N.V. (Burkina Faso) from March to July 2014.

Control Persons:
